It has been determined that the Regulatory Flexibility Act is not applicable to this notice since there is no requirement that the Commodity Credit Corporation (CCC) publish a notice of proposed rulemaking in accordance with 5 U.S.C. 553 or any other provision of law with respect to the subject matter of this notice.

It has been determined by an environmental evaluation that this action will have no significant impact on the quality of the human environment. Therefore, neither an environmental assessment nor an Environmental Impact Statement is needed.

This program/activity is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published by 48 FR 29115 (June 24, 1983).

The title and number of the Federal assistance program that this notice applies to are: National Wool Act Payments, 10.059, as found in the Catalog of Federal Domestic Assistance.

Section 703(a) of the National Wool Act of 1954, as amended ("Wool Act"), provides that the Secretary of Agriculture shall support the prices of wool and mohair to producers by means of loans, purchases, payments or other operations. It has been determined that the prices of wool and mohair will be supported for the 1986 to 1990 marketing years by means of payments to producers.

Section 703(b) of the Wool Act provides that the level of support for shorn wool for each of the marketing years 1982 through 1990 shall be 77.5 percent of an amount which is determined by multiplying 62 cents (the support price in 1965) by the ratio of: (1) The average parity index (the index of prices paid by farmers, including commodities and services, interest, taxes, and farm wage rates) for the three calendar years immediately preceding the calendar year in which such support price is being determined and announced to (2) the average parity index for the three calendar years 1958, 1959, and 1960, rounding the result to the nearest full cent. Based on current reported parity indices the calculation for the 1986 shorn wool support price (grease basis) is as follows:

(1) Average parity index, calendar years 1982–1984	1103.0
(2) Average parity index, calendar years 1958–1960	297.3
(3) Ratio of 1103.0 to 297.3	3.7101
(4) 3.7101 x 62 cents per pound (1965 support price)	$2.3003
(5) 77.5% x 2.3003	$1.7827
(6) 1.7827 rounded to nearest full cent	$1.78

Section 703(c) of the Wool Act provides that the support prices for pulled wool and for mohair shall be established at such levels, in relationship to the support price for shorn wool, as the Secretary of

Agriculture determines will maintain normal marketing practices for pulled wool, and as the Secretary determines is necessary to maintain approximately the same percentage of parity for mohair as for shorn wool. Section 703(c) further provides that the support price for mohair must be within a range of 15 per centum above or below the comparable percentage of parity at which shorn wool is supported.

The Wool Act provides that the Secretary shall establish and announce, to the extent practicable, support price levels for wool and mohair sufficiently in advance of each marketing year, as will permit producers to plan their production for such marketing year. Accordingly, the following method for calculating the support prices for pulled wool and mohair for the 1986 marketing year are being proposed.

Proposed Determinations

A. *Support Price-Pulled Wool.* The support price for pulled wool for the 1986 marketing year cannot be determined until the 1986 average market price for shorn wool is calculated, which should occur by April 1987. It is proposed that the method for calculating the support price for pulled wool shall be as follows. Once the average market price for shorn wool is known, the support price for pullled wool will be determined by subtracting the 1986 average market price for shorn wool from the 1986 support prices of shorn wool and multiplying that number by 5 pounds (the amount of wool pulled from the pelt of an average 100-pound unshorn lamb). The result is then multiplied by 80 percent which is a quality adjustment factor which recognizes that unshorn lamb pelts contain a shorter staple and a lower quality wool than wool shorn from other sheep.

B. *Support Price-Mohair.* It is proposed that the support price for mohair for the 1986 marketing year shall be determined based on the October 1985 parity prices for mohair and shorn wool. The following percentages are being considered in the final computation of the mohair support price:

(1) 85 pecent of the percent of parity at which shorn wool is supported.

(2) A percentage equal to the percent of parity at which shorn wool is supported.

(3) 115 percent of the percent of partity at which shorn wool is supported.

Interested persons are encouraged to comment on the proposed method of calculation for payments on pulled wool and the proposed level of price support for mohair. Consideration will be given to any data, views and recommendations which are submitted with respect to the above items.

Authority: Secs. 4 and 5, 62 Stat. 1070, as amended (15 U.S.C. 714b and c); secs. 702–708, 68 Stat. 910–912, as amended (7 U.S.C. 1781–1787).

Signed at Washington, DC, on May 9, 1986.

Milton J. Hertz,

Acting Executive Vice President, Commodity Credit Corporation.

BILLING CODE 3410-05-M

Forest Service

Intent To Amend the Routt, Pike and San Isabel; and Arapaho and Roosevelt National Forest Land and Resource Management Plans; Jefferson, Douglas, Park, Grand, Summit, Gilpin and Boulder Counties, CO

On February 12, 1985, the Rocky Mountain Region, Forest Service, U.S. Department of Agriculture, published a notice "Update of the Status of Participation in the Systemwide Site-Specific Metropolitan Denver Water Supply Environmental Impact Statements" (Vol. 50, No. 29, Page 5804). In that notice the Forest Service indicated that projects discussed in the Systemwide Site-Specific Environmental Impact Statement had the potential to affect the land use allocations of four National Forest Land and Resource Management Plans (Forest Plans). The National Forest administrative units identified in the February notice were the Arapaho and Roosevelt, the Pike and San Isable, the Routt, and the White River National Forests.

The notice also said that the sponsors expected to identify the projects which will have to be built in the near-term (10 to 15 years) and apply for the necessary land use authorizations and permits in October 1985. Additionally, if the projects identified did have the potential to affect Forest Plans, the Forest Service was to publish a Notice of Intent to prepare an Environmental Impact Statement to Amend the Forest Plans.

On March 4, 1986, the Forest Service received from the Denver Board of Water Commissioners an application for the construction and operation of the Two Forks Dam and Reservoir. Preliminary analysis shows that there may be a need to amend the Pike and San Isabel National Forest Plan to accommodate the proposed project. Additionally, operation of the proposed project or some of its alternatives may affect the operation of other elements of Denver's water collection system located on other National Forests. As a result there may be impacts on the Arapaho and Roosevelt and Routt National Forests that may require a Forest Plan amendment. The proposed project would inundate 5,250 acres of the Pike and San Isabel National Forests and potentially affect five different management area prescriptions under the current Forest Plan. Lesser National Forest acreages are inundated by alternatives to the proposed project, but some National Forest System land is required for each project alternative.

On April 10, 1986, the Denver Board of Water Commissioners applied to the Forest Service for approval to occupy National Forest System land within the Arapaho National Forest for the construction and operation of the extension and enlargement of the Williams Fork Diversion Project. The proposed project is located in a portion of the Arapaho National Forest that is administered by the Routt National Forest, and the lands are covered by the Routt's Land and Resource Management Plan. Preliminary analysis shows that there may be a need to amend the Routt National Forest Plan to accommodate the proposed project. Approval and construction of the proposed project or its alternative may also affect the operation of other elements of Denver's water collection system located on the Arapaho and Roosevelt National Forests, so the need for a Forest Plan amendment will also be evaluated for that Forest.

The Corps of Engineers (COE) is the lead agency in preparing the Environmental Impact Statement which will contain details sufficient to make the Forest Plan amendment decisions as well as land use authorization decisions. On April 9, 1982, the COE published a Notice of Intent to Prepare an Environmental Impact Statement in the **Federal Register** (Vol. 47, No. 69, Page 15405). In that notice the Forest Service was identified as a cooperating agency under the National Environmental Policy Act. The notice contained the schedule of scoping meetings.

Subsequent to analysis the scope of the EIS changed to emphasize site-specific projects and the COE published a second Notice of Intent to prepare an EIS in the **Federal Register** on April 9, 1984 (Vol. 49, No. 77 page 15800). The public was again asked to comment and to help define the scope of the issues to be analyzed in the EIS.

In addition to the two COE notices and requests for comments and the scoping meeting which were held, the Forest Service requested comments on the projects in their February 1985

notice referred to above. No additional scoping meetings have been scheduled, however, written comments and concerns may be sent to the Regional Forester, USDA Forest Service, P.O. Box 25127, Lakewood, CO 80225.

There will be a public comment period after the Draft EIS is released for public review and prior to preparation of the Final EIS. Public meetings will be conducted by the COE and the Forest Service to receive public input on the Draft EIS. These meetings will be held in the metropolitan Denver area as well as locations on Colorado's west slope and will be publicized through local news media.

S. H. Hanks,

Deputy Regional Forester.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Availability of an Environmental Impact Statement for Geothermal Leasing; Lassen National Forest, CA

The Department of Agriculture, Forest Service, and Department of the Interior, Bureau of Land Management, has jointly prepared an environmental impact statement for proposed geothermal leasing on part of the Lassen National Forest. The land area involved covers 206,500 acres including the 56,750 acres within the Lassen Known Geothermal Resource Area (KGRA), south of Lassen Volcanic National Park.

Five alternatives have been considered, ranging from no leasing, to leasing with standard and various additional stipulations for protection of surface an subsurface resources.

Public involvement highlighted the following four issues that were addressed in two different development scenarios, 75MW & 300MW: (1) Impacts to geothermal features of Lassen Volcanic National Park and adjacent private lands; (2) impacts to wilderness areas, the Pacific Crest Trail, private land, and Lassen Volcanic National Park; (3) impacts to air, suface water, ground water, fish, wildlife, recreation, visual resources, cultural resource, sound levels, timber, range, sensitive plants, and other vegetation (4) the types and degree of geothermal activities permitted, their potential effects, and protective measures to mitigate those effects. Such activities include: Use of heavy equipment, road construction, truck traffic, buildings, dust emissions, well drilling, steam and gas discharge, fluid and solid waste discharge, and well abandonment.

The preferred alternative recommends the leasing of only National Forest lands within noncompetitive application areas north of LVNP in which rocks derived from the Lassen Volcanic center do not occur. These areas would be leased with standard lease terms and special stipulations. The rest of the study area including the KGRA is recommended to not be leased.

Comments on the draft environmental impact statement are being solicited from public agencies and interested individuals and organizations.

Copies of the Draft EIS are available for review at the public libraries in Lassen, Plumas, Shasta and Tehama Counties, as well as Lassen National Forest, Supervisor's Office, 55 S. Sacramento, Susanville, CA and Susanville District Office, Bureau of Land Management, 705 Hall Street, Susanville, CA.

A limited number of single copies of the statement can be obtained by contacting the Forest Supervisor, Lassen National Forest or the District Manager, BLM-Susanville District.

DATE: The public comment period is open for 45 days from the date EPA published their Availability Notice, May 2, 1986. The comment period closes June 16, 1986.

Written comments should be sent to Mr. Richard A. Henry, Forest Supervisor, Lassen National Forest, 55 South Sacramento Street, Susanville, California 96130, phone (916) 275-2151; or to Mr. C. Rex Cleary, District Manager, Bureau of Land Management, 705 Hall Street, Susanville, California 96130, phone (916) 257-5381.

FOR FURTHER INFORMATION CONTACT: Jim Saake, Lassen National Forest, (916) 257-2151 or John Bosworth, BLM-Susanville District, (916) 275-5381.

Dated: May 8, 1986.

DEPARTMENT OF AGRICULTURE

Soil Conservation Service

Aquidneck Island Watershed, RI; Finding of No Significant Environmental Impact

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Aquidneck Island Watershed, Newport County, Rhode Island.

FOR FURTHER INFORMATION CONTACT: Richard N. Duncan, State Conservationist, Soil Conservation Service, Alderic Complex, 46 Quaker Lane, West Warwick, Rhode Island, 02893-2120, telephone (401) 828-1300.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Richard N. Duncan, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The project concerns a plan for watershed protection. The planned works of improvement include land treatment on cropland consisting of enduring practices (terraces), management practices (contour farming), and one agricultural waste storage facility.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State and local agencies, and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Richard N. Duncan.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the Federal Register.

Dated: May 7, 1986.

(Catalog of Federal Domestic Assistance Program No. 10-904, Watershed Protection and Flood Prevention Program. Office of Management and Budget Circular A-95 regarding State and local clearinghouse review of Federal and federally assisted programs and projects is applicable.)

Richard N. Duncan,

State Conservationist.

Jumper Creek Watershed, FL; Intent to Deauthorize Federal Funding

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of intent to deauthorize federal funding.

SUMMARY: Pursuant to the Watershed Protection and Flood Prevention Act, Pub. L. 83-566, and the Soil Conservation Service Guidelines (7 CFR 622), the Soil Conservation Service gives notice of the intent to deauthorize Federal funding for the Jumper Creek Watershed project, Sumter County, Florida.

FOR FURTHER INFORMATION CONTACT: James W. Mitchell, State Conservationist, Soil Conservation Service, 401 SE First Avenue, Room 248, Gainesville, Florida 32601 telephone (904) 377-0940.

Jumper Creek Watershed, Florida; Notice of Intent to Deauthorize Federal Funding

SUPPLEMENTARY INFORMATION: A determination has been made by James W. Mitchell that the proposed works of improvement for the Jumper Creek project will not be installed. The sponsoring local organizations have concurred in this determination and agree that Federal funding should be deauthorized for the project. Information regarding this determination may be obtained from James W. Mitchell, State Conservationist, at the above address and telephone number.

No administrative action on implementation of the proposed deauthorization will be taken until 60 days after the date of this publication in the Federal Register.

James W. Mitchell,

State Conservationist.

ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

Advisory Standard for Chairs Used Primarily for Enplaning and Deplaning Physically Disabled Passengers

AGENCY: Architectural and Transportation Barriers Compliance Board.

ACTION: Invitation for public comment on proposed advisory standard.

SUMMARY: Aircraft boarding chairs, wheelchair-like devices used to transport disabled passengers onto airplanes, have been cited for safety and other problems. Responding to a survey distributed through the Federal Register, (49 FR 36210, September 14, 1984), passengers using aircraft boarding chairs reported complaints regarding safety, comfort, independent mobility, and personal dignity. In response to these problems and complaints, the Architectural and Transportation Barriers Compliance Board (ATBCB) sponsored a research effort to examine aircraft boarding chairs. The objective of the research effort was to develop a non-binding federal advisory standard aimed at improving aircraft boarding chair design and use.

ATBCB retained the services of a human factors engineering consulting firm to perform the research effort and develop this advisory standard. A human factors team, which included human factors engineer and both a physician and physical therapist specializing in wheelchair design and prescription, analyzed existing aircraft boarding chairs in both their static state and during use. This approach permitted a comprehensive evaluation of the physical features of aircraft boarding chairs and the "human-machine" interactions. A Draft Advisory Standard was reviewed by industry experts, boarding chair designers, airline personnel, airport operators and aircraft boarding chair users.

This publication of a proposed advisory standard incorporates the reviewers' comments on the draft. It contains a thorough overview of the development effort as well as background information which should facilitate advisory standard implementation. The body of this advisory standard contains detailed guidance for boarding chair design and use as well as training. Technical assistance on this and related issues is available through the ATBCB.

DATE: To be assured of consideration, comments must be in writing and must be postmarked on or before July 14, 1986.

ADDRESS: Comments should be sent to: Docket Trans-1-86, U.S. Architectural and Transportation Barriers Compliance Board, 330 C Street, SW., Room 1010, Switzer Building, Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: For information on techical issues concerning this standard, contact Mr. Dennis Cannon, Office of Technical Services, (202) 472-2700 (Voice or TDD). Legal questions should be addressed to Ms. Debra Fischer, Deputy General Counsel (202) 245-1801 (Voice or TDD). These are not toll free numbers. Copies of this notice are also available on tape for visually impaired persons.

I. The Purpose of the Advisory Standard

This advisory standard is intended to promote improvements in the accessibility of facilities and services to disabled people. As described in Section II, this particular advisory standard is part of a larger effort by the ATBCB to eliminate architectural and transportation barriers encountered by disabled people. The ATBCB's mechanism for accomplishing this goal is the implementation of an advisory standard on the design and use of aircraft boarding chairs.

1. What Is an Advisory Standard?

An advisory standard is non-binding and considered guidance only. An advisory standard can, at a later point, be enforced but this would require action by federal agencies (other than the ATBCB) who have rulemaking and enforcement authority. The initial approach of developing and implementing an advisory standard,

rather than a binding one, is an effective way to introduce guidance in cooperative manner, working together with industry, user, and governmental entities to improve conditions.

2. Why Was This Advisory Standard Established?

This advisory standard was established to promote and facilitate improvements in aircraft boarding chair design and use. The need for the advisory standard arises from persistent safety problems and complaints regarding aircraft boarding chairs. The advisory standard provides a range of guidance that is intended to help eliminate problems encountered by disabled passengers and airline attendants.

The advisory standard development effort is the result of several years' work in the aircraft boarding chair area. Over several years, representatives of the government, airlines, airport operators, aircraft boarding chair manufacturers and wheelchair users have organized and worked together in an effort to identify problem areas and make efforts to improve aircraft boarding chair design and use.

Many of the reported problems have been attributed to physical design problems. However, some problems have been the result of improper use of the devices, a result of inadequate or improper training. The advisory standard addresses both of these problem causes.

3. Who Should Use This Advisory Standard?

The major advisory standard end-users are expected to be aircraft boarding chair designers, airlines, aircraft designers, general public disabled passengers, and insurance companies.

Use by Aircraft Boarding Chair Designers

Aircraft boarding chair designers can benefit from the advisory standard through the comprehensive design guidance. It can be utilized as the basis for detailed design criteria or specifications when the designer develops a new design or enchances an existing one or to develop product specifications and evaluation checklists. The advisory standard is written in a manner that recognizes an aircraft boarding chair design as an optimization problem that requires tradeoff analysis. Guidance is performance-oriented rather than prescriptive to allow for creative, trade-off solutions. The advisory standard provides data on desirable design features based on user testing and preferences to which the designer may not otherwise have access. Aircraft boarding chair designers and manufacturers should apply the guidance provided in the advisory standard since the airlines (the customer) may be encouraged by the government and, potentially, by insurance companies to specify and purchase aircraft boarding chairs that conform to the guidance.

Use by the Airlines

Airlines may use the advisory standard to select the best aircraft boarding chair for purchase. The advisory standard identifies performance requirements for aircraft boarding chairs that the purchaser should look for in devices on the market and identifies how a specific feature should operate or be designed to satisfy passenger and attendant needs. The advisory standard can be used as the basis for purchase specification. It can also be used to make improvement in areas such as aircraft boarding chair maintenance and airline attendant training. Airlines may use the advisory standard initially to evaluate the aircraft boarding chairs they are currently using and determine if there is a need to replace them with improved products. The guidelines may also be useful when designing training courses.

Use by Aircraft Designers

Aircraft designers, including those who design the airframe, cabin layouts, and seating may use the advisory standard in an effort to accommodate the needs of disabled passengers who need wheelchair or boarding chair access. Ideally, all commercial aircraft, including small, commuter aircraft, should permit wheelchair or boarding chair access to all seat locations. Cabin doorways and aisles should be designed to allow wheelchair or boarding chair maneuverability and effective passenger transfers. Basic anthropometric and boarding chair dimensional data contained in this advisory standard should assist aircraft designers in achieving these goals.

Use by the General Public/Disabled Passengers

Disabled passengers may use the advisory standard as a technical resource to explain to airlines the need for safe and efective boarding chairs.

Use by Insurance Companies

Insurance companies that underwrite airline passenger services may consider requiring that the airlines use boarding chairs that conform to the advisory standard in order to obtain insurance coverage. This would ensure that airlines utilize the safest boarding chairs available. This could reduce the airlines' vulnerability to claims resulting from accidents involving boarding chairs.

4. What is the Scope of this Advisory Standard?

The advisory standard applies specifically to aircraft boarding chairs. It is not intended to be applied directly to devices used for functions other than aircraft boarding, such as on-board chairs used for in-flight mobility or wheelchairs used for mobility within the airport terminal. However, if a product such as an on-board chair is used for the purpose of aircraft boarding, the advisory standard is applicable.

The scope of the guidance provided in this advisory standard is broad enough to account for the many types of aircraft boarding chairs currently in use. The broad scope also supports the objective of sustaining or increasing the number of aircraft boarding chair manufacturers. The advisory standard is not intended to restrict design freedom. The performance-based guidelines are designed to eliminate safety hazards while permitting different and creative solutions to the engineering problems.

Not all of the guidance provided will or can be applied to a single type of aircraft boarding chair design. This is due to the fact that aircraft boarding chairs have competing design requirements such as maximum adjustability and mechanical simplicity. It is considered the responsibility of the advisory standard user to interpret the guidelines and determine where specific guidelines apply. Technical assistance to supplement the advisory standard and provide guidance for advisory standard interpretation and implementation will be available through the ATBCB.

5. How is the Advisory Standard Organized?

This advisory standard with preamble is divided into seven sections. Sections I–II of the preamble's supplementary information provide background information regarding the functions of the advisory standard and the topic of architectural barriers and aircraft boarding chairs. Section III identifies particular questions on which public comment is invited. The Advisory Standard itself is in four parts. Part 1 provides a list of key terms. Part 2 defines the physical characteristics of the users, both the passenger and attendant, and the environment in which the boarding chairs are used. The remainder of the standard, Parts 3 and 4,

consists of guidelines for boarding chair design. Appendix A provides the adopted ISO test procedures. Appendix B contains guidelines on personnel training and defines who should be trained, how often training should be conducted, and the extent of training needed.

II. Project Background

1. The need for an Advisory Standard

There is a continuing need to provide disabled people with equal access to places and services. With improved recognition of the rights of disabled people, many public works and services have been modified to provide access. However, modifications have not included provisions for complete, unhindered access to aircraft. While many airport terminals now provide accessible restrooms, electric doors and ramps, aircraft manufacturers have not widened the airplane aisle to allow standard wheelchair access.

Because a standard wheelchair will not fit down the airplane aisle (17" wide), it is necessary that some other device be used for boarding and deplaning disabled passengers. It would seem that wheelchair manufacturers solved the problem already by designing aircraft boarding chairs (examples of existing boarding chairs are shown in Figure II–1). However, aircraft boarding chairs do not fulfill all of the needs of the passengers and attendants. Reports of accidents and near-accidents involving existing aircraft boarding chairs have indicated that improvements in aircraft boarding chair design are needed. An advisory standard that provides for the basic needs of aircraft boarding chair users is essential in eradicating existing architectural barriers for disabled persons in air transportation.

BILLING CODE 6820-RP-M

VOL 51 ISS 94 MY 15 1986 UMI

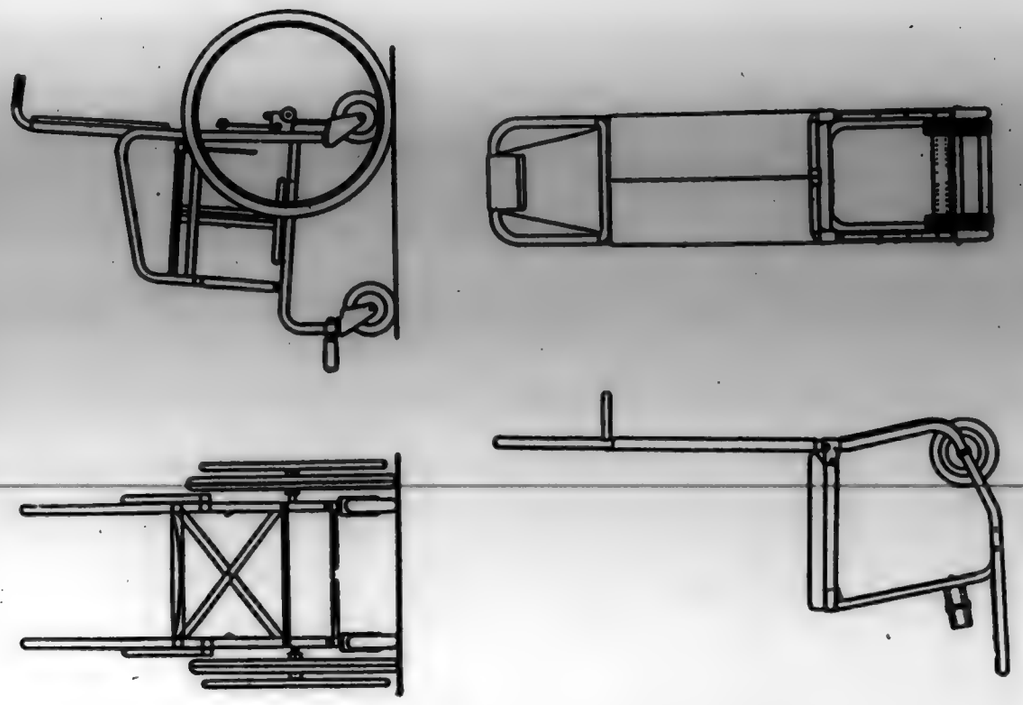

Figure II-1. Sample Existing Boarding Chairs

2. The Role of ATBCB

Under section 502 of the Rehabilitation Act of 1973, as amended, the Architectural and Transportation Barriers Compliance Board (ATBCB) is vested with various functions relating to transportation barriers confronting persons with disabilities (29 U.S.C. 792). First, the Board is directed to investigate and examine alternative approaches to eliminating transportation barriers, particularly with respect to public transportation (including air, water, and surface transportation whether interstate, foreign, intrastate, or local), and to determine what measures are being taken by Federal, State, and local governments and public and private agencies to eliminate such barriers. (id at 792(b) (2) and (3)).

The Board is also required to "prepare plans and proposals for . . . actions as may be necessary to the goals of adequate transportation . . . for handicapped individuals, including proposals for bringing together in cooperative effort, agencies, organizations, and groups working toward such goals of whose cooperation is essential to effective and comprehensive action" (id. at 792(c)(3)).

The Rehabilitation, Comprehensive Services, and Developmental Disabilities Amendments of 1978 (Pub. L. 95–502) amended section 502 to provide the ATBCB with new functions regarding transportation barriers. Under the Amendments, the Board is required to "insure that public conveyances, including rolling stock, are readily accessible to, and usable by physically handicapped persons" (29 U.S.C. at 792(b)(8)).

The Amendments also require the ATBCB, in cooperation and consultation with other concerned agencies, to "develop standards and provide appropriate technical assistance to any public or private activity, person or entity affected by regulations prescribed pursuant to this title [Title V of the Rehabilitation Act] with respect to overcoming . . . transportation . . . barriers" (id. at 792(d)(3)).

Since the ATBCB had received a number of reports of accidents or near-accidents involving the use of aircraft boarding chairs, the Board had reason to believe that current practices and standards regarding their use for enplaning and deplaning of disabled passengers, if any existed, are inadequate and unsafe.

As a result, the Board was concerned with the lack of standards in current regulations-standards that would ensure adequate safety features, equipment and procedures necessary to secure the safety features, equipment and procedures necessary to secure the safe enplaning and deplaning of physically disabled passengers by airport operators and airline carriers. This concern led to further research and the initiative to develop this advisory standard.

3. How This Advisory Standard Was Developed

The development of this standard was based on human factors engineering research and analysis. The human factors engineering research conducted to develop this advisory standard included full consideration of the product users (disabled passengers and airline attendants). Research methods included a complete literature search, static evaluations of the current product designs, dynamic observations of the products in use in their intended environment (the airport skybridge and aircraft), an assessment of the user's physiological needs, and extensive interviews with wheelchair users, airline attendants and boarding chair designers.

A set of problems, complaints, and concerns regarding boarding chairs was derived from each of the techniques. For each of the problems, complaints, and concerns identified, as well as for potential problems not actually observed or reported, a performance guideline was written to help alleviate the problem. The guidelines were then classified by topic (aircraft boarding chair feature, documentation issue, or training concern) for inclusion in this advisory standard.

Standards or standardized test procedures developed by industry consensus groups such as the International Organization for Standardization (ISO) or the American National Standards Institute (ANSI) have been incorporated where available and appropriate. Preliminary drafts were circulated for review and comment to the National Transportation Facilitation Committee (NTFC) Subgroup on Air Travel Accessibility, members of the ATBCB, and over 60 reviewers selected for their expertise in the subject area.

4. The needs of the Passengers and Airline Personnel

This standard addresses the needs of both the disabled passenger and the airline attendants. For the passenger, the boarding chair must provide adequate body support and restraint. Typically, a passenger is seated in the boarding chair for approximately 5 minutes or less. However, under circumstances when flight changes must be made, delays occur, or a standard wheelchair is unavailable, the time spent seated in the boarding chair can extend to an hour or longer. In such cases, support, ease of body repositioning and passenger independent mobility are vital. Regardless of the length of time spent seated in the boarding chair, proper support can only be achieved if the boarding chair accommodates the size of the passenger.

The airlines are concerned not only with the safety and comfort of the passenger, but also with the safety and comfort of the airline attendant and the ease of use of the aircraft boarding chair. The attendant is susceptible to injury if the transfer is performed incorrectly. Often, the size of the attendant in relation to the size of the boarding chair and passenger makes a proper transfer difficult. If the airline attendant must assume an awkward position while boarding or deplaning a passenger, there is a potential risk of injury for both the attendant and passenger.

5. Goals for Boarding Chair Designers and Airlines

It should be the goal of boarding chair designers and manufacturers to develop boarding chairs that minimize the potential for injury and increase overall comfort without sacrificing ease-of-use and low cost. The airline should select and purchase boarding chairs that best suit the needs of the passengers and attendants and provide adequate training for personnel. This standard provides guidelines to help fulfill these goals.

III. Areas for Public Comment

The board requests specific comments on the following four issues:

(1) Use of the 99th percentile male weight, as opposed to the 95th percentile male weight, in guidelines associated with load bearing capacity.

(2) The cost impacts of the proposed Advisory Standard in terms of new designs, existing boarding chair modifications and boarding chair replacement.

(3) Whether the final Advisory Standard, when published and provided for public information, should also be included in the Code of Federal Regulations even though it will be a non-binding standard.

(4) The size of the area on which the downward force is applied to the seat (see guideline 4.1(d)).

By vote of the Board, March 12, 1986.
Charles R. Hauser,
Chairperson, Architectural and Transportation Barriers Compliance Board.

Advisory Standard

Part 1. Definition of Key Terms

Air Carrier Airport: Airport that serves airlines utilizing aircraft that seat fifty or more passengers or receive federal funds for terminal facilities. (49 CFR Part 27, § 27.5)

Aircraft Boardng Chair: Narrow, wheelchair-like device used to transport non-ambulatory passengers between the airport terminal gate, via a skybridge or aircraft steps, and the aircraft seat.

Anthropometrics: Measurement of various human physical traits such as size, mobility (range-of-motion) and strength.

Attendant: Any individual who participates in the task of transporting and transferring a passenger; can be an airline employee, a service contractor, or a passenger's private assistant.

Boarding: The process of moving a passenger from the terminal, via a skybridge or aircraft steps, to the aircraft seat. The boarding task incorporates both transporting and transferring tasks.

Boarding Chair: Same as aircraft boarding chair.

Channeling: A groove used to direct or guide an attached mechanical part such as a strap in a specified direction.

Clarity of Function: Degree to which it is obvious how a boarding chair feature should be used.

Deplaning: The process of moving a passenger from the aircraft seat, via a skybridge or aircraft steps, to the airport terminal. The deplaning task incorporates both transporting and transferring.

Extended Periods: A duration of 15 minutes or longer. (period of time)

5th Percentile Female: An adult woman who is smaller than 95% of the female population for a given parameter.

Independent Mobility: The capability of moving without the help of another person while using a manual device.

ISO (Test) Dummy: A test apparatus, developed by the International Organization for Standardization (ISO), used as an equivalent human load for wheelchair testing. The dummy is equivalent to a male weighting 220 lbs with a standing height of 78 inches and is constructed according to Draft International Standard ISO-DIS 7176/11.

Lifting Device: Device used to elevate disabled passengers to the aircraft cabin entrance level, eliminating the need to use a stairway (REF: 44 Fed Reg 31442, Subpart D, Section 27.71(a)(2)(v))

95th Percentile Male: An adult man who is larger than 95% of the male population for a given parameter.

Quadriplegia: Paralysis involving the trunk and all limbs.

Repositioning: Shifting body position to redistribute weight.

Restrain: To restrict body movement or keep the body under control.

Skin Ulceration: Breakdown of skin tissue caused by prolonged external pressure on the skin.

Skybridge. Ramp that connects the airplane cabin door to the airport terminal gate entrance.

Standard Loading Mass: A regulation soccer ball (European football) filled with lead shot of approximately 3.0 mm to 4.0 in diameter to a specified weight (ISO definition).

Standard Loadng Pad: A rigid circular object 100 mm in diameter whose face has a convex spherical curvature of 300 mm radius with a 12 mm front edge radius. Pad should be faced with a layer of hard polyether foam 2 mm thick (ISO definition).

Storage Location: A place within the terminal (not on the aircraft) where boarding chairs are kept when not in use.

3.0 Safety Factor: A 200% increase in load capicity to ensure safety. To calculate load capacity with a 3.0 safety factor, multiply the baseline load by 3.0. This safety factor is generally accepted by wheelchair manufacturers and the ISO.

Transfer: The process of lifting up and moving a passenger from one seated position to another.

Transfer Board: Accessory used to bridge the gap between the aircraft boarding chair and aircraft seat. Passenger slides over the board thus reducing the time the passenger is held by the attendants.

Transport: The process of moving a passenger in a boarding chair whether it be by pushing, pulling or lifting.

Part 2. Human and Environmental Factors

2.1 *Physical Characteristics of Users.*

Designing aircraft boarding chairs requires close attention to the physical dimensions and biomechanical capabilities (together termed anthropometrics) of the people who will use the devices: the disabled passenger and the airline attendant. The aircraft boarding chair, the disabled passenger, and the airline attendant together form a system which has several physical interrelationships or interfaces. Designing the interfaces which meet the anthropometric requirements of the users will help assure that the "Boarding Chair" system is easy and safe to operate.

Body Dimensions

The boarding chair user population includes both adult males and females. Therefore, the physical characteristics of the aircraft boarding chair must accommodate a large range of human dimensions and physical capabilities which varies from small females to large males. It is normal in engineering and design to develop a product to meet the anthropometric requirements of 95% of the user population; meeting a large range which approaches 100% is usually infeasible or unwarranted. The range of anthropometric data is normally defined in terms of percentiles. To match the anthropometrics of approximately 95% of the aircraft boarding chair user population, one needs to find minimum and maximum anthropometric values (for a given parameter) for the 5th percentile female and the 95th percentile male, respectively.

A percentile is determined as follows:

For a 5th percentile female dimension, 5 out of 100 females would be smaller in that dimension.

The result of calculating parameter values for the 5th percentile female and 95th percentile male is a practical range of physical characteristics that can be used as a basis for design. This approach optimizes a design but, while it does not exclude them, may not met as effectively, the needs of 5% of the (small) females and 5% of the (large) males in the user population. It is not the intent to exclude any portion of the population. In practice a "5th–95th" design usually accommodates more than 95% of the user population.

Anthropometric data is presented in Figures 2–1 and 2–2 for use in designing aircraft boarding chairs. Figure 2–1 provides overall dimensions for the 5th percentile female and the 95th percentile male. Figure 2–2 provides hand, arm, foot and head dimensions for the same anthropometric range. This data is references from the "Human Factors Design Handbook." Additional data that relates specifically to the aircraft boarding chair design problem is presented below. The data includes body weight and strength. Other anthropometric data can be found in NASA Reference Publication 1024, "Anthropometric Source Book, Volume I: Anthropometry for Designers."

Figure 2-2. Hand, Arm, Foot, and Head Anthropometrics

BILLING CODE 6820-BF-C

Body Weight

Maximum body weight determines the maximum load or stress on the components and frame of the aircraft boarding chair. A 99th percentile male weighs 241 lbs. A weight of 241 lbs. should be used as a design basis with appropriate consideration given to the use of safety factors in design, since there are still many people who weigh more than 241 lbs. Clearly, an aircraft boarding chair can not be designed to accommodate the heaviest person imaginable. Nonetheless, the disigner is advised to maximize weight bearing capacity in aircraft boarding chair design. The 99th percentile weight has been used, as opposed to the 95th percentile (which is 224 pounds), since the potential for damage or collapse of the aircraft boarding chair is a significantly more serious safety hazard than the failure of other design features that affect comfort more than safety.

Physical Strength and Endurance

Figure 2-3 illustrates the lifting strength and pushing force capacity of the 5th percentile female. A 5th percentile female in a standing position is capable of lifting 74 pounds from a starting point 15 inches off the ground. The same individual can apply a horizontal force of 24 pounds to a handle device which is 33 inches off the ground. Strength declines continuously after intital application to the point that strength is reduced to 25% of the original maximum capacity after four minutes of force application. This data suggests that many disabled passenger transfers will require two or more attendants or that only relatively strong attendants will be capable of performing all aspects of the boarding task which culminates with a transfer (involving a lift). For this reason, strength and endurance requirements of the transporting task should be minimized in any given design. Attendant training should incorporate procedures for transporting heavy passengers.

MIL-STD-1472C

Figure 2-3. 5th Percentile Female Lifting and Pushing Strength

Physical Disability

Aircraft boarding chairs should be designed for passengers with maximum disability. Therefore, a person with quadriplegic involving total loss of arm and leg control and weakened head control should be considered as the design basis. Designs should also consider the potential needs of individuals with missing limbs or deformities and/or involuntary movements.

2.2 The Aircraft Boarding Environment.

Aircraft are not optimized for wheelchair access. Aircraft cabin interiors and aisles, in particular, are designed to be narrow so that the cabin can accommodate the maximum number of people. The narrow aisle is one of the major complicating factors in disabled

passenger access. The other major factor is the continuing lack of skybridge connections to airplanes at many smaller airports and with many commuter airlines, requiring the use of a stairway to board an airplane. Stairways are still used at some airports to board even large, wide-body airplanes, especially during rush periods of the day when there are not always enough gates with skybridges available. The U.S. Department of Transportation requires that operators at federally assisted airports assure that adequate assistance is provided for enplaning and deplaning handicapped persons. Boarding by jetways and by passenger lounges are the preferred methods for movement of handicapped persons between terminal buildings and aircraft at air carrier airports; however, where this is not practicable operators at air carrier airport terminals that receive federal financial assistance shall assure that there are lifts, ramps, or other suitable devices not normally used for movement of freight that are available for enplaning and deplaning wheelchair users [49 CFR 27.71(a)(2)(v)]. A lift eliminates the need to carry the passenger up a stairway. However, lifts are not consistently available and stairways are often used.

Since stairways will continue to be a common means of aircraft access for the indefinite future, aircraft boarding chairs must be designed so that they are safe to use on stairways.

Stairway operation is the most critical mode of aircraft boarding chair use. In stairway operations, the dropping or tipping hazard is greatest for the passenger, while the physical exertion requirement for attendants is also at its peak. Such operations also cause the disabled passenger the greatest discomfort and anxiety. Boarding chair design and boarding methods must be implemented which minimize the risk of injury.

Skybridges are the preferred boarding approach. There are two basic types of skybridges: stationary and movable. Stationary skybridges have a fixed floor inclination. Movable skybridges have vertical and horizontal adjustability and can result in a steeper overall floor incline of up to 7.5 degrees (13%). The slope angle of the connecting ramps between skybridge sections may be as high as 13 degrees (25%). The movable skybridge is also narrower to enhance its movability but satisfies the width requirement for wheelchair access.

Passengers who use wheelchairs normally travel down the skybridge in standard-sized wheelchairs. At the base of the skybridge they are transferred into an aircraft boarding chair and brought onto the airplane. When a skybridge is used for access, the only potential architectural barriers outside the aircraft are the inclination of the skybridge floor and the gap at the threshold between the aircraft cabin door and the skybridge. A steep skybridge floor inclination requires extra strength to control the wheelchair or boarding chair (in the case that the boarding chair is used from the terminal gate point). Brakes are required in case there is a need to stop and hold the boarding chair on the incline. The threshold gap may require backward tilting of the aircraft boarding chair to overcome it and has implications in wheel and caster design.

The aircraft, depending on make and cabin configuraton, may present an access problem. This is particularly true for small commuter aircraft. Although the cabin doorway and entranceway are wide enough to permit easy entry into the aircraft with a boarding chair, the aisles between seats are narrow. The narrow aisle width increases the danger of a passenger's limbs getting wedged between the boarding chair and an aircraft seat. The narrowness of the aisle also presents a problem when the passenger must be moved from the boarding chair to the aircraft seat. The attendants are required to reach around the seated passenger to lift him or her into the aircraft seat. Space for the attendants' arms in the area between the aircraft seats and the boarding chair is tight. Therefore, in cases where the aircraft seat armrest does not pivot out of the way, transferring is further complicated. A fixed armrest necessitates that one attendant reach over the back of the aircraft seat and lift the passenger up over the armrest. This presents risk to the passenger and attendant. Reaching around the back of the seat does not permit the attendant to obtain secure grip of the passenger and the approach is generally less gentle and comfortable for the passenger. The attendant also risks back injury due to poor posture during lifting.

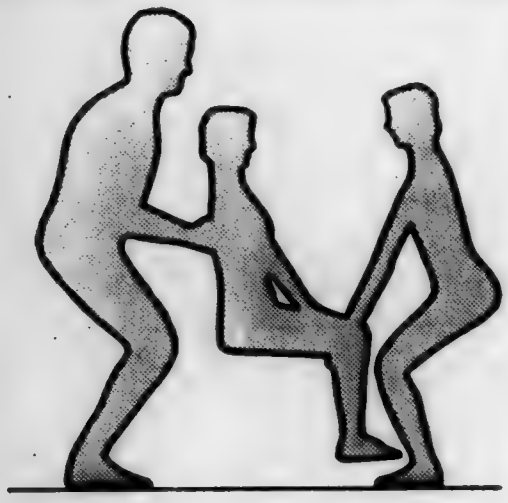
Part 3. Guidelines for Boarding Chair Use

3.1 Mobility.

(a) *Number of Attendants.* When boarding, a minimum of two airline attendants should be present to transport a passenger. If the passenger is particularly heavy or the attendant(s) is not physically strong, the transport task may require more than two attendants.

(b) *Time.* Once the boarding chair is at the aircraft entrance, the time to prepare the boarding chair for passenger seating should be less than two minutes.

(c) *Attendant Posture.* Transfers should not require the attendant to bend in awkward positions. Figure 3–1 illustrates the proper body posture that the boarding chair should permit.



- BEND AT THE KNEES
- KEEP CENTER OF GRAVITY OVER THE KNEES
- USE A SYMMETRICAL POSTURE - DO NOT TWIST
- HOLD A FIRM, BALANCED STANCE
- KEEP YOUR BACK STRAIGHT
- USE A SOLID GRIP - USE BOTH HANDS
- LIFT ABOVE THE CENTER OF GRAVITY

Figure 3-1 Proper Posture for Transferring an Aircraft Boarding Chair Passenger

(d) *Passenger Posture.* The boarding chair design should ensure proper passenger posture. Figure 1–1 illustrates a proper body posture for passengers seated in a boarding chair.

(e) *Boarding Chair Orientation.* The boarding chair should not require tilting for movement unless negotiating curbs, stairs, or similar barriers.

(f) *Turning.* The occupied boarding chair should be able to turn within the confines of the boarding environment and the aircraft cabin layout shown in Figure 3–2. Turning should not require tilting or rocking the boarding chair.

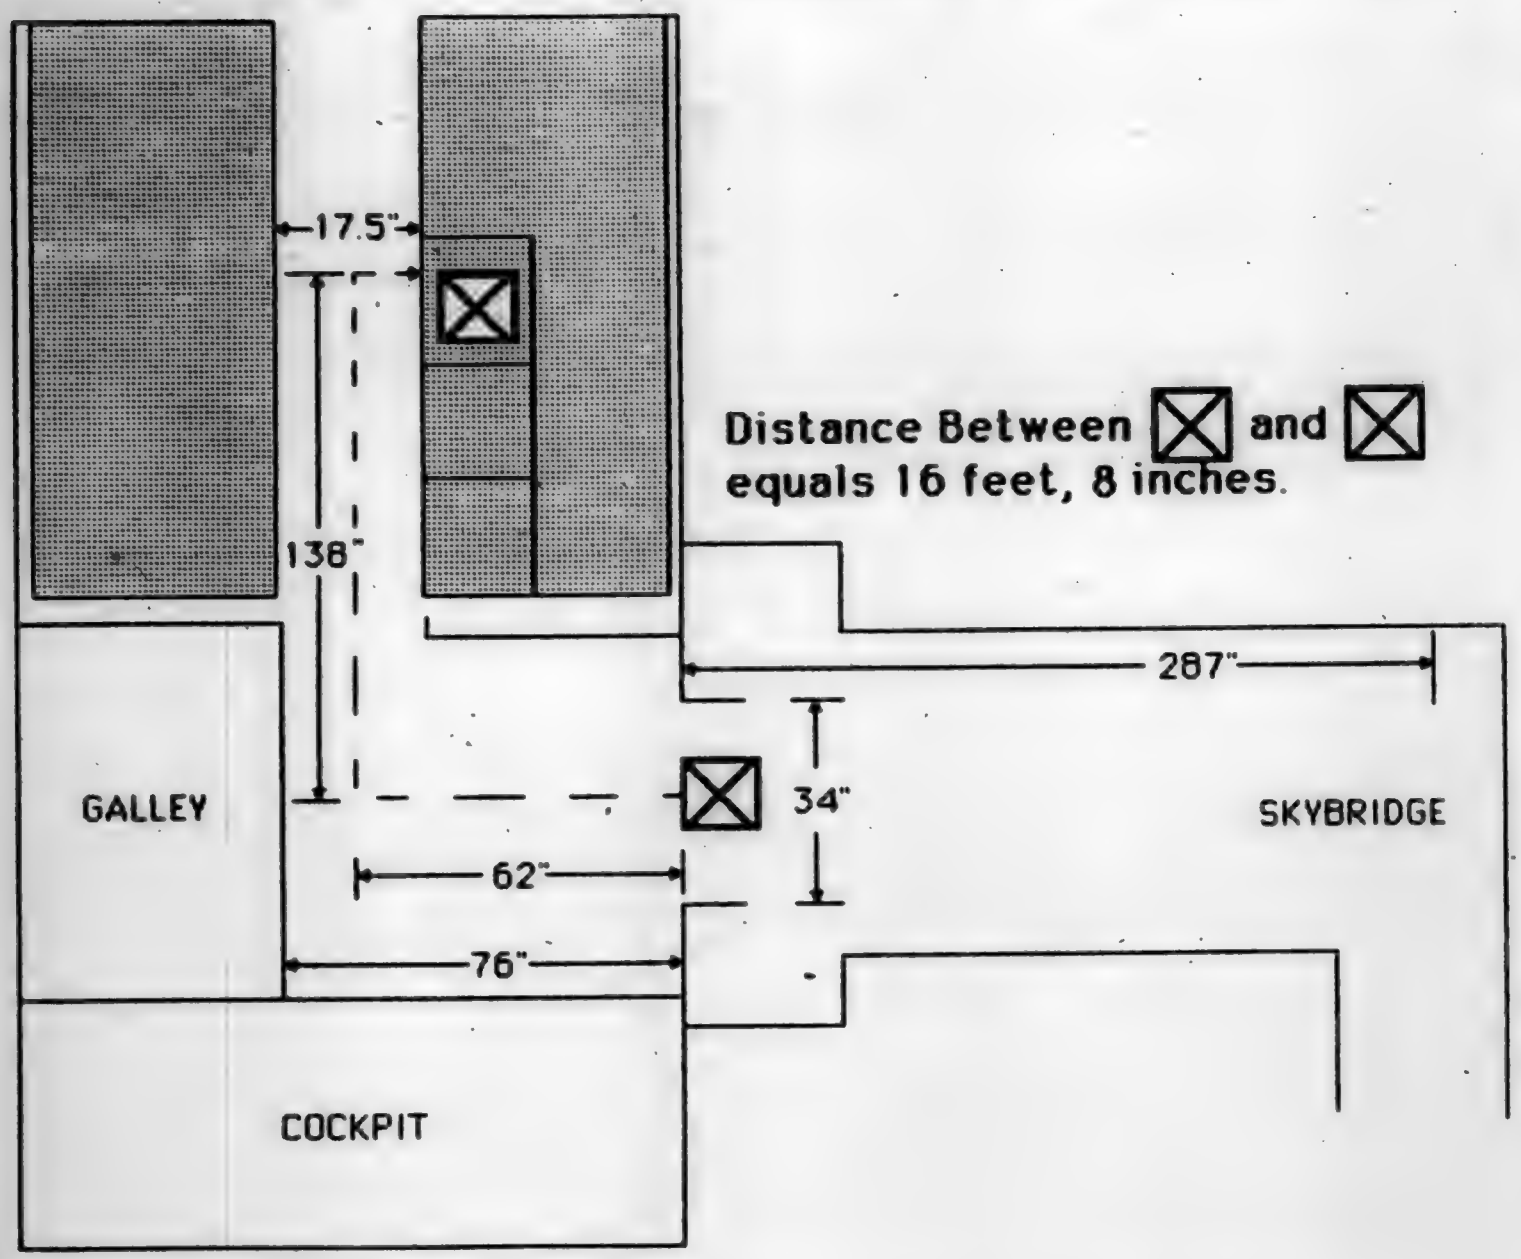


Figure 3–2. Typical Cabin Layout of a Jet Aircraft

BILLING CODE 4910-13-M

(g) *Ease of Movement.* The force required to push and turn (on a level surface) a boarding chair occupied by a 241 pound passenger (the 99th percentile male) should not exceed 24 pounds (the maximum force which can be exerted by a 5th percentile female).

(h) *Ease of Transfer.* The boarding chair should be designed to facilitate the use of a transfer board.

(i) *Vibration.* The boarding chair should be free of noticeable vibration when moving on a smooth surface such as a carpeted aircraft aisle.

(j) *Alignment.* When the boarding chair is pushed in a straight line it should continue to track accurately along that path.

(k) *Independent Mobility.* Boarding chairs designed to be used in the airport terminal should provide manual independent mobility for passengers who have manual independent mobility in their own wheelchairs.

(l) *Locking Mechanism.* Wheel locks should be accessible to the passenger. To the extent possible, the force required to engage/disengage locks should not exceed that which a passenger with limited hand and/or upper extremity function can exert. Wheel locks should hold the boarding chair (occupied by the 100 kg ISO dummy) motionless when placed at a 13 degree angle (maximum skybridge ramp angle) and faced either uphill or downhill. Wheel locks should not cause tire damage or excessive wear.

3.2 *Safety.*

(a) *Posture.* The boarding chair should be designed so that the passenger and attendant maintain proper posture during the passenger transport and transfer. (see Figure 1–1).

(b) *Support.* The boarding chair should provide adequate passenger body support for the full range of users, including quadriplegics and amputees. The passenger should not require supplementary seating or restraints outside those that are part of the boarding chair.

(c) *Restraints.* The restraining system should prevent the passenger from falling out of the boarding chair under all circumstances.

(d) *Hinges and Locking Mechanisms.* Hinges and locking mechanisms on movable and removable components should be located where they cannot pinch or damage the attendant's or passenger's skin or clothing.

(e) *Releases.* Releases (for components such as locks and footrests) should be located where they cannot be accidentally activated (released). Where accidental activation is possible and a safety concern, a guarded release or two-step release procedure should be used.

(f) *Rounded Edges.* The boarding chair design should incorporate rounded edges on all components to avoid injury to passenger, attendant or passerby and to protect the physical environment (stairway, skybridge, airplane).

3.3 *Maintenance.*

(a) *Preventive Maintenance.* Preventive maintenance tasks, task frequency, and specific procedures should be specified by the manufacturer. Maintenance task descriptions should include inspecting, cleaning, and performing minor repairs. All parts requiring maintenance should be easily accessible.

(b) *Cleaning.* Surfaces which come in contact with the passenger and attendant should be cleaned easily and cleaned as frequently as deemed appropriate by the airline. Boarding chair hardware components should be cleaned on a regular basis as deemed appropriate by the manufacturer. All surfaces and mechanisms requiring cleaning, as specified by the manufacturer, should be cleaned by airline personnel or the responsible contractor.

(d) *Inspection.* Parts which are subject to wear should be easily accessed and inspected on a regular basis. Inspection procedures should not require special knowledge, skills, tools, or equipment and should be performed by airline personnel or the responsible contractor.

(e) *Replacement of Parts.* Damaged or missing parts which are not part of the chair frame (main structure) should be available for purchase and replaceable according to paragraph 1.3(g).

(f) *Tools.* Only common tools should be required to perform maintenance tasks. Specialized or one-of-a-kind tools should not be required for maintenance tasks performed by airline personnel.

(g) *Spare Parts.* Components of the boarding chair which are easily replaced (such as fasteners and bearings) and not part of the chair frame (main structure) should be made readily available as spare parts stocked by the manufacturer and at least one other source. Available spare parts should be easily replaced.

3.4 *Storage.*

(a) *Damage Resistance.* Boarding chairs should be of durable construction to avoid damage during storage. Fabric on the chairs should be resistant to tears, stains, or fading which may occur during storage.

(b) *Compactness.* When possible, boarding chair design should utilize adjustable features which maximize compactness during storage.

(c) *Collapsibility.* Collapsible boarding chairs should lock in the collapsed position. Collapsible chairs should be easy to move when in the collapsed position. Reconfiguring the chair for use should be achieved easily and quickly.

(d) *Removable Items.* To avoid loss or theft, removable components should be attached to the chair during storage, though not necessarily in their operational configuration. Configuring components for storage should be performed easily and quickly. Small parts (such as nuts and bolts) should remain fastened to the chair during storage.

(e) *Loose Items.* There should be a clear method for storage of loose items (such as restraints) so they do not get lost or damaged.

(f) *Time Requirements.* Time required to prepare the boarding chair for storage should not exceed two minutes.

Part 4. Guidelines for Design Features

4.1 *General Physical Characteristics.*

(a) *Overall Dimensions.* The boarding chair should, to the extent possible, be sized to comfortably accommodate 95% of the passenger population (see Section 2.1), but should not exceed the dimensional limitations of the aircraft on which it is to be used.

(b) *Overall Weight.* Overall weight should be minimized.

(c) *Load Capacity.* The boarding chair should support 723 lbs. (the 99th percentile male body weight with 3.0 safety factor).

(d) *Static Stability.* The boarding chair should not structurally deflect (bend), rock or tip from the placement of a 241 lb. vertical, downward force at any point on the seat applied by a rigid circular object 4 inches in diameter (see definition for Standard Loading Pad).

The boarding chair should also meet the requirements for static stability as defined in Draft International Standard ISO/DIS 7176/1 (see Appendix A).

(e) *Static and Impact Strength.* For boarding chairs, the following sections of Draft International Standard ISO/TC173/SCI N3, "Static and Impact Strength Test", should be applied:

(1) 1—5.7 (Background Test Information)
(2) 6.1.1 Armrest Downward Static Load Test
(3) 6.1.2 Push Handle(s) Downward Static Load Test
(4) 6.1.3 Footrest Downward Static Load Test
(5) 6.1.4 Tipping Levers Downward Static Load Test
(6) 6.1.5 Hand Grip Static Load Test
(7) 6.1.6 Armrest Upward Static Load Test

(8) 6.1.7 Footrest Supports Upward Static Load Test
(9) 6.1.8 Push Handle(s) Upward Static Load Test
(10) 7.0 Conditions for Acceptance After Static Strength Test
(11) 8.1.1 Seat Impact Strength
(12) 8.1.2 Backrest Impact Strength
(13) 8.2.1 Drop Test Impact Strength
(14) 8.2.2 Rolling Test Wheels and/or Castors Impact Strength

For all above tests, the 220 lb. ISO dummy should be used (see Appendix A for test procedures).

(f) *Adjustable.* Where practical, adjustable features should be used to increase safety, support and comfort. The features should be easy to adjust and should not sacrifice chair and passenger stability.

(g) *Removable Parts.* To avoid loss, the number of removable parts should be minimized, or, if possible, eliminated.

(h) *Construction Materials.* Construction materials should be durable, damage resistant, fire retardant and low and high temperature resistant.

(i) *Protective features.* The boarding chair should have protective features (such as rounded edges and bumpers) to avoid damage to the aircraft boarding environment.

4.2 *Seating.*

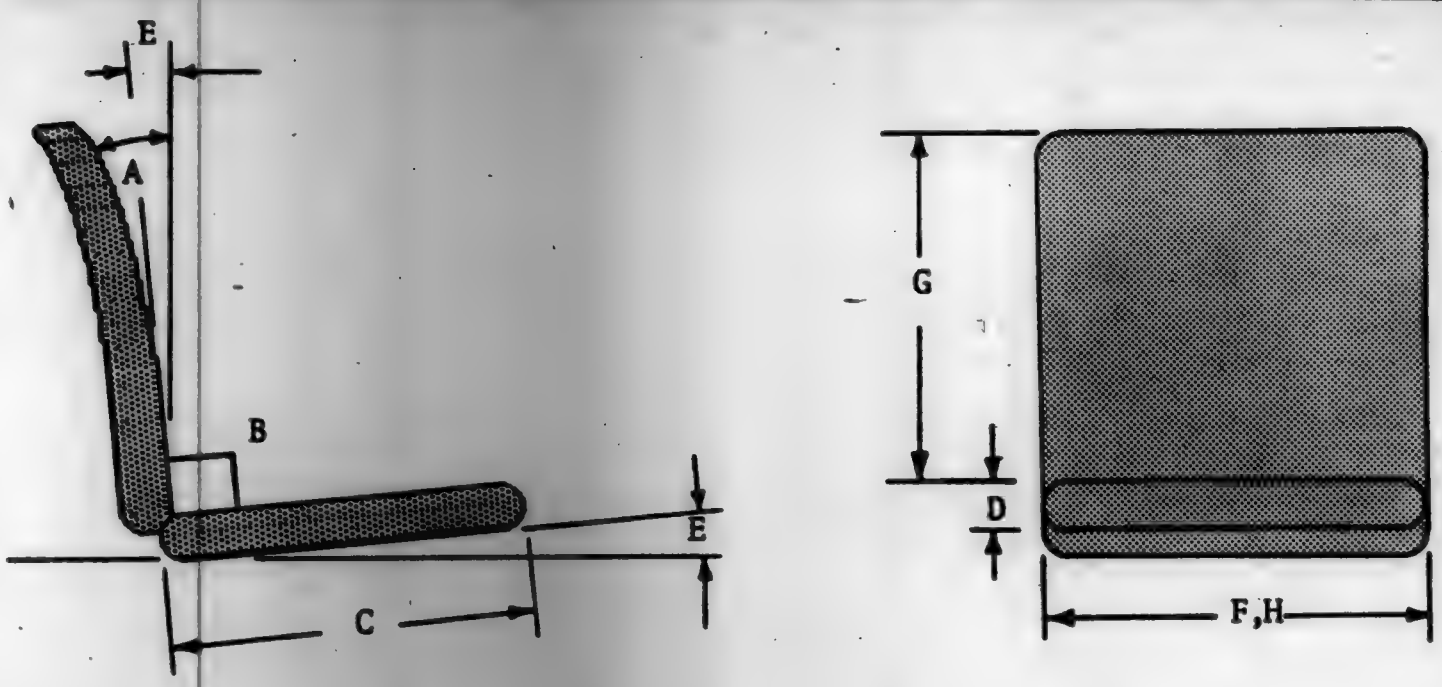
(a) *Function.* Seating should accommodate 95% of the population and should be designed to facilitate transfers by proving unobstructed access for lifting.

(b) *Dimensions.* Seating should be sized according to the dimensions given in Figure 4–1.

BILLING CODE 6320-BP-M

BILLING COD

VOL 51 ISS 94 MY 15 1986 UMI



DIMENSION	VALUE
A Backrest, Optimum Angle (degrees)	8-10
B Backrest to Seat Angle (degrees)	90
C Seat depth (inches)	16
D Seat Thickness (inches)	2 (min)
E Seat Angle (degrees)	5
F Backrest width (inches)	15
G Backrest height (inches)	25
H Seat width (inches)	15

Figure 4-1. Seat and Backrest Dimensions and Angles

BILLING CODE 6820-RP-C

(c) *Strength.* Seats should support a weight of at least 723 pounds (the weight of the 99th percentile male with a 3.0 safety factor) and should meet the requirements in guideline 4.1(e).

(d) *Location.* Seat surface height (compressed) should be 17–19 inches to match the height of aircraft seats and should incline 5 degrees to increase body restraint (see Figures 4–2 and 4–3).

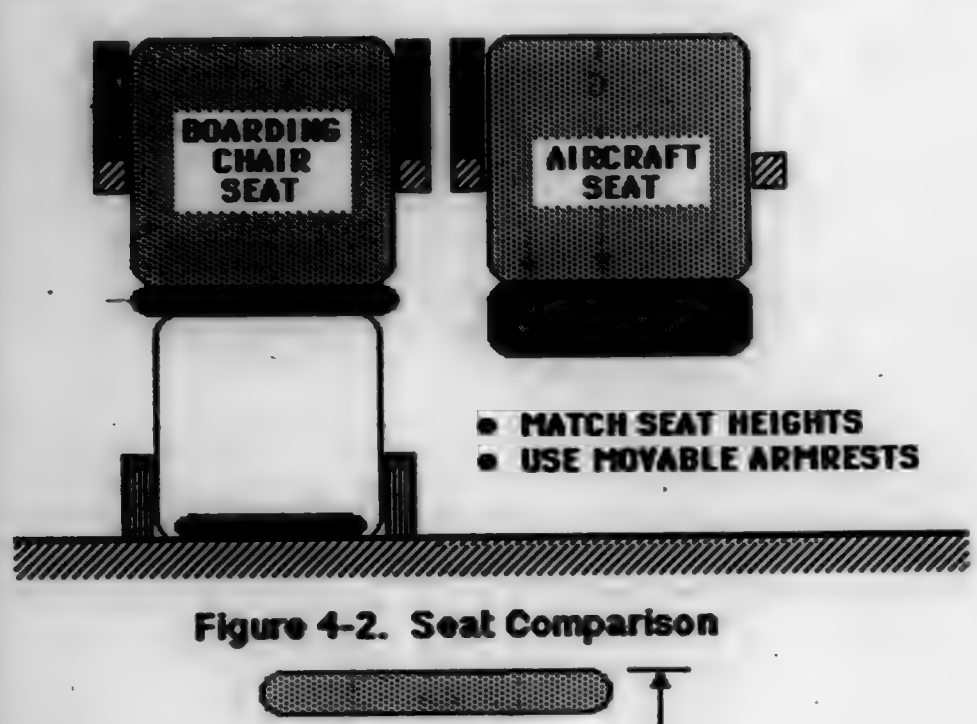


Figure 4-2. Seat Comparison

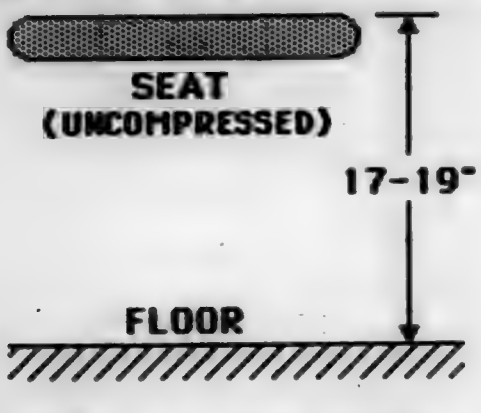

Figure 4-3. Seat Height

(e) *Shape.* Seat shape should provide passenger body support and restraint and distribute body weight evenly to avoid the risk of skin ulceration. Seat shape should not hinder passenger transfers.

(f) *Material.* Seat material should be water repellent, stain resistant, fire retardant, non-abrasive, durable, cleanable, and aesthetic. Based on ISO research, the cushion should be constructed of a good quality foam at least 2 inches thick with an indentation load deflection (ILD) of 70 as measured by ASTM Designation D 1564–71, "Standard Methods of Testing Slab Flexible Urethane Foam." The cushion cover should be stretchable or be fitted so that the top surface is 0.5 inches longer and wider than the foam pad. The cushion cover should be a color which is low in heat absorption so that the cover does not overheat (if left in the sun) and cause thermal trauma to passengers.

(g) *Texture.* Seat material texture should not be so rough (high friction) that it hinders passenger body positioning.

(h) *Cushioning.* Cushioned seating should be provided to distibute body weight evenly and to protect against skin ulceration. Seat cushions should not strike the back of the passenger's knee, thereby avoiding blood flow restriction and possible nerve damage (see Figure 4–4.)

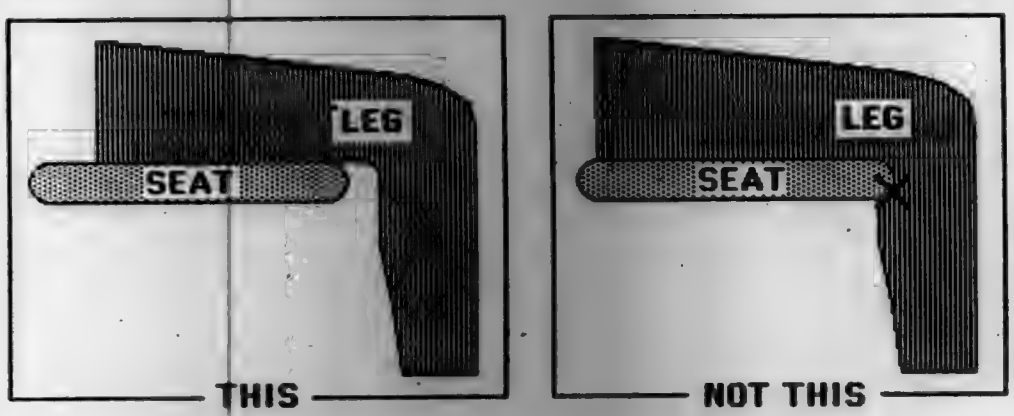

Figure 4-4. Seat Cushioning Placement

(i) *Construction.* Seats should keep their shape, even after extended use.

4.3 *Backrests.*

(a) *Function.* Backrests should support the passenger and aid in restraining the passenger's torso and be comfortable.

(b) *Dimensions.* Backrests should be sized according to dimensions given in Figure 4–1. Note: Where boarding chairs must be carried up stairways (i.e., at locations which are not air carrier airports) the backrest height should be a minimum of 38 inches. Refer to Section 4.4 Headrest.

(c) *Orientation.*. The angle between the base of the backrest and the seat should be 90 degrees. For comfort purposes, the middle to upper portion of the backrest may be gradually reclined as shown in Figure 4–1.

(d) *Strength.*. Backrests should meet the requirements in guideline 4.1(e).

(e) *Shape.* Backrests should be constructed to provide support, aid in restraining a passager, and avoid interference with passenger transfers.

(f) *Material.* Backrest material should be water repellent, stain resistant, fire retardant, non-abrasive, durable, cleanable, and attractive. For aesthetic purposes, cover material used on the backrest should be coordinated with the material used on the seat.

(g) *Texture.* Backrest cover material should not be so rough (high friction) that it hinders passenger body positioning.

(h) *Cushion.* The backrest cushion should provide a firm surface. However, cushion firmness should not compromise skin protection.

(i) *Folding.* Folding backrests should collapse in a manner which does not hinder transfers. Hinging mechanisms should automatically lock in place when the backrest is fully extended and folded.

(j) *Adjustment Mechanisms.* The method of operation of backrest adjustment mechanisms should be readily apparent and easy to perform.

4.4 Headrests.

(a) Function. Headrests should be provided to support the head, preventing the head from falling back or to the sides.

(b) *Dimensions.* Headrests should be dimensioned to accommodate 95% of the user population. (see Figure 2–2)

(c) *Location.* Headrests should support the passenger's head at ear level.

(d) *Strength.* Headrests should support a force of 30 lbs (the average weight of a male's head with a 3.0 safety factor) applied in the aft and both lateral directions and should meet the requirements in guideline 4.1(e).

(e) *Material.* Headrest material should be water repellent, stain resistant, fire retardant, non-abrasive, durable and cleanable.

(f) *Ease of Transfer.* The position of the headrest should be one which does not require an attendant to assume an awkward body position (with poor leverage) during a transfer. (e.g., the headrest could fold or retract out of the way).

4.5 *Armrests.*

(a) *Function.* Armrests should be provided to support the passenger's arms. Armrests should provide a firm gripping or resistance surface for passengers to push against when repositioning themselves and to assist in protecting the passenger from injury.

(b) *Dimensions.* Armrests should be sized to accommodate 95% of the passenger population for the dimension of arm length. (see Figure 2–2).

(c) *Location.* Armrests should be located at the seated elbow resting height optimized for 95% of the passenger population. The armrests should be adjustable over the range of 7.0–12.0 inches above the seat surface.

(d) *Strength.* Each armrest should support 241 lbs (the weight of the 99th percentile male) and meet the requirements in guideline 4.1(e).

(e) *Material.* Armrest material should be durable, non-slip, water repellent, stain resistant, fire retardant and cleanable.

(f) *Orientation.* Armrests should be oriented to provide vertical and lateral arm support.

(h) *Adjustability/Removability.* Armrests should be removable or fold away. Adjustable, folding, and/or removable armrests should have locking and quick release mechanisms that are accessible to the passenger.

4.6 *Gripping Surfaces.*

(a) *Function.* (a) Clearly identified gripping surfaces should be provided for attendants to hold onto during the transport of a passenger.

(b) *Number.* Gripping surfaces should be provided where needed for pushing, pulling, and lifting, as determined by defined operating procedures. As many gripping surfaces as possible should be provided to adapt to a variety of boarding chair-to-attendant orientations. As a minimum, the number of gripping surfaces should fulfill the requirements of paragraph 4.6(d).

(c) *Dimensions.* Gripping surface size should accommodate the 95th percentile male hand for width and length and the 5th percentile female hand for diameter (see Figure 2–2). Physical clearance between the gripping surface and surrounding boarding chair parts should be provided for the 95th percentile male hand.

(d) *Location.* As a minimum, gripping surfaces should be provided on the boarding chair frame near the shoulders and feet of the seated pasenger. The pushing surface should be located at the attendants' standing elbow height, 40–42 inches optimized for the 50th percentile of the total user population. (see Figure 2–1).

(e) *Material.* Gripping surface material should be textured, water repellent, stain resistant, temperature resistant, fire retardant and durable. Gripping surface materials should be firmly attached to avoid turning, slipping, or accidental removal.

(f) *Strength.* Each gripping surface should be capable of supporting (for all possible load applications) the total weight of the boarding chair plus 723 lbs (the 99th percentile male weight with a 3.0 safety factor). Each gripping surface should meet the requirements in guideline 4.1(e).

(g) *Body Posture.* The attendants should not be required to assume awkward positions (such as a twisted back or bent wrists) while pushing or lifting the chair.

(h) *Skin Protection.* The attendant's hands should be protected from contact with surrounding surfaces such as aircraft walls, seats, doors, or stairways while holding onto the gripping surfaces.

(i) *Clarity of Function.* Gripping surfaces should be readily apparent to the attendant.

(j) *Chair Stability.* When the boarding chair, ocupied by the 5th percentile female or 99th percentile male, is pushed, pulled or lifted by the gripping surfaces, the boarding chair should not tip or fall to either side.

4.7 *Restraints.*

(a) *Function.* Restraints, such as safety belts, should be used to secure a passenger in the boarding chair and ensure the safety of the passenger during transportation.

(b) *Placement.* Restraints should securely support:

(1) Torso.
(2) Pelvis.
(3) Knees.
(4) Feet.

Restraint placement should ensure that the passenger's body is centralized and stabilized in the boarding chair. Restraints should be attached rigidly to the boarding chair frame and held in their intended position of use by their method of attachment, channeling or some other means. Pelvic straps should be attached at a 30–45 degree angle from the seat connected at the seat and back joint to hold the pelvis against the back of the boarding chair (see Figure 4–5).

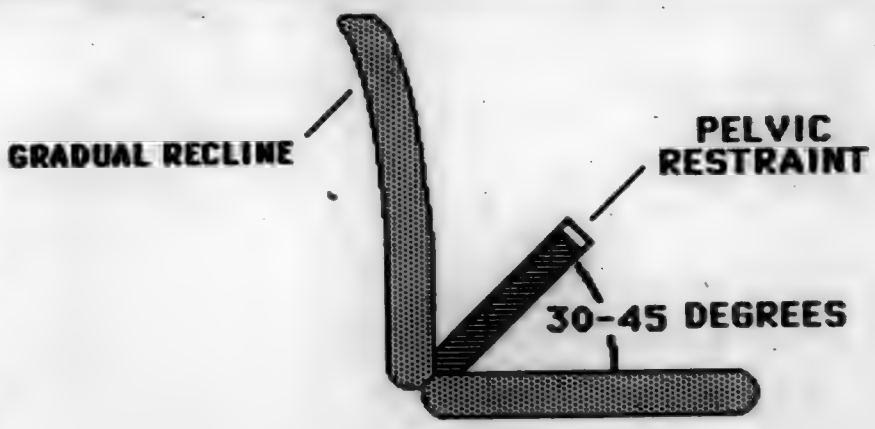

Figure 4-5. Pelvic Restraint Placement

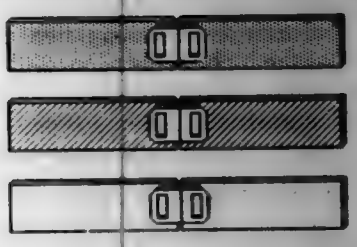
(c) *Material.* Material should be stain resistant, non-abrasive, fire retardant, water resistant, durable, cleanable and attractive.

(d) *Texture.* Material used should not cause skin irritation or promote skin ulceration at contact points.

(e) *Fastening Mechanisms.* Restraint connect and release mechanisms should require as few steps as possible to be secured effectively (1–2 steps is optimum). Fastening mechanisms should connect and release quickly and be within the passenger's reach. Fastening mechanisms should be able to be released by individuals with impaired strength and reduced hand and arm dexterity.

(f) *Adjustability.* Restraining devices should be easily adjustable in size to accommodate the body dimensions of passengers ranging from the 5th percentile female to the 95th percentile male (see Figure 2–1). Once a restraining device has been adjusted to fit a passenger, any excess portion of a strap should not interfere with boarding chair operation and create a potential hazard for tripping or catching.

(g) *Clarity of Function.* Restraining device method of use and connection should be obvious. Incorrect use should be impossible. The need for instructions on use shall be minimized. Coding techniques, such as color or shape, should be used to simplify the identification of interacting parts (see Figure 4–6).



(h) *Strength.* Restraining devices should withstand a force of 723 pounds (the weight of the 99th percentile male with a 3.0 safety factor) as shown in Figure 4–7.

Figure 4-6. Visual Coding of Restraints

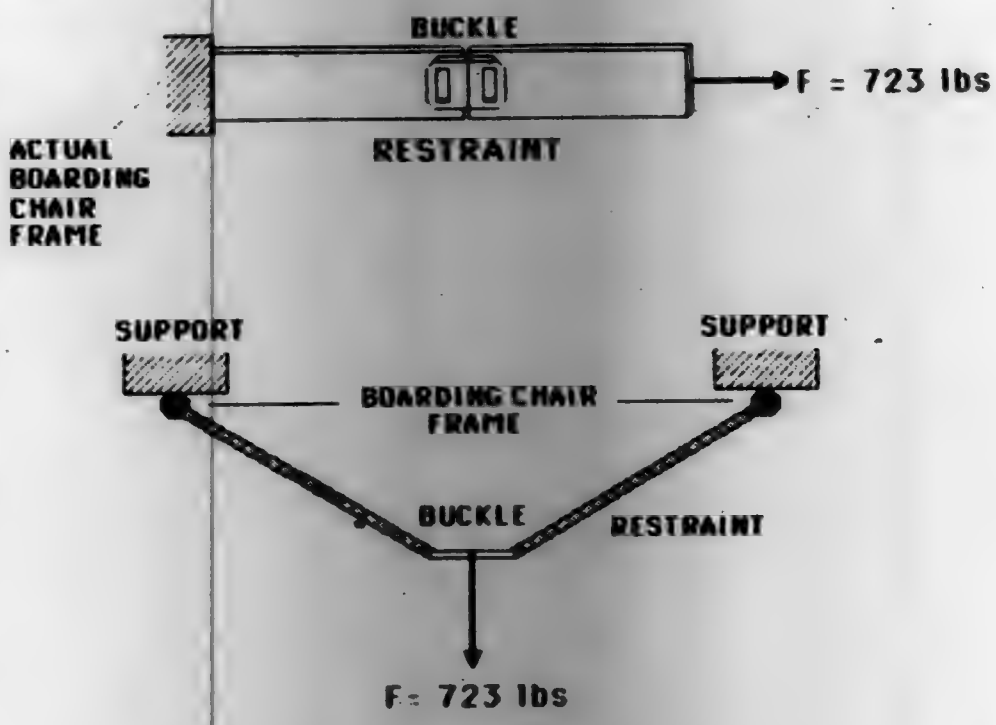


Figure 4-7. Static Testing of Restraints

(i) *Storage.* When not in use, restraining devices should not interfere with chair movement. Restraining devices not in use for a particular passenger should not interfere with operation or cause discomfort to the passenger. The method of restraint storage should be obvious and efficient.

4.8 Footrests

(a) *Function.* Footrests should be provided to support and stabilize the passenger's feet and legs during transport. The footrest should prevent the passenger's foot from slipping off the footrest when tilted back and should prevent the passenger's feet from sliding sideways or forward under all circumstances.

(b) *Dimensions.* Footrests should be a minimum of 4.3 inches in width for each foot. The depth of the footrest should maintain a secure and comfortable foot posture for extended periods. (See Figure 2–2).

(c) *Location.* The contact point between the foot and footrest should be located at an adjustable distance over the range of 16.0 to 29.0 inches from the front of the seat as shown in Figure 4.8.

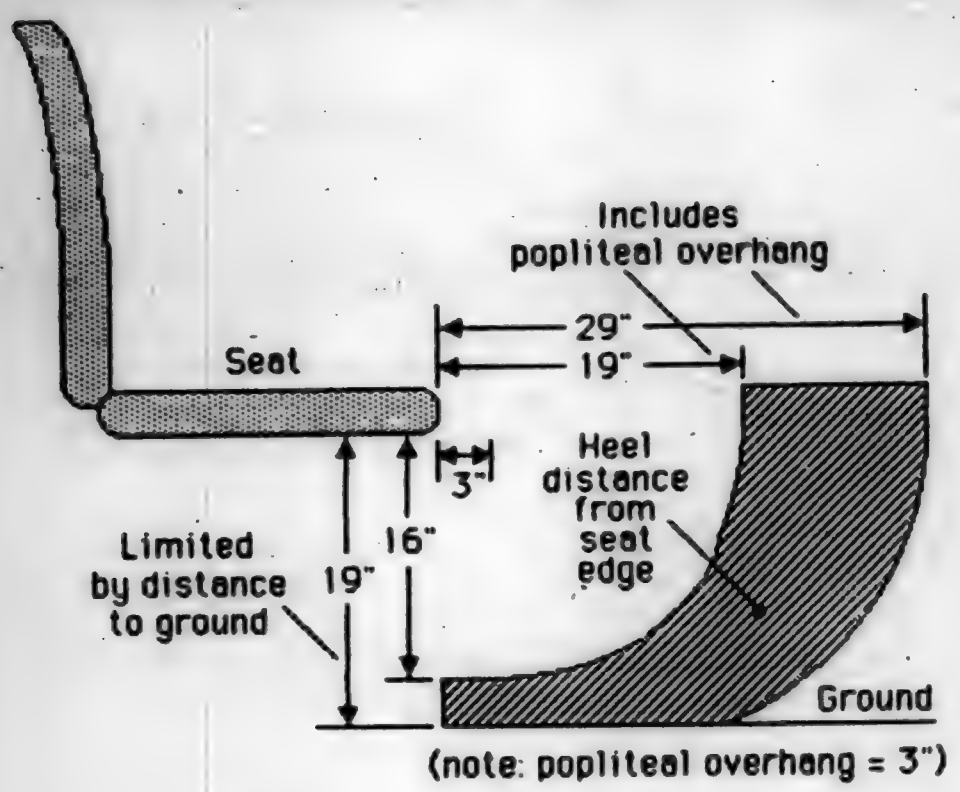

Figure 4.-8. Footrest Location

(d) **Orientation.** Footrests should allow the passenger's foot and lower leg to rest in the position typical to that person (this may not be directly side by side).

(e) *Adjustability.* Footrests should be easy to adjust.

(f) *Strength.* During operation, a collision between the footrest and a surrounding object should not cause passenger injury, alteration of passenger leg position, or damage to the boarding chair. Footrests should meet the requirements in guildeline 4.1(e).

(g) *Support.* Footrests should provide complete support to the passenger's feet and lower legs. Foot supports should prevent the passenger's feet and lower legs. Foot supports should prevent the passenger's feet from slipping beneath the boarding chair under all operating conditions.

(h) *Material.* Footrest material should be durable, resistant to cracking, chipping, or splintering, temperature resistant and cleanable.

(i) *Padding.* Footrests should not promote skin ulceration even after prolonged contact. Padding should be used, as necessary, to provide a comfortable contact surface; particularly in the area of the lower leg.

(j) *Ease of transfer.* Transfer of passengers should not be impeded by footrest size or location. If necessary, footrests should be retractable or swing away to ensure attendant and passenger safety.

Appendix A: Adopted ISO Test Procedures

Note.—Test Procedures have been paraphased and adapted for applicability to aircraft boarding chairs. For the complete Draft ISO Test Procedure Document, refer to ISO/173 SCI/WGI-220.

A1 Scope

This part of ISO 7176 specifies a method for determining the static, impact and fatigue strength of manual wheelchairs.

A2 References

ISO 6440 Wheelchairs—Nomenclature, Terms and Definitions ISO/DIS 7176/11 "Wheelchairs—Part II: Test Dummies".

A3 Definitions

For the purpose of the part of ISO, 7176, the definitions of ISO 6440 apply.

A4 Test Principles

The Static Tests are intended to assess the static strength of the wheelchair and its component parts under the high levels of loading that occur only occasionally.

The evaluation of boarding chairs does not require destructive tests.

A5 General Conditions

If this evaluation protocol is adopted, the following conditions shall be established and recorded during the testing of boarding chairs.

A5.1 The boarding chair shall be fully equipped for normal use.

A5.2 If the wheelchair has pneumatic tires, the air pressure in them should be adjusted in accordance with the directions set forth by the manufacturer/supplier. If a pressure range is specified, the highest recommended pressure shall be selected.

A5.3 The seat unit, if adjustable, shall be set to correspond to a natural sitting posture. The leg support/footrest, if adjustable, should be positioned 50mm above the ground. Horizontally adjustable seat units shall be set at their mid position. If adjustable, the slope of the seat relative to the horizontal shall be as close as possible to 4 degrees, and the slope of the backrest relative to the vertical shall be as close as possible to 10 degrees. The angle between the seat and leg support shall be as close as possible to 90 degrees. Wheelchairs with fore/aft adjustment on the rear wheels shall be adjusted at their middle position.

A5.4 The wheelchair shall be inspected to insure that:

(1) All supporting wheels are contacting the ground.

(2) All wheels meet the specified alignment tolerance limits.

(3) The folding mechanism (if it exists) fully and readily deploys (a wheelchair with a folding X-frame should fold under the influence of gravity when laid horizontally).

(4) All detachable components detach and reassemble readily.

(5) The tires are firmly seated in their rims.

(6) There are no loose spokes (if existing).

A5.5 The dimensions shall be recorded before the commencement of the tests and again all tests have been completed. Before any measurements are taken, any free play in the structure of the boarding chair which might affect the measurements should be taken up by loading the wheelchair with appropriate ISO dummy (Refer to ISO/DES 7176/11) Measurement should be made from well-defined points on the structure to give maximum indication of

any deformation that might occur as result of the tests.

A5.6 Immediately before commencing each test procedure the components for which the test was conducted shall be thoroughly inspected. Any visible defects shall be noted, and any defects considered sufficiently significant as to affect further testing shall, if possible, be rectified.

A5.7 References to an appropriate standard test dummy shall mean a test dummy of 220 lb constructed according to the details in ISO/DIS 7176/11 of this standard.

A6.1 Armrests Donward Static Load Test.

A downward force of 147ON, at 45 degrees, shall be applied to the upper surface of both armrests simultaneously while loading a fixture at the front of the horizontal surface of both armrests. For tests on chairs with removable armrests, check that armrests remove and reinstall correctly.

A6.1.2 Push handle(s) Downward Static Load Test.

A vertical downward force of 1860N shall be applied to the push bar or both push handles simultaneously. If the wheelchair is equipped with a push bar, the force is applied to the center of the push bar. If there are separate push handles the force is applied simultaneously by placing a bar over the push handles and applying the force, using the standard loading pad, midway between the handles.

A6.1.3 Footrest Downward Static Load Test.

A downward force of 1320N shall be applied once vertically downward, to the center of each footrest plate. If the footrest is of one-piece construction, the specified force shall be applied to its center, using the standard loading pad. If the wheelchair has adjustable knee angle leg rests they shall be adjusted as close as possible to 90 degrees between the seat and leg rest. Adjustable height footrests shall be extended to their lowest position or 50 mm above the ground, whichever is higher. If the footplate is adjustable, adjust to 90 degrees to the leg reference plane. During this test, slippage of adjustment shall not exceed 25 mm. The movable caster shall be placed in its normal trailing position.

A6.1.4 Tipping Levers Downward Static load Test.

A vertical downward force of 1470N shall be applied to each tipping lever in turn. The force shall be applied over a length of 50mm at the end of each tipping lever. This applies to any rearward projection that might be used as a foot tipping lever.

A6.1.5 Hand Grip Static Load Test.

A force of 1600N shall be applied once to each handgrip using a loading fixture. The force should be applied for 10 seconds without the handgrip pulling off.

A6.1.6 Armrests Upward Static Load Test.

An upward force of 1600N shall be applied at 10 degrees to the vertical, outward to the side. Force shall be applied to the underside of each armrest simultaneously, in the middle of the armrest, using 50mm webbing or strap material. For test on chairs with removable armrests check that armrests remove and reinstall correctly. Note: Vertically pivoting or non-locking armrests should pivot or remove easily and will therefore pass the test with regard to safety considerations.

A6.1.7 Footrest Supports Upward Static Load Test.

A vertical force of 430N shall be applied to both footrest support structures simultaneously (or most forward projecting part), using 50mm webbing or strapping material. If the footrest is constructed in one piece, the specified force shall be applied to its center. Note: Adjustable knee angle leg rests shall not be tested.

A 6.1.8 Push Handle(s) Upward Static Load Test.

A vertical upward force of 850N shall be applied to the push handle(s) simultaneously using 50mm webbing or strapping material. If a push bar is used, the load is applied to the center.

A7 . Conditions for Acceptance After State Strength Tests

The boarding chair shall be visually inspected after static strength tests are completed noting the following:

(1) Any fracture of any member, joint or component;

(2) Any fracture, cracking or discontinuity of the surface finish of the structure;

(3) Free play or loosening in the frame structure, folding mechanism, armrests, footrests, brakes, wheels or wheel bearings and any other component of the wheelchair, greater than that noted in the initial inspection;

(4) Any deformation or maladjustment of any part of the wheelchair, or its attachments, that will adversely affect its function;

(5) Wheel alignment shall be remeasured and recorded noting the tolerances given;

(6) The boarding chair dimensions shall be remeasured and recorded. These dimensions should be within 3mm of the pretest dimensions recorded;

A pass/fail disclosure shall be made based on the visual inspection and the alignment and dimensions noting the tolerances given.

A8.1.1 Seat Impact Strength.

The seat shall be tests for impact with the Standard Loading Mass filled with a weight of 25 kg. During these tests the wheelchair shall be secured to the floor to prevent folding or movement. With the wheelchair in the normal open position, the weighted mass shall be dropped onto different areas of the seat from a height of 200mm. The specified impact tests are as follows:

(1) Drop mass onto center of the seat.

(2) Drop mass onto each front corner of seat as near to the corner as possible. If the wheelchair has removable armrests they shall be removed.

A8.1.2 Backrest Impact Strength.

The backrest shall be tested for impact with the Standard Loading Mass with a weighted of 25kg. The specified impact tests for the backrest are as follows:

(1) Suspend the standard loading mass as a pendulum such that it impacts the center top edge of the backrest from the front at a 45 degree angle. The standard loading mass shall be dropped from a height of 500mm.

(2) Suspend the standard loading mass as a pendulum such that it impacts each back frame member at the top, from the front at a 45 degree angle. The standard loading mass shall be dropped from a height of 500mm. During this test the boarding chair shall be secured to the floor to prevent folding or movement.

A8.2.1 Drop Test Impact Strength.

(1) With all folding mechanism (if existing) deployed to the ready-to-use condition (open), lift the wheelchair loaded with the 220lb standard test dummy above a hard, flat surface at a height of 100mm. Using a quick release device drop the chair allowing it to fall freely under the influence of gravity to impact the flat surface. The wheelchair should be suspended from a single point so that it is tilted 10 degrees laterally (side-to-side) with an inclination 10 degrees aft so that a rear wheel will contact the floor first. The height of the chair should be measured from the floor to the lower surface of the wheel being tested.

(2) For folding chairs, repeat with an inclination fore 10 degrees so that a front wheel strikes the floor first.

A8.2.2 Rolling Test Wheels and/or Castors Impact Strength.

With the chair unfolded and loaded with the 220 lb standard test dummy, the chair is rolled on a straight line path at the velocity of 1.1 m/sec towards a standardized obstacle, which is securely fastened to the floor. The velocity

BEST COPY AVAILABLE

should be measured by use of a standardized procedure. The test dummy shall be securely fastened into the boarding chair. If there are removable/adjustable footrests or other projections, they should be adjusted to the most upward position in order to clear obstacles. If the distance between the floor and non-removable structures or footrests is less than the height of the standardized obstacle, the maximum possible height object should be used and recorded.

Each front wheel or castor should contact the standardized obstacle independently. The impact angle should be 45 degrees to the long dimension of the standardized obstacle.

A9 Conditions for Acceptance After Impact Strength Tests

The boarding chair shall be visually inspected after impact strength tests are completed. A pass/fail disclosure shall be made based on the criteria to be determined by the ISO.

Appendix B—Guidelines for Training

B1 Training Course Responsibility

Airlines or responsible contract personnel should conduct training courses. The airline will ensure that contract personnel conduct adequate training and will be ultimately responsible for training content, frequency, and adequacy.

B2 Frequency of Training

The airline or responsible contract personnel should train all personnel who will perform disabled passenger transports with aircraft boarding chairs before they are allowed to perform the boarding task on the job. Refresher courses should be taught when different equipment is acquired, new staff are hired, and routinely, according to an established schedule.

B3 Level of Training

All attendants should successfully perform a passenger transport and transfer using both a skybridge and stairway to gain access to the airplane.

B4 Training Course Content

Training courses should include the material covered in guidelines on passenger services, transfers and stairways.

B4.1 Effectiveness of Passenger Services.

Training courses should include the following topics to reduce the likelihood of passenger injury:

(a) Maintain proper attitude toward the passenger to avoid mistreatment.

(b) Consult with the passenger to identify the best method for transferring.

(c) Be aware of the risk of injury.

(d) Obtain the owner's chair during layovers if at all possible.

(e) Minimize the number of transfers per passenger.

(f) Restrain the passenger firmly, but not so tight as to cause injury.

(g) Take caution against legs and feet becoming dislodged from the support and getting caught on corners, seat braces or seats.

(h) Avoid pressure sores; allow the passengers to stay in their own wheelchairs, (that is specifically padded for them) for as long as possible.

(i) Know where the movable armrests are located on the aircraft.

(j) Know where the boarding chair can be parked (greatest percent incline without danger of brakes not holding.)

B4.2 Passenger Transfers.

Training courses should include the following information to reduce the likelihood of passenger or attendant injury:

(a) Consult with the passenger on the best way to accomplish the transport procedure.

(b) If possible, use a seat with a movable armrest.

(c) Do not lift a person who is too heavy for your strength.

(d) Stand with feet 12–18 inches apart, lift from the knees and not the back by keeping the back as straight as possible and stand as close to the passenger as possible.

(e) Engage brakes/locks on wheelchair and boarding chair whenever making a transfer.

(f) Allow the passenger to assist with the lift whenever possible.

B4.3 Use of Stairways for Boarding.

Training courses should include the following information to reduce the likelihood of injury:

(a) Whenever possible, avoid carrying a passenger up stairs.

(b) Locate and know how to utilize any lifting device provided at the airport.

(c) Before starting, make certain that all restraints are securely fastened, especially about the lower extremities that could splay and injure the attendant or upset the balance of the boarding chair.

(d) Place the less experienced attendant at the foot of the passenger and the more experienced attendant at the shoulders.

(e) Take a practice run if not fully familiar or comfortable with the layout. Practice with a heavy staff member.

(f) Keep the passenger informed at all times as to the progress.

(g) Make sure hands and gripping surfaces are not wet or slippery.

(h) Rest at each step to preserve stamina.

(i) Do not wear baggy clothing which could get caught. Wear non-slip footwear, such as rubber-soled shoes.

(j) Keep the boarding chair tilted back slightly as horizontally straight as possible. Even the slightest sideways tilting can jeopardize control.

[FR Doc. 81–11001 Filed 5–14–86; 8:45 am]
BILLING CODE 6820-SF-M

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Order No. 330]

Approval for Expansion of Foreign-Trade Zone No. 98, Birmingham, AL

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), and the Foreign-Trade Zones Board Regulations (15 CFR Part 400), the Foreign-Trade Zones Board (the Board) adopts the following order:

Whereas, the City of Birmingham, Alabama, grantee of Foreign-Trade Zone No. 98, has applied to the Board for authority to expand its general-purpose zone to include a warehouse complex in Birmingham, within the Birmingham port of entry;

Whereas, the application was accepted for filing on May 9, 1985, and notice inviting public comment was given in the Federal Register on June 11, 1985 (Docket No. 15–85, 50 FR 24551);

Whereas, an examiners committee has investigated the application in accordance with the Board's regulations and recommends approval;

Whereas, the expansion is necessary to improve zone services in the Birmingham area; and,

Whereas, the Board has found that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations are satisfied, and that approval of the application is in the public interest;

Now, Therefore, the Board hereby orders:

That the grantee is authorized to expand its zone in accordance with the application filed May 29, 1985. The grantee shall notify the Executive Secretary of the Board for approval prior to the commencement of any manufacturing operations. The authority given in this Order is subject to settlement locally by the District Director of Customs and the District Army Engineer regarding compliance

with their respective requirements relating to foreign-trade zones.

Signed at Washington, DC, this 8th day of May 1986.

Paul Freedenberg,

Assistant Secretary of Commerce for Trade Administration, Chairman, Committee of Alternates, Foreign-Trade Zones Board.

Attest:

John J. Da Ponte, Jr.

Executive Secretary.

BILLING CODE 3510-DS-M

[Order No. 331

Approval For Expansion of Foreign-Trade Zone No. 2, New Orleans, LA

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a-81u), and the Foreign-Trade Zones Board Regulations (15 CFR Part 400), the Foreign-Trade Zones Board (the Board) adopts the following order:

Whereas, the Board of Harbor Commissioners of the Port of New Orleans, Louisiana, grantee of Foreign-Trade Zone No. 2, has applied to the Board for authority to expand its general-purpose zone to include an industrial park site in New Orleans, within the New Orleans Customs port of entry;

Whereas, the application was accepted for filing on September 30, 1985, and notice inviting public comment was given in the **Federal Register** on October 11, 1985 (Docket No. 35-85, 50 FR 41545);

Whereas, an examiners committee has investigated the application in accordance with the Board's regulations and recommends approval;

Whereas, the expansion is necessary to improve zone services in the New Orleans area; and,

Whereas, the Board has found that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations are satisfied, and that approval of the application is in the public interest;

Now, Therefore, the Board hereby orders:

That the grantee is authorized to expand its zone in accordance with the application filed September 30, 1985. The grantee shall notify the Executive Secretary of the Board for approval prior to the commencement of any manufacturing operations. The authority given in this Order is subject to settlement locally by the District Director of Customs and the District Army Engineer regarding compliance with their respective requirements relating to foreign-trade zones.

Signed at Washington, D.C. this 8th day of May 1986.

Paul Freedenberg,

Assistant Secretary of Commerce for Trade Administration, Chairman, Committee of Alternates Foreign-Trade Zones Board.

Attest:

John J. Da Ponte, Jr.

Executive Secretary.

[FR Doc. 86-10914 Filed 5-14-86; 8:45 am]

BILLING CODE 3510-DS-M

International Trade Administration

[A-475-401]

Certain Brass Valves and Connections From Italy, for Use in Fire Protection Systems; Second Amendment to Final Determination of Sales at Less Than Fair Value and Amendment to Antidumping Duty Order.

AGENCY: International Trade Administration/Import Administration/Commerce.

ACTION: Notice.

SUMMARY: As a result of a remand from the United States Court of International Trade in *Badger—Powhattan* v. *United States et al* (Slip Op. 86-38 at 22, April 2, 1986), the Department of Commerce (the Department) is amending its final determination in this investigation and its antidumping duty order, and is directing the U.S. Customs Service to adjust the cash deposit for Rubinetterie A. Giacomini S.p.A. (Giacomini) and all other manufacturers/producers/exporters of certain valves and connections, of brass, for use in fire protection systems, from Italy (fire protection products) from 1.28 percent to 6.74 percent based on margins found for single and double clapper siamese fire department connections and pressure restricting valves.

EFFECTIVE DATE: May 15, 1986.

FOR FURTHER INFORMATION CONTACT: Charles E. Wilson, Office of Investigations, Import Administration, International Trade Administration, Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230; telephone: (202) 377-5288.

SUPPLEMENTARY INFORMATION: On November 30, 1984, we published a final determination of sales at less than fair value for fire protection products from Italy (49 FR 47066). Subsequently, we discovered and corrected clerical errors and amended our final determination (50 FR 1099). On February 19, 1985, in accordance with section 735(d) of the Act (19 U.S.C. 1673d), the United States International Trade Commission (ITC) notified the Department that imports of certain brass fire protection products, which include single and double clapper siamese fire department connections and pressure restricting valves, are materially injuring a United States industry. The ITC also notified the Department that fire hose coupling, fog/straight stream nozzles, angle-type hose gate valves, wedge-disc hose gate valves, and pressure regulating valves are not materially injuring a United States industry. After being notified of these findings, the Department published an antidumping duty order covering the two products found to be materially injuring a United States industry (50 FR 8354). The cash deposit of 1.28 percent required by this order for Giacomini and all other manufacturers/producers/exporters of fire protection products was based on the weighted-average of the less than fair value margins of Giacomini's sales of all seven products.

The United States Court of International Trade has directed the Department to amend its final determination and its antidumping duty order to reflect a weighted-average margin based only on margins found for single and double clapper siamese fire department connections and pressure restricting valves. Consequently, we are futher amending our final determination by changing the weighted-average margin to 6.74 percent based on the margins found for siamese fire department connections and pressure restricting valves.

We are also amending our antidumping duty order to reflect the weighted-average margin of 6.74 percent. Accordingly, the order is amended to read as follows: on and after the date of publication of this notice, United States Customs officers must require, at the same time as importers would normally deposit estimated Customs duties on this merchandise, a cash deposit equal to the estimated weighted-average antidumping duty margins on single and double siamese fire department connections and pressure restricting valves as noted below:

Manufacturers/producers/exporters	Weighted-average margin (percent)
Rubinetterie A. Giacomini S.P.A.	6.74
All other manufacturers/producers/exporters	6.74

May 8, 1986.

John L. Evans,

Acting Deputy Assistant Secretary for Import Administration.

[FR Doc. 86-10817 Filed 5-14-86; 8:45 am]

BILLING CODE 3510-DS-M

[A-489-501]

Antidumping Duty Order; Welded Carbon Steel Standard Pipe and Tube Products From Turkey

AGENCY: International Trade Administration/Import Administration/ Department of Commerce.

ACTION: Notice.

SUMMARY: The United States Department of Commerce (the Department) and the United States International Trade Commission (the ITC) have determined that welded carbon steel standard pipe and tube products from Turkey are being sold at less than fair value and that imports of this product from Turkey materially injure a United States industry. Therefore, based on these findings, all unliquidated entries, or warehouse withdrawals, for consumption of this product made on or after January 3, 1986, the date on which the Department published its "Preliminary Determination" notice in the Federal Register, will be liable for the assessment of antidumping duties. Further, a cash deposit of estimated antidumping duties must be made on all such entries, and withdrawals from warehouse, for consumption made after the date of publication of this antidumping duty order in the Federal Register.

EFFECTIVE DATE: May 15, 1986.

FOR FURTHER INFORMATION CONTACT: Paul Tambakis or Charles Wilson, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 377-4136 or (202) 377-5288.

SUPPLEMENTARY INFORMATION: The products covered by this investigation are welded carbon steel standard pipe and tube products with an outside diameter of 0.375 inch or more but not over 16 inches of any wall thickness, currently classified in the *Tariff Schedules of the United States Annotated* (TSUSA), under items 610.3231, 610.3234, 610.3241, 610.3242, 610.3243, 610.3252, 610.3254, 610.3256, 610.3258 and 610.4925. These products, commonly referred to in the industry as standard pipe or tube, are produced to various ASTM specifications, most notably A-120, A-53 or A-135.

In accordance with section 733 of the Tariff Act of 1930, as amended (the Act) (19 U.S.C. 1673b), on January 3, 1986, the Department published its preliminary determination that there was reason to believe or suspect that certain welded carbon steel pipe and tube products from Turkey were being sold in the United States at less than fair value (51 FR 235). On April 17, 1986, the Department published its final determination that these imports were being sold at less than fair value (51 FR 13044).

On April 30, 1986, in accordance with section 735(d) of the Act (19 U.S.C. 1673(d)), the ITC notified the Department that imports of welded carbon steel standard pipe and tube products from Turkey materially injure a United States industry. The ITC also notified the Department that a United States industry is not being materially injured or threatened with material injury by reason of imports of welded carbon steel line pipe from Turkey.

Therefore, in accordance with sections 736 and 751 of the Act (19 U.S.C. 1673e and 1675), the Department directs United States Customs officers to assess, upon further advice by the administering authority pursuant to section 736(a)(1) of the Act (19 U.S.C. 1673e(a)(1)), antidumping duties equal to the amount by which the foreign market value of the merchandise exceeds the United States price for all entries of welded carbon steel standard pipe and tube products from Turkey. These antidumping duties will be assessed on all unliquidated entries of such merchandise entered, or withdrawn from warehouse, for consumption on or after January 3, 1986, the date on which the Department published its "Preliminary Determination" notice in the Federal Register.

On and after the date of publication of this notice, United States Customs officers must require, at the same time as importers would normally deposit estimated duties on this merchandise, a cash deposit equal to the estimated weighted-average antidumping duty margin as noted below.

Article VI.5 of the General Agreement on Tariffs and Trade provides that "[n]o product . . . shall be subject to both antidumping and countervailing duties to compensate for the same situation of dumping or export subsidization." This provision is implemented by section 772(d)(1)(D) of the Act. Since dumping duties cannot be assessed on the portion of the margin attributable to export subsidies, there is no reason to require a cash deposit for that amount. Accordingly, the level of export subsidies, as determined in the final affirmative countervailing duty determination on certain welded carbon steel pipe and tube products from Turkey (51 FR 1268-1274) will be subtracted from the dumping margins shown below for deposit purposes.

Manufacturers/products/exporters	Weighted-average margin (percent)
Borusan Ihicat ve Dagitim	1.26
Erkboru Profil Sanayi ve Ticaret	23.12
Manneesmann-Sumerbank Boru Industrisi	23.12
All Others	14.74

This determination constitutes an antidumping order with respect to welded carbon steel standard pipe and tube products from Turkey pursuant to section 736 of the Act (19 U.S.C. 1673e) and § 353.48 of the Commerce Regulations (19 CFR 353.48). We have deleted from the Commerce Regulations Annex 1 of 19 CFR Part 353, which listed antidumping findings and orders currently in effect. Instead, interested parties may contact the Office of Information Services, Import Administration, for copies of the updated list of orders currently in effect.

This notice is published in accordance with section 736 of the Act (19 U.S.C. 1673e) and § 353.48 of the Commerce Regulations (19 CFR 353.48).

John L. Evans,

Acting Deputy Assistant Secretary for Import Administration.

May 7, 1986.

BILLING CODE 3510-DS-M

[A-565-501]

Postponement of Final Antidumping Duty Determination; Certain Welded Carbon Steel Small Diameter Pipes and Tubes From the Philippines

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: On April 24, 1986, Goodyear Steel Corporation, the respondent in the antidumping duty investigation of certain welded carbon steel small diameter pipes and tubes (pipes and tubes), requested by letter through Mitsubishi International Corporation that the final determination be postponed as provided for in section 735(a)(2)(A) of the Tariff Act of 1930, as amended (the Act) (19 U.S.C.

1673d(a)(2)(A)). Pursuant to this request, we are postponing our final antidumping duty determination as to whether sales of pipes and tubes from the Philippines have been made at less than fair value until not later than September 11, 1986.

EFFECTIVE DATE: May 15, 1986.

FOR FURTHER INFORMATION CONTACT: Mary J. Jenkins or John Brinkmann, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377–1756 or 377–3965, respectively.

SUPPLEMENTARY INFORMATION: On December 16, 1985, we published a notice in the **Federal Register** that we were initiating, under section 732(b) of the Act (19 U.S.C. 1673a(b)), an antidumping duty investigation to determine whether imports of pipes and tubes from the Philippines are being, or are likely to be sold at less than fair value (50 F.R. 51274). We issued our preliminary affirmative determination on April 22, 1986 (51 F.R. 15940). This notice stated that we would issue a final determination on or before July 7, 1986. On April 24, 1986, counsel for the single respondent requested that we extend the period for the final determination, in accordance with section 735(a)(2)(A) of the Act. This respondent accounts for a significant proportion of exports of the subject merchandise to the United States, and thus is qualified to make this request. If a qualified exporter properly requests an extension after an affirmative preliminary determination, the Department is required, absent compelling reasons to the contrary, to grant the request. Accordingly, we grant the request and postpone our final determination until not later than September 11, 1986, the 135th day after the date of publication of our preliminary determination in the **Federal Register**.

If requested, the public hearing will also be postponed until 2:00 p.m. on July 30, 1986, at the U.S. Department of Commerce, Room 3708, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Accordingly, prehearing briefs must be submitted to the Deputy Assistant Secretary by July 23, 1986.

This notice is published pursuant to section 735(d) of the Act.

John L. Evans,

Acting Deputy Assistant Secretary for Import Administration.

May 9, 1986.

BILLING CODE 3510-DF-M

Industry Functional Advisory Committee on Intellectual Property Rights for Trade Policy Matters; Establishment

SUMMARY: Subsection 135(c) of the Trade Act of 1974, 19 USC 2155, as amended by the Trade Agreements Act of 1979, (Pub. L. 95–39), and the Trade and Tariff Act of 1984 (Pub. L. 98–573), gives the President authority to establish advisory committees to provide general policy advice on trade. This authority has been delegated to the Secretary of Commerce (the Secretary), acting in conjunction with the United States Trade Representative (the USTR), according to Executive Order 11846 of March 27, 1975. It has now been determined by the Secretary and the USTR that the advisory committee listed below be established. This action is taken in accordance with the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. 2, and 41 CFR Part 101–6, as amended, Federal Advisory Committee Management Interim Rule.

Industry Functional Advisory Committee on Intellectual Property Rights for Trade Policy Matters

The committee will provide technical and policy advice and information to the Secretary and the USTR on trade policy matters arising in connection with the administration of U.S. trade policy. Members of the committee will be appointed by and serve at the discretion of the Secretary and the USTR. It is proposed that each committee will meet at least semi-annually at the request of the Secretary and the USTR, and will function solely as an advisory body in compliance with the provisions of the Federal Advisory Committee Act. The Trade Advisory Center, International Trade Administration (ITA) of the Department of Commerce, administers the program.

Copies of the Committee charter will be filed with appropriate committees of the Congress and copies will be forwarded to the Library of Congress.

EFFECTIVE DATE: May 2, 1986.

Membership

Representatives from industry or industry associations wishing to be considered for appointment to serve on this committee are requested to make application in writing to the Trade Advisory Center, Room H–6816, U.S. Department of Commerce, Washington, DC 20230, telephone: (202) 377–3268. Comments and inquiries may be sent to the same address.

FOR FURTHER INFORMATION CONTACT: Jacob Moose, Acting Director, Trade Advisory Center, telephone (202) 377–3200.

Dated: May 8, 1986.

Marjory Searing,

Acting Deputy Assistant Secretary for Trade Information and Analysis.

BILLING CODE 3510-DR-M

[C–122–507]

Countervailing Duty Order; Certain Fresh Atlantic Groundfish From Canada

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: In separate investigations, the United States Department of Commerce (the Department) and the United States international Trade Commission (ITC) have determined that certain fresh whole Atlantic groundfish from Canada are receiving benefits which constitute subsidies within the meaning of the countervailing duty law, and that imports of certain fresh whole Atlantic groundfish from Canada are materially injuring a United States industry. In its determination, the Department also found that certain fresh Atlantic groundfish fillets from Canada are receiving benefits which constitute subsidies within the meaning of the countervailing duty law. However, the ITC determined that imports of certain fresh Atlantic groundfish fillets are not materially injuring, threatening material injury to, or materially retarding the establishment of, a United States industry.

Therefore, based on these findings all entries of certain fresh whole Atlantic groundfish from Canada, which are entered or withdrawn from warehouse, for consumption on or after January 9, 1986, the date on which the Department published its preliminary countervailing determination in the **Federal Register**, will be liable for the possible assessment of countervailing duties. Furthermore, a cash deposit of estimated countervailing duties must be made on all such entries, or withdrawals from warehouse, for consumption, on or after the date of publication of this countervailing duty order in the **Federal Register**.

EFFECTIVE DATE: May 15, 1986.

FOR FURTHER INFORMATION CONTACT: Gary Taverman, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW.,

Washington, DC 20230; Telephone: (202) 377-0161.

SUPPLEMENTARY INFORMATION: The products covered by this order are certain fresh whole Atlantic groundfish, as currently provided for in items 110.1585, 110.1593, and 110.3560 of the *Tariff Schedules of the United States Annotated* (TSUSA).

In accordance with section 703 of the Act (19 U.S.C. 1671b), on January 9, 1986, the Department published its preliminary determination that there was reason to believe or suspect that imports of certain fresh Atlantic groundfish from Canada (including both whole and filleted groundfish) received benefits which constitute subsidies within the meaning of the countervailing duty law (51 FR 1010). In accordance with section 705 of the Act (19 U.S.C. 1671d), on March 24, 1986, the Department published its final determination that these imports are being subsidized (51 FR 10041).

On May 8, 1986, in accordance with section 705(d) of the Act [19 U.S.C. 1671d(d)], the ITC notified the Department of its determination that imports of certain fresh whole Atlantic groundfish are materially injuring a United States industry, and that imports of certain fresh Atlantic groundfish fillets are not materially injuring, threatening material injury to, or materially retarding the establishment of, a United States industry.

Therefore, in accordance with section 706 of the Act (19 U.S.C. 1671e), the Department directs United States Customs officers to assess, upon further advice by the administering authority pursuant to setion 706(a)(1) and 751 of the Act [19 U.S.C. 1671e(a)(1) and 1675], countervailing duties equal to the amount of the net subsidy for all entries of certain fresh whole Atlantic groundfish from Canada. These countervailing duties will be assessed on all unliquidated entries of certain fresh whole Atlantic groundfish from Canada entered, or withdrawn from warehouse, for consumption on or after January 9, 1986, the date on which the Department published its notice of "Preliminary Affirmative Countervailing Duty Determination" in the **Federal Register.**

On and after the date of publication of this notice, United States Customs officers must require, at the same time as importers would normally deposit estimated customs duties on this merchandise a cash deposit equal to 5.62 percent *ad valorem* on all entries of certain fresh whole Atlantic groundfish from Canada.

The Department also directs that suspension of liquidation be discontinued for entries of certain fresh Atlantic groundfish fillets. All estimated countervailing duties deposited on such entries shall be refunded and the appropriate bonds or other security released at time of liquidation.

This determination constitutes a countervailing duty order with respect to certain fresh whole Atlantic groundfish from Canada pursuant to section 706 of the Act (19 U.S.C. 1671e) and 355.36 of the Commerce Regulations (19 CFR 355.36).

We have deleted from the Commerce Regulations Annex III to 19 CFR Part 355 which listed countervailing duty orders currently in effect. Instead, interested parties may contact the Office of Information Services, Import Administration for copies of the updated list of orders currently in effect.

Notice of Review

In accordance with section 751(a)(1) of the Act [19 U.S.C. 1675(a)(1)], the Department hereby gives notice that, if requested, it will commence an administrative review of this order. For further information regarding this review, contact Mr. Richard Moreland at (202) 377-2768.

This notice is published in accordance with section 706 of the Act (19 U.S.C. 1671e) and 355.36 of the Commerce Regulations (19 C.F.R. 355.36).

John L. Evans,

Acting Deputy Assistant Secretary for Import Administration.

May 9, 1986.

BILLING CODE 3510-DS-M

[C-351-504]

Countervailing Duty Order; Certain Heavy Iron Construction Castings From Brazil

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: In its investigation concerning certain heavy iron construction castings from Brazil (heavy castings), the United States Department of Commerce (the Department) has determined that heavy castings from Brazil are receiving benefits which constitute subsidies within the meaning of the countervailing duty law. In a separate investigation, the United States International Trade Commission (ITC) determined that an industry in the United States is materially injured by reason of imports of heavy castings from Brazil.

Therefore, based on these findings, all unliquidated entries, or withdrawals from warehouse for consumption of heavy castings from Brazil made on or between August 12, 1985, the date on which the Department published its preliminary countervailing duty determination notice in the **Federal Register**, and December 11, 1985, and all entries, and withdrawals for consumption, on or after May 7, 1986, the date on which the ITC published its final determination in the **Federal Register**, will be liable for the assessment of countervailing duties. Further, a cash deposit of estimated countervailing duties must be made on all such entries, and withdrawals from warehouse, for consumption made on or after the date of publication of this countervailing duty order in the **Federal Register.**

EFFECTIVE DATE: May 15, 1986.

FOR FURTHER INFORMATION CONTACT: Thomas Bombelles, Office of Investigations, or Richard Moreland, Office of Compliance, International Trade Administration, United States Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-3174 or (202) 377-2768.

SUPPLEMENTARY INFORMATION: The Products covered by this order are heavy iron construction castings which are defined for purposes of this proceeding as manhole covers, rings and frames; catch basin grates and frames; and cleanout covers and frames; used for drainage or access purposes for public utility, water and sanitary systems. Manhole covers, rings and frames are currently provided for in item 657.0950 of the *Tariff Schedules of the United States Annotated* (TSUSA). All other heavy iron construction castings are subsumed in item 657.0990 of the TSUSA.

In accordance with section 703 of the Tariff Act of 1930, as amended (the Act) (19 U.S.C. 1671b), on August 12, 1985, the Department published its preliminary determination that there was reason to believe or suspect that imports of heavy castings from Brazil received benefits which constitute subsidies within the meaning of the countervailing duty law (50 FR 32462). On March 19, 1986, the Department published its final determination that these imports are being subsidized (51 FR 9491).

In accordance with section 705(d) of the Act (19 U.S.C. 1671d(d)), the ITC notified the Department that such imports of heavy castings from Brazil

materially injure a United States industry.

Therefore, in accordance with sections 706 and 751 of the Act (19 U.S.C. 1671e and 1675), the Department directs United States Customs officers to assess, upon further advice by the administering authority pursuant to section 706(a)(1) of the Act (19 U.S.C. 1671e(a)(1)), countervailing duties equal to the amount of the estimated net subsidy for all entries of heavy castings from Brazil. These countervailing duties with be assessed on all unliquidated entries of heavy castings entered, or withdrawn from warehouse, for consumption or or between August 12, 1985, the date on which the Department published its preliminary affirmative countervailing duty determination notice in the **Federal Register** (50 FR 32462) and December 11, 1985, and on all entries and withdrawals made on or after may 7, 1986, the date of publication of the ITC final affirmative determination in the **Federal Register**. Entries of heavy castings on or between December 11, 1985, and the day prior to the date of publication of the ITC final determination in the **Federal Register** are not liable for the assessment of countervailing duties since we cannot impose the suspension of the subject merchandise for more than 120 days without the issuance of a final affirmative ITC injury determination.

On and after the date of publication of this notice, United States Customs officers must require, at the same time as importers would normally deposit estimated duties on this merchandise, a cash deposit of 3.40 percent *ad valorem* on all entries of heavy castings from Brazil.

This determination constitutes a countervailing duty order with respect to certain heavy iron construction castings from Brazil, pursuant to section 706 of the Act (19 U.S.C. 1671e) and section 355.36 of the Commerce Regulations (19 CFR 355.36). We have deleted from the Commerce Regulations, Annex III of 19 CFR Part 355, which listed countervailing duty orders currently in effect. Instead, interested parties may contract the Office of Information Services, Import Administration, for copies of the updated list of orders currently in effect.

Notice of Review

In accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)), the Department hereby gives notice that, if requested, it will commerce an administrative review of this order. For further information regarding this review, contact Mr. Richard Moreland at (202) 377–2786.

This notice is published in accordance with section 706 of the Act (19 U.S.C. 1671e) and § 355.36 of the Commerce Regulations (19 CFR 355.36).

John L. Evans,

Acting Deputy Assistant Secretary for Import Administration.

Importers and Retailers' Textile Advisory Committee; Partially Closed Meeting

May 13, 1986.

A meeting of the Importers and Retailers' Textile Advisory Committee will be held on May 29, 1986 at 10:30 a.m., Herbert C. Hoover Building, Room 4830, 14th Street and Constitution Avenue, NW., Washington, DC 20230. (The Committee was established by the Secretary of Commerce on August 13, 1963 to advise Department officials of the effects on import markets of cotton, wool, and man-made fiber textile and apparel agreements.)

General Session: 10:30 a.m. Review of import trends, international activities, report on conditions in the market, and other business.

Excutive Session: 11:30 a.m. Discussion of matters properly classified under Executive Order 12356 (3 CFR Part (1982)) and listed in 5 U.S.C. 552b(c)(1) and (9).

The general session will be open to the public with the limited number of seats available. A Notice of Determination to close meetings or portions of meetings to the public on the basis of 5 U.S. C553b(c)(1) and (c)(9) has been approved in accordance with the Federal Advisory Committee Act. A copy of the notice is available for public inspection and copying in the Central Facility Room 6628, U.S. Department of Commerce, (202) 377–3031.

For futher information or copies of the minutes contact Helen L. LeGrande (202) 377–3737.

BILLING CODE 3510-DR-M

Wood Shake and Shingle Industry Prospects for Adjustment Assistance for Firms

AGENCY: International Trade Administration, Trade Development, Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, pursuant to section 264 of the Trade Act of 1974, has conducted a study of firms in the wood shake and shingle industry; such a study is required whenever the U.S. International Trade Commission (USITC) begins an investigation under section 201 of the Trade Act.

In its report issued March 25, 1986, the Commission determined by a 5–0–1 vote that wood shakes and shingles were being imported into the United States in such increased quantities as to threaten serious injury to the domestic industry producing like or directly competitive articles. Three Commissioners recommended the imposition of a new 35 percent duty for a 5-year period. Two Commissioners recommended trade

adjustment assistance, while the sixth Commissioner opposed import relief.

According to section 202 of the 1974 Trade Act, the President shall determine within 60 days after receiving a report from the Commission containing an affirmative finding, whether to provide import relief and what methods and amounts of import relief will be provided.

In 1985, imports of wood shakes and shingles totaled 4.9 million squares (a "square" is the equivalent of 100 square feet of surface area and contains between three to five bundles of shakes and shingles), up about 29 percent from 1980 levels. During the 1976–84 period, industry employment declined 53 percent and domestic production declined by 49 percent.

Under Section 251 of the 1974 Trade Act, a firm may petition the Department of Commerce to be certified as eligible to apply for trade adjustment assistance; certification requires that increased imports of articles like or directly competitive with those produced by the petitioning firm contributed importantly to: (1) Absolute declines in sales or production, or both, and (2) the separation, or threat of separation, of a significant number or proportion of its workers. A trade-impacted producer may petition the Department for certification at any time regardless of a prospective Commission finding or its results.

As of the date of this report, 39 firms in the domestic wood shake and shingle industry have been certified and 24 of those firms have received assistance. Based on employment, sales, production, and import data obtained by the USITC in its investigation, it appears likely that several other firms could be certified as eligible for adjustment assistance under the 1986 Trade Act extension legislation. However, an approximate number cannot be determined without specific data on each company.

The program of adjustment assistance for firms authorized by the Trade Act under Title II, Chapter 3, and administered by the International Trade Administration (ITA) in the Department of Commerce, expired on December 18, 1985. The Consolidated Budget Reconciliation Act of 1986 extends the program authorization until September 30, 1991, but only technical assistance is available for trade-impacted firms (financial assistance is no longer available). Technical assistance may be used for management and operational assistance, feasibility studies and related research to aid in developing and implementing a firm's recovery plan.

Under the Public Works and Economic Development Act of 1965 (PWEDA), as amended, direct and indirect assistance to firms is available without Trade Act certification through the Economic Development Administration of the Department of Commerce. Firms located in EDA-designated "redevelopment areas" and "economic development centers" can benefit directly from business development loans and guarantees. It may also be possible for firms to benefit indirectly from public works financing. PWEDA authorizes technical assistance to firms regardless of location, and grants loanable funds to communities with actual or threatened unemployment.

The Farmers Home Administration (FmHA) of the Department of Agriculture has a program which may benefit firms in the industry. Loan guarantees are available to businesses located in areas other than cities with a population over 50,000. FmHA can also make loans to public bodies, such as local governments and development organizations, in areas other than cities of over 20,000 population.

The Small Business Administration (SBA) administers three programs of potential assistance to small businesses. Most wood shake and shingle producers would qualify as a "small business" under the SBA definition.

FOR FURTHER INFORMATION CONTACT: Donald W. Butts, Office of Forest Products and Domestic Construction, Room 4512, U.S. Department of Commerce, Washington, DC 20230, telephone 202–377–0382. Additional copies of the report, "Prospects for Adjustment Assistance for Firms in the Wood Shake and Shingle Industry" are available from the previous address.

David Diebold,

Deputy Assistant Secretary for Trade Development.

BILLING CODE 3510-DR-M

Harvard School of Public Health; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 AM and 5:00 PM in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket No. 85–054. Applicant: Harvard School of Public Health, Cambridge, MA 02138. Instrument: Mass Spectrometer System, Model MMZAB. Manufacturer: VG Analytical Ltd., United Kingdom. Intended use: See notice of 50 FR 27999.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value of the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument provides (1) a mass range of 1 to 10 000 atomic mass units at an accelerating potential of 10 000 volts, (2) a scan speed of 0.1 seconds per decade and (3) FAB capability. The National Institutes of Health advises in its memorandum dated May 7, 1985 that (1) these capabilities are pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

We know of no other instrument or apparatus of equivalent scientific value to the foreign instrument which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials)

Frank W. Creel,

Director, Statutory Import Programs Staff.

BILLING CODE 3510-DS-M

National Bureau of Standards

[Docket No. 60456–6056]

Proposed Federal Information Processing Standard for Computer Graphics Metafile (CGM)

AGENCY: National Bureau of Standards, Commerce.

ACTION: Notice of proposed Federal information processing standard (FIPS).

SUMMARY: This proposed standard adopts a voluntary industry standard, Computer Graphics Metafile, for Federal use. The American National Standards Institute (ANSI) is expected to approve this standard in July 1986 as an American National Standard (ANS). The FIPS will adopt the final standard as approved by ANSI.

Prior to the submission of this proposed standard to the Secretary of Commerce for review and approval as a FIPS, it is essential to assure that consideration is given to the needs and views of manufacturers, the public, and State and local governments. The purpose of this notice is to solicit such views.

This proposed Federal Information Processing Standard contains two sections: (1) An announcement section, which provides information concerning the applicability, implementation, and maintenance of the standard, is provided in its entirety in this notice; and (2) a specification portion which deals with the technical requirements of the standard, draft proposed American National Standard (dpANS) CGM. Interested parties may obtain a copy of the technical specifications from the Computer and Business Equipment Manufacturers Association (CBEMA), Attn: Sang, X3 Secretariat, 311 First Street NW., Washington, DC 20001, (202) 737–8888.

DATE: To be considered, comments on this proposed FIPS must be received on or before August 13, 1986.

ADDRESS: Comments concerning the adoption of CGM as a FIPS are invited and may be sent to Director, Institute for Computer Sciences and Technology, ATTN: Proposed FIPS for CGM, National Bureau of Standards, Technology Building, Room B154, Gaithersburg, MD 20899.

Written comments received in response to this notice will be made part of the public record and will be available for inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, Herbert C. Hoover Building, 14th Street between Pennsylvania and Constitution Avenues, NW., Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Mr. Mark Skall, Center for Programming Science and Technology, National Bureau of Standards, Gaithersburg, MD 20899, (301) 921–2431.

Dated: May 12, 1986.

Ernest Ambler,

Director.

Federal Information Processing Standards Publication _____

(date)

Announcing the Standard for Computer Graphics Metafile (CGM)

Federal Information Processing Standards Publications (FIPS PUBS) are issued by the National Bureau of Standards pursuant to section 111(f)(2) of the Federal Property and Administrative Services Act of 1949, as amended, Public Law 89–306 (79 Stat. 1127), Executive Order 11717 (38 FR 12315, dated May 11, 1973), and Part 6 of Title 15, Code of Federal Regulations (CFR).

1. *Name of Standard.* Computer Graphics Metafile (CGM) (FIPS PUB _____).

2. *Category of Standard.* Software Standard, Graphics.

3. *Explanation.* This publication announces the adoption of the American National Standard for Computer Graphics Metafile, ANSI X3.122–1986, as a Federal Information Processing Standard (FIPS). ANSI X3.122–1986 is a graphics data interface standard which specifies a file format suitable for the description, storage, and communication of graphics (pictorial) information in a device independent manner. The purpose of the standard is to facilitate the transfer of graphical information between different graphical software systems, different graphical devices, and different computer graphics installations.

4. *Approving Authority.* Secretary of Commerce.

5. *Maintenance Agency.* Department of Commerce, National Bureau of Standards (Institute for Computer Sciences and Technology).

6. *Cross Index.* American National Standard X3.122–1986, Computer Graphics Metafile (CGM).

7. *Related Documents.*

a. Federal Information Resources Management Regulation 201–8.1, Federal ADP and Telecommunications Standards.

b. American National Standard Graphical Kernel System, GKS, ANSI/ASC X3.124–1985.

8. *Objectives.* The primary objectives of this standard are:

—To allow the portability of graphics data among different graphics installations and devices. This encourages a uniform interface for noninteractive picture description.

—To promote the exchange of graphic information enabling installations to share data and reduce time spent recomputing in efforts to regenerate graphics data.

—To promote the use of a standard set of elements using standard terminology, which aids graphics programmers in using graphics methods.

9. *Applicability.*

a. This standard is intended for use in computer graphics applications that are either developed or acquired for government use.

b. The use of this standard is strongly recommended when one or more of the following situations exist:

—A graphics metafile is maintained at a central facility for a decentralized system that employs graphics devices of different makes and models that must utilize the data.

—A graphics metafile is required to preserve picture data when conversion or migration from one graphics system to another is necessary and the two systems are not necessarily compatible.

—A graphics metafile is intended for information interchange between a source system and a target system that are not necessarily compatible.

—A graphics metafile is intended for archival pruposes and the format and access to a standardized structure is critical to guarantee long life availability and utilization of the data.

c. Non-standard features should be used only when the needed operation or function cannot reasonably be implemented with the standard features alone. Although non-standard features can be very useful, it should be recognized that the use of these or any other non-standard elements may make the interchange of graphics picture data and future conversion more difficult and costly.

10. *Specifications.* American National Standard ANSI X3.122–1986, Computer Graphics Metafile, defines the scope of the specifications, the syntax and semantics of the CGM elements and requirements for a conforming implementation. All of these specifications apply to Federal government implementation of this standard.

11. *Implementation.* The implementation of this standard involves two areas of consideration: acquisition of CGM implementations and interpretations of the standard.

11.1 *Acquisition of CGM Implementations.* This publication is effective (six months after the date of publication of final document in the **Federal Register**). Implementations acquired for Federal use after this date should implement the standard. Conformance to this standard should be considered whether computer graphics metafile systems are developed internally, acquired as part of an ADP system procurement, acquired by separate procurement, used under an ADP leasing arrangement, or specified for use in contracts for programming services.

A transition period provides time for industry to produce metafile systems conforming to the standard. The transition period begins on the effective date and continues for twelve (12) months thereafter. The provisions of this publication apply to orders placed after the date of this publication; however, a metafile package not conforming to this standard may be acquired for interim use during the transition period.

11.2 *Interpretation of FIPS CGM.* Resolution of questions regarding this

standard will be provided by NBS. Questions concerning the content and specifications should be addressed to: Director, Institute for Computer Sciences and Technology, ATTN: CGM Interpretation, National Bureau of Standards, Gaithersburg, MD 20899.

12. *Waivers.* Under certain exceptional circumstances the head of the agency is authorized to waive the application of provisions of this FIPS PUB. Exceptional circumstances which would warant a waiver are:

a. Significant, continuing cost or efficiency disadvantages will be encountered by the use of this standard and,

b. The interchange of information between the system for which the waiver is sought and other systems is not anticipated.

Agency heads may act only upon written waiver requests containing the information detailed above. Agency heads may approve requests for waivers only by a written decision which explains the basis upon which the agency head made the required finding(s). A copy of each such decision, with procurement sensitive or classified portions clearly identified, shall be sent to the Director, Institute for Computer Sciences and Technology, National Bureau of Standards, Gaithersburg, Maryland 20899.

When the determination on a waiver request applies to the procurement of equipment and/or services, a notice of the waiver determination must be published in the *Commerce Business Daily* as a part of the notice of solicitation for offers of an acquisition or, if the waiver determination is made after that notice is published, by amendment to such notice.

A copy of the waiver request, any supporting documents, the document approving the waiver request and any supporting and accompanying document(s), with such deletions as the agency is authorized and decides to make under 5 U.S.C. 552(b), shall be part of the procurement documentation and retained by the agency.

BILLING CODE 3510-CN-M

National Oceanic and Atmospheric Administration

Marine Mammals; Issuance of Permit; Blank Park Zoo of Des Moines

On March 28, 1986, notice was published in the **Federal Register** (51 FR 10650) that an application had been filed by Blank Park Zoo of Des Moines for a permit to take for public display five (5) California sea lions (*Zalophus californianus*) and three (3) harbor seals (*Phoca vitulina*) from beached/stranded or captive born stocks.

Notice is hereby given that on May 8, 1986, as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), the National Marine Fisheries Service issued a Permit for the above taking subject to certain conditions set forth therein.

The Permit is available for review by interested persons in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, DC;

Director, Southeast Region, National Marine Fisheries Service, 9450 Koger Boulevard, St. Petersburg, Florida 33702; and

Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731-7415.

Dated: May 9, 1986.

Richard B. Roe,

Director, Office of Fisheries Management, National Marine Fisheries Service.

[FR Doc. 86-10996 Filed 5-14-86; 8:45 am]

BILLING CODE 3510-22-M

Marine Mammals; Issuance of Permit; Dr. Douglas Wartzok (P375)

On March 14, 1986, notice was published in the **Federal Register** (51 FR 8668) that an application had been filed by Dr. Douglas Wartzok, Professor and Chairman, Department of Biological Sciences, Purdue University, Fort Wayne, Indiana 46805 to take bowhead whales in the Beaufort Sea by radio-tagging and harassment.

Notice is hereby given that on May 6, 1986, as authorized by the provisions of the Marine Mammal Protection Act (16 U.S.C. 1361-1407) and the Endangered Species Act of 1973 (16 U.S.C. 1531-1543), the National Marine Fisheries Service issued a Permit for the above taking subject to certain conditions set forth therein.

Issuance of this Permit as required by the Endangered Species Act of 1973 is based on a finding that such Permit: (1) was applied for in good faith; (2) will not operate to the disadvantage of the endangered species which are the subject of this Permit; (3) and will be consistent with the purposes and policies set forth in Section 2 of the Endangered Species Act of 1973. This Permit was also issued in accordance with and is subject to Parts 220-222 of Title 50 CFR, the National Marine Fisheries Service regulations governing endangered species permits.

The Permit is available for review by interested persons in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, DC;

Director, Alaska Region, National Marine Fisheries Service, 709 West 9th Street, Federal Building, Juneau, Alaska 99802.

Dated: May 9, 1986.

Richard B. Roe,

Director, Office of Fisheries Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Import Restraint Limits for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in the Republic of Singapore

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 16, 1986. For further information contact Ross Arnold, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Background

On March 12, 1986 a notice was published in the **Federal Register** (51 FR 8527), which announced extension of the limits established for Categories 333, 359, 636 and 659pt. (all TSUSA items except 384.2105, 384.2115, 384.2120, 384.2125, 384.2646, 384.2647, 384.2648, 384.2649, 384.2652, 384.8651, 384.8652, 384.8653, 384.8654, 384.9356, 384.9357, 384.9358, 384.9359, 384.9365), among others, produced or manufactured in Signapore and exported during the six-month period which began on January 1, 1986 and extends through June 30, 1986.

Under the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of August 21, 1961, as amended, and extended, the Governments of the United States and Singapore have agreed to further amend their agreement to increase the limits for cotton and man-made fiber textile products, produced or manufactured in

Singapore and exported during the six-month period which began on January 1, 1986 and extends through June 30, 1986 in Category 333 from 9,669 dozen to 19,669 dozen, Category 359 from 76,067 pounds to 100,000 pounds, Category 636 from 25,000 dozen to 40,000 dozen, and Category 659pt. from 125,000 pounds to 160,000 pounds. The two countries also agreed to establish restraint limits for wool products in Categories 434 and 435 at a level of 2,926 dozen for each category, produced and manufactured in Singapore and exported during the period which began on January 1, 1986 and extends through June 30, 1986. The letter to the Commissioner of Customs which follows this notice implements the agreed amendments.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

William H. Houston III,

Chairman, Committe for the Implementation of Textile Agreements.

May 12, 1986.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of March 7, 1986 which directed you to prohibit entry of certain cotton, wool, and man-made fiber textile products, produced or manufactured in Singapore and exported during the six-month period which began on January 1, 1986 and extend through June 30, 1986.

Effective on May 16, 1986, the directive of March 7, 1986 is hereby amended to increase the limits established for the following categories:

Categories	6-mo. restraint limits [1]
333	19,669 dozen.
359	100,000 pounds.
636	40,000 dozen.
659pt. [2]	160,000 pounds.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1985.

[2] In Category 659pt., all TSUSA numbers in the category except 384.2105, 384.2115, 384.2120, 384.2125, 384.2646, 384.2647, 384.2649, 384.2649, 384.2652, 384.8651, 384.8652, 384.8653, 384.8654, 384.9358, 384.9357, 384.9358, 384.9359, 384.9365.

Also effective on May 16, 1986, the directive of March 7, 1986 is hereby amended to include limits for Categories 434 and 435 at a level of 2,926 dozen for each catetory.

Charges for Categories 434 and 435 that have been made to the groups and aggregate limits shall be the same charges, in correct units, made to the category limits established in this directive.

Textile products in Categories 434 and 435 which have been exported to the United States prior to January 1, 1986 shall not be subject to this directive.

Textile products in Categories 434 and 435 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484 (a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), DEcember 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Extending Import Restraint Limits for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in the Republic of Singapore; Correction

May 19, 1986.

On March 12, 1986, a notice was published in the **Federal Register** (51 FR 8527), which announced the aggregate, group and individual category limits under a further extension of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of August 21, 1961, as amended and extended, between the Governments of the United States and the Republic of Singapore. The limit for men's and boys' knit shirts of man-made fibers in Category 638, exported during the period which began on January 1, 1986 and extends through June 30, 1986, was inadvertently omitted from the letter to the Commissioner of Customs which followed that notice and should have been included as follows:

Category	6-month restraint limit (doz)
638	212,500

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

DEPARTMENT OF DEFENSE

Department of the Navy

Chief of Naval Operations, Executive Panel Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app.), notice is hereby given that the Chief of Naval Operations (CNO) Executive Panel Advisory Committee will meet June 17–18, 1986, from 9 a.m. to 5 p.m. each day, at 4401 Ford Avenue, Alexandria, Virginia. All sessions will be closed to the public.

The purpose of this meeting is to review maritime issues as they impact national security policy and requirements. The entire agenda for the meeting will consist of discussions of key issues related to national security policy and related intelligence. These matters constitute classified information that is specifically authorized by Executive order to be kept secret in the interest of national defense and is, in fact, properly classified pursuant to such Executive order. Accordingly, the Secretary of the Navy has determined in wriing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of title 5, United States Code.

For further information concerning this meeting, contact Lieutenant Paul G. Butler, Executive Secretary of the CNO Executive Panel Advisory Committee, 4401 Ford Avenue, Room 928, Alexandria, Virginia 22302-0268. Phone (703) 756-1205.

Dated: May 7, 1986.

William F. Roos, Jr.,

Lieutenant, JAGC, U.S. Naval Reserve, Federal Register Liaison Officer.

[FR Doc. 86-10919 Filed 5-14-86; 8:45 am]

BILLING CODE 3810-AE-M

Naval Research Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5

U.S.C app.), notice is hereby given that the Naval Research Advisory Committee Panel On U.S. Navy Anti-Submarine Warfare Technology 1986–1996 will meet on June 4–6, 1986, at the Naval Research Laboratory, Building 43, Washington, DC. The meeting will commence at 8:30 A.M. and terminate the 5:30 P.M. on June 4; and commence at 8:30 A.M. and terminate at 5:00 P.M. on June 5 and 6, 1986. All sessions of the meeting will be closed to the public.

The purpose of the meeting is to evaluate the security of the present and future U.S. Navy surface fleet and undersea surveillance systems. The agenda will include technical briefings on the threat, surface ASW response, strategic and tactical performance requirements, undersea surveillance, and emerging technology. These briefings will contain classified information that is specifically authorized under criteria established by Executive order to be kept secret in the interest of national defense and are in fact properly classified pursuant to such Executive order. The classified and nonclassified matters to be discussed are so inextricably intertwined as to preclude opening any portion of the meeting. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the pubic because they will be concerned with matters listed in section 552b(c)(1) of title 5, United States Code.

For further information concerning this meeting contact: Commander T. C. Fritz, U.S. Navy, Office of Naval Researach (Code 100N), 800 North Quincy Street, Arlington, VA 22217–5000, Telephone number (202) 696–4870.

Dated: May 9, 1986.

William F. Roos, Jr.,

Lieutenant, JAGC, U.S. Naval Reserve, Federal Register Liaison Officer.

BILLING CODE 3810-AE-M

Board of Advisors to the President, Naval War College, Newport, RI; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app.), notice is given that the Board of Advisors to the President, Naval War College, will meet on June 5, 1986, in Room 210, Conolly Hall, Naval War College, Newport, Rhode Island. The meeting will commence at 8:30 a.m., and the purpose is to elicit the advice of the Board on educational, doctrinal, and research policies and programs. The agenda will consist of presentations and discussions on the curriculum, programs and plans of the college, and is open to the public. For further information contact: Mrs. Mary Guimond, Executive Assistant to the Dean of Academics, Naval War College, Newport, Rhode Island 02841–5010. Telephone number (401) 841–3589.

Dated: May 9, 1986.

William F. Roos, Jr.,

Lieutenant, JAGC, U.S. Naval Reserve, Federal Register Liaison Officer.

BILLING CODE 3810-AE-M

DEPARTMENT OF EDUCATION

Office of Postsecondary Education

Guaranteed Student Loan Program and Plus Program

AGENCY: Department of Education.

ACTION: Notice of special allowance for quarter ending March 31, 1986.

The Assistant Secretary for Postsecondary Education anounces a special allowance to holders of eligible loans made under the Guaranteed Student Loan Program (GSLP) or the PLUS Program. This special allowance is provided for under section 438 of the Higher Education Act of 1965 (the Act), as amended (20 U.S.C. 1087–1).

Pursuant to the requirements of section 252 of Pub. L. 99–177, Balanced Budget and Emergency Deficit Control Act of 1985 (popularly known as the Gramm-Rudman-Hollings Act), the President issued a sequestration order on February 4, 1986, directing implementation of the reductions contained in that law. Section 256 of Pub. L. 99–177 provides that if a sequestration order is issued, the special allowance formula for loans made after the order takes effect and before the end of the fiscal year is adjusted by reducing the rate provided in section 438(b)(2)(A)(iii) of the Higher Education Act by .4 percent. The reduction will apply to the first four special allowance payments on loans made on or after March 1, 1986, and before October 1, 1986.

Except for loans subject to section 438(b)(2)(B) of the Act, 20 U.S.C. 1087–1(b)(2)(B), for the quarter ending March 31, 1986, the special allowance will be paid at the following rates:

	Applicable interest rate (percent)	Annual special allowance rate (percent)	Special allowance rate (percent) for quarter ending Mar. 31, 1986
I. GSLP loans or PLUS loans made prior to Oct. 1, 1981.	7	3.625	0.90625
	9	1.625	0.40625
II. GSLP loans or PLUS loans made on or after Oct. 1, 1981:			
A. Loans not subject to reduction order.	7	3.56	0.89
	8	2.56	0.64
	9	1.56	0.39
	12	0.00	0.00
	14	0.00	0.00
B. Loans subject to reduction order.	7	3.16	0.79
	8	2.16	0.54
	9	1.16	0.29
	12	0.00	0.00

The Assistant Secretary determines the special allowance rate in the manner specified in the Act, for loans at each applicable interest rate by making the following four calculations:

(a) *Step 1.* Determine the average bond equivalent rate of the 91-day Treasury Bill auctioned during the quarter for which this notice applies (7.06 percent for the quarter ending March 31, 1986);

(b) *Step 2.* Subtract from that average the applicable interest rate (7, 8, 9, 12, or 14 percent) of loans for which a holder is requesting payment;

(c) *Step 3.* (1) Add 3.5 percent to the remainder, and, in the case of loans made before October 1, 1981, round the sum upward to the nearest one-eighth of one percent; or

(2) Add 3.1 percent to the remainder, in case of loans subject to the reduction order pursuant to Pub. L. 99–177; and

(d) *Step 4.* Divide the resulting percent in Step 3 (either (c)(1) or (c)(2), as applicable) by four.

FOR FURTHER INFORMATION CONTACT: Ralph B. Madden, Chief, Policy Section, Guaranteed Student Loan Branch, Division of Policy and Program Development, Department of Education on (202) 245–2475.

(Catalog of Federal Domestic Assistance No. 84.032, Guaranteed Student Loan Program and PLUS Program)

Dated: May 9, 1986.

C. Ronald Kimberling,

Assistant Secretary for Postsecondary Education.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Financial Assistance Award (Grant); Restriction of Eligibility

AGENCY: U.S. Department of Energy (DOE); San Francisco Operations Office.

ACTION: Notice of restriction of eligibility for grant award.

SUMMARY: DOE announces that it plans to conduct a competitive solicitation among the U.S. Territories and Puerto Rico inviting them to submit proposals for special energy projects. It is anticipated that the total amount of funding available for this program shall be $476,000. The Statutory Authority for use of a grant award is Pub. L. 95–91, DOE Organization Act, and Pub. L. 96–597.

Grant No. DE–FG03–86SF16333

Scope of Project

The DOE proposes to establish a competitive solicitation among the U.S. Territories and Puerto Rico inviting them to submit proposals for projects to address priority needs and opportunities as identified in the 1982 *Territorial Energy Assessment*, which was prepared by DOE in response to a mandate in the Omnibus Territories Act, Pub. L. 96–597. The actual work to be accomplished will be determined by the several projects selected for awards. These will be chosen by an interagency selection panel made up of a designee by the Director of the Office of State and Local Assistance Programs in DOE, a designee from the DOI Office of Territorial Affairs and the Director of the Pacific Site Office of DOE. All projects selected will be in the general categories of promoting the use of proven technologies that employ indigenous renewable resources or serve to reduce the costs and dependencies of the territories on imported fuels. A requirement of the solicitation will be for the territorial energy offices to work with their resident expertise in preparing proposals to be submitted thru the territorial office.

This solicitation will be on a restricted eligibility basis to the U.S. Territories and Puerto Rico.

FOR FURTHER INFORMATION CONTACT: Robert S. Todaro, U.S. Department of Energy, San Francisco Operations Office, 1333 Broadway, Oakland, CA 94612.

Issued in Oakland, California, April 28, 1986.

R.A. Du Val,

Manager, San Francisco Operations Office.

BILLING CODE 6450–01–M

Economic Regulatory Administration

Mountain Fuel Supply Co. and Wexpro Co. Proposed Consent Order

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of proposed consent order and opportunity for comment.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces a proposed Consent Order for $990,000 with Mountain Fuel and Wexpro and provides an opportunity for public comment on the terms and conditions of the proposed Consent Order.

DATES: Comments by June 16, 1986.

ADDRESS: Send comments to: "Mountain Fuel/Wexpro Consent Order Comments," Office of the Solicitor, Economic Regulatory Administration, U.S. Department of Energy, Room 3H–017, RG–43, 1000 Independence Avenue, SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT: Francine B. Pinto, Office of the Solicitor, Economic Regulatory Administration, U.S. Department of Energy, Room 3F–070, RG–43, 1000 Independence Avenue, SW., Washington, DC 20585. Copies of the proposed Consent Order may be obtained free of charge by writing or calling this office (202) 252–4102.

SUPPLEMENTARY INFORMATION: On April 18, 1986, the ERA executed a proposed Consent Order with Mountain Fuel Supply Company and Wexpro Company. Under 10 CFR 205.199J(b), a proposed Consent Order which involves the sum of $500,000 or more, excluding interest and penalties, becomes effective no sooner than thirty (30) days after publication of a notice in the Federal Register requesting comments concerning the proposed Consent Order. Although ERA has signed and tentatively accepted the proposed Consent Order, the ERA may, after consideration of the comments it receives, withdraw its acceptance and, if appropriate, attempt to negotiate a modification of the Consent Order, or issue the Consent Order as signed.

I. Background

During the period January 1, 1975 through December 31, 1980, Mountain Fuel Supply Company (Mountain Fuel) and Wexpro Company (Wexpro) engaged in the production and sale of crude oil from the Dry Piney Field located in Sublette County, Wyoming. Accordingly, Mountain Fuel and Wexpro were "producers" of crude oil, as defined in 19 CFR 212.31, and were subject to the regulations governing first sales of domestic crude oil in 10 CFR, Part 212, Subpart D. During the period January 1, 1975 to December 31, 1976 the Dry Piney Field was operated by Mountain Fuel. From January 1, 1977 to December 31, 1980 Wexpro operated the field. During this period the ERA conducted an audit of the sales of crude oil made by Mountain Fuel and Wexpro from the Dry Piney Field properties. The audit concluded that these sales were made at prices in excess of the maximum lawful ceiling prices provided by Subpart D.

On July 15, 1982, DOE issued a Proposed Remedial Order (PRO) to Mountain Fuel. The PRO alleged that Mountain Fuel caused overcharges in the amount of $468,649.16 during the audit period attributable to sales from the Dry Piney Field. Mountain Fuel and Wexpro filed a Joint Statement of Objections to the PRO on September 22, 1982. On December 13, 1984 ERA filed a motion to join Wexpro as a party to the proceedings. On December 21, 1984 Mountain Fuel and Wexpro filed a joint response to ERA's motion in which they stated that they did not oppose ERA's motion and acknowledged that on January 1, 1977 Wexpro became the operator of the Dry Piney Field properties.

In their Statement of Objections, the firms admitted that an invalid posted price had been utilized in pricing crude oil from the Dry Piney Field from January 1, 1975 through January 31, 1976 and acknowledged that Mountain Fuel was liable for the overcharges during this period. The firms contended, however, that the posted price which was used from February 1, 1976 through December 31, 1980 was a valid price and that no overcharges occurred after January 31, 1976. In addition Mountain Fuel and Wexpro generally challenged the application of the operator liability doctrine, specifically alleging that they should not be held responsible for overcharges related to any volumes of crude oil taken in kind by royalty and working interest owners in the Dry Piney Field. The firms also raised objections to the interest rates and remedial measures specified in the PRO.

After considering briefs and oral argument, DOE's Office of Hearings and Appeals issued the PRO as a Remedial Order (RO) to Mountain Fuel and Wexpro on November 6, 1985. In the RO, OHA found that prices contained in certain price bulletins circulated by Amoco Production Company constituted the highest posted prices applicable to production from the Dry Piney properties operated by the firms. The RO concluded that at different times during the audit period Mountain Fuel

and Wexpro exceeded the applicable Amoco prices. Under this decision, Mountain Fuel and Wexpro's liability, inclusive of interest, is approximately $1,246,000. On December 12, 1985, Mountain Fuel and Wexpro appealed this decision to the Federal Energy Regulatory Commission.

Throughout the foregoing proceeding, Mountain Fuel and Wexpro have claimed that the posted price utilized from February 1, 1976 to December 31, 1980 was a valid price and that no overcharges occurred after January 31, 1976. The firms have also maintained that they should not be held liable for overcharges related to volumes of crude oil taken in kind by interest owners because the interest owners set their own sales prices. Based on the analysis of the firms' arguments and the entire record in this proceeding, and in light of the expense to the government associated with any additional litigation, ERA believes that a payment of $990,000 is a satisfactory compromise of the issues raised in this audit. This amount includes interest.

II. Consent Order

The proposed Consent Order has been entered into in order to resolve all civil and administrative disputes, claims, and causes of action by DOE relating to Mountain Fuel's and Wexpro's compliance with the federal petroleum price and allocation regulations during the period January 1, 1975 through December 31, 1980. Although Mountain Fuel and Wexpro contend in all respects that they correctly construed and applied the applicable regulations, Mountain Fuel and Wexpro have entered into the proposed Consent Order to avoid the expense of litigation and the disruption of business. DOE believes that the proposed Consent Order is in the public interest and provides a satisfactory resolution of the issues raised by the audit.

III. Refunds

Under the terms of the proposed Consent Order, Mountain Fuel and Wexpro shall pay to DOE all of the monies deposited in the escrow account established by the firms on behalf of DOE inclusive of all interest accrued since January 31, 1980. The refund will be deposited in a suitable account for appropriate distribution by DOE.

IV. Submission of Written Comments

Interested persons are invited to submit written comments concerning the terms and conditions of the proposed Consent Order to the address given above. The ERA will consider all comments it receives by 4:30 pm, local time, on the 30th day after the date of publication of this notice. Any information or data considered confidential by the person submitting it must be identified as such in accordance with the procedures in 10 CFR 205.9(f).

Issued in Washington, DC on the 5th day of May, 1986.

Carl A. Corrallo,

Solicitor, Office of the Solicitor, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 86-30-NG]

ANR-TransCanada Energy Co.; Application To Import Natural Gas From Canada

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of application for blanket authorization to import natural gas from Canada for short-term and spot sales.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on April 25, 1986, of an application filed by ANR-TransCanada Energy Company (ANR-TransCanada Energy) for blanket authorization to import up to 100 Bcf of Canadian natural gas for a period of two years beginning on the date of first delivery. The gas would be supplied from sources in Alberta, Canada, for sale on a short-term basis to U.S. purchasers. The specific terms of each import and sale would be negotiated on an individual basis including the price and volumes. According to ARN-TransCanada Energy, the transactions it comtemplates will use existing pipeline facilities. ANR-TransCanada Energy proposes to file quarterly reports with the ERA giving the specific details of each transaction.

The application was filed with the ERA pursuant to section 3 of the Natural Gas Act and DOE Delegation Order No. 0204-111. Protests, motions to intervene, notices of intervention, and written comments are invited.

DATES: Protests, motions to intervene, or notices of intervention, as applicable, and written comments are to be filed no later than June 16, 1986.

FOR FURTHER INFORMATION CONTACT:

Olga Ronkovich, National Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Forrestal Building, Room GA-076, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252-6116

Diane Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E-042, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252-6667.

SUPPLEMENTARY INFORMATION: The decision on this application will be made consistent with the DOE's gas import policy guidelines, under which competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties that may oppose this application should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. The applicant has asserted that this import arrangement is competitive. Parties opposing the arrangement bear the burden of overcoming this assertion.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate procedural action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590. They should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA-076, RG-23, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, 20585, (202) 252-9478. They must be filed no later than 4:30 p.m., June 16, 1986.

The Administrator intends to develop a decisional record on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or a trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any

request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of ANR-TransCanada Energy's application is available for inspection and copying in the Natural Gas Division Docket Room, GA–076 at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays.

Issued in Washington, DC, May 5, 1986.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450–01–M

[ERA Docket No. 86–27–NG]

Michigan Consolidated Gas Co.; Application To Amend Authorization To Import Natural Gas From Canada

AGENCY: Department of Energy, Economic Regulatory Administration.

ACTION: Notice of Application to Amend Authorization to Import Natural Gas From Canada.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on April 16, 1986, of an application from Michigan Consolidated Gas Company (MichCon) to amend its existing import authorization to increase the maximum daily import of Canadian natural gas from 13,000 Mcf to 50,000 Mcf, pursuant to exchange agreements with Esso Chemical Canada (ECC), a Division of Imperial Oil Limited (Imperial), and Shell Western E&P Inc. (Shell).

Notice of MichCon's application to import up to 13,000 Mcf per day on an interruptible basis was issued on November 15, 1985, (50 FR 48467). DOE/ERA Opinion and Order No. 96 (1 ERA ¶70,614), issued December 20, 1985, authorized this import for a three-year period beginning on the date of first delivery which occurred on January 23, 1986. The gas is purchased by Imperial from TransCanada PipeLines Limited (TransCanada) and transported from the point of importation to MichCon by Great Lakes Gas Transmission Company (Great Lakes). The import represented a part of a proposed energy exchange, on an equivalent Btu basis, of natural gas for ethane that was being sold by Shell to MichCon. The ethane would now be delivered to ECC, a division of Imperial. Under the arrangement, MichCon incurs no additional cost above what it was paying Shell prior to the energy exchange.

The application was filed with the ERA pursuant to Section 3 of the Natural Gas Act and DOE Delegation Order No. 0204–111. Protests, motions to intervene, notices of intervention, and written comments are invited.

DATES: Protests, motions to intervene or notices of intervention, as applicable, and written comments are to be filed no later than June 16, 1986.

FOR FURTHER INFORMATION CONTACT:

Robert M. Stronach, Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Forrestal Building, Room GA–076, 1000 Independence Ave., SW., Washington, DC 20585 (202) 252–9622

Diane J. Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E–042, 1000 Independence Avenue, SW., Washington, DC 20585 (202) 252–6667

SUPPLEMENTARY INFORMATION: Since the commencement of the natural gas/ethane exchange authorized by Opinion and Order No. 96, deliveries of gas by TransCanada to Great Lakes, and by Great Lakes to MichCon, have varied dramatically from 0 to 13,000 Mcf per day. At the same time, however, deliveries of ethane to ECC have been comparatively constant. As a result, a substantial imbalance has accumulated and continues to grow. The imbalance (839,826 Mcf as of March 31, 1986) is far in excess of what MichCon contemplated when it originally sought authorization for the importation. However, TransCanada has informed MichCon that it is able from time to time to deliver to Great Lakes, and Great Lakes has indicated that it can deliver to MichCon, volumes of gas in excess of 13,000 Mcf per day. MichCon wishes to be able to take advantage of these opportunities to reduce the sizable exchange imbalance more quickly than would otherwise be the case.

The proposed increase in the maximum daily quantity from 13,000 Mcf of gas per day to 50,000 Mcf per day is solely for the purpose of reducing the exchange imbalance described above and will not result in an increase in the total volume of gas to be imported over the term of the authorization.

The decision on this application will be made consistent with the DOE's gas import policy guidelines, under which competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties that may oppose this application should comment in their responses on the issue of competitivenss as set forth in the policy guidelines. The applicant asserts that this import arrangement is competitive. Parties opposing the arrangement bear the burden of overcoming this assertion.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene, or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate procedural action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590. They should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA–076–A, RG–23, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252–9478. They must be filed no later than 4:30 p.m. e.d.t., June 1, 1986.

The Administrator intends to develop a decisional record on the application through responses to the notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request

that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or a trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based upon the official record, including the application and responses filed by parties pursuant to this notice, in accordnace with 10 CFR 590.316.

A copy of MichCon's application is available for inspection and copying in the Natural Gas Division Docket Room, GA-076-A (202) 252-9478 at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal Holidays.

Issued in Washington, DC, May 5, 1986.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 86-29-NG]

Natgas (U.S.), Inc.; Application to Export Natural Gas

AGENCY: Department of Energy, Economic Regulatory Administration.

ACTION: Notice of Application for Blanket Authorization to Export Natural Gas for Short-Term and Spot Sales.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on April 22, 1986, of an application filed by Natgas (U.S.), Inc. (Natgas) for a blanket authorization to export up to 75 Bcf of natural gas for a two-year period beginning on the date of first delivery for sales on a short-term or spot basis primarily in Canada. Natgas, a U.S. corporation, is a wholly-owned subsidiary of Pan-Alberta Resources Incorporated which is an affiliate of Pan-Alberta Gas Ltd. (Pan-Alberta), a Canadian company. Pan-Alberta, a reseller of Alberta gas in the Canadian domestic and U.S. export markets, currently supplies the gas imported by Northwest Alaskan Pipeline Company through the prebuild eastern and western legs of the Alaska Natural Gas Transportation System.

The gas for export would be supplied by Pan-Alberta or other Canadian or U.S. suppliers. Natgas anticipates that a very large percentage of the gas to be exported pursuant to a blanket authorization would be either gas produced in western Canada that is merely being transported across U.S. territory to buyers in eastern Canada, or Canadian and U.S. gas currently committed to U.S. buyers that woud be released by such buyers for spot or short-term sales in eastern Canada. Natgas proposes to export the gas either as an exporter on its own behalf or as a broker or agent on behalf of U.S. and/or Canadian suppliers and/or Canadian purchasers. The specific terms of each export and sale woud be negotiated individually in short-term or spot sale contracts, and would, Natgas contends, necessarily be market responsive. Natgas intends that the exported gas would be transported through existing pipeline facilities, and proposes filing quarterly reports to the ERA.

In support of its application, Natgas maintains that its proposed export arrangement is fully consistent with the public interest requirement of section 3 of the Natural Gas Act, and with the DOE's announced international gas trade policies that are designed to promote competition by fostering freely negotiated arrangements between commercial parties.

The application is filed with the ERA pursuant to section 3 of the Natural Gas Act and DOE Delegation Order No. 0204-111. Protests, motions to intervene, notices of intervention and written comments are invited.

DATE: Protests, motions to intervene or notices of intervention, as applicable, and written comments are to be filed no later than 4:30 p.m. e.d.t. on June 16, 1986.

FOR FURTHER INFORMATION CONTACT:

Norman Breckner, Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Forrestal Building, Room GA-076, 1000 Independence Avenue, SW., Washington, DC 20585 (202) 252-9482

Diane Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E-042, 1000 Independence Avenue, SW., Washington, DC 20585 (202) 252-6667

SUPPLEMENTARY INFORMATION: The decision on this application will be made consistent with the Secretary of Energy's Delegation Order to the Administrator of the ERA (49 FR 6690, February 22, 1984), under which the domestic need for the gas to be exported is the primary consideration in determining whether it is in the public interest. Parties that may oppose this application should comment in their responses on the issue of the domestic need for the gas as set forth in the Delegation Order. The applicant asserts that there is no domestic need for this gas. Parties opposing the arrangement bear the burden of overcoming this assertion.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene, or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate procedural action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590. They should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA-076-A, RG-23, Forrestal Building, 1000 Independence Avenue, SW, Washington, DC 20585 (202) 252-9478. They must be filed no later than 4:30 p.m. e.d.t. June 16, 1986.

The Administrator intends to develop a decisional record on the application through response to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or a trial-type hearing. Any request to file additional written comments should

explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by the parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of Natgas' application is available for inspection and copying in the Natural Gas Division Docket Room, GA-076 (202) 252-9478, at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., e.d.t. Monday through Friday, except Federal holidays.

Issued in Washington, DC, on May 5, 1986.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

[FR Doc. 86-10886 Filed 5-14-86; 8:45 am]

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

New Docket Prefix: TF; Gas Pipeline Tariffs Rate Adjustments

May 7, 1986.

Notice is hereby given that a new docket prefix has been created for interim rate adjustments pursuant to Purchased Gas Adjustment Provisions of FERC Gas Pipeline Tariffs.

The Commission has recently approved, on a case by case basis, procedures which will permit interstate natural gas pipelines to adjust their jurisdictional rates to reflect a revised average cost of gas between their regularly scheduled Purchased Gas Adjustment (PGA) adjustment dates. Such adjustments will be filed pursuant to the interim rate adjustment section of the Purchased Gas Adjustment Provisions (PGCA) of the General Terms and Conditions of their respective FERC Gas Tariffs.

These pipelines currently track changes in purchased gas costs under the *TA* docketing procedure whereby each pipeline is assigned an identification number and filings are docketed sequentially within each fiscal year. For example, TA86-2-42 identifies Transwestern Pipeline Corporation's (Transwestern) second PGA filing of FY 1986.

Although the interim rate adjustments are tendered pursuant to the pipelines' PGAC provisions and § 154.38(d)(iv) of the Commission's regulations they will not be subject to the same processing and review requirements of regular PGA filings. Accordingly, the Commission has established a new Prefix *TF* to identify such filings. Except for the *TF* prefix filings will be tracked under teh procedures establsished for the

Although the interim rate adjustments are tendered pursuant to the pipelines' PGAC provisions and§ 154.38(d)(iv) of the Commission's regulations they will not be subject to the same processing and review requirements of regular PGA filings. Accordingly, the Commission has established a new Prefix *TF* to identify such filings. Except for the *TA* prefix, filings will be tracked under the procedures established for the *TF* system. For example, the second adjustment in FY 1986 filed by Transwestern pursuant to section 19.6 (Interim Adjustments) of the PGA provision of its tariff will be designated *TF* 86-2-42. Filings made pursuant to Transwestern's overall PGA provision will retain the *TA* prefix.

The *TF* prefix is only applicable to those pipelines which have received specific Commission approval to make such interim rate adjustments.

The applicable filing fee for filings designated *TF* is the fee set forth in § 381.205 of the Commission's Regulations.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 9950-000, et al.]

Hydroelectric Applications; R.D. Bailey Hydro Partners et al.

Take notice that the following hydroelectric applications have been filed with the Federal Energy Regulation Commission and are available for public inspection:

1 a. Type of Application: Preliminary Permit.

b. Project No.: 9950-000.

c. Date Filed: March 21, 1986.

d. Application: R.D. Bailey Hydro Partners.

e. Name of Project: Bailey.

f. Location: Guyandotte River, Mingo and Wyoming Counties, West Virginia.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. Contact Person: Mr. Bruce J. Wrobel, Mitex, Inc., 91 Newbury Street, Boston, MA 02116 (617) 424-1888.

i. Comment Date: June 13, 1986.

j. Competing Application: Project No. 9928-000 Date Filed: March 3, 1986. Due Date: May 23, 1986.

k. Description of Project; The proposed project would use the existing R.D. Bailey Dam and Lake, owned and operated by the U.S. Army Corps of Engineers, and would consist of: (1) a new 1,200-foot-long penstock 6.5 feet in diameter; (2) a concrete powerhouse approximately 50 feet wide and 75 feet long; (3) two new turbine-generators of 3.5-MW capacity each; (4) a new 69-kV transmission line 4 miles in length; and (5) appurtenant facilities.

The estimated annual energy production is 29 million kWh. The hydraulic head is 120 feet. Project power would be sold.

l. This notice also consists of the following standard paragraphs: A8, B, C, and D2.

m. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on results of these studies Applicant would decide whether to proceed with more detailed studies and the preparation of an application for license to construct and operate the project. Applicant estimates that the cost of work to be performed under the preliminary permit would be $100,000.

2 a. Type of Application: Preliminary Permit.

B. Project No.: 9829-000.

c. Date Filed: December 31, 1985.

d. Applicant: Thomas J. Collins.

e. Name of Project: Fordam Hydropower Project.

f. Location: On Rock River Near Rockford, Winnebago County, Illinois.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. Contact Person: Mr. Thomas J. Collins, Suite 401, 600 West Jackson Boulevard, Chicago, IL 60606 (312) 454-1060.

i. Comment Date: June 16, 1986.

j. Description of Project: The proposed project would consist of: (1) an existing concrete dam 637 feet long and 10 feet high; (2) an existing reservoir with a normal surface elevation of 703 msl; (3) a proposed powerhouse housing two 300-kW generators for a total capacity of 600 kW; (4) a proposed 12-kV transmission line 1,000 feet long; and (5)

appurtenant facilities. The Applicant estimates that the average annual energy generation would be 4.0 GWh. The project energy would be sold to a utility or industry. The dam is owned by Commonwealth Edison Company, Chicago, Illinois.

k. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

l. Proposed Scope under this Permit: A perliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit is 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on result of these studies Applicant would decide whether to proceed with more detailed studies, and the preparation of an application for license to construct and operate the project. Applicant estimates that the cost of the work to be performed under the preliminary permit would be $95,000.

3 a. Type of Application: Preliminary Permit.

b. Project No.: 9949–000.

c. Date Filed: March 20,, 1986.

d. Applicant: WV Hydro Corporation.

e. Name of Project: Morgantown.

f. Location: At the U.S. Army Corps of Engineers' Morgantown Lock and Dam on the Monongahela River in Monongalia County, West Virginia.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. James B. Price, President, WV Hydro Corporation, 120 Calumet Court, Aiken, SC 29801, (803) 642–2749.

i. Comment Date: June 19, 1986.

j. Description of Project: The proposed run-of-river project would utilize the U.S.Army Corps of Engineers' Morgantown Lock and Dam and would consist: (1) a new intake structure and powerhouse at the east end of the dam with one turbine-generator unit with an installed capacity of 8 MW; (2) a short tailrace (3) a new 138–kV, 4,400-foot-long transmission line: and (4) other appurtenances. Applicant estimates an average annual generation of 28,000 MWh.

k. Purpose of Project: Project energy would be sold to the Monongahela Power Company.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

m. Proposed Scope under this Permit: A perliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 36 months during which time Applicant would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates that the cost of the studies under permit would be $100,000.

4 a. Type of Application: Preliminary Permit.

b. Project No.: 9974–000.

c. Date Filed: March 14, 1986.

d. Applicant: Robbins Lumber, Inc.

e. Name of Project: Robbins.

f. Location: St. George River in Waldo County, Maine.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Edwin A. Heisler, Richardson, Hildreth, Tyler & Troubh, Attorneys at Law, 465 Congress Street, Portland, ME 04101 (207) 774–5621.

i. Comment Date: June 23, 1986.

j. Description of Project: The proposed project would consist of: (1) a new 18-foot-high, 100-foot-long concrete and timber crib dam; (2) a reservoir with a surface area of 16 acres, a storage capacity of 50 acre-feet, and a normal water surface elevation of 180 feet m.s.l.; (3) a new concrete intake structure; (4) a new concrete powerhouse containing one generating unit with a capacity of 42 kW and one generating unit with a capacity of 85 kW for a total installed capacity of 127 kW; (5) a new 30-foot-long earth tailrace; (6) a new transmission line, 180 feet long; and (7) appurtenant facilities. The applicant estimates the average annual generation would be 550,000 kWh. The applicant owns the project property at the proposed dam site.

k. Purpose of Project: Project power would be sold to Central Maine Power Company.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

m. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. The applicant seeks issuance of a prelimiary permit for a period of 36 months during which time the applicant would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the applicant would decide whether to proceed with an application for FERC license. The applicant estimates that the cost of the studies under permit would be $39,000.

5. a. Type of Applicant: Preliminary Permit.

b. Project No: 9945–000.

c. Date Filed: March 17, 1986.

d. Applicant: City of Fort Collins.

e. Name of Project: Horsetooth-Poudre.

f. Location: Horsetooth Reservoir, Soldier Canyon Dam, and Cache La Poudre River, near Fort Collins, in Larimer County, Colorado.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Michael B. Smith, Director, Waste & Wastewater Utility, City of Fort Collins, P.O. Box 580, Fort Collins, CO 80522.

i. Comment Date: June 13, 1986.

j. Description of Project: The proposed project would utilize the existing outlet works at the U.S. Bureau of Reclamation's Soldier Canyon Dam (Horsetooth Reservoir) and would consist of: (1) an existing 54-inch-diameter, 1,500-foot-long steel pipeline running from the outlet works to the Fort Collins Water Treatment Plant (WTP) No. 2; (2) a combination of existing 27-inch-diameter steel and 24-inch-diameter concrete pipelines, 38,000 feet long, running from the Fort Collins Water Treatment Plant No. 1 Cahe La Poudre River diversion to, (3) a new 36-inch-diameter, 16,000-foot-long pipeline to WTP No. 2; (4) a powerhouse containing 3 turbine-generator units with a total installed capacity of 850 MW and producing an estimated average annual generation of 0.19 GWh; and (5) a tap transmission line to interconnect the project to an existing 13.2 kV Public Service Company of Colorado (PSCC) line. Project power would be sold to PSCC.

A preliminary permit does not authorize construction. Applicant seeks issuance of a preliminary permit to investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for development. Applicant estimates that the cost of the studies under permit would be $50,000.

k. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

6 a. Type of Application: Preliminary Permit.

b. Project No.: 9940–000.

c. Date Filed: March 5, 1986.

d. Applicant: Birch Power Company.

e. Name of Project: Pines.

f. Location: On Springs tributary to the Pahsimeroi River, in Custer County, Idaho. Township 13N and Range 22E.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contract Person: Mr. Ted S. Sorenson, 550 Linden Drive, Idaho Falls, ID 83401 (208) 522–8069.

i. Comment Date: June 23, 1986.

j. Description of Project: The proposed project would consist of: (1) a 6-foot-high diversion structure at elevation 5,600 feet; (2) a 29,400-foot-long feeder ditch; (3) a 6,100-foot-long, 34-inch-diameter steel penstock; (4) a powerhouse containing a single generating unit with a capacity 900 kW and an average annual generation of 5,500,000 kWh; and (5) a 0.05-mile-long transmission line.

A preliminary permit does not authorize construction. Applicant seeks issuance of a preliminary permit for a term of 24 months during which it would conduct engineering and environmental feasibility studies and prepare an FERC license application at a cost of $45,000. No new roads would be constructed or drilling conducted during the feasibility study.

k. Purpose of Project: Project power would be sold.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, D2.

7 a. Type of Application: Preliminary Permit.

b. Project No.: 9923–000.

c. Date Filed: March 3, 1986.

d. Applicant: Western Environmental Energy Company.

e. Name of Project: Mill Creek.

f. Location: On Mill Creek, a tributary to the Colorado River, near Moab, within Manti-La Sal National Forest, in San Juan County, Utah (In T26S, R24E; T26S, T23E; T27S, R23E; and T27S, R22E, S.L.M.&B.).

g. Filed Pursuant to: Federal Power Act, 16 U.S.C 791[a]—825(r).

h. Contact Person: Mr. James W. Oliver, Jr., 265 East Maple Street, Mapleton, UT 84663 (801) 489–7225. Mr. Grant D. Durtschi, 12090 South 2330 West, Riverton, UT 84065 (801) 254–0649.

i. Comment Date: Jnue 16, 1986.

j. Description of Project: The proposed run-of-the-river project would consist of: (1) an 7-foot-high, 16-foot-long concrete diversion structure at elevation 7,674 feet msl; (2) a 30-inch-diameter, 28,600-foot-long steel penstock; (3) a powerhouse containing two turbine-generator units with a combined rate capacity of 7,309 kW operating under a head of 2,144 feet; and (4) a 12.5-kV, 18,500-foot-long transmission line interconnecting the project to an existing Utah Power and Light Company line. The project's estimated average annual generation of 36.493 GWh would be sold to Utah Power and Light Company.

A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit to investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for development. Applicant estimates that the cost of the studies under permit would be $50,000.

k. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

8 a. Type of Application: Preliminary Permit.

b. Project No.: 9922–000.

c. Date Filed: March 3, 1986.

d. Applicant: City of Boulder, Colorado.

e. Name of Project: Boulder.

f. Location: City of Boulder Municipal Water System.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Ms. Eva J. Heinrich, City of Boulder, P.O. Box 791, Boulder, CO 80306 (303) 441–3205.

i. Comment Date: June 13, 1986.

j. Description of Project: The proposed project would consist of retrofitting the City of Boulder's municipal water transmission and distribution system for the installation of five conduit-type hydroelectric developments. Data on existing project structures in outlined in Tables 1 and 2. Data on proposed project works is outlined in Table 3. Applicant intends to interconnect the project with the existing Public Service Company of Colorado (PSCC) transmission grid. Project power would be sold to PSCC. The project would be partially located on Roosevelt National Forest lands.

A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of preliminary permit to investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for development. Applicant estimates that the cost of the studies under permit would be $100,000.

k. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C and D2.

9 a. Type of Application: Preliminary Permit.

b. Project No.: 9910–000.

c. Date Filed: February 12, 1986.

d. Applicants: Dam Nine Hydro Partners.

e. Name of Project: Kentucky River Lock and Dam No. 9.

f. Location: On the Kentucky River in Jessamine and Madison Counties, Kentucky.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Ingolf Hermann, Ridgehill Professional Building, Suite 380, 2000 Plymouth Road, Minnetonka, MN 55343 (612) 546–5110.

i. Comment Date: June 16, 1986.

j. Description of Project: The proposed project would utilize the U.S. Army Corps of Engineers Kentucky River Lock and Dam No. 9, having a water surface elevation of 550.6 feet msl and would consist of: (1) a new reinforced concrete powerhouse approximately 80 feet by 90 feet located in the right abutment containing two turbine/generator units having a total installed capacity of 5,100 kW operating at 17.3 feet of hydraulic head; (2) a new 1.8-mile-long 69-kV transmission line; and (3) appurtenant facilities. The Applicant estimates the average annual energy production to be 18 GWh.

k. Purpose of Project: The Applicant intends to sell the power generated at the proposed facility to the Kentucky Utility Company.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C and D2.

m. *Proposed Scope of Studies under Permit:* A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 36 months during which time Applicant would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates that the cost of the studies under permit would be $200,000.

10 a. Type of Application: Preliminary Permit.

b. Project No.: 9898–000.

c. Date Filed: February 3, 1986.

d. Applicant: Scofield Hydro Associates.

e. Name of Project: Scofield Hydro Project.

f. Location: On Price River in Carbon County, Utah: SLB&M, T.12S., R.7E, Sec. 6.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Mike Graham, P.O. Box N, Manti, Utah 84642.

i. Comment Date: June 13, 1986.

j. Description of Project: The proposed project would utilize the existing U.S. Bureau of Reclamation's Scofield Dam and Reservoir, and would consist of: (1) a 60-inch-diameter penstock utilizing the existing outlet works; (2) a powerhouse with an installed capacity of 1,450 kW operating under a gross head of 125 feet; (3) a tailrace discharging downstream of the toe of the dam; (4) a 46-kV transmission line, about 4,000 feet long, connecting to an existing line; and (5) appurtenant facilities. The Applicant estimates that the average annual energy output would be 8,896,000 kWh.

k. Purpose of Project: Project energy would be sold to local municipalities or the local power company.

l. A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit to investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for development. Applicant estimates that the cost of the studies under permit would be $23,000.

m. This notice also consist of the following standard paragraphs: A5, A7, A9, B, C, and D2.

11 a. Type of Application: Preliminary Permit.

b. Project No.: 9833-000.

c. Date Filed: December 31, 1985.

d. Applicant: West Rutland Pumped Storage Hydrolectric, Inc.

e. Name of Project: West Rutland Pumped Storage.

f. Location: On the Castleton River, Rutland County, Vermont.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Dermot A. McGuigan, West Rutland Pumped Storage Hydroelectric, Inc., c/o Vermont Hydroelectric, Inc, Chace Mill, 1 Mill Street, Burlington, VT 05401 (802) 658–5110.

i. Comment Date: June 13, 1986.

j. Description of Project: The proposed project would consist of: (1) a new upper reservoir of 40 acres surface area and storage capacity of 4,000 acre-feet at a normal maximum surface elevation of 550 feet mean sea level, to be located in an existing excavated marble quarry; (2) a lower reservoir in existing or new sub-surface excavations; (3) a new power tunnel 20 feet in diameter; (4) a new excavated powerhouse enclosing 3 new turbine/generators of 25 MW capacity each; (5) a new 345 kV transmission line one-half-mile long; and (6) appurtenant facilities.

The project would operate as a pumped-storage facility with an estimated annual power generation of 240,000,000 kWh. The hydraulic head is 500 feet. Project power will be sold. The existing facilities are owned by Gawet Marble & Granite, Inc.

k. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

l. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit is 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on results of these studies Applicant would decide whether to proceed with more detailed studies and the preparation of an application for license to construct and operate the project. Applicant estimates that the cost of the work to be performed under the preliminary permit would be $300,000.

12. a. Type of Application: Preliminary Permit.

b. Project No.: 9802-000.

c. Date Filed: December 30, 1985.

d. Applicant: Twin Lakes Associates, Inc.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Dr. Dennis O'Neill, President, Twin Lakes Associates, Inc., P.O. Box 961, Leadville, CO 80461 (303) 486–3397.

i. Comment Date: June 13, 1986.

j. Description of Project: The proposed run-of-the-river project would consist of: (1) a 7-foot-high, 20-foot-long earthfill diversion structure at elevation 11,170 feet msl;(2) a 30-inch-diameter, 3,500-foot-long penstock; (3) a powerhouse containing a single turbine-generator unit with a rated capacity of 1,500 kW operating under a head of 570 feet; and (4) a 13.8–kV, 64,000-foot-long transmission line interconnecting the project to an existing Sangre de Cristo Rural Electric Association line. The project's estimated average annual generation of 11.118 GWh would be sold to a utility yet to be determined.

A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit to investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for development. Applicant estimates that the cost of the studies under permit would be $35,000.

k. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

13. a. Type of Application: Preliminary Permit.

i. Comment Date: June 13, 1986.

j. Description of Project: The proposed project would consist of: (1) reconstruction of an existing breached concrete and stone mansonry gravity dam 80 feet long and 9 feet high (breakaway flashboards 3 feet high will be considered); (2) an existing 30 acre reservoir with a storage capacity of 200 acre-feet at a surface elevation of 295 msl; (3) enlarging an existing canal to 7 feet wide, 7 feet deep, and 250 feet long; (4) a proposed concrete power flume 15 feet wide, 20 feet long, and 20 feet deep housing a 1,000 kW submerged bulb turbine generator; (5) a proposed tailrace 10 feet wide, 7 feet deep, and 20 feet long; (6) upgrading an existing transmission line; and (7) appurtenant facilities. The Applicant estimates that the average annual energy generation would be 5.0 GWh. The project energy would be sold to Niagara Mohawk Power Company. The dam is owned by Richard Rogers, Rossie, New York, and Charles Hyatt, Clarence, New York.

k. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

l. Proposed Scope under this Permit: A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit is 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on results of these studies Applicant would decide whether to proceed with more detailed studies, and the preparation of an application for license to construct and operate the project. Applicant estimates that the cost of the work to be performed under the preliminary permit would be $30,000.

19 a. Type of Application: Preliminary Permit.

b. Project No: 9616–000.

c. Date Filed: November 12, 1985.

d. Applicant: John W. Delaney & Barbara Delaney.

e. Name of Project: Delaney.

f. Location: Squannacook River in Middlesex Country, Massachusetts.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Warren Guinan, Power Technics, Inc., P.O. Box 1469, Dover, NH 03820, (603) 335–2606.

i. Comment Date: June 19, 1986.

j. Description of Project: The proposed project would consist of: 1) an existing 12-foot-high, 116-foot-long granite block dam owned by the Applicant; 2) an existing reservoir with a surface area of 14 acres and a storage capacity of 70 acre-feet at crest elevation 302 feet NGVD; 3) a proposed powerhouse at the base of the dam containing a generating unit with a rated capacity of 105-kW; and 4) a proposed 37-foot-long transmission line tying into the existing Fitchburg Gas and Electric system. The Applicant estimates a 261,800 kWh average annual energy production.

k. Proposed Scope of Studies under Permit: A preliminiary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit to investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates that the cost of the studies under permit would be $22,500.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

20 a. Type of Application: Preliminary Permit.

b. Project No: 9530–000.

c. Date Filed: October 7, 1985.

d. Applicant: Douglas Hydro, Inc.

e. Name of Project: Tahoe Tunnel Power Project.

f. Location: Tahoe Basin in Douglas County, Nevada; Mount Diablo Base & Meridian: T13N, R18E, Sec. 13 and 14; T13N, R19E, Sec. 19, 20, 21, 22.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. David L. Pruett, Douglas Hydro, Inc., Route 2, Box 69, Gardnerville, NV 89410.

i. Comment Date: June 23, 1986.

j. Description of Project: The proposed project would be located on both Toiyabe National Forest and private lands, would utilize waters of Tahoe Basin waste treatment facilities, and would consist of: (1) an intake structure and a steel pipeline/penstock, 24 inches in diameter and about 24,000 feet long; (2) a powerhouse with an installed capacity of 2,500 kW operating under a head of 1,400 feet; (3) a tailrace discharging into an irrigation system; (4) a 12.5 KV transmission line, about 0.1 mile long, interconnecting with a Sierra Pacific Power Company line; and (5) appurtenant facilities. The Applicant estimates that the average annual energy output would be 17,500,000 kWh.

k. Purpose of Project: Project energy would be sold to the Sierra Pacific Power Company or other power purchasers.

l. A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit to investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for development. Applicant estimates that the cost of the studies under permit would be $50,000.

m. This notice also consist of the following standard paragraphs: A5, A7, A9, B, C, and D2.

21a. Type of Application: Minor License.

b. Project No.: 7830–002.

c. Date Filed: December 6, 1985.

d. Applicant: Florida Water Conservancy District (FWCD).

e. Name of Project: Lemon Dam.

f. Location: On Lemon Dam and Reservoir, on the Florida River, near Durango, in La Plata County, Colorado.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Loyd N. Hess, President, FWCD, Lawrence McDaniel, General Counsel, FWCD, P.O. Box 1157, Durango, CO 81302, (303) 247–1113.

i. Comment Date: June 19, 1986.

j. Description of Project: The proposed project would utilize the existing U.S. Bureau of Reclamation's (Bureau) 215-foot-high earthfilled Lemon Dam, impounding a 40,100 acre-foot reservoir, and would consist of: (1) a penstock consisting of the existing 8-inch-diameter bypass pipe, beginning upstream of the outlet control gates, passing through the existing gate chamber and ending 26 feet below the outlet control gates; (2) modification of the existing gate chamber to house a single Worthington pump-induction generator unit with a rated capacity of 110 kW and producing an estimated average annual generation of 0.757 GWh; (3) the 0.48-kV generator leads; (4) a 12.5-kV service connection cable installed in the 200-foot-high elevator shaft and interconnected to an existing Colorado Ute Electric Association (CUEA) transmission line; (5) a 3-phase, 0.48/12.5-kV, 150-kVA transformer; (6) a 1,200-foot-long, 7.2.-kV distribution line serving the dam superintendent's home; and (7) appurtenant facilities. Project

power would be utilized at the superintendent's home and to operate the dam with excess power sold to CUEA. The project would be located on Bureau lands which were withdrawn from the San Juan National Forest. Applicant estimates project cost at $173,000.

k. This notice also consists of the following standard paragraphs: A3, A9, B, C and D1.

22 a. Type of Application: Minor License (5MW or Less).

b. Project No.: 4206–001.

c. Date Filed: February 10, 1986.

d. Applicant: STS Energenics Ltd.

e. Name of Project: Laguna Dam.

f. Location: On the Colorado River, in Imperial County, California, and Yuma County, Arizona.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Granville Smith II, STS Energenics Ltd., 1725 K Street, NW, Suite 112, Washington, DC 20006, (202) 463–8620.

i. Comment Date: June 13, 1986.

j. Description of Project: The proposed run-of-river project would utilize the existing Bureau of Reclamation's 43-foot-high, 166-foot-long, Laguna Dam located on the Lower Colorado River and would consist of: (1) an underground intake structure; (2) a 9-foot-diameter, 203-foot-long penstock; (3) a powerhouse containing a single turbine-generator unit with a rated capacity of 875 kW, operating under a head of 21.5 feet; (4) a 45-foot-long concrete tailrace; and (5) a 252-foot-long, 34.5 kV transmission line interconnecting the project to an existing Bureau of Reclamation line. The project's estimated average annual generation of 4.2 GWh would be sold to Southern California Edison Company. The project would affect Bureau of Reclamation lands. The estimated cost of constructing the project is $1,892,000.

k. This notice also consists of the following standard paragraphs: A3, A9, B, C, and D1.

Standard Paragraphs

A3. Development Application—Any qualified development applicant desiring to file a competing application must submit to the Commission, on or before the specified comment date for the particular application, a competing development application, or a notice of intent to file such an application. Submission of a timely notice of intent allows an interested person to file the competing development application no later than 120 days after the specified comment date for the particular application. Applications for preliminary permit will not be accepted in response to this notice.

A4. Development Application—Public notice of the filing of the initial development application, which has already been given, established the due date for filing competing applications or notices of intent. In accordance with the Commission's regulations, any competing development applications or notices of intent to file competing development applications, must be filed in response to and in compliance with the public notice of the initial development application. No competing applications or notices of intent may be filed in response to this notice.

A5. Preliminary Permit—Anyone desiring to file a competing application for preliminary permit for a proposed project must submit the competing application itself, or a notice of intent to file such an application, to the Commission on or before the specified comment date for the particular application (see 18 CFR 4.36 (1985)). Submission of a timely notice of intent allows an interested person to file the competing preliminary permit application no later than 30 days after the specified comment date for the particular application.

A competing preliminary permit application must conform with 18 CFR 4.30(b)(1) and (9) and 4.36.

A7. Preliminary Permit—Any qualified development applicant desiring to file a competing development application must submit to the Commission, on or before the specified comment date for the particular application, either a competing development application or a notice of intent to file such an application. Submission of a timely notice of intent to file a development application allows an interested person to file the competing application no later than 120 days after the specified comment date for the particular application.

A competing license application must conform with 18 CFR 4.30(b)(1) and (9), and 4.36.

A8. Preliminary Permit—Public notice of the filing of the initial preliminary permit application, which has already been given, established the due date for filing competing preliminary permit and development applications or notices of intent. Any competing preliminary permit or development application, or notice of intent to file a competing preliminary permit or development application, must be filed in response to and in compliance with the public notice of the initial preliminary permit application. No competing applications or notices of intent to file competing applications may be filed in response to this notice.

A competing license application must conform with 18 CFR 4.30(b)(1) and (9) and 4.36.

A9. Notice of intent—A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, include an unequivocal statement of intent to submit, if such an application may be filed, either (1) a preliminary permit application or (2) a development application (specify which type of application), and be served on the applicant(s) named in this public notice.

B. *Comments, Protests, or Motions to Intervene*—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 C.F.R §§ 385.210, .211, .214. In determining the appropriate action to take, the Commission consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. *Filing and Service of Responsive Documents*—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST" OR "MOTION TO INTERVENE", As Applicable, and the Project Number of the particular application to which the filing is in response. Any of the above named documents must be filed by providing the original and the number of copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Mr. Fred E. Springer, Director, Division of Project Management, Federal Energy Regulatory Commission, Room 203–RB, at the above address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the the particular application.

D1. *Agency Comments*—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the Federal Power Act, the Fish and Wildlife Coordination Act, the

Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Perservation Act, the National Environmental Policy Act, Pub. L No. 88–29, and other applicable statutes. No other formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the Applicant. If an agency does not file comments with the Commission within the time set for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D2. *Agency Comments*—Federal, State, and local agencies are invited to file comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3a. *Agency Comments*—The U.S. Fish and Wildlife Service and the State Fish and Game agency(ies) are requested, for the purposes set forth in Section 408 of the Energy Security Act of 1980, to file within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, the agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3b. *Agency Comments*—The U.S. Fish and Wildlife Service and the State Fish and Game agency(ies) are requested, for the purposes set forth in Section 30 of the Federal Power Act, to file within 45 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will presumed to have none. Other Federal, State, and local agencies are requested to provide comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 45 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Dated: May 9, 1986.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86–10924 Filed 5–14–86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP86–74–000]

Algonquin Gas Transmission Co. Complainant and Texas Eastern Transmission Corp. Respondent; Notice of Complaint

May 7, 1986.

Take notice that on May 6, 1986, Algonquin gas Transmission Company (Complainant), 1284 Soldiers Field Road, Boston, Massachusetts 02135, filed in Docket No. RP86–74–000 a complaint, pursuant to Order No. 436 and § 385.206 of the Commission's rules of practice and procedure (18 CFR 385.206), against Texas Eastern Transmisison Corporation (Respondent), principal pipeline supplier to Complainant, for carrying out its current transportation program during the interim period of Order No. 436 in a manner that unduly discriminates against Complainant's New England LDC customers and unduly grants preference to Respondent's upstream customers, all as more fully set forth in the complaint which is on file with the Commission and open to public inspection.

Complainant states that it and its New England LDC customers are almost exclusively dependent on Respondent for its pipeline Gas supplies. It is further stated that Respondent's position is that it would have zero natural Gas Policy Act (NGPA) section 311 transportation capacity available to serve such New England LDC customers until all requests of Respondent's upstream LDC customers for such service have been satisfied.

Complainant alleges that Respondent is currently moving substantial quantities of NGPA section 311 gas for such upstream LDC customers and moving no gas for the New England LDC customers. Thus, it is asserted that Respondent is cutting off the New England LDC customers in clear violation of Order No. 436.

Complainant states that Respondent has advised that such action is required by a provision in Volume 1 of its FERC Gas Tariff (§ 12.6 of the General Terms and Conditions). Complainant claims that such an application of the tariff produces a result which violates the non-discrimination principles of Order No. 436.

Complainant, therefore, requests that Respondent be ordered, on an expedited basis, to cease and desist its acts, and apply § 12.6 of its Tariff in a manner which affords the New England LDC customers access to available NGPA section 311 transportation capacity on a basis that is on a parity with upstream LDC customers.

Any person desiring to be heard or to make any protest with reference to said complaint should on or before May 19, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's rules. Complainant states that a copy of the complaint has been served on Texas Eastern. Texas Eastern's answer to the complaint shall also be due on or before May 19, 1986.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86–10925 Filed 5–14–86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER86-287-000]

Electric Rates; Order Accepting for Filing and Suspending Rates, Noting Intervention, Granting Waiver of Notice Requirements, and Establishing Hearing Procedures; Cambridge Electric Light Co.

Issued: May 8, 1986

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C. M. Naeve.

On February 6, 1986, as completed on March 13, 1986 [1] Cambridge Electric Light Company (Cambridge) submitted for filing a proposed interim agreement providing for the transmission by Cambridge of preference power from the Power Authority of the State of New York's (PASNY) Niagara Project to the Town of Belmont, Massachusetts (Belmont).[2] Under the terms of the agreement, Cambridge waives the provisions of its current full requirements tariff on file which mandate that Belmont purchase its entire requirements from Cambridge. Cambridge has no partial requirements rate schedule or tariff on file, but the company states that it will develop an appropriate rate to accommodate Belmont's new service as soon as possible. In the interim, Belmont will continue to be served at the full requirements rate. Cambridge proposes to wheel Belmont's PASY power at the proposed rate of $2.50/kW/month and to credit Belmont's power bills for an amount equal to Cambridge's average energy costs times Belmont's PASNY energy. Cambridge requests waiver of the notice requirements to permit an effective date of July 1, 1985, the date that Belmont began receiving PASNY power.

Notice of the original filing was published in the **Federal Register** [3] with comments due on or before March 7, 1986. Notice of the amended filing was published in the **Federal Register**,[4] with comments due on or before April 10, 1986.

On March 6, 1986, Belmont filed a motion to intervene and protest to Cambridge's original filing, requesting a one day suspension and hearing. Belmont further claimed that the filing was deficient and requested that Cambridge be required to supplement its filing with cost-of-service data required by § 35.13 of the Commission's regulations.[5] Belmont notes that the proposed filing, while crediting Belmont's power bills with the company's average energy costs, does not credit the bills for the capacity being provided by PASNY. Belmont alleges that it is entitled to capacity credits, arguing that, because of Belmont's PASNY allocation, Cambridge has benefitted by being able to reduce its New England Power Pool (NEPOOL) load commitments.

On March 21, 1986, Cambridge filed an answer to Belmont's motion, disputing Belmont's allegations and its request for suspension. Cambridge admits that it does not give Belmont a capacity credit on its requirements billing but notes, however, that, if PASNY power becomes unavailable to Belmont, Cambridge remains obligated to serve Belmont's full load. Cambridge claims that, during the period of this interim agreement, Belmont's PASNY allotment has only served to reduce the energy which would otherwise be supplied by Cambridge and that it is, therefore, unjustifiable to give Belmont a capacity credit during the interim period. With respect to Belmont's allegation that Cambridge obtained capacity benefits from NEPOOL, Cambridge answers that capacity acquisition commitments are made on a relatively long lead time and that, given the short notice afforded by Belmont, the company was unable to achieve any reduction in its costs of capacity, at least during this interim period. Cambridge concedes that, when the parties negotiate a partial requirements agreement, it may be appropriate to recognize the capacity value to Cambridge to the allotment.

On April 10, 1986, Belmont amended its March 6, 1986 protest. Belmont argues that Cambridge's charge for both transmission and full requirements amounts to a double payment for use of the company's transmission and interconnection facilities; that there is no merit to Cambridge's allegation that Belmont did not give adequate notice of its PASNY purchases; that these purchases provided capacity benefits to Cambridge which should be reflected in this filing; and that Cambridge erred in calculating the firm transmission rate.

Discussion

Under Rule 214 of the Commission's rules of practice and procedure (18 CFR 385.214), the timely, unopposed motion to intervene serves to make Belmont a party to this proceeding.

Our review of the company's filing and the pleadings indicates that the rates have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. Accordingly, we shall accept the rates for filing and suspend them as ordered below.

In *West Texas Utilities Co.*, 18 FERC ¶61,189 (1982), we explained that where our preliminary examination indicates that proposed rates may be unjust and unreasonable, and may be substantially excessive, as defined in *West Texas*, we would generally impose a maximum suspension. We also noted that circumstances (such as customer agreement) might dictate a different result. Here, our examination suggests that the proposed rates may yield substantially excessive revenues. However, Belmont requires the transmission service to receive the benefits of its PASNY allotment. The town has supported waiver of notice and requested only a nominal suspension so that the rate may be effective as of July 1, 1985, the date on which the PASNY service began.[6] Under these circumstances, we believe that good cause exists to waive the notice requirements and impose a nominal suspension of the rates. Accordingly, we shall accept the rates for filing and suspend them to become effective on July 1, 1985, subject to refund.

Finally, we note that Cambridge's proposed rate is based, in part, upon payments made to Boston Edison Company (Edison) for the joint use of a substation owned by Edison. According to Cambridge's 1984 Form 1, this payment amounted to $1,253,756. The service is currently governed by Edison's filed Rate Schedule FPC No. 101; that rate schedule, however, provides for a charge of only $82,578.[7] Edison has been advised that it improperly failed to file increases in the substation charge from the level currently on file, and the company has indicated that it will make the necessary

---

[1] The company's original filing was deemed deficient by the Commission's Office of Electric Power Regulation, and additional information was submitted on March 13, 1986.

[2] *See* Attachment for rate schedule designations.

[3] 51 FR 7,329 (1986).

[4] 51 FR 11,605 (1986).

[5] Cambridge supplied additional cost data on March 13, 1986. *See* note 1.

[6] We note that, while both the company and the affected customer desire a July 1, 1985 effective date, neither has explained the reason for Cambridge's delay in tendering its submission. While we shall grant the request for waiver of the notice requirements in this proceeding, we admonish Cambridge to be more timely in future filings.

[7] Edison's substation charge is determined monthly pursuant to a formula. The formula lacked sufficient specificity to be accepted as the filed rate, however, and by letter order dated March 11, 1975, the Commission informed Edison that changes in the charges produced by the formula required a timely filing pursuant to the Commission's regulations.

filings. Because any Commission action regarding those filings may affect the inclusion of those costs in Cambridge's rate to Belmont, we shall make Cambridge's rate subject to the outcome of any Commission action on Edison's anticipated filing.

The Commission Orders:

(A) Waiver of the notice requirements is hereby granted for good cause shown.

(B) Cambridge's proposed rates are hereby accepted for filing and suspended, to become effective, subject to refund, on July, 1985, and, further, subject to the outcome of the Commission's action on the filing by Boston Edison Company of its charge for the joint use of the substation referred to in the body of this order.

(C) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act (18 CFR, Chapter I), a public hearing shall be held concerning the justness and reasonableness of Cambridge's rates.

(D) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convent a prehearing conference in this proceeding within approximately fifteen (15) days of the date of this order, in a hearing room of the Federal Energy Regulatory Commission 825 North Capitol Street, NE., Washington, DC 20426. The presiding judge is authorized to establish procedural dates, including the submission of a case-in-chief by Cambridge, and to rule on all motions (except motions to dismiss) as provided in the Commission's rules of practice and procedure.

(E) Subdocket 000 in Docket No. ER86-287 is hereby terminated. Docket No. ER86-287-001 is assigned to the evidentiary hearing ordered in the Federal Register.

(F) The Secretary shall promptly publish this order in the Federal Register.

By the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

Office of Conservation and Renewable Energy

[Docket No. CAS-RM-80-304]

Industrial Energy Conservation Program; Identification of Corporations for Purposes of Industrial Energy Efficiency Improvement and Recovered Materials Utilization Reporting

AGENCY: Department of Energy.

ACTION: Notice of corporate identification.

SUMMARY: The Department of Energy (DOE) is identifying corporations which consumed at least one trillion British termal units (Btu's) of energy in calendar year 1985 in any of the major energy-consuming industries, as required by DOE's regulations at 10 CFR 445.15 which implements section 373(b) of the Energy Policy and Conservation Act (EPCA), as amended by the National Energy Conservation Policy Act.

Section 445.12 of these regulations requires certain corporations which consumed at least one trillion Btu's of energy in a calendar year in any of the 20 major energy-consuming industries identified by DOE to file a certified statement with DOE. The deadline to file this report with DOE was February 4, 1986. Based on the reports filed in response to this requirement and reports filed previously, DOE has identified the corporations listed in the appendix to this notice. Identified corporations are required to meet the reporting requirements of 10 CFR Part 445, Subpart C.

A Corporation may file a request with DOE to modify its identification on the grounds of technical or clerical error within 30 days of this notice as provided in 10 CFR 445.16.

Identified corporations are required to report on energy efficiency improvements and, if appropriate, recovered materials utilization in calendar year 1985 either directly to DOE or to DOE-approved sponsors of reporting programs, pursuant to Subpart C of 10 CFR Part 445 which implements the requirements of sections 374A, 375 and 376 of EPCA.

DATE: Requests for modification of identification must be filed by June 16, 1986.

ADDRESS: Modification requests should be submitted to: Office of Conservation and Renewable Energy, Hearings and Dockets Branch, U.S. Department of Energy, Docket Number CAS-RM-80-304 CE-80, Room 6B-025, 1000 Independence Avenue, S.W., Washington, D.C. 20585, (202) 252-9319.

FOR FURTHER INFORMATION CONTACT:

Charles J. Glaser, Office of Industrial Programs CE-14, U.S. Department of Energy, 1000 Independence Avenue, S.W., Washington, D.C. 20585, (202) 252-2429.

Vivian S. Lewis, Office of General Counsel GC-12, U.S. Department of Energy, 1000 Independence Avenue, S.W., Washington, D.C. 20585, (202) 252-9507.

Issued in Washington, DC, May 2, 1986.

Donna R. Fitzpatrick,

Assistant Secretary, Conservation and Renewable Energy.

BILLING CODE 6450-01-M

[Docket No. CAS-RM-80-304]

Industrial Energy Conservation Program; Exempt Corporations and Adequate Reporting Programs

AGENCY: Department of Energy.

ACTION: Notice of Exempt Corporations and Adequate Reporting Programs.

SUMMARY: As an annual part of the Department of Energy's (DOE) Industrial Energy Conservation Program, DOE is exempting certain corporations from the requirement of filing directly with DOE corporate energy efficiency progress reports including, if appropriate, progress on recovered materials utilization, and is determining as adequate certain industrial reporting programs for third party sponsor reporting. This notice is required pursuant to section 376(g)(1) of the Energy Policy and Conservation Act (EPCA) and DOE's regulation set forth at 10 CFR Part 445, Subpart D. DOE compiled this list based on submissions filed by corporations and third party sponsors in accordance with 10 CFR 445.34 and 445.35. The deadline for these filings was February 4, 1986. These procedures, which allow identified corporations to be exempted from filing energy data directly with DOE, assist in maintaining the confidentiality of consumption information and reduce the reporting burden for corporations. Parentheses with the word "partial" follow any corporation which reports less than its total energy data in a particular 2-digit SIC code through the program sponsor under which it is listed. The corporation reports the rest of its energy data through another sponsor or directly to DOE. The exempt corporations and the respective sponsors of adequate reporting programs are listed alphabetically by industry in the appendix to this notice.

FOR FURTHER INFORMATION CONTACT:

Charles J. Glaser, Office of Industrial Programs, CE-14, U.S. Department of Energy, 1000 Independence Avenue, S.W., Washington, D.C. 20585, (202) 252-2429

Vivian S. Lewis, Office of General Counsel, GC-12, U.S. Department of Energy, 1000 Independence Avenue, S.W., Washington, D.C. 20585, (202) 252-9507.

Issued in Washington, DC, May 2, 1986.

Donna R. Fitzpatrick,

Assistant Secretary, Conservation and Renewable Energy.

BILLING CODE 6450-01-M

Office of Hearings and Appeals

Issuance of Proposed Decisions and Orders, Week of April 21 Through April 25, 1986.

During the week of April 21 through April 25, 1986, the proposed decisions and orders summarized below were issued by the Office of Hearings and Appeals of the Department of Energy with regard to applications for exception.

Under the procedural regulations that apply to exception proceedings (10 CFR Part 205, Subpart D), any person who will be aggrieved by the issuance of a proposed decision and order in final form may file a written notice of objection within ten days of service. For purposes of the procedural regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date an aggrieved person receives actual notice, whichever occurs first.

The procedural regulations provide that an aggrieved party who fails to file a Notice of Objection within the time period specified in the regulations will be deemed to consent to the issuance of the proposed decision and order in final form. An aggrieved party who wishes to contest a determination made in a proposed decision and order must also file a detailed statement of objections within 30 days of the date of service of the proposed decision and order. In the statement of objections, the aggrieved party must specify each issue of fact or law that it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of these proposed decisions and orders are available in the Public Reference Room of the Office of Hearings and Appeals, Room 1E-234, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays.

George B. Breznay,

Director, Office of Hearings and Appeals.

May 2, 1986.

Exxon Junction Service Bowbells, North Dakota, Kee-0033

Exxon Junction Service filed an Application for Exception from the requirement that it file Form EIA-782B. On April 21, 1986, the Department of Energy issued a Proposed Decision and Order which determined that the exception request be denied.

Schaal Oil Company, Jefferson, Iowa, Kee-0025

Schaal Oil Company filed an Application for Exception from the requirement that it file Form EIA-782B. The exception request, if granted, would relieve Schaal from its monthly reporting obligation. On April 22, 1986, the Department of Energy issued a Proposed Decision and Order which determined that the exception request be denied.

[FR Doc. 86-10868 Filed 5-14-86; 8:45 am]

BILLING CODE 6450-01-M

Issuance of Decisions and Orders, Week of April 14 through April 18, 1986.

During the week of April 14 through April 18, 1986, the decisions and orders summarized below were issued with respect to appeals and applications for other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Appeal

Environmental Task Force, 4/17/86; KFA-0020

The Environmental Task Force (ETF) filed an Appeal from a determination issued to it by the Director of the Office of the Executive Secretariat (Director) of the Department of Energy (DOE). ETF sought information under the Freedom of Information Act (FOIA) concerning the formation of a DOE cabinet level group to review the status of nuclear power in America. In considering the Appeal, the Office of Hearings and Appeals found that the scope of the search for responsive documents was inadequate, and that the Director must provide a more detailed justification for withholding portions of one document pursuant to FOIA Exemption 4. Accordingly, the case was remanded to the Director for a further search and determination.

Remedial Order

Transco Trading Company, 4/14/86; HRO-0014

The Office of Hearings and Appeals (OHA) issued a Decision and Order determining that a crude oil reseller, its parent corporation, and its president violated the "layering" regulation. The Decision required the parties to refund $21,187,495.00 plus interest.

The OHA rejected the firm's argument that it provided traditional and historical reseller services by taking risks. The OHA stated that the action which caused the risk rather than the risk itself is the relevant factor in determining whether a service was provided.

The OHA's decision also denied a motion by the Economic Regulatory Administration (ERA) which sought to withdraw one of the ERA's theories of liability. The OHA found that Transco's parent corporation could be held responsible for Transco's violations on the theory that both companies constituted one "firm."

Motions for Discovery

Brazoria Energy, Inc; HRD-0276
Gerald W. Collum, 4/17/86; HRH-0276

Brazoria Energy, Inc; and Gerald W. Collum (collectively "Brazoria") filed a Motion for Discovery and Motion for Evidentiary Hearing in connection with a Statement of Objections to a Proposed Remedial Order that was issued to Brazoria and Carl L. Counts. In the discovery motion, Brazoria sought discovery through interrogatories and the production of documents pertaining to (i) the audit of the firm, (ii) the administrative record of certain rulemakings applicable to crude oil resellers, and (iii) the DOE's contemporaneous construction of portions of the crude oil reseller regulations. The DOE determined that the discovery motion should be denied

since not only was it procedurally defective and failed to set forth clearly the information which was requested, but also because the discovery would not elicit evidence relevant and material to the issues raised in the Statement of Objections. Brazoria requested an evidentiary hearing to present evidence on the issue of whether certain crude oil resales were "layered" and on the issue of Gerald W. Collum's personal liability. The DOE partially granted an evidentiary hearing with regard to Collum's personal liability for the regulatory violations alleged in the PRO. The DOE further determined that Brazoria could submit written documentation relating to specific transactions covered in the PRO in which Brazoria alleges it performed traditional and historical reseller services.

Murphy Oil Corporation: HRD-0244 Economic Regulatory Administration, 4/16/86: HRD-0254

Murphy Oil Corporation filed Motion for Discovery in which it sought contemporaneous construction discovery concerning the treatment of revenues derived from the sale of fee-free import licenses. The discovery was requested in connection with the firm's objection to a Proposed Remedial Order in order to support its contention that the refiner price regulations did not require firms to treat such revenues as decreases in their crude oil costs. The Economic Regulatory Administration sought discovery pertaining to Murphy's method of accounting for revenues attributable to the sale of fee-free import licenses.

The DOE found that the agency had never taken an inconsistent position regarding fee-free import licenses and that the regulations were not sufficiently ambiguous to make contemporaneous construction discovery appropriate. Accordingly Murphy's discovery request was denied. With respect to the ERA's Motion, the DOE found that information pertaining to Murphy's method of accounting for fee-free license revenues was relevant to the issue of whether Murphy was entitled to reduce its May 1973 crude oil cost to reflect such revenues. Murphy had argued that although it did not actually receive any payments for fee-free licenses in May 1973, it should nevertheless be permitted to reduce its crude oil costs to reflect payments attributable to May 1973 under an accrual method of accounting. The DOE found, however, that the ERA's motion was unduly broad insofar as it sought information pertaining to the firm's accounting practices for years other than 1973, the year at issue. Accordingly, the ERA's discovery motion was granted in part.

Supplemental Order

C&H Refinery, Inc., 4/14/86: KRX-0012

A Remedial Order issued by DOE to C&H Refinery, Inc. on April 7, 1986 (Case No. KRO-0100) inadvertently included an incorrect ordering paragraph. This Supplemental Order deleted the incorrect paragraph, Ordering Paragraph (2).

Implementation of Special Refund Procedures

ELM City Filling Stations, Inc., 4/17/86: HEF-0067

The DOE issued a Decision and Order which establishes procedures for the distribution of funds totalling $172,193.63 obtained as a result of a Consent Order entered into between the DOE and Elm City Filling Stations, Inc. The Decision sets forth refund application procedures for customers who purchased No. 6 residual fuel oil from Elm City during the period covered by the Consent Order—November 1, 1973 through December 31, 1973. Specific information regarding the data to be included in refund applications is discussed in the Decision.

GCO Mineral Company, 4/15/86: HEF-0570

The DOE issued a Decision and Order setting forth procedures for distributing $1,800,000 plus accrued interest remitted to the DOE by GCO Mineral Company, a crude oil producer and a refiner, pursuant to a 1984 consent order. The DOE determined that the funds should be divided into two pools, one for crude oil claims and the other for refined products claims. The crude oil funds will be pooled with other crude oil funds in escrow to afford Congress the opportunity to select the means for distributing the funds. The remainder of the GCO settlement funds will be available to customers of GCO refined products who were injured by the firm's pricing practices during the consent order period, August 19, 1973 through June 30, 1979. The Decision outlines specific information to be included in refund applications.

Refund Applications

Allied Materials Corporation/Kitchen Oil Company, Kelley Oil Co., Paul Penley Oil Co., Inc., 4/16/86, FR194-1; RF194-3; FR194-5.

The DOE issued a Decision and Order concerning three Applications for Refund filed by Kitchen Oil Company, Kelley Oil Co., and Paul Penley Oil Co., Inc. Each of the applicants had purchased refined petroleum products from Allied Materials Corporation, and each sought a portion of the settlement fund obtained by the DOE through a consent order with Allied. Two of the three firms applied for refunds based upon the procedures for filing small claims outlined in *Allied Materials Corporation and Excel Corporation*, 13 DOE ¶ 85,095 (1985). The one remaining applicant was eligible to apply for a refund greater than $5,000, but chose to follow the small claims procedures. After examining the applications submitted by the firms, the DOE concluded that each of the three firms should receive a refund based on the per gallon volumetric refund amount. The total amount of refunds granted was $10,011.

Amtel, Inc./Highway Oil, Inc. et al., 4/15/86, RF46-22 et al.

The DOE issued a Decision and Order concerning eight refund applications filed in the Amtel, Inc. special refund proceeding. In the Decision, the DOE found that all eight claimants were spot purchasers from Amtel and that none of the claimants had rebutted the presumption that spot purchasers were not injured by Amtel's alleged overcharges. Accordingly, all eight applications were denied.

Amtel, Inc./Krum Oil Company, et al., 4/17/86, RF46-1 et al.

The DOE issued a Decision and Order granting 12 Applications for Refund filed in the Amtel, Inc. special refund proceeding. All but one of the applicants chose to rely on the per gallon volumetric presumption and the presumption of injury for small claims established in the *Amtel* implementation Decision. The DOE found that the remaining applicant, Mobley Oil Company, had failed to submit information sufficient to demonstrate that the firm should receive a refund in excess of the volumetric amount. Accordingly, all 12 applicants received refunds based on the per gallon volumetric amount. The total amount of refunds granted in this proceeding is $38,133 ($20,378 principal plus $18,755 interest).

Arkansas Louisiana Gas Co./Southern Marketing, Inc., 3/17/86, RF154-16.

The DOE issued a Decision concerning an Application for Refund from the Arkansas Louisiana Gas Co. (Arkla) escrow account filed by Southern Marketing, Inc. Southern was a spot purchaser of Arkla products. Spot purchasers must rebut the no-injury presumption by submitting sufficient evidence to establish that they were unable to recover the alleged overcharges they paid the consent order firm. Southern failed to provide substantial proof of injury. Accordingly, its refund claim was denied.

Boswell Oil Company/Belle Vernon Oil Company, 4/17/86, RF179-3; RF179-6; RF179-16.

The Department of Energy issued a Decision and Order concerning three separate applications for refund in the Boswell Oil Company special refund proceeding filed in connection with purchases of motor gasoline by Belle Vernon Oil Company from Boswell. In determining which applicant was the proper recipient of Belle Vernon's refund, the DOE found that, absent special circumstances, the impact of Boswell's pricing practices would have been felt by the firm's owners at the time of those alleged overcharges. Due to a legal dispute over the liquidation of Belle Vernon's assets, however, the DOE was unable to determine the extent of each owner's alleged injury. The DOE therefore concluded that the refund of $1,604.39 should go to Belle Vernon's Liquidating Receiver who will ultimately disburse the refund to the owners in accordance with the judgment of the court handling the liquidation.

Central Oil Co./Fred's Auto Repair, 4/18/86, RF209-1.

The DOE issued a Decision and Order concerning an Application for Refund filed by Fred's Auto Repair in the Central Oil Company special refund proceeding. Fred's Auto Repair was a reseller of motor gasoline purchased from Central during the consent order period (November 1, 1973 through October 3, 1974) and the volume of the firm's purchases rendered it eligible for a refund below the $5,000 small claims threshold. In its Decision, the DOE granted the Fred's Auto Repair application under the standards specified in *Bayside Fuel Oil Depot Corp.*, 13 DOE ¶ 85,139 (1985). The refund granted in this proceeding totals $740, representing $492 in principal and $257 interest.

Gate Petroleum, Inc./Robert E. Hatcher, 4/14/86 RF205–4.

The DOE issued a Decision and Order granting an Application for Refund which Robert E. Hatcher filed in the Gate Petroleum, Inc. Special refund proceeding. In the Decision, the DOE found that Hatcher had purchased motor gasoline from Gate during the consent order period and that Hatcher's claim did not exceed the $5,000 presumption of injury for small claims. Accordingly, Hatcher was granted a refund of $208 ($136 principal plus $72 interest).

Lowe Oil Company/Jones Texaco, 4/14/86, RF206–4.

The DOE issued a Decision and Order concerning an Application for Refund filed by Jones Texaco. The applicant had purchased refined petroleum products from Lowe Oil Company, and thus sought a portion of the settlement fund obtained by the DOE through a consent order entered into with Lowe. The firm was identified in the DOE's audit files and was listed in the Appendix to the Decision establishing refund procedures for the distribution of the Lowe consent order fund. *See L&L Oil Company, Inc., Lowe Oil Company, and Moyle Petroleum Company,* 13 DOE ¶ 85,198 (1985). After examining the applications submitted by the firm the DOE granted the applicant a refund of $412, representing $262 in principal, and $150 in accrued interest.

Richards Oil Company/Dayton's, 4/16/86, RF70–29.

The DOE issued a Decision and Order granting a refund in the Richards Oil Company special refund proceeding to a firm which had been identified by the Economic Regulatory Administration as having sustained overcharges alleged in the ERA's audit of Richards' sales of No. 2 fuel oil and Nos. 4, 5, and 6 residual fuel oil. The claimant's Application for Refund adequately demonstrated that it was injured by the alleged overcharges. The total amount of the refund granted in the Decision was $8,219, representing $5,819 in principal and $3,400 in interest.

Gulf Oil Corp., Township of Randolph et al., 4/17/86, RF40–1117 et al.

The DOE issued a Decision and Order concerning Applications for Refund filed by 85 end-users of petroleum products purchased indirectly from Gulf Oil Corporation. In accordance with the procedures established in the Gulf Special Refund Proceeding, the DOE determined that each applicant should receive a refund based on its purchase volumes of Gulf products during the consent order period. The total amount of refunds approved in this Decision is $16,630 ($13,994 principal plus $2,636 interest).

Gulf Oil Corporation/Region Oil Co. Inc., et al., 4/15/86, RF40–828, et al.

The DOE issued a Decision and Order concerning four Applications for Refund filed by retailers and resellers of Gulf covered refined petroleum products. In accordance with the procedures established in the Gulf special refund proceeding, the DOE determined that each applicant should receive a refund based on its purchase volumes of Gulf products during the consent order period. The refunds granted in this decision total $78,777.

Little America Refining Company/Moyle Petroleum, 4/17/86, RF112–119.

The DOE issued a Decision and Order concerning an Application for Refund filed by Moyle Petroleum, a purchaser and reseller of products covered by a consent order the agency entered into with Little America Refining Company (Larco). Based on the principles established for evaluating Larco refund applications, the DOE concluded that the applicant was injured. Therefore, the DOE granted Moyle a refund of $17,428, representing its full volumetric share of $11,646 plus $5,782 in interest.

Little America Refining Company/Dunn Oil, et al., 4/17/86, FR112–93, et al.

The DOE issued a Decision and Order granting refunds from the Little America Refining Company (Larco) deposit escrow account to four resellers of Larco covered products. All four firms elected to limit their refund claims to the small claims threshold level of $5,000, and were therefore not required to submit further evidence of injury. The refunds to these firms total $29,928, representing $20,000 in principal and $9,928 in interest.

The Parade Company/Gulf States Oil & Refining Company, 4/17/86, RF74–3.

Gulf States Oil & Refining Company (Gulf States) filed an Application for Refund in which the firm sought a portion of the fund obtained by the DOE through a consent order entered into with The Parade Company (Parade). The DOE found that Gulf States paid above-market average prices for butane and pentane during most of the months of 1976 and 1977 in which purchases were made during the consent order period. Using a three-step competitive disadvantage methodology, the DOE calculated a range of Gulf States' competitive disadvantage. A refund of $52,324.98 was found to equitably compensate Gulf States for injury experienced as a result of Parade's alleged overcharges. In addition, the firm received accrued interest of $11,795.50 for a total refund of $64,122.48.

BILLING CODE 6750–01–M

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, Department of Energy.

ACTION: Notice of Implementation of Special Refund Procedures.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy solicits comments concerning the appropriate procedures to be followed in refunding to adversely affected parties $20,985.53 obtained as a result of a Consent Order which the DOE entered into with Port Oil Company, Inc., a reseller-retailer of petroleum products located in Mobile, Alabama. The money is being held in escrow following the settlement of enforcement proceedings brought by the DOE's Economic Regulatory Administration.

DATES AND ADDRESS: Comments must be filed within 30 days of publication of this notice in the **Federal Register** and should be addressed to the Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585. All comments should conspicuously display a reference to case number HEF–0153.

FOR FURTHER INFORMATION CONTACT: Walter J. Marullo, Office of Hearings

and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252–6602.

SUPPLEMENTARY INFORMATION: In accordance with § 205.282(b) of the procedural regulations of the Department of Energy, 10 CFR 205.282(b), notice is hereby given of the issuance of the Proposed Decision and Order set out below. The Proposed Decision sets forth procedures and standards that the DOE has tentatively formulated to distribute to adversely affected parties $20,965.53 plus accrued interest obtained by the DOE under the terms of a Consent Order entered into with Port Oil Company, Inc. (Port). The funds were provided to the DOE by Port to settle all claims and disputes between the firm and the DOE regarding the manner in which the firm applied the federal price regulations with respect to its sales of motor gasoline during the period April 1, 1979, through December 31, 1979.

OHA proposes that a two-stage refund process be followed. In the first stage, OHA has tentatively determined that a portion of the consent order refunds should be distributed to firms and individuals that purchased Port motor gasoline during the consent order period. In order to obtain a refund, each claimant will be required to submit a schedule of its monthly purchases of Port motor gasoline and to demonstrate that it was injured by Port's pricing practices. The specific requirements for proving injury are set forth in the following Proposed Decision and Order.

Applications for Refund should not be filed at this time. Appropriate public notice will be given when the submission of claims is authorized.

Some residual funds may remain after all meritorious first-stage claims have been satisifed. OHA invites interested parties to submit their views concerning alternative methods of distributing any remaining funds in a subsequent proceeding.

Any member of the public may submit written comments regarding the proposed refund procedures. Such parties are requested to submit two copies of their comments. Comments should be submitted within 30 days of publication of this notice. All comments received in this proceeding will be available for public inspection between 1:00 and 5:00 p.m., Monday through Friday, except federal holidays, in the Public Reference Room of the Office of Hearings and Appeals, located in Room 1E–234, 1000 Independence Avenue, SW., Washington, DC 20585.

Dated: May 5, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

Proposed Decision and Order of the Department of Energy

Implementation of Special Refund Procedures

May 5, 1986.

Name of Firm. Port Oil Company, Inc.
Date of Filing: October 13, 1983
Case Number: HEF–0153

Under the procedural regulations of the Department of Energy (DOE), the Economic Regulatory Administration (ERA) may request that the Office of Hearings and Appeals (OHA) formulate and implement special procedures to distribute funds received as a result of an enforcement proceeding in order to remedy the effects of actual or alleged violations of the DOE regulations. *See* 10 CFR Part 205, Subpart V. On October 13, 1983, ERA filed a Petition for the Implementation of Special Refund Procedures in connection with a consent order entered into with Port Oil Company, Inc. (Port).

I. Background

Port is a "reseller-retailer" of refined petroleum products as the term was defined in 10 CFR 212.31 and is located in Mobile, Alabama. A DOE audit of Port's records revealed possible violations of the Mandatory Petroleum Price Regulations. 10 CFR Part 212, Subpart F. The audit alleged that between April 1, 1979, and December 31, 1979, Port committed possible pricing violations amounting to $101,670.59 with respect to its sales of motor gasoline.

In order to settle all claims and disputes between Port and the DOE regarding the firm's sales of motor gasoline during the period covered by the audit, Port and the DOE entered into a consent order on September 1, 1981 (modified on April 17, 1986). The consent order refers to ERA's allegations of overcharges, but notes that there was no finding that violations occurred. Additionally, the consent order states that Port does not admit that it violated the regulations.

Under the terms of the consent order, Port was required, in a series of installments, to deposit $18,472.72, plus interest, into an interest-bearing escrow account for ultimate distribution by the DOE. Port made its final payment on February 23, 1983.[1]

[1] Port paid $20,965.53, including installment interest, into the escrow account. This amount represents the principal which will form the basis for refund calculations. The total value of the Port escrow account stood at $29,499.98 as of March 31, 1986.

II. Proposed Refund Procedures

The procedural regulations of the DOE set forth general guidelines to be used by OHA in formulating and implementing a plan of distribution for funds received as a result of an enforcement proceeding. 10 CFR Part 205, Subpart V. The Subpart V process may be used in situations where the DOE is unable to identify readily those persons who likely were injured by alleged overcharges or to ascertain readily the amount of such persons' injuries. For a more detailed discussion of Subpart V and the authority of OHA to fashion procedures to distribute refunds, *See Office of Enforcement,* 9 DOE ¶ 82,508 (1981), and *Office of Enforcement,* 8 DOE ¶ 82,597 (1981) (*Vickers*).

Our experience with Subpart V cases leads us to believe that the distribution of refunds in this proceeding should take place in two stages. In the first stage, we will accept claims from identifiable purchasers of motor gasoline who may have been injured by Port's pricing practices during the period April 1, 1979, through December 31, 1979. If any funds remain after all meritorious first-stage claims have been paid, they may be distributed in a second-stage proceeding. *See, e.g., Office of Special Counsel,* 10 DOE ¶ 85,048 (1982) (*Amoco*).

A. Refunds to Identifiable Purchasers

In the first stage of the Port refund proceeding, we propose to distribute the funds currently in escrow to claimants who demonstrate that they were injured by Port's alleged overcharges. As we have done in many prior refund cases, we propose to adopt certain presumptions and findings which will be used to help determine the level of a purchaser's injury.

The presumptions and findings we plan to adopt in this case are used to permit claimants to participate in the refund process without incurring inordinate expenses and to enable OHA to consider the refund applications in the most efficent way possible in view of the limited resources available. First, we plan to adopt a presumption that the alleged overcharges were dispersed evenly in all of Port's sales of motor gasoline made during the consent order period. This presumption is called a volumetric method. Second, we propose to adopt a presumption of injury with respect to small claims. Third, we plan to adopt a presumption that spot purchasers were not injured by the alleged overcharges. Finally, we are making proposed findings that end

users, certain types of regulated firms, and cooperatives were injured by Port's pricing practices.

The pro rata, or volumetric, refund presumption assumes that alleged overcharges by a consent order firm were spread equally over all gallons of product covered by the consent order. In the absence of better information, this assumption is sound because the DOE price regulations generally required a regulated firm to account for increased costs on a firm-wide basis in determining its prices. This presumption is rebuttable, however. A claimant which believes that it incurred a disproportionate share of the alleged overcharges may submit evidence proving this claim in order to receive a larger refund. *See Sid Richardson Carbon and Gasoline Co. and Richardson Products Co./Siouxland Propane Co.*, 12 DOE ¶ 85,054 at 88,164 (1984), and cases cited therein.

Under the volumetric method we plan to adopt, a claimant will be eligible to receive a refund equal to the number of gallons of Port motor gasoline that it purchased during the consent order period times the volumetric factor. The volumetric factor is the average per gallon refund and in this case equals $0.002561 per gallon.[2] In addition, successful claimants will receive a proportionate share of the accured interest.

The second presumption we plan to use is that purchasers of Port motor gasoline seeking small refunds were injured by the firm's pricing practices. Under this presumption, a claimant who is a reseller or retailer would not be required to submit any additional evidence of injury beyond volumes of Port motor gasoline purchased if its refund claim is below $5,000. *See Texas Oil & Gas Corp.*, 12 DOE ¶ 85,069 at 88,210 (1984); *Office of Special Counsel*, 11 DOE ¶ 85,226 (1984) (*Conoco*), and cases cited therein.

A reseller or retailer which claims a refund in excess of $5,000 will be required to document its injury. While there are a variety of methods by which a firm might make such a showing, a firm is generally required to demonstrate (i) that it maintained a "bank" of unrecovered costs, in order to show that it did not pass the alleged overcharges through to its own customers, and (ii) that market conditions were the reason that it did not pass through those increased costs.[3]

A modification of the standard injury requirement is necessary in this proceeding because for 5½ months of the 9-month Port consent order period, retailers of motor gasoline were not required to computed MLSPs with reference to May 15, 1973 selling prices and increased costs. *See* 10 CFR 212.93; 45 FR 29,546 (1989). Instead, effective July 16, 1979, a retailer was required to calculate its MLSP under a fixed-marign approach set forth in the new rule. Unrecouped increased product costs could no longer be banked for later recovery. *Id.* Consequently, retailers were not required to maintain or compute cost banks during the 5½ month period. As a result, any requirement that a retailer claimant make a demonstration of injury like that contemplated for resellers, *i.e.*, based on unrecovered cost banks, would effectively eliminate all non-threshold retailer claimants for a portion of the consent order period. Therefore, in this proceeding, we will allow retailers which lack banks subsequent to July 16, 1979 to file a claim for a refund which exceeds $5,000.[4] However, like resellers, retailers will be required for the entire consent order period to show that market conditions prevented them from recovering those increased product costs, *e. g.*, through a demonstration of reduced profit margins, decreased market shares, depressed sales volumes or competitive disadvantage.[5]

If a reseller or retailer made only spot purchases, we propose that it should not receive a refund since it is unlikely to have been inuured. As we have previously stated with respect to spot purchasers:

> [T]hose customers tend to have considerable discretion in where and when to make purchases and would therefore not have made spot market purchases of [the firm's product] at increased prices unless they were able to pass through the full amount of [the firm's] quoted selling price at the time of purchase to their own customers.

Vickers, 8 DOE at 85,396–97. Firms which made only spot purchases of Port motor gasoline will not receive refunds unless they present evidence which rebuts the spot purchaser presumption and establishes the extent to which they were injured.

As noted above, we have concluded tht end users were injured by the alleged overcharges. Unlike regulated firms in the petroleum industry, members of this group generally were not subject to price controls during the consent order period. They were therefore not required to base their pricing decisions on cost increases or to keep records which would show whether they passed through cost increases. An analysis of the impact of the alleged overcharges on the final prices of goods and services which were not covered by the petroleum price regulations would therefore be beyond the scope of a special refund proceeding. *See Office of Enforcement*, 10 DOE ¶ 85,072 (1983) (*PVM*); *see also Texas Oil & Gas Corp.*, 12 DOE at 88,209, and cases cited therein.[6]

In addition, we propose that firms whose prices for goods and services are regulated by a government agency or by the terms of a cooperative agreement not be required to demonstrate that they absorbed the motor gasoline overcharges alleged by ERA. In the case of regulated firms, *e.g.*, public utilities, any overcharges incurred as a result of Port's alleged violations of the DOE regulations would routinely be passed through to the utilities' customers. Similarly, any refunds received by such firms would be reflected in the rates they were allowed to charge their customers. Refunds to agricultural cooperatives would likewise directly influence the prices charged to their member customers. Consequently, we propose adding such firms to the class of claimants that are not required to show that they did not pass through to their customers cost increases resulting from alleged overcharges. *See, e.g., Office of Special Counsel*, 9 DOE ¶ 82,538 (1982) (*Tenneco*), *and Office of Special Counsel*, 9 DOE ¶ 82,545 at 85,244 (1982) (*Pennzoil*). Instead, those firms should

---

[2] This figure is computed by dividing the $20,965.53 received from Port by the 8,184,882 gallons of motor gasoline sold by the firm during the consent order period.

[3] This injury requirement reflects the nature of the petroleum price regulations in effect beginning on August 19, 1973, and ending on July 16, 1979 for retailers, and on May 1, 1980, for resellers. Under the original rules, a reseller or retailer of motor gasoline was required to calculate its maximum lawful selling price (MLSP) by summing its selling price on May 15, 1973, with increased costs incurred since that time. A firm which was unable to charge its MLSP in a particular month could "bank" any unrecovered increased product costs, so that those costs could be recouped in a later month, if possible. *See* 10 CFR 212.93; 45 FR 29546 (1980).

[4] The cost bank requirement has been relaxed in other instances involving the change in the pricing regulations for motor gasoline. *See* Tenneco Oil Company/United Fuels Corporation, 10 DOE ¶ 85,085 at 88,017 n.1 (1982).

[5] Resellers or retailers who claim a refund in excess of $5,000 but who do not attempt to establish that they did not pass through the price increases will be eligible for a refund of up to the $5,000 threshold, without being required to submit evidence of injury beyond purchase volumes. Firms potentially eligible for greater refunds may choose to limit their claims to $5,000. *See* Vickers, 8 DOE at 85,396. *See also* Office of Enforcement, 10 DOE ¶ 85,029 at 88,122 (1982).

[6] If a firm is both a spot purchaser and an end user, it will be treated as an end user and will not be required to make any showing of injury beyond that required of other end users.

provide with their application a full explanation of the manner in which refunds would be passed through to their customers and how the appropriate regulatory body or membership group will be advised of the applicant's receipt of any refund money. Sales by cooperatives to nonmembers, however, will be treated the same as sales by any other reseller.

As in previous cases, only claims for at least $15 will be processed. This minimum has been adopted in prior refund cases because the cost of processing claims for refunds of less than $15 outweighs the benefits of restitution in those situations. *See e.g., Uban Oil Co.*, 9 DOE at 85.225. *See also* 10 CFR 205.286(b). The same principle applies here.

If valid claims exceed the funds available in the escrow account all refunds will be reduced proportionately. Actual refunds will be determined after analyzing all appropriate claims.

B. Applications for Refund

Any purchaser claiming a portion of the consent order funds will be required to file an application for Refund pursuant to 10 CFR 205.283. In its application, a claimant must include a schedule of its monthly purchases of Port motor gasoline as well as all relevant information necessary to support its claim in accordance with the presumptions and findings outlined above. A claimant must also state whether it has previously received a refund, from any source, with respect to the alleged overcharges underlying this proceeding. Each applicant must also state whether there has been a change in ownership of the firm since the audit period. If there has been a change in ownership, the applicant must provide the names and addresses of the other owners, and should either state the reasons why the refund should be paid to the applicant rather than to the other owners or provide a signed statement from the other owners indicating that they do not claim a refund. Finally, an applicant should report whether it is or has been involved as a party in DOE enforcement or private actions filed under section 210 of the Economic Stabilization Act. If these actions have been concluded the applicant should furnish a copy of any final order issued in the matter. If the action is still in progress, the applicant should briefly describe the action and its current status. The applicant must keep OHA informed of any change in status while its Application for Refund is pending. *See* 10 CFR 205.9(d).

C. Distribution of Remaining Consent Order Funds

In the event that money remains after all meritorious claims have been satisfied, residual funds could be distributed in a number of ways in a subsequent proceeding. However, we will not be in a position to decide what should be done with any remaining funds until the initial stage of this refund proceeding has been completed. We encourage the submission by interested parties of proposals which address alternative methods of distributing any remaining funds.

It Is Therefore Ordered That:

The refund amount remitted to the Department of Energy by Port Oil Company, Inc. pursuant to the Consent Order executed on September 1, 1981, as modified on April 17, 1986, will be distributed in accordance with the foregoing decision.

[FR Doc. 86-10890 Filed 5-14-86; 8:45 am]
BILLING CODE 6450-01-M

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, Department of Energy.

ACTION: Notice of implementatation of special refund procedures.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy announces the procedures for disbursement of $50,595 obtained as a result of a consent order which the DOE entered into with Petroleum Sales and Service, Inc. (PS&S), a reseller-retailer of refined petroleum products located in Buffalo, New York. The money is being held in escrow following the settlement of enforecement proceedings brought by the DOE's Economic Regulatory Administration.

DATE AND ADDRESS: Applications for refund of a portion of the PS&S consent order funds must be filed in duplicate and must be received within 90 days of publication of this notice in the **Federal Register**. All applications should refer to Case Number HEF-0151 and should be addressed to: Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT: Walter J. Marullo, Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585, (202) 252-6602.

SUPPLEMENTARY INFORMATION: In accordance with § 205.282(c) of the procedural regulations of the Department of Energy, 10 CFR 205.282(c), notice is hereby given of the issuance of the Decision and Order set out below. The Decision relates to a consent order entered into by the DOE and Petroleum Sales and Service, Inc. (PS&S) which settled all claims and disputes between PS&S and the DOE regarding the manner in which PS&S applied the federal price regulations with respect to its sales of motor gasoline during the period, April 1, 1979, through March 31, 1980 (consent order period). A Proposed Decision and Order tentatively establishing refund procedures and soliciting comments from the public concerning the distribution of the PS&S consent order funds was issued on March 13, 1986. 51 FR 38189 (March 20, 1986).

The Decision sets forth procedures and standards that the DOE has formulated to distribute the contents of an escrow account funded by PS&S pursuant to the consent order. The DOE has decided to accept Applications for Refund from firms and individuals that purchased motor gasoline sold by PS&S during the consent order period. Eligible applicants downstream customers as well as first purchasers. In order to receive a refund, a claimant will be required to submit a schedule of its monthly purchases of PS&S motor gasoline and to demonstrate that it was injured by PS&S. pricing practices. A downstream purchaser must also submit the name of its immediate supplier and indicate why it believes the motor gasoline was originally sold by PS&S.

As the accompanying Decision and Order indicates, Applications for Refund may now be filed by customers that purchased motor gasoline sold by PS&S during the consent order period. Applications will be accepted provided they are filed in duplicate and received no later than 90 days after publication of this Decision and Order in the **Federal Register**. The specific information required in an Application for Refund is set forth in the Decision and Order.

Dated: May 2, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

Decision and Order of the Department of Energy

Implementation of Special Refund Procedures

May 2, 1986.

Name of Firm: Petrpleum Sales and Service, Inc.

Date of Filing: October 13, 1983.

Case Number: HEF-0151.

Under the procedural regulations of the Department of Energy (DOE), the

Economic Regulatory Administration (ERA) may request that the Office of Hearings and Appeals (OHA) formulate and implement special procedures to distribute funds received as a result of an enforcement proceeding in order to remedy the effects of actual or alleged violations of the DOE regulations. *See* 10 CFR Part 205, Subpart V. On October 13, 1983, ERA filed a Petition for the Implementation of Special Refund Procedures in connection with a consent order entered into with Petroleum Sales and Service, Inc. (PS&S). This Decision and Order contains the procedures which the OHA has formulated to distribute the funds received pursuant to that consent order.

I. Background

PS&S is a "reseller-retailer" of refined petroleum products as that term was defined in 10 CFR 212.31 and is located in Buffalo, New York. A DOE audit of PS&S's records revealed possible violations of the Mandatory Petroleum Price Regulations. 10 CFR Part 212, Subpart F. The audit alleged that between April 1, 1979, and March 31, 1980, PS&S committed possible pricing violations amounting to $129,428 with respect to its sales of motor gasoline.

In order to settle all claims and disputes between PS&S and the DOE regarding the firm's sales of motor gasoline during the period covered by the audit, PS&S and the DOE entered into a consent order on September 29, 1981. The consent order refers to ERA's allegations of overcharges but notes that there was no finding that violations occurred. Additionally, the consent order states that PS&S does not admit that it violated the regulations.

Under the terms of the consent order, PS&S was required, in a series of installments, to deposit $59,595, plus interest, into an interest-bearing escrow account for ultimate distribution by the DOE. PS&S avoided paying any installment interest by remitting the full sum on September 30, 1981.[1]

II. Jurisdiction and Authority to Fashion Refund Procedures

The general guidelines which the OHA may use to formulate and implement a plan to distribute funds received as the result of a consent order are set forth 10 CFR Part 205, Subpart V. For a more detailed discussion of Subpart V and the authority of the OHA to fashion procedures to distribute refunds obtained as part of settlement agreements, *see Office of Enforcement*, 9 DOE ¶ 82,508 (1981); and *Office of Enforcement*, 8 DOE ¶ 82,597 (1981).

On March 13, 1986, the OHA issued a Proposed Decision and Order (PD&O) setting forth a tentative plan for the distribution of refunds to parties that can make a reasonable showing of injury as a result of PS&S's alleged violations in its sales of motor gasoline during the consent order period. 51 Fed. Reg. 38189 (March 20, 1986). The PD&O stated that the basic purpose of a special refund proceeding is to make restitution for injuries that were experienced as a result of actual or alleged violations of the DOE regulations.

In order to give notice to all potentially affected parties, a copy of the Proposed Decision was published in the **Federal Register** and comments regarding the proposed refund procedures were solicited. In addition, copies of the PD&O were sent to various petroleum dealers associations. Comments were submitted on behalf of the States of Arkansas, Delaware, Iowa, Louisiana, North Dakota, Rhode Island, Utah, and West Virginia concerning the distribution of any funds remaining after refunds have been made to injured parties. The purpose of this Decision is to establish procedures for filing and processing claims in the first stage of the PS&S refund proceeding. Any procedures pertaining to the disposition of any monies remaining after this first stage will necessarily depend on the size of the fund. *See Office of Enforcement*, 9 DOE at 85,055. Therefore, it would be premature for us to address the issues raised by the states' comments at this time. Since no comments were received concerning the first-stage procedures, they will be adopted as proposed.

III. Refunds to Identifiable Purchasers

In the first stage of the PS&S refund proceeding, we will distribute the funds currently in escrow to claimants that demonstrate that they were injured by the alleged overcharges. In order to be eligible to receive a refund, claimants will have to file an application and, with the three exceptions discussed below, show the extent to which they were injured by the alleged overcharges. To the extent that any individual or firm can establish injury, it will be eligible for a share of the consent order funds.

In this case we will adopt two rebuttable presumptions as well as two findings regarding injury. These presumptions and findings have been used in many previous special refund cases. First, we will presume that purchasers of PS&S motor gasoline that are claiming small refunds ($5,000 or less) were injured by the alleged overcharges. Second, in the absence of compelling material, we will adopt a presumption that spot purchasers were not injured. Third, we will make a finding that end-users or ultimate consumers of PS&S motor gasoline whose business operations are unrelated to the petroleum industry were injured by the alleged overcharges. Lastly, we ill not require a detailed demonstration of injury from regulated utilities or agricultural cooperatives that purchased PS&S motor gasoline and passed the alleged overcharges associated with that product through to their end-user members. Prior OHA decisions provide detailed explanations of the bases of these presumptions and findings. *E.g., Peterson Petroleum, Inc.*, 13 DOE ¶ 85,191 at 88,508–10 (1985). The rationale for their use was also fully explained in the PD&O. 51 FR 9715 at 9716–17 (March 20, 1986). These presumptions and findings will permit claimants to apply for refunds without incurring disproportionate expenses and will enable the OHA to consider the refund applications in the most efficient way possible in view of the limited resources available.

In the PD&O we stated that a demonstration of "banks" of unrecovered product costs, along with information regarding an applicant's competitive disadvantage in its local market, would generally be a sufficient showing of injury for reseller or retailer applicants claiming refunds above the $5,000 threshold.[2] *See, e.g., Triton Oil and Gas Corp./Cities Service Company*, 12 DOE ¶ 85,107 (1984); *Tenneco Oil Company/Mid-Continent Systems, Inc.*, 10 DOE ¶ 85,009 (1982). As outlined in the PD&O, we will continue to use this requirement for non-threshold reseller applicants, but we will use a modified requirement for retailers.

A modification of the standard injury requirement is necessary because for 8½ months of the 12 month PS&S consent order period, retailers of motor gasoline were not required to compute MLSPs with reference to May 15, 1973 selling prices and increased costs. *See* 10 CFR 212.93; 45 FR 29546(1980). Instead, effective July 16, 1979, a retailer

[1] The total value of the PS&S escrow account stood at $91,904.99 as of March 31, 1986.

[2] This injury requirement reflects the nature of the petroleum price regulations in effect beginning on August 19, 1973, and ending on July 16, 1979 for retailers, and on May 1, 1980 for resellers. Under the original rules, a reseller or retailer of motor gasoline was required to calculate its maximum lawful selling price (MLSP) by summing its selling price on May 15, 1973, with increased costs incurred since that time. A firm which was unable to charge its MLSP in a particular month could "bank" any unrecovered increased product costs, so that those costs could be recouped in a later month, if possible. *See* 10 CFR 212.93; 45 FR 29546 (1980).

BEST COPY AVAILABLE

was required to calculate its MLSP under a fixed-margin approach set forth in the new rule. Unrecouped increased product costs could no longer be banked for later recovery. *Id.* Consequently, retailers were not required to maintain or compute cost banks during the 8⅓ month period. As a result, any requirement that a retailer claimant make a demonstration of injury like that contemplated for resellers, *i.e.*, based on unrecovered cost banks, would effectively eliminate all non-threshold retailer claimants for a portion of the consent order period. Therefore, in this proceeding, we will allow retailers which lack banks subsequent to July 16, 1979 to file a claim for a refund which exceeds $5,000.[3] However, like resellers, retailers will be required for the entire consent order period to show that market conditions prevented them from recovering those increased product costs, *e.g.*, through a demonstration of reduced profit margins, decreased market shares, depressed sales volumes, or competitive disadvantage.[4]

A. Calculation of Refund Amounts

We will use a volumetric method to determine the refunds of eligible applicants. This method presumes that the alleged overcharges were spread equally over all the gallons of motor gasoline sold by PS&S during the consent order period. Under the volumetric method, a claimant will be eligible to receive a refund equal to the number of gallons of PS&S motor gasoline that it purchased during the consent order period times the volumetric factor. The volumetric factor is the average per gallon refund and in this case equals $0.001074.[5] In addition, successful claimants will receive a proportionate share of the accrued interest.

We recognize that a particular purchaser could have incurred a disproportionate share of the alleged overcharges. Any purchaser who can make a showing of disproportionate overcharge may file a refund application based on such a claim.

As in previous cases, only claims for at least $15 will be processed. We have found through our experience in prior refund cases that the cost of processing claims for refunds of less than $15 outweighs the benefits of restitution in those situations. *See, e.g., Uban Oil Co.*, 9 DOE ¶ 82,541 at 85,225 (1982). *See also* 10 CFR 205.286(b). The same principle applies here.

If valid claims exceed the funds available in the escrow account, all refunds will be reduced proportionately. Actual refunds will be determined after analyzing all appropriate claims.

IV. Applications for Refund

We have determined that by using the procedures described above, we can distribute the PS&S consent order funds as equitably and efficiently as possible. Accordingly, we will now accept Applications for Refund from individuals and firms that purchased motor gasoline sold by PS&S between April 1, 1979, and March 31, 1980. Eligible applicants include downstream customers as well as first purchasers.

There is no specific application form which must be used. In order to receive a refund, each claimant must submit the following information:

(1) A schedule of its montly purchases of PS&S motor gasoline along with any relevant information necessary to support its claim in accordance with the presumptions and findings outlined above. If the applicant was a downstream purchaser it must also submit the name of its immediate supplier and indicate why it believes the motor gasoline was originally sold by PS&S.

(2) Whether the applicant has previously received a refund from any source, with respect to the alleged overcharges identified in the ERA audit underlying this proceeding;

(3) Whether there has been a change in ownership of the firm since the audit period. If there has been a change in ownership, the applicant must provide the names and addresses of the other owners, and should either state the reasons why the refund should be paid to the applicant rather than to the other owners or provide a signed statement from the other owners indicating that they do not claim a refund;

(4) Whether the applicant is or has been involved as a party in DOE enforcement or private action filed under § 210 of the Economic Stabilization Act. If these actions have been concluded the applicant should furnish a copy of any final order issued in the matter. If the action is still in progress, the applicant should briefly describe the action and its current status. The applicant must keep OHA informed of any change in status while its Application for Refund is pending. *See* 10 CFR 205.9(d); and

(5) The name and telephone number of a person who may be contacted by this Office for additional information.

Finally, each application must include the following statement: "I swear [of affirm] that the information submitted is true and accurate to the best of my knowledge and belief." *See* 10 CFR 205.283(c); 18 U.S.C. 1001.

All applications must be filed in duplicate and must be received within 90 days from the date of publication of this Decision and Order in the **Federal Register**. A copy of each application will be available for public inspection in the Public Reference Room of the Office of Hearings and Appeals. Any applicant which believes that its application contains confidential information must indicate this and submit two additional copies of its application from which the information has been deleted. All applications should refer to Case No. HEF–0151 and should be sent to: Office of Hearings and Appeals, Department of Energy, 1000 Independence Ave., SW., Washington, DC 20585.

It Is Therefore Ordered That:

(1) Applications for Refund from the funds remitted to Department of Energy by Petroleum Sales and Service, Inc. pursuant to the Consent Order executed on September 29, 1981, may now be filed.

(2) All applications must be filed no later than 90 days after publication of this Decision and Order in the **Federal Register**.

Dated: May 2, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

[FR Doc. 86–10891 Filed 5–14–86; 8:45 am]

BILLING CODE 6450–01–M

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, Department of Energy.

---

[3] The cost bank requirement has been relaxed in other instances involving the change in the pricing regulations for motor gasoline. *See* Tenneco Oil Company/United Fuels Corporation, 10 DOE ¶ 85,006 at 88,017 n.1 (1982) (Tenneco).

[4] Resellers or retailers who claim a refund in excess of $5,000 but who do not seek to establish that they did not pass through the price increases will be eligible for a refund of up to the $5,000 threshold, without being required to submit evidence of injury beyond purchase volumes. Firms potentially eligible for greater refunds may choose to limit their claims to $5,000. *See* Vickers, 8 DOE at 85,398. *See also* Office of Enforcement, 10 DOE ¶ 85,029 at 88,122 (1982).

[5] This figure is computed by dividing the $59,585 received from PS&S by the 55,481,424 gallons of motor gasoline estimated to have been sold by the firm during the consent order period. The volume estimate was derived from data concerning PS&S's purchases of motor gasoline during the first six months of the consent order period. Since the firm has limited storage capacity, it is reasonable to assume that PS&S sales of motor gasoline were roughly equal to its purchases during a given period. After making this assumption, we then extrapolated from the six months data to arrive at a sales estimate for the entire consent order period.

ACTION: Notice of Implementation of Special Refund Procedures.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy solicits comments concerning the appropriate procedures to be followed in refunding to adversely affected parties $93,907.92 obtained as a result of a Consent Order which the DOE entered into with King and King Enterprises, Inc., a reseller-retailer of petroleum products located in Kansas City, Missouri. The money is being held in escrow following the settlement of enforcement proceedings brought by the DOE's Economic Regulatory Administration.

DATE AND ADDRESS: Comments must be filed within 30 days of publication of this notice in the **Federal Register** and should be addressed to the Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585. All comments should conspicuously display a reference to case number HEF-0108.

FOR FURTHER INFORMATION CONTACT: Walter J. Marullo, Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585, (202) 252-6602.

SUPPLEMENTARY INFORMATION: In accordance with § 205.282(b) of the procedural regulations of the Department of Energy, 10 CFR 205.282(b), notice is hereby given of the issuance of the Proposed Decision and Order set out below. The Proposed Decision sets forth procedures and standards that the DOE has tentatively formulated to distribute to adversely affected parties $93,907.92 plus accrued interest obtained by the DOE under the terms of a Consent Order entered into with King and King Enterprises, Inc. (K&K). The funds were provided to the DOE by K&K to settle all claims and disputes between the firm and the DOE regarding the manner in which the firm applied the federal price regulations with respect to its sales of motor gasoline during the period March 1, 1979, through June 30, 1979.

OHA proposes that a two-stage refund process be followed. In the first stage, OHA has tentatively determined that a portion of the consent order funds should be distributed to the ten first purchasers identified in the ERA audit file. In order to obtain a refund, each of these claimants will be required to submit a schedule of its monthly purchases of motor gasoline from K&K or to submit a statement verifying that it purchased motor gasoline from K&K and is willing to rely on the data in the audit file. In addition, Applications for Refund will be accepted from purchasers not identified by the ERA audit. Unidentified customers that bought directly from K&K will be required to provide schedules of their monthly purchases during the consent order period. An indirect purchaser will also be required to provide the name of the firm from which the purchase was made as well as the reason why it believes the motor gasoline was initially sold by K&K. All claimants, whether identified or unidentified, will have to demonstrate that they were injured by K&K's pricing practices. The specific requirements for proving injury are set forth in the following Proposed Decision and Order. Applications for Refund should not be filed at this time. Appropriate public notice will be given when the submission of claims is authorized.

Some residual funds may remain after all meritorious first-stage claims have been satisfied. OHA invites interested parties to submit their views concerning alternative methods of distributing any remaining funds in a subsequent proceeding.

Any member of the public may submit written comments regarding the proposed refund procedures. Such parties are requested to submit two copies of their comments. Comments should be submitted within 30 days of publication of this notice. All comments received in this proceeding will be available for public inspection between 1:00 and 5:00 p.m., Monday through Friday, except federal holidays, in the Public Reference Room of the Office of Hearings and Appeals, located in Room 1E-234, 1000 Independence Avenue SW., Washington, DC 20585.

Dated: May 1, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

Proposed Decision and Order of the Department of Energy

Implementation of Special Refund Procedures

May 1, 1986.

Name of Firm: King and King Enterprises, Inc.

Date of Filing: October 13, 1983.

Case Number: HEF-0108.

Under the procedural regulations of the Department of Energy (DOE), the Economic Regulatory Administration (ERA) may request that the Office of Hearings and Appeals (OHA) formulate and implement special procedures to distribute funds received as a result of an enforcement proceeding in order to remedy the effects of actual or alleged violations of the DOE regulations. *See* 10 CFR Part 205, Subpart V. on October 13, 1983, ERA filed a Petition for the Implementation of Special Refund Procedures in connection with a consent order entered into with King and King Enterprises, Inc. (K&K).

I. Background

K&K is a "reseller-retailer" of refined petroleum products as that term was defined in 10 CFR 212.31 and is located in Kansas City, Missouri. A DOE audit of K&K's records revealed possible violations of the Mandatory Petroleum Price Regulations, 10 CFR Part 212, Subpart F. A Notice of Probable Violation (NOPV) issued by ERA on September 29, 1980, alleged that between March 1, 1979, and June 30, 1979, K&K committed possible pricing violations amounting to $507,237.16 with respect to its sales of motor gasoline.

In order to settle all claims and disputes between K&K and the DOE regarding the firm's sales of motor gasoline during the period covered by the audit, K&K and the DOE entered into a consent order on August 31, 1981. The consent order refers to ERA's allegations of overcharges, but notes that there were no finding that violations occurred. Additionally, the consent order states that K&K does not admit that it violated the regulations.

Under the terms of the consent order, K&K was required, in a series of installments, to deposit $81,934.56, plus interest, into an interest-bearing escrow account for ultimate distribution by the DOE. K&K made its final payment on August 18, 1983. This decision concerns the distribution of the funds inthe escrow account, including accrued interest.[1]

II. Proposed Refund Procedures

The procedural regulations of the DOE set forth general guidelines to be used by OHA in formulating and implementing a plan of distribution for funds received as a result of an enforcement proceeding. 10 CFR Part 205, Subpart V. The Subpart V process may be used in situations where the DOE is unable to identity readily those persons who likely were injured by alleged overcharges or to ascertain readily the amount of such persons' injuries. For more detailed discussion of Subpart V and the authority of OHA to fashion procedures to distribute refunds, *see Office of Enforcement*, 9 DOE ¶ 82,508 (1981), *and Office of Enforcement*, 8 DOE ¶ 82,597 (181) (*Vickers*).

[1] K&K paid $93,907.92, including installment interest, into the escrow account. This amount represents the principal which will form the basis for refund calculations. The total value of the K&K account stood at $130,721.28 as of March 31, 1986.

Our experience with Subpart V cases leads us to believe that the distribution of refunds in this proceeding should take place in two stages. In the first stage, we will attempt to provide refunds to identifiable purchasers of refined petroleum products who may have been injured by K&K's pricing practices between March 1, 1979, and June 30, 1979. In any funds remain after all meritorious first-stage claims have been paid, they may be distributed in a second-stage proceeding. *See, e.g., Office of Special Counsel,* 10 DOE ¶ 85,040 (1982) *(Amoco).*

A. Refunds to Identified Purchasers

In order to recompense parties who were injured as a result of the alleged violations of the DOE regulations, we will rely in part upon the information developed by the ERA in its aduit of K&K. *See, e.g., Marion Corp.* 12 DOE ¶ 85,014 (1984) *(Marion).* With this type of material, a reasonably precise determination can be made as to the identity of possibly overcharged parties and the level of any overcharges.

During the DOE's audit of K&K, ten first purchaser-customers of the firm were identified as having been allegedly ovecharged. ERA also alleged ovecharges to other, unidentified customers. As in previous cases of this type, we propose that the funds in the escrow account be apportioned among (i) the first purchasers identified by the audit which adequately demonstrate that they were injured by the alleged overcharges, (ii) other injured first purchasers, and (iii) subsequent repurchasers that can also show injury. *See, e.g., Bob's Oil Co.,* 12 DOE ¶ 85,024 (1984); *Richards Oil Company,* 12 DOE ¶ 85,150 (1984). The first purchasers identified by the audit, with the share of the settlement allotted to each by ERA, are listed in the Appendix to this Decision.

We plan to adopt certain presumptions and findings regarding injury which will allow claimants to participate in the refund process without incurring inordinate expenses and which will enable OHA to consider the refund applications in the most efficient way possible in view of the limited resources available. First, we propose to adopt a presumption of injury with respect to small claims. Second, we plan to adopt a presumption that spot purchasers were not injured by the alleged overcharges. Third, we plan to use a volumetric presumption for applicants not identified by ERA. Finally, we are making proposed fundings that end users, certain types of regulated firms, and cooperatives were injured by K&K's pricing practices. The volumetric and spot purchaser presumptions as well as the three findings will be discussed below in Section II.

Under the small-claims presumption, if a refund claim is below a certain sum, a reseller- or retailer-claimant will not be required to making a showing of injury other than evidence of the volumes of K&K motor gasoline which it purchased. In this case, $5,000 is a reasonable value for the threshold. *See Texas Oil & Gas Corp.* 12 DOE ¶ 85,069 at 88,210 (1984); *Office of Special Counsel,* 11 DOE ¶ 85,226 (1984) *(Conoco),* and cases cited therein. The record in this proceeding indicates that eight of the ten identified customers made small purchases.

A reseller or retailer which claims a refund of more than $5,000 will be required to document its injury. While there are a variety of methods by which a firm can make such a showing, a firm is generally required to demonstrate (i) that it maintained a "bank" of unrecovered costs, in order to show that it did not pass the alleged overcharges through to its own customers, and (ii) that market conditions were the reason that it did not pass through those increased costs.[4]

We propose to distribute a portion of the escrow funds to the firms listed in the Appendix to this Decision, provided that they file Applications for Refund and make any necessary demonstrations of injury.[5] Refunds will be authorized for those firms in the amounts indicated, plus accrued interest to the date they receive refunds.[6]

B. Refunds to Unidentified Purchasers

As noted above, this Decision concerns the distribution of the entire $03,997.92 that K&K deposited into the escrow account, plus accrued interest to date. Since the settlement amounts tentatively allotted to identified purchasers total only $23,883.59, the remaining portion of the K&K consent order funds may be distributed among first purchasers other than those identified by the ERA audit as well as to subsequent repurchasers that may have been injured by the alleged overcharges. To assist potential claimants in deciding whether to apply for a refund, we propose to use the small-claims presumption discussed above. In addition, we will adopt a presumption that the alleged overcharges allotted to unidentified purchasers were dispersed equally among all sales of motor gasoline made by K&K to those customers during the consent order period. In the absence of better information, this presumption is sound because the DOE price regulations generally required a regulated firm to account for increased costs on a firm-wide basis in determining its prices. However, we also recognize that the impact on an individual purchaser could have been greater, and any pruchaser may file a refund application based on a claim that it incurred a disproportionate share of the alleged overcharges. *See, e.g., Sid Richardson Carbon & Gasoline, Co., and Richardson Products Co. Siouxland Propane Co.,* 12 DOE § 85,054 at 88,164 (1984), and cases cited therein.

Under the volumetric method we plan to adopt, a claimant that was not identified by the ERA audit will be eligible to apply for a refund equal to the number of gallons of K&K motor gasoline that it purchased times the volumetric factor. The volumetric factor is the average per gallon refund and in this case equals $0.010441 per gallon.[8] In addition, successful claimants will receive a proportionate share of the accrued interest.

If a reseller or retailer made only spot purchases, we propose that it should not receive a refund since it is unlikely to have been injured. As we have previously stated with respect to spot purchasers:

[T]hose customers tend to have considerable discretion in where and when to make purchases and would therefore not have made spot market purchases of [the firm's

---

[3] Resellers or retailers who claim a refund in excess of $5,000 but who cannot establish that they did not pass through the price increases will be eligible for a refund of up to the $5,000 threshold, without being required to submit further evidence of injury. Firms potentially eligible for greater refunds may choose to limit their claims to $5,000. *See* Vickers, 8 DOE at 85,396. *See also* Office of Enforcement, 10 DOE ¶ 85,069 at 88,122 (1982) (Ada).

[4] One of the firms listed in the Appendix is itself involved in an enforcement proceeding with the DOE. On October 29, 1982, the ERA issued a Proposed Remedial Order (PRO) alleging overcharges by Highway Oil, Inc. on its sales of motor gasoline during the period November 1973 through April 1974. The alleged overcharges specified in the PRO totaled $2,808,430.56, including interest through September 1982. We may delay granting a refund to Highway until the issues underlying this enforcement proceeding are resolved.

[5] The share of the K&K escrow fund allocated to each firm listed in the Appendix represents 16.15 percent of the amount each was allegedly overcharged plus its proportionate share of the installment interest paid by K&K. This is consistent with the terms of the K&K consent order which settled for 16.15 percent of the total amount of overcharges alleged in the NOPV. However, purchasers identified in th ERA audit as having allegedly been overcharged may attempt to show that they should receive refunds larger than those indicated.

[6] This per gallon factor is computed by dividing the $70,344.23 available for distribution to unidentified purchasers by the 6,737,516 gallons of motor gasoline which K&K sold to those customers during the consent order period.

product] at increased prices unless they were able to pass through the full amount of [the firm's] quoted selling price at the time of purchase to their own customers.

Vickers, 8 DOE at 85, 396–97. Firms which made only spot purchases of K&K motor gasoline will not receive refunds unless they present evidence which rebuts the spot purchaser presumption and stablishes the extent to which they were injured.

As noted above, we are making a proposed finding that end users were injured by the alleged overcharges. Unlike regulated firms in the petroleum industry, members of this group generally were not subject to price controls during the consent order period. They were therefore not required to base their pricing decisions on cost increases or to keep records which would show whether they passed through cost increases. An analysis of the impact of the alleged overcharges on the final prices of goods and services which were not covered by the petroleum price regulations would be beyond the scope of a special refund proceeding. *See Office of Enforcement*, 10 DOE ¶ 85,072 (1983) (*PVM*); *see also Texas Oil & Gas Corp.*, 12 DOE at 88,209, and cases cited therein.*

In addition, we propose that firms whose prices for goods and services are regulated by a governmental agency or that operate under the terms of a cooperative agreement not be required to demonstrate that they absorbed the motor gasoline overcharges alleged by ERA. In the case of regulated firms, *e.g.*, public utilities, any overcharges incurred as a result of K&K's alleged violations of the DOE regulations would routinely be passed through to their customers. Refunds to agricultural cooperatives would likewise directly influence the prices charged to their member customers. Consequently, we propose adding such firms to the class of claimants that are not required to show that they did not pass through to their customers cost increases resulting from alleged overcharges. *See, e.g., Office of Special Counsel*, 9 DOE ¶ 82,539 (1982) (*Tenneco*), *and Office of Special Counsel*, 9 DOE ¶ 82,545 at 85,244 (1982) (*Pennzoil*). Instead, those firms should provide with their applications a full explanation of the manner in which refunds would be passed through to their customers and of how the appropriate regulatory body or membership group will be advised of the applicant's receipt of any refund money.

* If a firm is both a spot purchaser and an end user, it will be treated as an end user and will not be required to make any showing of injury beyond that required of other end users.

Sales by cooperatives to nonmembers, however, will be treated the same as sales by any other reseller.

As in previous cases, only claims for at least $15 will be processed. This minimum has been adopted in prior refund cases because the cost of processing claims for refunds of less than $15 outweighs the benefits of restitution in those situations. *See, e.g., Uban Oil Co.*, 9 DOE at 85,225. *See also* 10 CFR 205.286(b). The same principle applies here.

If valid claims exceed the funds available in the escrow account, all refunds will be reduced proportionately. Actual refunds will be determined after analyzing all appropriate claims.

C. Applications for Refund

Any purchaser claiming a portion of the consent order funds will be required to file an Application for Refund pursuant to 10 CFR 205.283. In its application, a claimant identified by ERA must submit either a schedule of its monthly purchases of motor gasoline from K&K during the consent order period or a statement verifying that it purchased motor gasoline from K&K and is willing to rely on the data in the audit file. A purchaser not identified by the ERA audit will be required to provide specific information as to the date, place, and volume of motor gasoline purchased as well as the name of the firm from which the purchase was made. All applicants, whether identified or unidentified, should also provide all relevant information necessary to support their claims in accordance with the presumptions and findings outlined above. A claimant must also state whether it has previously received a refund, from any source, with respect to the alleged overcharges underlying this proceeding. Each applicant must also state whether there has been a change in ownership of the firm since the audit period. If there has been a change in ownership, the applicant must provide the names and addresses of the other owners, and should either state the reasons why the refund should be paid to the applicant rather than to the other owners or provide a signed statement from the other owners indicating that they do not claim a refund. Finally, an applicant should report whether it is or has been involved as a party in DOE enforcement or private actions filed under section 210 of the Economic Stabilization Act. If these actions have been concluded the applicant should furnish a copy of any final order issued in the matter. If the action is still in progress, the applicant should briefly describe the action and its current status. The applicant must keep OHA informed of any change in status while its Application for Refund is pending. *See* CFR 205.9(d).

D. Distribution of Remaining Consent Order Funds

In the event that money remains after all meritorious claims have been satisfied, residual funds could be distributed in a number of ways in a subsequent proceeding. However, we will not be in a position to decide what should be done with any funds remaining in the escrow account until the initial stage of this refund proceeding has been completed. We encourage the submission by interested parties of proposals which address alternative methods of distributing any remaining funds.

It is Therefore Ordered That:

The refund amount remitted to the Department of Energy by King and King Enterprises, Inc. pursuant to the Consent Order executed on August 31, 1981, will be distributed in accordance with the foregoing decision.

APPENDIX—FIRST PURCHASERS

First purchaser	Share of settlement*
D&D Oil, 9524 Antioch, Overland Park, KS 66212	$104.21
EA-ZEE, 406 S. Main, Gardner, KS 66030	895.24

ENVIRONMENTAL PROTECTION AGENCY

[FRL–3016–4]

California State Motor Vehicle Pollution Control Standards; Opportunity for Public Hearing

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of an opportunity for public hearing.

SUMMARY: The California Air Resources Board (CARB) has notified EPA that it

has adopted regulations which set forth exhaust emission standards and enforcement procedures for new modifier certified motor vehicles. These regulations pertain to "grey market" passenger cars, light-duty trucks and medium-duty vehicles. California has requested EPA to determine that these regulations are within the scope of previous waivers granted to California pursuant to section 209(b) of the Clean Air Act (Act), 42 U.S.C. 7543(b). However, EPA considers these regulations to be new standards and test procedures and, hence, the proper subject of a full waiver determination. This notice announces that EPA has tentatively scheduled a public hearing for June 12, 1986, to consider CARB's request and to hear comments from interested parties regarding CARB's regulations. Any party desiring to present oral testimony for the record at the public hearing, instead of, or in addition to, written comments, must notify EPA by June 5, 1986. If no party informs EPA that it wishes to testify on these modifier certified regulations, no hearing will be held and EPA will consider CARB's request based on written submissions to the record.

DATES: EPA will hold a public hearing on June 12, 1986, beginning at 9:00 a.m., if any party notifies EPA by June 5, 1986, that it wishes to present oral testimony regarding CARB's requests. Any party may submit written comments regarding CARB's requests by July 7, 1986. It is EPA policy to consider late comments if time permits.

ADDRESSES: EPA will hold the public hearing announced in this notice at: U.S. Environmental Protection Agency, Regional Office (Region IX), Nevada room, 215 Fremont Street, San Francisco, California. Parties wishing to present oral testimony at the public hearing should notify in writing: Charles N. Freed, Director, Manufacturers Operations Division (EN-340-F), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. Any party may also submit written comments regarding the waiver request to the same address to the attention of the Docket EN-86-15. Copies of material relevant to the waiver request (Docket EN-86-15) will be available for public inspection during normal working hours (8:00 a.m. to 4:30 p.m., Monday through Friday) at the U.S. Environmental Protection Agency, Central Docket Section (A-130), Gallery I, Waterside Mall, 401 M Street SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Steven M. Spiegel, Attorney/Advisor, Manufacturers Operations Division (EN-340-F), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, (202) 382-2529.

SUPPLEMENTARY INFORMATION:

I. Background and Discussion

Section 209(a) of the Act, as amended, 42 U.S.C. 7543(a), provides in part: "No state or any political subdivision thereof shall adopt or attempt to enforce any standard relating to the control of emissions from new motor vehicles or new motor vehicle engines subject to this part . . . [or] require certification, inspection, or any other approval relating to the control of emissions as condition precedent . . . to the initial retail sale, titling (if any), or registration of such motor vehicle, motor vehicle engine, or equipment."

Section 209(b) of the Act requires the Administrator, after notice and opportunity for public hearing, to waive application of the prohibitions of section 209(a) for California "if the State determines that [its] . . . standards will be, in the aggregate, at least as protective of public health and welfare as applicable Federal standards . . . [unless] the Administrator finds that—(A) the determination of the State is arbitrary and capricious, (B) [California] does not need such . . . standards to meet compelling and extraordinary conditions, or (C) [its] standards and accompanying enforcement procedures are not consistent with section 202(a) of [the Act]."

Once California has received a waiver of the application of the prohibitions of section 209(a) for its standards and enforcement procedures for a class of vehicles, it may adopt other conditions precedent to initial retail sale, titling or registration of the subject class of vehicles without the necessity of receiving a further waiver of Federal preemption. If California acts to amend previously waived emission standards or accompanying enforcement procedures, the change may be considered to be within the scope of the previous waiver if it does not undermine California's determination that its standards, in the aggregate, are as protective of public health and welfare as comparable Federal standards, does not affect the consistency of California's requirements with respect to section 202(a) of the Act, and raises no new issues affecting EPA's previous waiver determinations.

By a letter dated March 28, 1986, CARB submitted to EPA a request for a determination that certain regulations are within the scope of previous waivers of Federal preemption. These regulations include the adoption of a new Section 1904 of Title 13 of the California Administrative Code—Special Test Procedures for Certification and Compliance—New Modifier Certified Motor Vehicles ("Modifier Certification Procedures"). These regulations apply to the California certification of all passenger cars, light-duty trucks, and medium-duty vehicles manufactured outside the United States which are subsequently modified to meet California motor vehicle emission standards by independent commercial importers.

The Modifier Certification Procedures incorporate, with significant revisions, California's existing certification program applicable to original equipment manufacturers. Specifically, the regulations:

(1) Require modifiers to demonstrate that the modified vehicles meet California emission standards and minimum requirements for durability, driveability and configuration control;

(2) require modifiers to warrant emission controls and be responsible for parts availability, repair stations and recall program administration as necessary;

(3) require modifiers to demonstrate financial responsibility by posting a $1,000 bond per vehicle or provide recall insurance with a minimum of $3,000 liability per vehicle;

(4) provide for assembly-line testing, confirmatory testing, engine compartment labelling, fuel fill pipes and openings, new and used dealership inspections, defect reporting and in-use vehicle enforcement testing.

California states in its March 28, 1986 letter that it has determined that these amendments do not undermine its determination that its standards are, in the aggregate, at least as protective of the public health and welfare as the applicable Federal standards since these amendments do not change California exhaust emission standards. Further, California states that these amendments are consistent with section 202(a) of the Act. Finally, California states that the amendments raise no new issues affecting previous waiver decisions. However, EPA believes that by extending California's emission standards and enforcement procedures to grey market vehicles not previously covered, these regulations do raise significant new issues not considered in prior waiver decisions. California's new regulations establish new standards and enforcement procedures for modifier certified new motor vehicles.

Since EPA believes California's request should be considered according to the requirements for a full waiver

determination, an opportunity for a hearing is being provided to consider comments from interested parties. Any party wishing to present testimony at the hearing should address the following issues:

(1) Whether or not California's determination that the amended standards are at least as protective of public health and welfare as applicable Federal standards is arbitrary and capricious;

(2) Whether or not California needs its standards to meet compelling and extraordinary conditions; and

(3) Whether or not California standards and accompanying enforcement procedures are consistent with section 202(a) of the Act.

II. Procedures for Public Participation

If the scheduled hearing takes place, it will provide an opportunity for interested parties to state orally their views or arguments or to provide pertinent information concerning the amendments at issue. Any party desiring to make an oral statement should file 10 copies of its proposed testimony and other relevant material along with its request for a hearing with the Director of EPA's Manufacturers Operations Division at the address listed above not later than June 5, 1986. In addition, the party should submit 25 copies, if feasible, of the proposed statement to the Presiding Officer at the time of the hearing.

Since a public hearing is designated to give interested persons an opportunity to participate in this proceeding, there are no adversary parties as such. Statements by participants will not be subject to cross examination by other participants without special approval by the Presiding Officer. The Presiding Officer is authorized to strike from the record statements which he or she deems irrelevant or repetitious and to impose reasonable limits on the duration of the statements of any witness.

If EPA does hold the hearing, the Agency will make a verbatim record of the proceedings. Interested persons may arrange with the reporter at the hearing to obtain a copy of the transcript at their own expense. I will base my determination with regard to CARB's request on the record of the public hearing, if any, and on any other relevant written submissions and consider other pertinent information. This information will be available for public inspection at the EPA Central Docket Section.

Dated: May 2, 1986.

J. Craig Potter,

Assistant Administrator for Air and Radiation.

BILLING CODE [illegible]

[Docket Nos. A-79-28, A-82-37, A-84-25; ORD-FRL-3016-2]

Draft Addendum to The EPA Criteria Document: Air Quality Criteria For Particulate Matter and Sulfur Oxides

AGENCY: Environmental Protection Agency.

ACTION: Notice of public meeting.

SUMMARY: This notice announces a workshop to be held by EPA's Environmental Criteria and Assessment Office at the Environmental Research Center, Research Triangle Park, Carolina, to facilitate preparation of an external review draft of an addendum to the health effects chapters of the criteria document, *Air Quality Criteria for Particulate Matter and Sulfur Oxides* (EPA-600/8-82-029aF, bF, cF).

DATES: The workshop will be held on May 22 and 23, 1986, from 8:30 a.m. to 5:30 p.m. Members of the public are invited to attend as observers.

FOR FURTHER INFORMATION CONTACT: Dennis J. Kotchmar, M.D., Project Manager for the Particulate Matter/Sulfur Oxides Addendum, Environmental Criteria and Assessment Office, MD-52, U.S. Environmental Protection Agency, Research Triangle Park, NC 27711 (919) 541-4158 [FTS 629-4158]. The project manager should also be contacted by those persons who wish to attend the workshop.

SUPPLEMENTARY INFORMATION: In 1982, EPA's Environmental Criteria and Assessment Office (ECAO) completed preparation of a revised criteria document, *Air Quality Criteria for Particulate Matter and Sulfur Oxides* (EPA-600/8-82-029aF, bF, and cF). In that same year, EPA's Office of Air Quality Planning and Standards completed preparation of staff papers to assess the implications of the revised criteria for the review, and possible revision, of the national ambient air quality standards for particulate matter (EPA-450/5-82-001) and for sulfur oxides (EPA-450/5-82-007). On March 20, 1984 (49 FR 10408), EPA proposed revisions of the particulate matter standard and formally issued the criteria document.

On April 1, 1986 (51 FR 11058), EPA announced plans to prepare addenda to the criteria document and the staff papers. The addendum to the criteria document will summarize pertinent health effects studies that have been published since the completion of the document in 1982. The addenda to the staff papers will assess the implications, if any, of these studies for the national ambient air quality standards.

ECAO is now assembling a panel of authors and contributors, EPA personnel, and other scientifically and technically qualified persons to review a draft of the addendum to the criteria document at the workshop. Copies of the workshop draft of the addendum will be made available to the public at the meeting, and observers will have an opportunity to make brief oral statements. The draft addendum subsequently will be revised and released as an external review draft. Ample opportunity will be provided for public review and submission of written comments upon release of the first external review draft. The public comment period will be announced in a subsequent **Federal Register** notice.

Detailed notes of the meeting will be kept by EPA. These notes and any other materials provided for or produced collectively at the meeting will be included in the rulemaking docket established for particulate matter (A-82-37) and in the review docket (A-79-28) and the rulemaking docket (A-84-25) established for sulfur oxides. The dockets are available for inspection and copying between the hours of 8:00 a.m. and 4:00 p.m. at EPA headquarters in the Central Docket Section (A-130), Gallery 1, West Tower, Waterside Mall, 401 M Street, SW., Washington, DC 20460.

Dated: May 7, 1986.

Donald J. Ehreth,

Acting Assistant Administrator for Research and Development.

[FR Doc. 86-10044 Filed 5-14-86; 8:45 am]

BILLING CODE [illegible]

[Docket No. PF-456; FRL-3016-5]

Pesticide Tolerance Petitions; Mobay Chemical Corp. and Pennwalt Corp.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received pesticide petitions relating to the establishment of tolerances for certain pesticide chemicals in or on certain agricultural commodities.

ADDRESS: By mail, submit comments identified by the document control number [PF-456] and the petition number, attention Product Manager (PM-16), at the following address:

Information Services Section (TS–757C), Program Management and Support Division, Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

In person, bring comments to: Information Services Section (TS–757C), Environmental Protection Agency, Rm. 236, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments filed in response to this notice will be available for public inspection in the Information Services Section office at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, except legal holiday.

FOR FURTHER INFORMATION CONTACT: By mail:

William Miller (PM–16), Registration Division (TS–767C), Environmental Protection Agency, Office of Pesticide Programs, 401 M St., SW., Washington, D.C. 20460.

Office location and telephone number:

Room 211, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202, (703–557–2600).

SUPPLEMENTARY INFORMATION: EPA has received pesticide petitions (PP) relating to the establishment of tolerances for certain pesticide chemicals in or on certain agricultural commodities.

Initial Filings

1. *PP 6F3402.* Mobay Chemical Corp., P.O. Box 4913, Kansas City, MO 64120. Proposes amending 40 CFR 180.320 by reducing the established tolerances for the combined residues of the insecticide/bird repellent 3,5-dimethyl-4-(methylthio) phenyl methylcabamate and its cholinesterase-inhibiting metabolites in or on the commodities blueberries and cherries from 25.0 parts per million (ppm) to 5.0 ppm. The proposed analytical method for determining residues is a gas chromatographic procedure utilizing a flame photometric detector operated in the sulfur mode.

2. *PP 6F3399.* Pennwalt Corp., Three Parkway, Room 619, Philadelphia, PA 19102. Proposes to amend 40 CFR Part 100 by establishing exemptions from the requirement of a tolerance for residues of the insecticides fluorine compounds cryolite and synthetic cryolite (sodium aluminum fluoride) in or on the following commodities: apples, apricots, beans, beets (with or without tops) or beet greens alone, blackberries, blueberries (huckleberries), boysenberries, broccoli, brussels sprouts, cabbage, carrots, cauliflower, citrus fruits, corn, collards, cranberries, cucumbers, dewberries, eggplants, grapes, kale, kohlrabi, lettuce, loganberries, melons, mustard greens, nectarines, okra, peaches, peanuts, pears, peas, peppers, plums (fresh prunes), potatoes, pumpkins, quinces, radishes (with or without tops) or radish tops, raspberries, rutabagas (with or without tops) or rutabaga tops, squash, strawberries, summer squash, tomatoes, turnips (with or without tops) or turnip greens, and youngberries.

The proposed analytical method for determining residues is an ammonium hydryide reflex method employing a floride specific ion.

Authority: 21 U.S.C. 346a.

Dated: May 9, 1986.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Progams.

BILLING CODE 6560–50–M

FEDERAL COMMUNICATIONS COMMISSION

[CC Docket 86–181]

Common Carrier Bureau; Midyear 1986 Access Tariff Filings

AGENCY: Federal Communications Commission.

ACTION: Order designating issues for investigation.

SUMMARY: This action establishes an investigation of the National Exchange Carrier Association's (NECA) proposed carrier common line rates which were filed as NECA's Tariff F.C.C. No. 1, Transmittal No. 122, on April 1, 1986, to be effective June 1, 1986. This action also establishes a procedural schedule for this investigation.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Dan Grosh, Tariff Division, (202)–632–6387.

SUPPLEMENTARY INFORMATION: This is an initiation of an investigation of NECA's midyear 1986 access tariff filings, CC Docket No. 86–181, adopted May 2, 1986, and released May 2, 1986.

The full text of the Bureau's Order is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Summary of Designation Order

Pending before the Commission are the latest set of access tariff revisions, filed pursuant to the Commission's Order in CC Docket No. 85–385 Revision of Part 69 of the Commission's Rules and Regulations, FCC 86–70, released February 6, 1986, as implemented in the Common Carrier Bureau's Order, Midyear 1986 Access Tariff Filings, Mimeo No. 3414, released March 26, 1986.

By this Designation Order, the Bureau has initiated an investigation of NECA's tariff revisions regarding its carrier common line rates to determine if they are reasonable before June 1, 1986 effective date.

Albert Halprin,

Chief, Common Carrier Bureau.

[FR Doc. 86–10959 Filed 5–14–86; 8:45 am]

BILLING CODE 6712–01–M

[FCC 86–224]

Midyear 1986 Access Tariff Filings; Memorandum Opinion and Order

Adopted: May 1, 1986.
Released: May 2, 1986.
By the Commission.

1. Initial review of the access tariff transmittals and rates filed by the local exchange carriers on April 1, 1986 to be effective June 1, 1986 indicates that some rates, terms, and conditions may be unreasonable or in conflict with Commission Rules and Orders. Because of the importance of these filings to the public and to long distance carriers, we anticipate that investigatory and other proceedings to correct the tariffs may be necessary. Because of the limited time available before the June 1 effective date, however, it is important that any

such proceedings be initiated and concluded promptly, so far as possible before June 1.

2. For these reasons, and in light of the fact that the issues involved are largely ones of compliance with Commission Orders and the review of individual rates; we hereby delegate authority to the Chief, Common Carrier Bureau, to designate for hearing and issue reports or Orders with respect to all issues presented by the access tariff transmittals filed by or on behalf of the local exchange carrier to be effective June 1, 1986, including amendments or additions thereto. Any conclusions reached concerning the access tariffs will directly affect the reasonableness of the pending MTS and WATS rate revisions filed by AT&T Communications in its Transmittal No. 804, also effective June 1. Therefore, our delegation of authority also includes this transmittal, any amendments or additions thereto, and the pending investigation of AT&T's WATS rates in CC Docket No. 85–81.[1] This action is taken pursuant to § 1.1 and 0.201 et seq. of the Commission's Rules, 47 CFR 1.1 and 0.201 et seq.

Federal Communications Commission.

William J. Tricarico,

Secretary.

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224–010926.

Title: Long Beach Container Terminal, Inc./Orient Overseas Container Line, Inc.

Parties:

Long Beach Container Terminal, Inc. (LBCT)

Orient Overseas Container Line, Inc. (Carrier)

Synopsis: The proposed agreement would permit LBCT to provide container terminal stevedoring services at its terminal facility located in the Port of Long Beach for containers to be loaded onto or discharged from cellular container vessels owner, operated, chartered or controlled by the Carrier in the trade between Far East Ports and the Port of Long Beach.

Agreement No.: 224–010927.

Title: Long Beach Container Terminal, Inc./Neptune Orient Lines Terminal Agreement

Parties:

Long Beach Container Terminal, Inc. (LBCT)

Neptune Orient Lines, Ltd. (NOL)

Synopsis: The proposed agreement would permit LBCT to provide container terminal stevedoring services at its terminal facility located in the Port of Long Beach for containers to be loaded onto or discharged from cellular container vessels owner, operated, chartered or controlled by NOL in the trade between Far East Ports and the Port of Long Beach.

Agreement No.: 224–010928.

Title: Long Beach Container Terminal, Inc./Yamashita-Shinnihon Steamship Co., Ltd.

Parties:

Long Beach Container Terminal, Inc. (LBCT)

Yamashita-Shinnihon Steamship Co., Ltd. (Carrier)

Synopsis: The proposed agreement would permit LBCT to provide container terminal stevedoring services at its terminal facility located in the Port of Long Beach for containers to be loaded onto or discharged from cellular container vessels owner, operated, chartered or controlled by the Carrier in the trade between Far East Ports and the Port of Long Beach.

Dated: May 12, 1986.

By Order of the Federal Maritime Commission.

John Robert Ewers,

Secretary.

[FR Doc. 86–10946 Filed 5–14–86; 8:45 am]

BILLING CODE 6730–01–M

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224–010929

Title: Los Angeles Terminal Agreement.

Parties:

City of Los Angeles (Port)

Yang Ming Marine Transport Ltd. (Yang Ming)

Synopsis: The proposed agreement would accomplish the relocation of Yang Ming from its current premises operated by the Overseas Terminal Company to an operating area within and adjacent to the Indies Terminal. The parties have requested a shortened review period.

Agreement No.: 224–010930

Title: Port of Los Angeles Terminal Agreement.

Parties:

City of Los Angeles Harbor Department (City)

Stevedoring Services of America (SSA)

Synopsis: The proposed agreement would establish a nonexclusive preferential assignment arrangement whereby the City would provide SSA an nonexclusive lease of three Port cranes. The crane assignment would require SSA to pay the City $87,780 per year for each crane for up to 3000 hours of use. For each additional hour of use, SSA would pay the City 75 percent of the Port of Los Angeles tariff rate for cranes. The crane assignment will terminate July 31, 1989. The parties have requested a shortened review period.

Agreement No.: 217–010731–001

Title: Sea-Land Service/United Arab Shipping Co. Space Charter Agreement

Parties:

Sea-Land Service, Inc. (Sea-Land)

United Arab Shipping Company (UASA

Synopsis: The proposed amendment would change the allocation of spaces

[1] Because this delegation of authority is intended only to allow necessary action before the schedule June 1 effective dates of the tariffs, delegation of authority to act in CC Docket No. 85–81 is granted only up to June 1, 1986.

UASC agrees to make available to Sea-Land from a guaranteed number per annum to a fixed number per vessel sailing in each direction. It would also permit the parties to interchange equipment and would clarify the scope of the agreement as it pertains to certain foreign-to-foreign movements.

Dated: May 12, 1986.

By order of the Federal Maritime Commission.

John Robert Ewers,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Harco Bankshares, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than June 6, 1986.

A. **Federal Reserve Bank of Cleveland** (Lee S. Adams, Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *Harco Bankshares, Inc.*, Harlan, Kentucky; to become a bank holding company by acquiring 100 percent of the voting shares of the Harlan National Bank, Harlan, Kentucky.

B. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Bankers' Bancorp of Illinois*, Springfield, Illinois; to become a bank holding company by acquiring 100 percent of the voting shares of Independent Bankers' Bank of Illinois, Springfield, Illinois, a *de novo* bank.

2. *St. Joseph Bancorporation, Inc.*, South Bend, Indiana; to acquire 100 percent of the voting shares of First Union Bank and Trust, Winamac, Indiana. Comments on this application must be received not later than June 2, 1986.

C. **Federal Reserve Bank of St. Louis** (Delmer P. Weisz, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Bancorp of Mississippi, Inc.*, Tupelo, Mississippi; to acquire at least

7.76 percent of the voting shares of First Mississippi National Corporation, Hattiesburg, Mississippi, and thereby indirectly acquire shares of First Mississippi National Bank, Hattiesburg, Mississippi.

D. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *Verde Valley Bancorp, Inc.*, Cottonwood, Arizona; to become a bank holding company by acquiring 100 percent of the voting shares of The Bank of Verde Valley, Cottonwood, Arizona, a *de novo* bank.

Board of Governors of the Federal Reserve System, May 12, 1986.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

MCorp, et al.; Acquisitions of Companies Engaged in Permissible Nonbanking Activities

The organizations listed in this notice have applied under § 225.23(a) (2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting woud be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated for the application or the offices of the Board of Governors not later than June 6, 1986.

A. **Federal Reserve Bank of Dallas** (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *MCorp*, Dallas, Texas; to acquire Ecom Systems, Incorporated, Memphis, Tennessee, and thereby engage in the activity of providing to others financially related data processing and data transmission services, facilities, and data bases; or access to them pursuant to § 225.25(b)(7) of the Board's Regulation Y.

2. *MCorp Financial Inc.*, Wilmington, Delaware; to acquire Ecom Systems, Incorporated, Memphis, Tennessee, and thereby engage in the activity of providing to others financially related data processing and data transmission services, facilities, and data bases; or access to them pursuant to § 225.25(b)(7) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, May 9, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Resource Companies, Inc.; Application To Engage de Novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than June 5, 1986.

A. **Federal Reserve Bank of Minneapolis** (Bruce J. Hedblom, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Resource Companies, Inc.*, Minneapolis, Minnesota; to engage *de novo* through its subsidiary Resource Capital Advisers, Inc., Minneapolis, Minnesota, in providing continuous and individualized management of investment portfolios including equities, bonds, and short-term investments pursuant to § 225.25(b)(4)(iii) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, May 9, 1986.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 86-10900 Filed 5-14-86; 8:45 am]

BILLING CODE 6210-01-M

Suburban Bancorp. Inc., et al.; Formations of, Acquisitions, and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the

Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than June 6, 1986.

A. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Suburban Bancorp, Inc.*, Palatine, Illinois; to acquire 100 percent of the voting shares of Marengo State Bank, Marengo, Illinois.

2. *Suburban Bancorp, Inc.*, Palatine, Illinois; to acquire 95 percent or more of the voting shares of West Brook Bank, Westchester, Illinois.

B. Federal Reserve Bank of St. Louis (Delmer P. Weisz, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Smith Associated Banking Corporation*, Little Rock, Arkansas; to acquire at least 98 percent of the voting shares of Stephens Security Bank, Stephens, Arkansas.

Board of Governors of the Federal Reserve System, May 9, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Procurement Activities; Information Collection

AGENCY: Federal Trade Commission.

ACTION: Application to OMB under the Paperwork Reduction Act, 44 U.S.C. 3507 (1982) and 5 CFR 1320.12 (1982) and 5 CFR 1320.12 (1985) for clearance of the information collection aspects of FTC procurement activities.

SUMMARY: Under the Code of Federal Regulations (Title 41–Public Contracts and Property Management), the FTC is required to solicit information from the private business community regarding certain planned procurement actions. Information is submitted in response to Invitations for Bids, Requests for Proposals, and Requests for Quotations. The responses generally include pricing and technical approach plans and information regarding the offeror's previous experience and related business data addressing its ability to perform the proposed work. The Commission is seeking a three-year extension of the existing OMB clearance (Control No. 3084–0047) for the information collection requests made in the procurement of necessary goods and services. The FTC has issued no procurement regulations or forms of its own. It uses government-wide procurement procedures that are estimated to involve 1,000 burden hours annually.

DATE: Comments on this application must be submitted on or before June 16, 1986.

ADDRESS: Send comments to Mr. Don Arbuckle, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3228, Washington, DC 20503. Copies of this application may be obtained from: Public Reference Branch, Room 130, Federal Trade Commission, Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Robert S. Walton III, Office of Procurement and Contracts, Federal Trade Commission, Washington, DC 20580, (202) 523–5552.

Dated: May 9, 1986.

Marcy J.K. Tiffany,

Acting General Counsel.

BILLING CODE 6750-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Alcohol, Drug Abuse, and Mental Health Administration

Initial Review Committees; Meetings

AGENCY: Alcohol, Drug Abuse, and Mental Health Administration, HHS.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of the forthcoming meetings of the agency's initial review committees. These committees will be open for discussion of administrative announcements and program developments. The committees will be performing initial review of applications for Federal assistance. Therefore, portions of the meetings will be closed to the public as determined by the Acting Administrator, ADAMHA, in accordance with 5 U.S.C. 552(b)(6) and 5 U.S.C. app. 2, sec. 10(d). Notice of these meetings is required under the Federal Advisory Committee Act, Pub. L. 92–463.

Committee Name: Biochemistry, Physiology, and Medicine Subcommittee of the Alcohol Biomedical Research Review Committee.

Date and Time: June 2–3: 9:00 a.m.

Place: Wellington Hotel, 2505 Wisconsin Avenue NW, Washington, DC 2007.

Status of Meeting: Open—June 2: 9:00–11:00 a.m. Closed—Otherwise.

Contact: Walter T. Schaffer, Room 16C26, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–6106.

Purpose: The Subcommittee is charged with the initial review of applications for assistance from the National Institute on Alcohol Abuse and Alcoholism for support of research and training activities and makes recommendations to the National Advisory Council on Alcohol Abuse and Alcoholism for final review.

Committee Name: Biological and Neurosciences Subcommittee of the Mental Health Research Education Review Committee.

Date and Time: June 2–3: 9:00 a.m.

Place: Linden Hill Hotel, Pinehurst Room, 5400 Pooks Hill Road, Bethesda, Maryland 20814.

Status of Meeting: Open—June 2: 9:00–10:00 a.m. Closed—Otherwise.

Contact: Betty Russell, Room 9C15, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–6470.

Purpose: The Committee is charged with the initial review of applications for assistance from the National Institute of Mental Health for support of research training activities in the area of biological sciences related to mental health, with recommendations to the National Advisory Mental Health Council for final review.

Committee Name: Neuroscience and Behavior Subcommittee of the Alchohol Biomedical Research Review Committee.

Date and Time: June 2–3: 9:00 a.m.

Place: Wellington Hotel, 2505 Wisconsin Avenue, N.W., Washington, DC 20007.

Status of Meeting: Open—June 2: 9:00–11:00 a.m. Closed—Otherwise.

Contact: Mark R. Green, Room 16C26, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

Purpose: The Committee is charged with the initial review of applications for assistance from the National Institute on Alcohol Abuse and Alcoholism for support of research and training activities and makes recommendations to the National Advisory Council on Alcohol Abuse and Alcoholism for final review.

Committee Name: Research Scientist Development Review Committee.

Date and Time: June 4–5: 9:00 a.m.

Place: Chevy Chase Holiday Inn, 5520 Wisconsin Avenue, Chevy Chase, Maryland 20815.

Status of Meeting: Open—June 4: 9:00–10:00 a.m. Closed—Otherwise.

Contact: Linda Rainey, Room 9C05, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–6470.

Purpose: The Committee is charged with the initial review of applications for assistance from the National Institute of Mental Health for support of activities to develop and execute a program of Research Scientist and Research Scientist Development Awards to appropriate institutions for the support of individuals who are engaged full time in research and related activities relevant to mental health, with recommendations to the National Advisory Mental Health Council for final review.

Committee Name: Aging Subcommittee of the Life Course and Prevention Research Review Committee.

Date and Time: June 5–6: 9:00 a.m.

Place: The Bethesda Ramada, 8400 Wisconsin Avenue, Bethesda, Maryland 20814.

Status of Meeting: Open—June 4: 9:00–10:30 a.m. Closed—Otherwise.

Contact: Jean Byrne, Room 9C18, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–3857.

Purpose: The Committee is charged with the initial review of applications for assistance from the National Institute of Mental Health for support of research grants, individual postdoctoral research fellowships and institutional research training grants, cooperative agreements, and research and development contracts, as they relate to mental health in the fields of child, family, and aging, with recommendations to the National Advisory Mental Health Council for final review.

Committee Name: Drug Abuse Clinical and Behavioral Research Review Committee.

Date and Time: June 10–13: 9:00 a.m.

Place: Hyatt Regency Bethesda, One Bethesda Metro Center, Bethesda, Maryland 20814.

Status of Meeting: Open—June 10: 9:00–9:30 a.m. Closed—Otherwise.

Contact: Daniel L. Mintz, Room 10–42, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–2620.

Purpose: The Committee is charged with the initial review of applications for assistance from the National Institute on Drug Abuse for support of research and research training activities and makes recommendations to the National Advisory Council on Drug Abuse for final review.

Committee Name: Services Research Subcommittee of the Epidemiologic and Services Research Review Committee.

Date and Time: June 11–13: 9:00 a.m.

Place: Chevy Chase Holiday Inn, 5520 Wisconsin Avenue, Chevy Chase, Maryland 20815.

Status of Meeting: Open—June 11: 9:00–10:00 a.m. Closed—Otherwise.

Contact: Gloria Yockelson, Room 9C08, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–1367.

Purpose: The Committee is charged with the initial review of applications for assistance from the National Institute of Mental Health for support of research and research training activities as they relate to mental health epidemiology, mental health service systems research, and evaluation of clinical mental health services, with recommendations to the National Advisory Mental Health Council for final review.

Committee Name: Psychopathology and Clinical Biology Research Review Committee.

Date and Time: June 11–13: 9:00 a.m.

Place: Sheraton Washington Hotel, 2660 Woodley Road at Connecticut, Washington, DC 20008.

Status of Meeting: Open—June 11: 9:00–10:00 a.m. Closed—Otherwise.

Contact: Emilie A. Embrey, Room 9C08, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–1340.

Purpose: The Committee is charged with the initial review of applications for assistance from the National Institute for support of activities in the fields or research and research training activities in the areas of clinical psychopathology and clinical biology as they relate to mental health, with recommendations to the National Advisory Mental Health Council for final review.

Committee Name: Criminal and Violent Behavior Research Review Committee.

Date and Time: June 11–13: 9:15 a.m.

Place: Dupont Plaza Hotel, Dupont Circle, 1500 New Hampshire Avenue NW, Washington, DC 20009.

Status of Meeting: Open—June 11: 9:15–10:30 a.m. Closed—Otherwise.

Contact: Peg Lyons, Room 9C18, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–3907.

Purpose: The Committee is charged with the initial review of applications for assistance from the National Institute of Mental Health for support of research grants, individual postdoctoral research fellowships and institutional research training grants, cooperative, and research and development contracts, as they relate to the mental health aspects of criminal, delinquent, and antisocial behavior; individual violent behavior; sexual assault; and law-mental health interactions related to these areas, with recommendations to the National Advisory Mental Health Council for final review.

Committee Name: Basic Behavioral Processes Research Review Committee.

Date and Time: June 12: 9:00 a.m.

Place: The State Plaza Hotel, 2117 E Street NW, Washington, DC 20037.

Status of Meeting: Open—June 12: 9:00–10:00 a.m. Closed—Otherwise.

Contact: Shirley Maltz, Room 9C26, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–3936.

Purpose: The Committee is charged with the initial review of applications for assistance from the National Institute of Mental Health for support of research and research training activities relating to experimental and physiological psychology and comparative behavior, with recommendations to the National Advisory Mental Health Council for final review.

Committee Name: Cognition, Emotion, and Personality Research Review Committee.

Date and Time: June 12–13: 9:00 a.m.

Place: Wellington Hotel, 2505 Wisconsin Avenue NW, Washington, DC 20007.

Status of Meeting: Open—June 12: 9:00–10:00 a.m. Closed—Otherwise.

Contact: Doris East, Room 9C26, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–3944.

Purpose: The Committee is charged with the initial review of applications for assistance from the National Institute of Mental Health for support of research and research training activities relating to the fields of personality, cognition, emotion, and higher mental processes, with recommendations to the National Advisory Mental Health Council for final review.

Committee Name: Mental Health Behavioral Sciences Research Review Committee.

Date and Time: June 12–14: 9:00 a.m.

Place: Wellington Hotel, 2505 Wisconsin Avenue, N.W., Washington, DC 20007.

Status of Meeting: OPEN—June 12: 9:00–10:00 a.m. CLOSED—Otherwise.

Contact: Naomi Lichtenberg, Room 9C26, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–3936

Purpose: The Committee is charged with the initial review of applications for assistance from the National Institute of Mental Health for support of research and/or research training activities relating to behavioral science areas relevant to mental health and makes recommendations to the National Advisory Mental Health Council for final review.

Committee Name: Psychological Sciences Subcommittee of the Mental Health Research Education Review Committee.

Date and Time: June 12–13: 9:00 a.m.

Place: Georgetown Marbury House, Stafford Sheffield Room, 3000 Wisconsin Avenue NW, Washington, DC 20036.

Status of Meeting: Open—June 12: 9:00–10:00 a.m. Closed—Otherwise.

Contact: Sandra Buckhalter, Room 9C05, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–4843.

Purpose: The Committee is charged with the initial review of applications for assistance from the National Institute of Mental Health for support of research and research training activities in the areas of personality, emotion, cognition, and related higher mental processes, with recommendations to the National Advisory Mental Health Council for final review.

Committee Name: Psychosocial and Biobehavioral Treatments Subcommittee of the Treatment Development and Assessment Research Review Committee.

BILLING CODE 4160-20-M

Centers for Disease Control

Demonstration of Effectiveness of Injury Control Interventions; Program Announcement and Notice of Availability of Funds for Fiscal Year 1986

The Centers for Disease Control (CDC), announces that competitive cooperative agreement applications are being accepted for Demonstration of Effectiveness of Injury Control Interventions. The Catalog of Federal Domestic Assistance number is being applied for.

Program Objective

The purpose of each cooperative agreement is to demonstrate, using epidemiologic methods, that an ongoing injury control program or intervention has a measurable beneficial effect on the (a) the incidence of the injury, or (b) the severity of the injury, or (c) recovery from the injury, or (d) the cost of the injury, or (e) exposure to injurious agents.

Applicants are encouraged to coordinate all activities with State and/or local health officials.

The cooperative activities will be performed using existing data sets; new data will not be generated, and new interventions will not be started.

The cooperative agreement is not intended to assist an agency or institution study the effectiveness of a hospital-based surgical or medical treatment for a specific type of injury. However, pre-hospital emergency trauma care, including a community trauma care system or components thereof, may be considered for study.

Authority

The legislative authority for these Cooperative Agreements is Section 301 of the Public Health Service Act.

Eligibility Requirements

Eligible applicants include public and private nonprofit organizations. Thus, State and local governments, U.S. Territories, the Commonwealth of Puerto Rico, the District of Columbia, universities, colleges, and research institutions may apply for these cooperative agreements.

Availability of Funds

It is expected that approximately $88,000 will be available in Fiscal Year 1986 to fund up to four (4) cooperative agreements, ranging in value from $15,000 to $35,000. The project(s) will be for a one-year period.

Type of Assistance

The award(s) resulting from this announcement will be a Cooperative Agreement(s). Cooperative activities of the recipient are:

1. Identify, collect, edit, sort, and link, if necessary, appropriate data sources on:

a. injury outcomes, e.g. severity or incidence of injury of interest;

b. exposure to the injurious agent(s) of interest, e.g. motor vehicle crashes, fires;

c. individuals or populations to which the intervention has and has not been applied.

2. Design and develop a protocol to demonstrate the effect of the intervention(s). The following references provide good examples of approaches for measuring the effectiveness of an intervention:

a. Decker MD, Dewey, MJ, Hutcheson RH, and Shafner W. The use and efficacy of child restraint devices. JAMA 1984; 252:2571–2575.

b. Spiegel CN and Lindaman FC. Children can't fly: a program to prevent

childhood morbidity and mortality from window falls. AJPH 1977; 67:1143–1147.

c. Muller A. An evaluation of the effectiveness of motorcycle daytime headlight laws. AJPH 1982; 72:1136–1141.

d. Guerin D and MacKinnon D. An assessment of the California child passenger restraint requirement. AJPH 1985; 75:142–144.

3. Conduct statistical and epidemiologic analysis of data.

4. Interpret, present, and publish findings in appropriate scientific journals in collaboration with CDC.

Cooperative activities of CDC/CEH are:

1. Assist in the editing of appropriate data sets on injury outcome, exposure to injurious agents, and recipients of the injury intervention(s).

2. Assist in the development of the protocol to demonstrate the effect of the intervention.

3. Collaborate in the statistical and epidemiologic analysis of data.

4. Collaborate in the interpretation, presentation, and publication of the study findings.

Applications

1. Copies—Place of Submission

The original and two copies of the application should be submitted on Form PHS 5161–1 (revised 3–79) on or before July 7, 1986 to: Grants Management Officer, Centers of Disease Control, 255 East Paces Ferry Road, Atlanta, Georgia 30305. Telephone: (404) 262–6575.

Application forms should be available in your business office or from the above address.

2. Deadlines

Applications shall be considered as meeting the deadline if they are either:

a. Received on or before the deadline date.

b. Sent on or before the deadline date and received in time for submission to the independent review group. (Applicants should request a legibly-dated receipt from a commercial carrier or U.S. Postal Service. Private metered postmarks shall not be acceptable as proof of timely mailing.)

3. Late Applications

Applications which do not meet the criteria in either paragraph 1 or 2 immediately above are considered late applications and will not be considered in the current competition and will be returned to the applicant.

4. Reviews

Applications are not subject to review as governed by Executive Order 12372, Intergovernmental Review of Federal Programs, and are not subject to review under regulations (42 CFR Part 122, as amended, and Part 123) implementing the National Health Planning and Resources Development Act of 1974.

5. Content and Evaluation Criteria

Review of the application will be conducted in accordance with PHS Grants Administration Manual Chapter PHS:1–507, Objective Review of Grant Applications. The information provided should be consistent with the following evaluation criteria:

a. The applicant's understanding of the requirements, problems, objectives, complexities, and interactions required of this cooperative agreement.

b. How the project will be administered; how the applicant will develop and implement the project, including a time schedule; what are the qualifications and time allocations of the staff that will be assigned to the project; and what facilities and data processing equipment will be required to carry out this project.

c. The ability of the applicant to carry out the responsibilities of the project.

d. The nature and extent of the injury or trauma problem in the community or population that will be studied.

e. The applicant's detailed description of:

(1) The rationale for the intervention;

(2) The reason(s) for implementing the program, project, or measure in this community;

(3) What is the population targeted for the intervention;

(4) Why the applicant believes the program, project, or measure to have a beneficial impact on public health;

(5) When the intervention began (and ended, if applicable);

(6) How the intervention program is administered and funded.

f. The sources of data that will be used to measure:

(1) The number of occurrences of the injury;

(2) The degrees of severity of the injury;

(3) What individuals have been exposed to the injurious agent(s) regardless of whether or not an injury was sustained;

(4) The cost(s) of the injury and the intervention;

(5) The extent of recovery from the injury.

g. The quality of existing data including:

(1) If available, samples of forms used for data collection;

(2) Evidence, if available, of the validity and reliability of the data;

(3) The training and instruction given to data recorders;

(4) If the data used was a sample, then describe sampling method.

h. Assurance that the data for injury occurrence, exposure to the injurious agent(s), and intervention program(s) are for time periods that are appropriate to show the effectiveness of the intervention and that the data are available and existent.

i. The method(s) in which data sources could be linked to demonstrate the effectiveness of an intervention. If data will need to be put on a computer tape, describe how this will be done, what quality control measures will be taken for this process, and what will be the source of the computer hardware.

j. Plans to publish results and designate responsibilities for scientific publications and authors, summary documents, news releases, etc.

Reporting Requirements

1. A final performance report, final financial status report, final invention certification and inventory of equipment (if applicable) will be due 90 days after the end of the project in accordance with 45 CFR Part 74, Subpart M.

2. All reports shall be submitted to: Centers for Disease Control, Grants Management Branch, PGO, 255 East Paces Ferry Road, N.E., Room 321, Atlanta, Georgia 30305.

Information

Information on application procedures, copies of application forms, and other material may be obtained from Betty Feeley, Grants Management Specialist, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, Atlanta, GA 30305, Telephone: 404/262–6575 or FTS 236–6575.

Technical assistance may be obtained from Richard Hoffman, M.D., Division of Injury Control and Epidemiology, Center for Environmental Health, Centers for Disease Control, 1600 Clifton Road, NE., Atlanta, GA 30333, Telephone: 404/454–4575 or FTS 454–4575.

Dated: May 9, 1986.

William E. Muldoon,

Director, Office of Program Support Centers for Disease Control.

BILLING CODE 4310-JA-M

Environmental Impact Statement/New Mexico Wilderness Study Areas

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Intent to Prepare a Revised Draft Environmental Impact Statement (DEIS).

SUMMARY: The Department of the Interior, Bureau of Land Management, New Mexico is preparing a Revised DEIS for the New Mexico Statewide Wilderness Study. The Revised DEIS will address all 46 Wilderness Study Areas (WSA's) in the Statewide Study. This will include those WSA's or WSA lands that have split estate (Federal surface/non-Federal subsurface), as well as one WSA that is less than 5,000 acres. These lands are now being studied because they were reinstated for wilderness study due to a court decision. This Revised DEIS will supersede the earlier DEIS which was released in May 1985.

Scoping to help define environmental issues and alternatives for these reinstated lands has occurred both in 1982 and during the post year.

The Revised DEIS is scheduled for release in September 1986. The following WSA's will be addressed in this DEIS:

WILDERNESS STUDY AREAS IN THE NEW MEXICO STATEWIDE WILDERNESS STUDY

Name	WSA No.	Acreage
Albuquerque District		
Taos Resource Area:

Bakersfield District Advisory Council Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Bakersfield district advisory council meeting.

SUMMARY: Notice is hereby given in accordance with pub. L. 94–579 and 43 CFR Part 1780 that the Bakersfield District Advisory Council to the Bureau of Land Management, U.S. Department of the Interior, will meet formally on June 13 and 14, 1986. The meeting on Friday, June 13, will begin at 9 a.m. in Room 335, in the Federal Building at 800 Truxtun Avenue, Bakersfield, California. The meeting on Saturday, June 14, will be a field trip to the Walker Pass area, departing at 7 a.m. from the Federal Building in Bakersfield.

SUPPLEMENTARY INFORMATION: The meeting agenda on Friday will consist of updates and orientation on Bureau programs, including resource management projects, and the BLM/Forest Service Interchange.

The Council will tour the Walker Pass Common Allotment area on Saturday and will review initial efforts made toward developing the Walker Pass Coordinated Resource Management Plan. Public participants may meet the tour when it departs at 7 a.m. from the Federal Building in Bakersfield, or at 8:30 a.m. at the Chimney Peak turnoff from Highway 178.

Opportunity for the public to address the Council will be available at 3 p.m. that afternoon at the South Fork Union School on Highway 178 in Weldon, California.

Public participants are invited to join the meeting and field trip, but must provide their own transportation and meals.

Summary minutes of the meeting will be maintained in the Bakersfield District office and will be available for public inspection and reproduction during regular business hours within 30 days following the meeting.

FOR FURTHER INFORMATION CONTACT: Marta Witt, Public Affairs Officer, Bakersfield District, Bureau of Land Management, 800 Truxtun Avenue, Room 311, Bakersfield, CA 93301; (805) 861–4191.

Dated: May 9, 1986.

Robert D. Rheiner, Jr.,

District Manager.

Dickinson District Advisory Council Meeting

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of meeting.

SUMMARY: The citizen advisory council for the Bureau of Land Management's Dickinson District will meet June 11, 1986, in Dickinson, North Dakota. The following topics will be discussed at the Council meeting:

BLM/FS interchange; noxious weed and grasshoper control program; land sales-exchanges (pooling); progress of the North Dakota Resource Management Plan; the status of the coal program and oil drainage review; the Secretarial program "Take Pride In America—This Land Is Your Land"; public land in the Conservation Reserve Program; volunteers in the BLM; and Federal appropriations to counties.

The Council is chartered by the Secretary of Interior to give citizen advice to the Dickinson District Manager regarding planning and management of public lands and resources.

The meeting is open to the public, and members of the public will be given the opportunity to make statements before the Council. Persons wishing to submit a written statement to the Council should send it to the Dickinson District Manager.

Location, Date, and Time: June 11, 1986, from 8:30 A.M. to approximately 4:00 P.M. Mountain Daylight Time, Community Room (basement) of the Gate City Building, 204 Sims Street, Dickinson, North Dakota.

FOR FURTHER INFORMATION CONTACT: William F. Krech, District Manager; P.O. Box 1229, Dickinson, North Dakota 58602; Telephone (701) 225–9148.

Dated: May 7, 1986.

William F. Krech,

District Manager.

BILLING CODE 4310-DN-M

Meeting of the Rock Springs District Advisory Council

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of field tour and meeting of the Rock Springs District Advisory Council.

DATE: June 25–26, 1986.

ADDRESS: Rock Springs District Office, Bureau of Land Management, U.S. Highway 191 North, Rock Springs, Wyoming.

FOR FURTHER INFORMATION CONTACT: Donald H. Sweep, District Manager, Rock Springs District, Bureau of Land Management, P.O. Box 1869, Rock Springs, Wyoming 82902–1869, (307) 382–5350.

SUPPLEMENTARY INFORMATION: The field tour will leave the District Office at 9:00 A.M. on June 25 and return about 4:30 P.M. the same day. Weed control, rehabilitation of disturbed sites, and threatened and endangered plant species will be discussed. The tour is open to the public; however, BLM will not provide transportation.

The meeting on June 26 will begin at 9:00 A.M. in the District Office conference room.

The agenda will include:

Introduction of New Members
Election of Officers
Discussion of the Field Tour
Pinedale Resource Management Plan Progress Report
Wild Horse Gathering Plan
Update on Riley Ridge
Cooperative Management Agreement with Wyoming Game and Fish
Minerals Decentralization
Public Comment Period

Arrangements for the Next Meeting.

Donald J. Seibert,

Acting District Manager.

BILLING CODE 4310-DN-M

Realty Action—Lease, Montana

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action, lease of public lands in Lewis and Clark County, Montana.

SUMMARY: The following described lands have been identified as suitable for a ski area lease under the conditions of section 302 of the Federal Land Policy and Management Act (FLPMA) of 1976; 43 U.S.C. 1732.

Principal Meridian Montana

T. 12 N., R. 6 W., Sec. 35, lots 1, 17, 18, 19, 20, 23, NW¼NE¼, NE¼NW¼.
Section 36, lots 28, 29.

The lands will be offered non-competitively to the Great Divide Skiing Company as part of the former Mt. Belmont Ski Area. Only portions of the above described lands will actually be included in the lease.

DATES: For a period of 45 days from the date of this notice, interested parties may submit comments to the address shown below. Any adverse comments will be evaluated by the BLM, Montana State Director, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become the final determination of the Department of Interior.

FOR FURTHER INFORMATION CONTACT: Detailed information concerning the proposed lease including an environmental assessment and the actual lands to be included in the lease will be available at the Butte District Office, 106 N. Parkmont, P.O. Box 3388, Butte, Montana 59702.

SUPPLEMENTARY INFORMATION: The Great Divide Ski Company is in the process of purchasing the Belmont Ski Area from the Belmont Ski Club which has operated in the area under a Recreation and Public Purposes Act lease. The reason for converting the lease to a commercial lease is to allow greater capitalization of the area so major improvements can be made to the lifts, runs, and lodge facilities. Less than one-half of the ski area is located on public land. The rest is leased from private parties. The lands will be leased non-competitively with the annual rental based on the appraised fair market value.

Dated: May 7, 1986.

Jack A. McIntosh,

District Manager, Butte District.

AGENCY: Minerals Management Service.

ACTION: Notice of the receipt of a proposed development operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that Shell Offshore Inc. has submitted a DOCD describing the activities it proposes to conduct on Lease OCS-G 8448, Block 279, South Timbalier Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an onshore base located at Venice, Louisiana.

DATE: The subject DOCD was deemed submitted on May 6, 1986. Comments must be received within 15 days of the date of this Notice or 15 days after the Coastal Management Section receives a copy of the DOCD from the Minerals Management Service.

ADDRESSES: A copy of the subject DOCD is available for public review at the Office of the Regional Director, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana (Office Hours: 9 a.m. to 3:30 p.m., Monday through Friday). A copy of the DOCD and the accompanying Consistency Certification are also available for public review at the Coastal Management Section Office located on the 10th Floor of the State Lands and Natural Resources Building, 625 North 4th Street, Baton Rouge, Louisiana (Office Hours: 8 a.m., to 4:30 p.m., Monday through Friday). The public may submit comments to the Coastal Management Section, Attention OCS Plans, Post Office Box 44396, Baton Rouge, Louisiana 70805.

FOR FURTHER INFORMATION CONTACT: Angie D. Gobert, Mineral Management Service, Gulf of Mexico OCS Region, Rules and Production, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit, Phone (504) 838-0876.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to Sec. 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review. Additionally, this Notice is to inform the public, pursuant to § 930.61 of Title 15 of the CFR, that the Coastal Management Section/Louisiana Department of Natural Resources is reviewing the DOCD for consistency with the Louisiana Coastal Resources Program.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979 (44 FR 53685).

Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: May 9, 1986.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

BILLING CODE 4310-MR-M

INTERSTATE COMMERCE COMMISSION

[Fifth Revised I.C.C. Order No. P.-86]

Passenger Train Operation; Central Vermont Railway, Inc.

TO: Central Vermont Railway, Inc.

It appearing, That the National Railroad Passenger Corporation (Amtrak) has established through passenger train service between Washington, DC and Montreal, Canada. The operation of these trains requires the use of the tracks and other facilities of Boston and Maine Corporation (BM). The BM Line is temporarily out of service because of a labor dispute. An alternate route is available via the Central Vermont Railway, Inc., between Palmer, Massachusetts and White River Junction, Vermont.

It is the opinion of the Commission that the use of such alternate route is necessary in the interest of the public and the commerce of the people; that notice and public procedure herein are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered,

(a) Pursuant to the authority vested in me by order of the Commission decided January 13, 1986, and of the authority vested in the Commission by section 402(c) of the Rail Passenger Service Act of 1970 (45 U.S.C. 562(c)), Central

Vermont Railway, Inc. (CV), is directed to operate trains of the National Railroad Passenger Corporation (Amtrak) between Palmer, Massachusetts and White River Junction, Vermont.

(b) In executing the provisions of this order, the common carriers involved shall proceed even though no agreements or arrangements now exist between them with reference to the compensation terms and conditions applicable to said transportation. The compensation terms and conditions shall be, during the time this order remains in force, those which are voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, the compensation terms and conditions shall be as hereafter fixed by the Commission upon petition of any or all of the said carriers in accordance with pertinent authority conferred upon it by the Interstate Commerce Act and by the Rail Passenger Service Act of 1970, as amended.

(c) *Application.* The provisions of this order shall apply to intrastate, interstate and foreign commerce.

*(d) *Effective date.* This order shall become effective at 11:59 p.m., April 18, 1986.

*(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., April 30, 1986, unless otherwise modified, amended, or vacated by order of this Commission.

This order shall be served upon Central Vermont Railway, Inc., and upon the National Railroad Passenger Corporation (Amtrak), and a copy of this order shall be filed with the Director, Office of the Federal Register.

Issued at Washington, DC, April 18, 1986.

Interstate Commerce Commission.

William J. Love,

Agent.

[I.C.C. Order No. P-90]

Passenger Train Operation; Union Pacific Railroad Co.

To: Union Pacific Railroad Company.

It appearing, that the National Railroad Passenger Corporation (Amtrak) has established through passenger train service between Chicago, Illinois and Los Angeles, California. The operation of these trains requires the use of tracks and other facilities of The Atchison, Topeka and Santa Fe Railway Company (ATSF). A potion of the ATSF Line between Daggett and Los Angeles, CA, is temporarily out of service because of a work stoppage. An alternate operation is available via the Union Pacific Railroad Company between Dagget and Los Angeles, California.

It is the opinion of the Commission that the use of such alternate operation is necessary in the interest of the public and the commerce of the people; that notice and public procedure herein are impracticable and contrary to the public interest and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered,

(a) Pursuant to the authority vested in me by order of the Commission decided January 13, 1986, and of the authority vested in the Commission by section 402(c) of the Rail Passenger Service Act of 1970 (45 U.S.C. 562(c)), the Union Pacific Railroad Company (UP) is directed to operate trains of the National Railroad Passenger Corporation (Amtrak) between Daggett, California and the Union Passenger Terminal in Los Angeles, California.

(b) In executing the provisions of this order, the common carriers involved shall proceed even though no agreements or arrangements now exist between them with reference to the compensation terms and conditions applicable to said transportation. The compensation terms and conditions shall be, during the time this order remains in force, those which are voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, the compensation terms and conditions shall be as hereafter fixed by the Commission upon petition of any or all of the said carriers in accordance with pertinent authority conferred upon it by the Interstate Commerce Act and by the Rail Passenger Service Act of 1970, as amended.

(c) *Application.* The provisions of this order shall apply to intrastate, interstate and foreign commerce.

(d) *Effective date.* This order shall become effective at 3:30 p.m., EDT, May 5, 1986.

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., EDT, May 12, 1986, unless otherwise modified, amended, or vacated by order of this Commission.

This order shall be served upon Union Pacific Railroad Company and upon The National Railroad Passenger Corporation (Amtrak), and a copy of this order shall be filed with the Director, Office of the Federal Register.

Issued at Washington, DC, May 5, 1986.

Interstate Commerce Commission.

Bernard Gaillard,

Agent.

[Finance Docket No. 30815

Chicago West Pullman Corp.; Acquisition and Operation Exemption; Manufacturers' Junction Railway Company; Exemption

Chicago West Pullman Corporation (Chicago West) has filed a notice of exemption to acquire and operate the line of Manufacturers' Junction Railway Company (MJ).

Chicago West is a non-carrier that already controls a carrier, Chicago, West Pullman & Southern Railroad Company (CWP). CWP is a Class III railroad that operates over 30 miles of track in Chicago, IL. MJ is a carrier that operates approximately 5.27 miles in Cicero, IL. CWP and MJ do not connect. the distance between them is approximately 21 miles. Chicago West states that the acquisition is not part of a series of anticipated transactions that would lead to a connection between CWP and MJ. This is an acquisition of nonconnecting carrier, exempt from 49 U.S.C. 11343. *See* 49 CFR 1180.2(d)(2).

Employees of MJ affected by MJ closing the facility will be protected by the Facility Closing Program, as agreed to by the United Transportation Union. All other railroad employees affected by the transaction, will be protected by the conditions in *New York Dock Ry.—Control—Brooklyn Eastern District*, 360 I.C.C. 60 (1979). this will satisfy the statutory requirements of 49 U.S.C. 10505(g)(2).

Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction.

Decided: April 30, 1986.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

James H. Bayne,

Secretary.

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards; Subcommittee on Regulatory Policies and Practices; Meeting

The ACRS Subcommittee on Regulatory Policies and Practices will hold a meeting on May 27, 1986, Room 1717 H Street NW., Washington, DC.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows:

Tuesday, May 27, 1986—8:30 a.m. until the conclusion of business

The Subcommittee will discuss the regulatory process as it relates to the June 9, 1985 event at Davis-Besse.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the

meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, its consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allowed therefor can be obtained by a prepaid telephone call to the cognizant ACRS staff member, Mr. Gary Quittschreiber (telephone 202/634-3267) between 8:15 A.M. and 5:00 P.M. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., which may have occurred.

Dated: May 9, 1986.

Morton W. Libarkin,

Assistant, Executive Director for Project Review.

BILLING CODE 7590-01-M

OFFICE OF PERSONNEL MANAGEMENT

Federal Prevailing Rate Advisory Committee; Open Committee Meeting

According to the provisions of section 10 of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given that meetings of the Federal Prevailing Rate Advisory Committee will be held on:

Thursday, June 5, 1986
Thursday, June 12, 1986
Thursday, June 19, 1986
Thursday, June 26, 1986

These meetings will start at 10 a.m. and will be held in Room 5A06A, Office of Personnel Management Building, 1900 E Street NW., Washington, DC.

The Federal Prevailing Rate Advisory Committee is composed of a Chairman, representatives from five labor unions holding exclusive bargaining rights for Federal blue-collar employees, and representatives from five Federal agencies. Entitlement to membership of the Committee is provided for in 5 U.S.C. 5347.

The Committee's primary responsibility is to review the Prevailing Rate System and other matters pertinent to establishing prevailing rates under subchapter IV, chapter 53, 5 U.S.C., as amended, and from time to time advise the Office of Personnel Management.

These scheduled meetings will start in open session with both labor and management representatives attending. During the meeting either the labor members or the management members may caucus separately with the Chairman to devise strategy and formulate positions. Premature disclosure of the matters discussed in these caucuses would unacceptably impair the ability of the Committee to reach a consensus on the matters being considered and would disrupt substantially the disposition of its business. Therefore, these caucuses will be closed to the public because of a determination made by the Director of the Office of Personnel Management under the provisioins of section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463) and 5 U.S.C. 552b(c)(9)(B). These caucuses may, depending on the issues involved, constitute a substantial portion of the meeting.

Annually, the Committee publishes for the Office of Personnel Management, the President, and Congress a comprehensive report of pay issues discussed, concluded recommendations, and related activities. These reports are available to the public, upon written request to the Committee's Secretary.

The public is invited to submit material in writing to the Chairman on Federal Wage System pay matters felt to be deserving of the Committee's attention. Additional information on these meetings may be obtained by contacting the Committee's Secretary, Office of Personnel Management, Federal Prevailing Rate Advisory Committee, Room 1340, 1900 E Street NW., Washington, DC 20415 (202) 632-9710.

William B. Davidson, Jr.,

Chairman, Federal Prevailing Rate, Advisory Committee.

May 8, 1986.

BILLING CODE 6325-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-23212; File No. SR-CBOE-86-07]

Self-Regulatory Organizations; Chicago Board Options Exchange Inc.; Order Approving Proposed Rule Change

On March 6, 1986, the Chicago Board Options Exchange, Inc. ("CBOE"), submitted to the Securities and Exchange Commission ("Commission"), pursuant to section 19(b)(1) under the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b-4 thereunder,[2] a proposed rule change that would establish for a six month period a foreign currency options incentive program that would provide financial credits to market makers based on the number of their off-floor order trades. These credits could be applied by the market maker toward the payment of dues, fees and open-market seat purchases.

The proposed rule change was noticed in Securities Exchange Act Release No. 23051 (March 4, 1986), 51 FR 11123. No comments were received on the proposed rule change.

Under the proposed six-month currency options incentive program, the CBOE would compute for each market-maker, from trade match data in each currency option class, the total number of inperson, market-maker trades made with off-floor orders (also known as "accommodation volume")[3] Based on this information, incentive credits will be allocated among market-makers for each currency option class. The monthly allocation of credits will be the percentage of each market-maker's accommodation volume per currency option class as compared to the toal accommodation volume in that class. Accordingly, if a market-maker handles 10% of the accommodation volume in a particular option, he will receive 10% of the bonus for that month in that option. The CBOE will, however, impose a $50 cap per contract, so that if a market-maker trades only one contract, the maximum incentive credit that can be gained is $50. During the first three months of the program, CBOE will impose the following monthly limits on credits allowed for each currency options class: $30,000 each for Japanese yen and Swiss francs, $20,000 each for

[1] 15 U.S.C. 78s(b)(1)(1982).

[2] 17 CFR 240.19b-4 (1985).

[3] Accommodation volume includes both firm proprietary and public customer orders. No order from a market-maker can be an off-floor order and thus, will not be counted as a part of a market-maker's accommodation volume.

British pounds and West German marks, and $10,000 each for Canadian dollars and French francs. In addition, during the entire six month program, the monthly total of incentive credits will not be more than $120,000 for all currency options classes.[4]

The incentive credits can be applied, by the market-maker who earned them, toward the payment of CBOE dues, fees and open-market seat purchases.[5] In addition, the credits can be sold to the market-marker's clearing firm, which also may apply them to its dues, fees and open-market seat purchases. In its filing, the CBOE has stated that it will begin to compute market-maker accommodation volume in connection with the program as of March 3, 1986, although no actual credits will be applied until Commission approval of the proposal.

The CBOE has stated that the purpose of its currency incentive program is to ensure the continued presence of those market-makers who have already demonstrated the ability and willingness to fill outside order flow, and to attract new market-makers to the currency trading crowds. CBOE believes that because it will provide a regularized level of incentive payments in each currency options class, the program should encourage market makers to support these products.

In reviewing the proposed incentive program, the Commission recognizes that CBOE is attempting to attract more market-maker interest in a new product that, to date, has not attracted substantial market-maker or other floor participation. Nevertheless, the Commission is concerned that an incentive program designed to provide dollar credits (that can be applied to dues and fees) based on a market-maker's volume in foreign currency options could encourage so-called "chumming"[6] or other artificial forms of trading by which market-makers might attempt to inflate their volume in order to earn the credits. Indeed, as a more general matter, the Commission is also concerned about the fact that market-makers would be induced to trade based, not on their assessment of market forces or in response to their affirmative market making obligations, but rather in an attempt to earn trading credits.

The Commission, however, has determined that this limited incentive program may be approved. First, we note that the program will only exist for a six month trial period. Second, under the proposal, no order from another market-maker will be deemed an off-floor order in which credit for accommodation volume is provided. Accordingly, the proposal should not create incentives for market-makers to enter into transactions with each other solely for the purpose of obtaining credits. Third, in its filing, the CBOE states that it will monitor the currency options trading of market-makers doing a large accommodation volume to ensure that this volume consists of actual accommodations that should be counted towards the market-maker's credits. We also note that the CBOE's general surveillance of prearranged trading should capture any transaction effected for the purpose of increasing a market-maker's volume. On balance, therefore, the Commission believes that the six month currency options incentive program proposed by CBOE for the limited purpose of attracting more market makers to a relatively new product traded mostly by institutional investors should be approved.[7]

For these reasons, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6[8] and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2)of the Act,[9] that the proposed rule change is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[10]

Dated: May 7, 1986.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-23218; File No. SR-CBOE-86-11]

Self-Regulatory Organizations; Chicago Board Options Exchange, Inc.; Order Granting Accelerated Approval to Proposed Rule Change Relating to Extension of the RAES Pilot Program

The Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") submitted on May 2, 1986, copies of a proposed rule change pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 19b-4 thereunder, to extend the operation of the CBOE's retail automatic execution system ("RAES") pilot program. RAES permits the automatic execution of certain public customer orders in a limited number of the Standard & Poor's 100 Index ("OEX") series.[1] The Proposal would extend the operation of the pilot from April 30, 1986, through July 4, 1986. The CBOE applied for an extension of time in order to give the Commission additional time to consider a companion rule filing wherein the CBOE requests that the RAES pilot in OEX be made permanent.[2] In the interim, the Exchange seeks to continue operating RAES in OEX on a pilot basis.

In its submission to the Commission, the CBOE states that the RAES pilot has been highly successful, with customers' brokers receiving execution reports on RAES orders sometimes within one minute of the order's entry into the system. CBOE states that there have been virtually no complaints regarding RAES or its operations. The Exchange believes that the proposed rule change is ocnsistent with the provisions of the Act, in particular section 6(b)(5) thereof, in that the proposed rule change offers the potential for improved accuracy, reporting and handling of small public customer orders and timely and cost-

---

[4] This will provide CBOE with the flexibility to alter the dollar limits in each class established for the first three months of the program depending on how the trading in each class is effected by the incentive credits. In any event, however, the monthly total credits for all options classes will not exceed $120,000.

[5] CBOE has indicated that by allowing the credits to be applied to open-market seat purchases the rule proposal may also encourage the purchase of such seats on the exchange.

[6] Chumming is a broad term that covers a variety of activity, including prearranged trades, wash sales and trade reversals, that is intended to give the appearance of increased trading volume. *See Report of the Special Study of the Options Markets.* H.R. Rep. No. 1PC3. 96th Cong., 1st Sess. (Comm Print 1978) at 169–172.

[7] In addition, CBOE has represented that during the program it will monitor whether increased market-maker participation in foreign currency options results from market-makers leaving lower volume equity options classes thereby decreasing the liquidity in those options classes. The CBOE has stated that it does not believe such an effect is likely to occur.

[8] 15 U.S.C. 78f (1982).

[9] 15 U.S.C. 78 s(B) (2) (1982).

[10] 17 CFR 200.30-3(a)(12)(1985).

[1] A complete description of RAES is provided in the Commission's initial order approving CBOE's implementation of the RAES pilot program. *See* Securities Exchange Act Release No. 21686 (January 28, 1985), 50 FR 4029 (File No. SR–CBOE–84–30).

[2] *See* Securities Exchange Act Release No. 22274 (July 29, 1985) 50 FR 31284 (File No. SR–CBOE–85–32). The CBOE also has filed with the Commission a proposed rule change to use RAES for individual stock options on a six month pilot basis. *See* Securities Exchange Act Release No. 22270 (July 26, 1985), 50 FR 31449 (File No. SR–CBOE–85–16, Amendment No. 2).

efficient executions of small option orders.

The Commission finds that an extension of the pilot program through July 4, 1986 is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, in particular, sections 6(b)(5) and 11A of the Act.[3] It does not appear that extending the duration of the pilot until this time will impose any undue burdens on public customers of OEX, or on any other public customers.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after date of publication of the proposal in the **Federal Register** in that the pilot has been operational since February 1, 1985 and the Commission has not received any comments concerning the pilot which would warrant discontinuing it prior to a Commission determination on the merits of the CBOE's request to accord the pilot permanent status.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[4] that the proposed rule change is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[5]

Dated: May 8, 1986.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-23219; File No. SR-DTC-86-3]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the Depository Trust Company

On April 17, 1986 the Depository Trust Company ("DTC") filed a proposed rule change with the Commission under section 19(b)(1) of the Securities Exchange Act of 1934 ("the Act"). The proposed rule change, among other things, modifies DTC's procedures for crediting cash dividend and interest payments ("Payments"), charge-backs of dividend and interest payments, dividend and interest refunds and passing through fund usage charges on bearer municipal bond interest payments. The rule change is a temporary rule which will expire no later than October 17, 1986. The Commission is publishing this Notice to solicit comment on the rule change.[1]

DTC's proposed rule change modifies DTC's procedures for crediting corporate cash dividend and interest payments from payment on the date payment is received to payment on payable date, subject to certain exceptions. (DTC will continue to credit bearer and registered municipal bond interest payments on payable date.) Because some paying agents routinely fail to pay dividends and interests in good funds on payment date, the proposal would authorize DTC to withhold crediting participants' accounts until DTC has received the necessary funds. Moreover, any margin of Payments credited to Participants in excess of actual receipts by DTC on that day will be funded by an equal amount of same-day funds received the next day which then would not be invested overnight (thereby reducing monthly dividend refunds to Participants). When infrequent peak payment dates make cash flow from same-day funds projected for the next day inadequate to fund that margin of Payments, some large Payments to DTC of less than $5 million will be deleted from credits to Participants if those Payments do not arrive before early afternoon.

The proposal also modifies DTC's refund policy with respect to dividend and interest investment income to reduce the monthly refund of overnight investments to participants that pay DTC more than 90%, but less than 100%, of dividend and interest payments received in same-day funds on payable date. Because DTC pays participants dividend and interest on their securities positions in next-day funds, DTC invests dividend and interest payments received in same-day funds on payable date overnight and rebates to participants, *pro rata* on a monthly basis, the income from those investments. Currently, participants that have paid DTC at least 90% of the dollar amount owed to DTC during the previous three month period on payable date and in same day funds share in this investment income. Under the proposal DTC, however, will reduce the monthly refund payments to these paying agents by the percentage of the total month's payments that fall short of 100% of the amount due DTC in same day-funds on payable date.[2]

The proposal also allows DTC to pass through interest collection agent's interest cost from late payments to participants. (This is called a "funds usage charge".) DTC channels all coupons for bearer municipal bonds to a central interest collection agent ("Agent"). On payable date the Agent pays DTC the total interest payments regardless of whether the Agent has collected all the funds from the various paying agents. Under the proposal, the Agent will charge DTC a funds usage charge and DTC will pass the charge on a *pro rata* basis to participants that received those particular payments.

The proposal allows DTC to charge-back certain dividend payments previously credited to participants. DTC will charge-back previously credited payments upon written request from a paying agent within 10 business days of the payable date for an error by the paying agent; a failure by the issuer to provide the paying agent with sufficient funds to cover the payments; or the bankruptcy of the issuer on or prior to the payable date. Also, DTC may charge back any errors made by DTC as a result of erroneous announcements or calculations or payments credited to participants in anticipation of payments which have not been received by DTC 10 business days after payable date. For charge-backs as a result of a paying agent's written request, the rule change requires DTC to notify participants one business day prior to the date DTC enters the charge-back in the participants' daily settlement accounts.[3] If the paying agent notifies DTC more than 10 business days after payment date, DTC is not required to charge-back the participant's accounts but will cooperate with the paying agent and participants to resolve the matter. For DTC initiated charge-backs, DTC will give participants one day notice if the

---

[3] 15 U.S.C. 78f and 78k-1 (1982).

[4] 15 U.S.C. 78s(b)(2)(1982).

[5] 17 CFR 200.30-3(a)(12) (1985).

[1] Written comments from DTC participants on charge-backs of Payments were solicited by DTC. Several Commentors raised a concern that DTC would charge-back payments to participants before participants' customers returned the Payments. DTC, however, believes situations of this type arise infrequently and are offset by the benefits of obtaining Payments from paying agents on payable date in same-day funds. Written comments from DTC participants or others were not solicited or received on crediting of Payments on payable date, reducing dividend and interest refunds and passing through to participants any funds usage charge.

[2] For example, if a payor fails to make 5% of its payments on payable date and 4% of the payments made on payable date are not in same-day funds, its refund for that month will be reduced by 9%.

[3] While DTC usually will attempt to verify the facts stated in the notice from the paying agent, the rule change notes that DTC incurs no such obligation.

charge-back will occur within 10 business days after payable date. Otherwise, DTC will notify participants 5 business days prior to entry of the charge-back.

DTC believes that proposed rule change is consistent with section 17A of the Act because it will improve the timeliness of dividend and interest payments to DTC participants. DTC believes the proposal also will improve processing and recordkeeping of DTC and its participants.

The foregoing rule change has become effective pursuant to section 19(b)(3)(A) of the Securities Exchange Act of 1934 and subparagraph (e) of Securities Exchange Act Rule 19b–4. This rule change is a temporary rule which shall expire no later than October 17, 1986. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views and arguments concerning the proposal. Persons making written submission should file six copies with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the filing, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of U.S.C. 552, will be available for inspection and copying in the commission's Public Reference Section, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the filing will also be available for inspection and copying at the principal office of DTC. All submissions should refer to the file number in the caption above and should be submitted by June 5, 1986.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 8, 1986.

John Wheeler,

Secretary.

BILLING CODE 8010–01–M

[Release No. 34-23220; File No. SR-NASD-86-12]

Self-Regulatory Organizations; Proposed Rule Change by National Association of Securities Dealers, Inc. Relating to Specifications and Study Outline for the Revised General Securities Representative Examination

Pusuant to section 19(b) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on May 1, 1986, the National Association of Securities Dealers, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organizations Statement of the Terms of Substance of the Proposed Rule Change

The NASD has filed revised specifications and a revised study outline for the General Securities Representative (Series 7) examination administered by the securities industry self-regulatory organizations. The examination questions for the revised Series 7 examination are in the custody of the New York Stock Exchange, Inc.

II. Self-Regulatory Organization's Statements Regarding the Proposed Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of the these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purposes of, and Statutory Basis for, the Proposed Rule Change

The Series 7 examination is used to qualify persons seeking registration as general securities representatives. The revised specifications and study outline reflect a joint securities industry self-regulatory effort to update the examination in view of securities industry developments since the Series 7 examination was adopted as an industry wide qualification examination in 1974. Among the changes in the industry are: the development of several new securities products (such as, index options, interest rate options, and foreign currency options), the alteration of the product mixes within the general securities firms, and the modification of the registered representative's job due to the expanding range of financial services offered. The examination has been revised to cover these areas, as well as, to place more emphasis on Direct Participation Programs. Moreover, the revised examination will place less emphasis on factual recall and more emphasis on application, evaluation, and analysis.

The revised specifications and study outline are consistent with section 15A(g)(3) of the Securities Exchange Act of 1934, which provides that a registered securities association may prescribe standards of training, experience and competence for persons associated with a member and may examine and verify the qualifications of such persons in accordance with procedures established by the rules of the association.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The NASD does not believe that the specifications or study outline for the revised Sereis 7 examination will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceeding to determine whether the proposed rule change should be disapproved.

IV. Solicitation by Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions

should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the submissions, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 522 will be available for inspection and copying in the Commission's Public Reference Section, 450 5th Street, NW., Washington, D.C. 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted in June 5, 1986.

For the Commission, by the Division of Market Regulation, pursuant to delegated Authority, 17 CFR 200.30-3(a)(12).

Dated: May 8, 1986.

John Wheeler,

Secretary.

[FR Doc. 86-10993 Filed 5-14-86; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-23214; File No. SR-PSE-86-4]

Self-Regulatory Organizations; Order Approving Proposed Rule Change by the Pacific Stock Exchange, Inc., Relating to the Adoption of a Rule Fixing the Effective Date of Suspension of Trading in Dually Listed Securities When the Primary Market Has Suspended Trading Due to Buyouts or Mergers

The Pacific Stock Exchange, Inc. ("PSE") submitted on March 18, 1986, copies of a proposed rule change pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 19b-4 thereunder, to amend Rule I, section 3(f) of the PSE's Rules to specify the date and time of suspension of trading in dually traded securities that have been suspended by the primary market due to a merger or buyout.[1] The proposal provides for the suspension of trading in the affected security at the close of trading on the primary market on the day designated by the primary market as the day of suspension.[2] The rule also allows for the Joint Equity Floor Trading Committee of the PSE ("JEFTC"), in situations involving suspensions because of a buyout or merger, to commence the suspension at a time other than the close of business of the primary market. The PSE states that this provision will permit the Exchange flexibility to deal with unforeseen situations.[3]

Notice of the proposed rule change, together with the terms of substance of the proposal, was given by the issuance of a Commission release (Securities Exchange Act Release No. 23061, March 25, 1986) and by publication in the **Federal Register** (51 FR 11125, April 1, 1986). No comments were received regarding the proposal.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6 and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 7, 1986.

John Wheeler,

Secretary.

[FR Doc. 86-10992 Filed 5-14-86; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 35-24092]

Filings Under the Public Utility Holding Company Act of 1935 ("Act"); National Fuel Gas Co. et al.

May 8, 1986.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendment(s) thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by June 2, 1986 to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the addresses specified below. Proof of service (by affidavit, or in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

National Fuel Gas Company, et al. (70-7210)

National Fuel Gas Company ("National"), 30 Rockefeller Plaza, New York, New York 10112, a registered holding company, and its subsidiaries, National Fuel Gas Supply Corporation ("Supply"), Seneca Resources Corporation, Empire Exploration, Inc. ("Empire"), Penn-York Energy Corporation, and National Fuel Gas Distribution Corporation, all located at 10 Lafayette Square, Buffalo, New York 14203, have filed an application-declaration with this Commission pursuant to sections 6(a), 7, 9(a), 10 and 12 (c), (d) and (f) of the Act and Rules 43 and 500(a)(3) promulgated thereunder.

The applicants-declarants seek authority for (i) the transfer by Supply to Empire of Supply's remaining oil and gas wells and related facilities in the Appalachian region; (ii) the transfer by Empire to Supply of 50 shares of Empire common stock, $10 par value; and (iii) the declaration of a dividend of these shares of common stock from Supply to National. The transfers will be valued at net book value as of the end of the latest practical fiscal year. The number of wells to be transferred will not exceed 2,400, and the net book value at September 30, 1985 of the wells and

---

[1] The original filing of the proposed rule change by the PSE was mistakenly listed as File No. SR-PSE-86-3. Therefore, the Commission release and publication in the **Federal Register** incorrectly refer to the rule filing by that file number.

[2] Since the primary markets, the New York Stock Exchange, Inc. and the American Stock Exchange, Inc., close at 4:00 p.m. Eastern time, and the PSE does not close until 1:30 p.m. Pacific time (4:30 p.m. Eastern time), under the rule, the PSE will continue to be open for thirty minutes after trading has halted on the Exchange on an affected security.

[3] In a letter to the Division of Market Regulation, the PSE explained the rationale of the "unforeseen circumstances" provision of the rule change, noting that, "some degree of flexibility" was necessary to achieve the purposes of the rule. The letter cited an emergency situation, where the primary market is forced to close prior to its normal time on a day when a merger or buyout-related halt also has been announced, as evidence of the utility of this provision. *See* Letter from Kenneth J. Marcus, Attorney, Compliance Department, PSE, to Michael Cavalier, Branch Chief, Division of Market Regulation, SEC, dated March 25, 1986.

related facilities to be transferred will not exceed $15 million.

Additionally, they seek authorization until December 31, 1986 to grant easements, rights-of-way, other interests in real property, and to transfer other property or assets, which are not goods, at market consideration where business requirements dictate.

Eastern Edison Company (70–7254)

Eastern Edison Company ("Eastern"), 110 Mulberry Street, Brockton, Massachusetts 02403, an electric utility subsidiary of of Eastern Utilities Associates, a registered holding company, has filed a declaration with this Commission pursuant to sections 6, 7 and 12(c) of the Act and Rule 50 promulgated thereunder.

Eastern proposes to increase its capital stock in an amount not in excess of $15,000,000 consisting of up to 150,000 shares of Preferred Stock, per value $100 per share ("New Preferred Stock") and to issue and sell such New Preferred Stock by competitive bidding. Eastern also proposes to issue sell, in one or more series from time to time by competitive bidding, up to $55,000,000 aggregate principal amount of First Mortgage and Collateral Trust Bonds ("New Bonds"). Eastern requests authorization to issue and and sell its New Preferred Stock and New Bonds through December 31, 1986.

The net proceeds of the sales of the New Preferred Stock and/or of one or more series of New Bonds will be applied first to redeem outstanding securities. The remainder of the proceeds will be applied to pay underwriting costs and other issuance expenses for the New Preferred Stock and the New Bonds and to reduce short-term bank indebtedness of Eastern.

Northeast Nuclear Energy Company et al. (70–7256)

Northeast Nuclear Energy Company ("Company"), and The Connecticut Light and Power Company ("CL&P"), Seldon Street, Berlin, Connecticut 06037, and Western Massachusetts Electric Company ("WMECO"), 174 Brush Hill Avenue, West Springfield, Massachusetts 01089, each a subsidiary of Northeast Utilities, a registered holding company, have filed a declaration pursuant to sections 6(a), 7, and 12(b) of the Act and Rules 45 and 50(a)(5) thereunder.

The Company proposes to issue and sell, pursuant to a negotiated private placement with one or more institutional investors, not to exceed $20 million aggregate principal amount of guaranteed term notes. The notes will have maturities ranging from 7 to 20 years and are proposed to be guaranteed severally but not jointly by CL&P and WMECO in the percentages of 81% and 19%, respectively. The Company proposes to negotiate the terms of the issuance. It may do so.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

John Wheeler,

Secretary.

DEPARTMENT OF STATE

[CM–8/969]

Chairman's Ad Hoc Group on Communications Development of the National Committee of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT); Meeting

The Department of State announces that the Chairman's Ad Hoc Group on International Communications Development of the National Committee of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT) will meet on May 29, 1986 at 10:30 a.m. in Room 1205, Department of State, 2201 C Street NW., Washington, D.C.

The National Committee assists in the resolution of administrative/procedural problems pertaining to U.S. CCITT activities. The Ad Hoc Group on International Communications Development reviews issues pertaining to the improvement and/or expansion of the communications infrastructure in developing countries.

The purpose of the meeting on May 29 will be to review the results of the April 22–24 meeting of the Advisory Board of the Center for Telecommunications Development in Geneva. In addition, the Ad Hoc Group will review the status of United States support for the Center and make recommendations regarding appropriate United States positions regarding the Center for the ITU Administrative Council, which convenes June 16 in Geneva.

Members of the general public, specifically representatives of the telecommunications industry and those who are concerned with telecommunications development issues in developing countries, are invited to attend the meeting and join in the discussion, subject to the instructions of the Chairman. Admittance of public members will be limited to the seating available. All attendees must use the C Street entrance to the building. In that regard, entrance to the Department of State building is controlled and entry will be facilitated if arrangements are made in advance of the meeting. All persons wishing to attend should call (202) 647–1007.

Requests for further information should be directed to Mr. D. Clark Norton, State Department, Washington, DC, telephone (202) 647–1007.

Dated: May 6, 1986.

Earl S. Barbely,

Acting Director, Office of Technical Standards and Development.

BILLING CODE 4710-07-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Individual Flotation Devices

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of availability of proposed technical standard order (TSO) and request for comments.

SUMMARY: The proposed TSO–C72c prescribes the minimum performance standard that individual flotation devices must meet in order to be identified with the marking "TSO–C72c."

DATE: Comments must identify the TSO file number and be received on or before August 22, 1986.

ADDRESS: Send all comments on the proposed Technical Standard Order to: Federal Aviation Administration, Policy and Procedures Branch, AWS–110, Aircraft Engineering Division, Office of Airworthiness—File No. TSO–C72c, 800 Independence Avenue, SW., Washington, DC 20591

or deliver comments to:

Room 335, 800 Independence Avenue, SW., Washington, DC 20591

FOR FURTHER INFORMATION CONTACT: Ms. Bobbie J. Smith, Policy and Procedures Branch, AWS–110, Aircraft Engineering Division, Office of Airworthiness, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591, Telephone (202) 426–8395.

Comments received on the proposed technical standard order may be inspected, before and after the comment closing date at Room 335, FAA Headquarters Building (FOB–10A), 800 Independence Avenue, SW., Washington, DC 20591, between 8:30 a.m. and 4:30 p.m.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to comment on the proposed TSO listed in this notice by submitting such written data, views, or arguments as they may desire. Communications should identify the TSO file number and be submitted to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Director of Airworthiness before issuing the final TSO.

Background

TSO holders have asked questions regarding the correct marking of seat cushions which incorporate fire blocking material to meet FAR 25.853(c), effective November 26, 1984, and which will be required for transport category airplanes operating under FAR Part 121 after November 26, 1987.

Since many TSO seat/flotation device manufacturers are including the fire blocking materials as part of their TSO article, TSO–C72b is being changed to include FAR 25.853(c) as an option.

TSO–C72b is being changed to allow the TSO holder, if he so desires, to conduct the testing of FAR 25.853(c), effective November 26, 1984, and after conducting such testing and meeting those requirements, mark on the TSO tag that the cushion has been tested to FAR 25.853(c).

How to Obtain Copies

A copy of the proposed TSO may be obtained by contacting the person under "FOR FURTHER INFORMATION CONTACT." Federal Aviation Administration Standards for Individual Flotation Devices may be obtained at the FAA Headquarters in the Office of Airworthiness, Aircraft Engineering Division (AWS–110), and at all Aircraft Certification Offices (ACO's).

Issued in Washington, DC, on May 8, 1986.

Thomas E. McSweeny,

Manager, Aircraft Engineering Division, Office of Airworthiness.

Customs Service

Performance Review Boards; Appointment of Members

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: General notice.

SUMMARY: This notice announces the appointment of the members of the U.S. Customs Service Performance Review Boards (PRB's) in accordance with 5 U.S.C. 4313(c)(4). The purpose of the PRB's is to review senior executive employee's performance and make recommendations regarding performance and performance awards.

DATE: The Performance Review Boards become effective on May 15, 1986.

FOR FURTHER INFORMATION CONTACT: Jerry L. Padalino, Director of Human Resources, U.S. Customs Service, 1301 Constitution Avenue, NW., Room 1134, Washington, D.C. (202) 377–9205.

SUPPLEMENTARY INFORMATION: There are two Performance Review Boards in the U.S. Customs Service as follows:

1. The Performance Review Board to review Senior Executives rated by the Commissioner and Deputy Commissioner is composed of the following members:

Stephen E. Higgins—Director, Bureau of Alcohol, Tobacco and Firearms
Mitchell A. Levine—Assistant Commissioner, Comptroller, Financial Management Service
John W. Mangels—Director, Office of Operations, Department of Treasury
Larry B. Sheafe—Assistant Director (Investigations) U.S. Secret Service
Richard Wassenaar—Assistant Commissioner (Criminal Investigations), Internal Revenue Service

2. The Performance Review Board to review all other Senior Executives is composed of the following members:

William P. Rosenblatt—Assistant Commissioner Office of Enforcement, U.S. Customs Service
William Green—Assistant Commissioner Office of Internal Affairs, U.S. Customs Service
Eugene H. Mach—Assistant Commissioner, Office of Inspection and Control, U.S. Customs Service
Michael H. Lane—Assistant Commissioner, Office of Commercial Operations, U.S. Customs Service
James W. Shaver—Assistant Commissioner, Office of International Affairs, U.S. Customs Service
D. Lynn Gordon—Acting Comptroller, U.S. Customs Service
Jerry L. Padalino—Director, Office of Human Resources, U.S. Customs Service
William J. Griffin—Regional Commissioner, Northeast Region, U.S. Customs Service
James R. Grimes—Regional Commissioner, South Central Region, U.S. Customs Service
Donald F. Kelly—Regional Commissioner, New York Region, U.S. Customs Service
Edward F. Kwas—Regional Commissioner, Southeast Region, U.S. Customs Service
William Logan—Regional Commissioner, Southwest Region, U.S. Customs Service
Richard McMullen—Regional Commissioner, North Central Region, U.S. Customs Service
Quintin L. Villanueva, Jr.—Regional Commissioner, Pacific Region, U.S. Customs Service.

Dated: May 9, 1986.

UNITED STATES INFORMATION AGENCY

Culturally Significant Objects Imported for Exhibition; Determination

Notice is hereby given of the following determination: Pursuant to the authority vested in me by the act of October 19, 1965 (79 Stat. 985, 22 U.S.C. 2459), Executive Order 12047 of March 27, 1978 (43 FR 13359, March 29, 1978), and Delegation of Authority of June 27, 1985 (50 FR 27393, July 2, 1985), I hereby determine that the objects to be included in the exhibit, "Silver Treasure from Early Byzantium" (included in the list [1] filed as a part of this determination) imported from abroad for the temporary exhibition without profit within the United States are of cultural significance. I also determine that the temporary exhibition or display of the listed exhibit objects at the Walters Art Gallery in Baltimore, Maryland, beginning on or about May 16, 1986, to on or about August 18, 1986, is in the national interest.

Public notice of this determination is ordered to be published in the **Federal Register.**

Dated: May 13, 1986.

Thomas E. Harvey,

General Counsel and Congressional Liaison.

[FR Doc. 86-11078 Filed 5-14-86; 8:45 am]

BILLING CODE 8230-01-M

[1] An itemized list of objects included in the exhibit is filed as part of the original document. A copy of this list may be obtained by contacting Mr. John Lindburg of the Office of the General Counsel of USIA. The telephone number is 202-485-7978, and the address is Room 700, U.S. Information Agency, 301 4th Street, SW., Washington, DC 20547.

UNITED STATES SENTENCING COMMISSION

Treatment of Prior Criminal Record Under Sentencing Guidelines; Hearing

AGENCY: United States Sentencing Commission.

ACTION: Notice of Hearing.

SUMMARY: This notice announces that a hearing on the topic of treatment of prior criminal record under sentencing guidelines is scheduled by the U.S. Sentencing Commission for Thursday, May 22, 1986.

Date: May 22, 1986.

Time: 10 a.m.

Location: U.S. Sentencing Commission Hearing Room, 14th Floor of the North Office Tower at National Place, 1331 Pennsylvania Avenue, N.W., Washington, D.C. 20004 Further Information: Contact Paul K. Martin, Communications Director, 1331 Pennsylvania Avenue, N.W., Suite 1400, Washington, D.C. 20004, (202) 662-8800.

SUPPLEMENTARY INFORMATION: The U.S. Sentencing Commission was established under the Comprehensive Crime Control Act of 1984 and is an independent Commission in the Judicial Branch. The Commission is charged with developing a national sentencing policy for the federal courts, and pursuant to that, determinate sentencing guidelines. The May 22 hearing, the Commission's second, will focus on the offender characteristics a judge should consider when sentencing—specifically the treatment of prior record in the sentencing decision.

Written statements on this topic may be submitted to the U.S. Sentencing Commission, 1331 Pennsylvania Avenue, N.W., Suite 1400, Washington, D.C. 2004. The hearing record will remain open for thirty days after the hearing for additional written submissions. All are invited to attend the hearing.

William W. Wilkins, Jr.,

Chairman.

Sunshine Act Meetings

Federal Register
Vol. 51, No. 94
Thursday, May 15, 1986

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

CONTENTS

	Item
Federal Deposit Insurance Corporation	1, 2
Federal Election Commission	3
Legal Services Corporation	4
Occupational Safety and Health Review Commission	5

1

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 2:00 p.m. on Tuesday, May 20, 1986, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous meetings.

Application for Federal deposit insurance and for consent to merge and establish five branches:

United Savings Bank, Manchester, New Hampshire, a state-chartered stock savings bank, in orgnaization, for Federal deposit insurance, for consent to merge, under its charter and title, with United Federal Bank, FSB, Manchester, New Hampshire, a non-FDIC-insured institution, and for consent to establish the five branches of United Federal Bank, FSB as branches of United Savings Bank.

Application for consent to merge and establish two branches:

Bank of Dadeville, Dadeville, Alabama, an insured State nonmember bank, for consent to merge, under its charter and title, with Camp Hill Bank, Camp Hill, Alabama, and for consent to establish the two offices of Camp Hill Bank as branches of the resultant bank.

Applications for consent to purchase assets and assume liabilities:

First National Bank and Trust Company/St. Lucie County, Port St. Lucie, Florida, for consent to purchase certain assets of and assume the liability to pay deposits made in the St. Lucie Plaza Branch of Citizens Federal Savings and Loan Association, Miami, Florida, a non-FDIC-insured institution.

Bank One, Athens, National Association, Athens, Ohio for consent to purchase certain assets of and assume the liability to pay deposits made in the Logan, Pomeroy and Athens offices of Diamond Savings and Loan Company, Findlay, Ohio, a non-FDIC-insured institution.

Recommendations regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 46,512–SR
The Bank of Woodson, Woodson, Texas
Case No. 46,513–SR
United of America Bank, Chicago, Illinois
Case No. 46,516–SR (Amendment)
Gamaliel Bank, Gamaliel, Kentucky

Reports of committees and officers:

Minutes of actions approved by the standing committees of the Corporation pursuant to authority delegated by the Board of Directors.

Reports of the Division of Bank Supervision with respect to applications, requests, or actions involving administrative enforcement proceedings approved by the Director or an Associate Director of the Division of Bank Supervision and the various Regional Directors pursuant to authority delegated by the Board of Directors.

Discussion Agenda:

No matters scheduled.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, NW., Washington, DC.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 898–3813.

Dated: May 13, 1986.
Federal Deposit Insurance Corporation.
Hoyle L. Robinson,
Executive Secretary.

2

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:30 p.m. on Tuesday, May 20, 1986, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors, pursuant to sections 552b(c)(2), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of Title 5, United States Code, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a members of the Board of Directors requests that an item be moved to the discussion agenda.

Recommendations with respect to the initiation termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured banks or officers, directors, employees, agents or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), and (c)(9)(A)(ii)).

Note.—Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

Discussion Agenda:

Memorandum regarding the Corporation's assistance agreement with an insured bank.

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2) and (c)(6)).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, NW., Washington, DC.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 898–3813.

Date: May 13, 1986.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

FEDERAL ELECTION COMMISSION

DATE AND TIME: Tuesday, May 20, 1986, 10:00 a.m.

PLACE: 999 E Street, NW., Washington, DC

STATUS: This meeting will be closed to the public.

ITEMS TO BE DISCUSSED:

Compliance matters pursuant to 2 U.S.C. 437g
Audits conducted pursuant to 2 U.S.C. 437g, 438(b), and Title 26, U.S.C.
Matters concerning participation in civil actions or proceedings or arbitration
Internal personnel rules and procedures or matters affecting a particular employee

* * * * *

PERSON TO CONTACT FOR INFORMATION: Mr. Fred Eiland, Information Officer, 202-376-3155.

Mary W. Dove,

Administrative Assistant.

4

LEGAL SERVICES CORPORATION

TIME AND DATE: An executive session will be held at 5:00 p.m., Thursday, May 22, 1986. The public portion of the meeting will commence at 1:00 p.m., Thursday, May 22, 1986, and continue until all official business is completed.

PLACE: May 22, 1986—Twin Bridges Marriott, Chesapeake Room, 333 Jefferson Davis Highway, Arlington, Virginia 22202.

STATUS OF MEETING: Open [A portion of the meeting is to be closed to discuss personnel, personal, litigation, and unvestigatory matters under the Government in the Sunshine Act [5 U.S.C. 552b (c) (2), (6), (7), (9)(B), and (10)] and 45 CFR 1622.5(a), (e), (f), (g), and (h)].

MATTERS TO BE CONSIDERED:

1. Personal and Personnel Matters (Closed)
2. Litigation and Investigation Matters (Closed)
3. Approval of Agenda
4. Approval of Minutes
   —February 21, 1986
   —March 21, 1986
   —March 29, 1986
5. Proposal to Transfer Funds from the Program Development Budget Line to Law School Clinics
6. Proposal to Consolidate Regional Office Functions in Washington, DC
7. Discussion and Action on Recommendations of the Operations and Regulations Committee
   Questioned Costs—Proposed 45 CFR Part 1630
   —Report from Corporation Staff
   —Public Comment
   F.I.F.O.—Proposed 45 CFR Part 1631
   —Report from Corporation Staff
   —Public Comment
8. Public Comment

Part II

Environmental Protection Agency

40 CFR Parts 795 and 799
Proposed Test Rules:
Methylcyclopentane; Commercial Hexane
Tetrabromobisphenol A
Triethylene Glycol Monomethyl, Monoethyl, and Monobutyl Ethers

VOL 51 ISS 94 MY 15 1986 UMI

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 795 and 799

[OPTS-42084; FRL-3008-8]

Methylcyclopentane and Commercial Hexane; Proposed Test Rule

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: In response to the Interagency Testing Committee's (ITC) designation of methylcyclopentane (MCP; CAS No. 96-37-7) for health effects testing, EPA is proposing that manufacturers and processors of MCP as well as manufacturers and processors of commercial hexane other than as impurities be required under section 4(a)(1)(A) of the Toxic Substances Control Act (TSCA) to perform testing of MCP for neurotoxicity (schedule-controlled operant behavior, neuropathology, functional observation battery, motor activity, and developmental neurotoxicity screen), subchronic toxicity, and inhalation and dermal pharmacokinetics (absorption, distribution, metabolism, and excretion). The Agency also believes that it could find under section 4(a)(1)(B) that there is the potential for substantial human exposure to MCP from its manufacture, processing, and use as a substantial component of commercial hexane and other mixed hexane products. EPA is proposing the testing of MCP because it is the second largest constituent of commercial hexane. The largest constituent, *n*-hexane, is a known neurotoxicant undergoing testing by the National Toxicology Program (NTP) for other toxicological endpoints. The Agency has inadequate information to characterize the toxicity of MCP. If industry should consider reformulating commercial hexane to reduce its *n*-hexane content, the content of MCP in the mixture would increase. Therefore, the Agency believes that testing MCP is necessary to determine its potential impact on human health.

Because there is substantial production and widespread exposure to commercial hexane and because current exposure to MCP occurs primarily following exposure to commercial hexane, EPA is also proposing under section 4(a)(1)(B) of TSCA that manufacturers and processors of commercial hexane other than as an impurity be required to perform testing of this substance for acute and subchronic toxicity, oncogenicity, reproductive toxicity, developmental toxicity, mutagenicity, neurotoxicity (schedule-controlled operant behavior, neuropathology, functional observation battery, and motor activity), and inhalation and dermal pharmacokinetics (absorption, distribution, metabolism and excretion).

DATES: Submit written comments on or before July 14, 1986. If persons request an opportunity to submit oral comments by June 30, 1986, EPA will hold a public meeting on this rule in Washington, DC. For Further information on arranging to speak at the meeting see Unit VIII of this preamble.

ADDRESS: Submit written comments identified by the document control number (OPTS-42084) in triplicate to: TSCA Public Information Office (TS-793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E-108, 401 M St. SW., Washington, DC 20460.

A public version of the administrative record supporting this action is available for inspection at the above address from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: Edward A. Klein, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Rm. E-543, 401 M St. SW., Washington DC 20460, Toll Free: (800-424-9065), In Washington, DC.: (554-1404), Outside the USA: (Operator--202-554-1404).

SUPPLEMENTARY INFORMATION: EPA is issuing a proposed test rule for MCP and commercial hexane under section 4(a) of TSCA in response to the ITC's designation of MCP for health effects testing consideration. Testing is being proposed for commercial hexane because there is widespread exposure to commercial hexane and because current exposure to MCP occurs primarily following exposure to commercial hexane. The Agency has concluded that existing data are inadequate to assess the risks to health posed by exposure to MCP and commercial hexane and that testing of both substances is necessary to develop such data.

I. Introduction

A. ITC Recommendation

TSCA (Pub. L. 94-469, 90 Stat. 2003 *et seq.*; 15 U.S.C. 2601 *et seq.)* established the ITC under section 4(e) to recommend to EPA a list of chemicals to be considered for testing under section 4(a) of the Act. The ITC designated methylcyclopentane (MCP; CAS No. 96-37-7) for priority consideration for health effects testing in its 16th Report, published in the **Federal Register** of May 21, 1985 (50 FR 20930). The ITC recommended that MCP be tested for health effects including neurotoxicity, cardiotoxicity, oncogenicity, genotoxicity, teratogenicity, and reproductive effects. The rationale for conducting these tests was based on: (1) The potentially high exposure of the general population to MCP through its presence in commercial hexane solvents and gasoline; (2) the large number of workers (over one million) thought to have been potentially exposed to MCP; and (3) the irrelevance of existing toxicity studies in which animals were dosed orally rather than by inhalation, the route by which the general population is more likely to be exposed to MCP. No separate justification for cardiotoxicity or oncogencity testing was provided in the Report.

Because of its high volatility and moderate water solubility, the ITC expected MCP to partition into the atmosphere where it would be rapidly degraded. Therefore, the ITC did not recommend testing for environmental effects.

B. Test Rule Development Under TSCA

Under section 4(a) of TSCA, the EPA shall by rule require testing of a chemical substance or mixture to develop appropriate test data if the Administrator finds that:

(A) (i) the manufacture, distribution in commerce, processing, use, or disposal of a chemical substance or mixture, or that any combination of such activities, may present an unreasonable risk of injury to health or the environment,

(ii) there are insufficient data and experience upon which the effects of such manufacture, distribution in commerce, processing, use, or disposal of such substance or mixture or of any combination of such activities on health or the environment can reasonably be determined or predicted, and

(iii) testing of such substance or mixture with respect to such effects is necessary to develop such data; or

(B) (i) a chemical substance or mixture is or will be produced in substantial quantities, and (I) it enters or may reasonably be anticipated to enter the environment in substantial quantities or (II) there is or may be significant or substantial human exposure to such substance or mixture,

(ii) there are insufficient data and experience upon which the effects of the manufacture, distribution in commerce, processing, use, or disposal of such substance or mixture or of any combination of such activities on health or the environment can reasonably be determined or predicted, and

(iii) testing of such substance or mixture with respect to such effects is necessary to develop such data.

EPA uses a weight-of-evidence approach in making a section 4(a)(1)(A)(i) finding; both exposure and toxicity information are considered in determining whether available data support a finding that the chemical may present an unreasonable risk. For the finding under section 4(a)(1)(B)(i), EPA considers only production, exposure, and release information to determine if there is or may be substantial production and significant or substantial human exposure or substantial release to the environment. For the findings under sections 4(a)(1) (A)(ii) and (B)(ii), EPA examines toxicity and fate studies to determine if existing information is adequate to reasonably determine or predict the effects of human exposure to, or environmental release of, the chemical. In making the finding under section 4(a)(1) (A)(iii) or (B)(iii) that testing is necessary, EPA considers whether ongoing testing will satisfy the information needs for the chemical and whether testing which the Agnecy might require would be capable of developing the necessary information.

EPA's process for determining when these findings apply is described in detail in EPA's first and second proposed test rules, published in the Federal Register of July 18, 1980 (45 FR 48524) and June 5, 1981 (46 FR 30300). The section 4(a)(1)(A) findings are discussed at 46 FR 48524 and 46 FR 30300, and the section 4(a)(1)(B) findings are discussed at 46 FR 30300.

In evaluating the ITC's testing recommendations concerning MCP, EPA considered all available relevant information including the following: information presented in the ITC's report recommending testing consideration; production volume, use, exposure, and release information reported by manufacturers of MCP under the TSCA section 8(a) Preliminary Assessment Information Rule (40 CFR Part 712); health and safety studies submitted under the TSCA section 8(d) Health and Safety Data Reporting Rule (40 CFR Part 716) concerning MCP; and published and unpublished data on MCP and commercial hexane available to the Agency. From its evaluation, as described in this proposed rule, EPA is proposing health effects testing requirements for MCP under section 4(a)(1)(A). Because there is substantial production and widespread exposure to commercial hexane and because current exposure to MCP occurs primarily following exposure to commercial hexane, EPA is also proposing that manufacturers and processors of commercial hexane be required to perform testing of this substance for health effects under section 4(a)(1)(B).

II. Review of Available Data

A. Chemical Profile

1. *MCP.* MCP is a colorless, flammable liquid with a sweet odor (Ref. 1). At 25 ° C, MCP has a moderate water solubility of 42 mg/l (Ref. 2). Its vapor pressure is 100 mm Hg at 17.9° C (Ref. 3) and 233 mm Hg at 37.8° C (Ref. 4), and its specific gravity is 0.750 g/ml at 20/4 ° C (Ref. 5). The log octanol/water partition coefficient (K_{ow}) is estimated as 3.31 (Ref. 6). A log soil/sediment-absorption coefficient (K_{oc}) is estimated as 3.18 (Ref. 6). MCP has an estimated atmospheric half-life of 1.97 days and an estimated Henry's law constant of 0.322 atm-m³/mole (Ref. 6). Because of its high volatility and moderate water solubility, MCP is expected to partition into the atmosphere, where it would be rapidly degraded by reaction in the vapor phase with hydroxyl radicals (Ref. 6).

2. *Commercial hexane.* MCP is one of several C_6 hydrocarbons found in commercial hexane (Ref. 9). Normal hexane (*n*-hexane; CAS No. 110–54–3), sometimes known as "hexane," is the saturated straight-chain hydrocarbon with the molecular formula C_6H_{14} (Ref. 9). It is a clear, volatile liquid with a molecular weight of 86.17 daltons and a specific gravity of 0.660 g/ml at 20° C (Ref. 13). *n*-Hexane solidifies between −95 and −100° C, boils at 68.95° C, and has a vapor pressure of 150 mm Hg at 24.8° C (Ref. 13). At room temperature, *n*-hexane has a faint, peculiar odor (Ref. 41). Insoluble in water, *n*-hexane is fairly soluble in organic solvents, e.g., alcohol, ether, and chloroform (Ref. 41).

While in the singular sense "hexane" refers to *n*-hexane, in the plural sense "hexanes" refer to the straight chain compound *n*-hexane, as well as the branched hydrocarbons with the same C_6H_{14} molecular formula known as isohexanes, which include 2-methylpentane (2-MP; CAS No. 107–83–5), 3-methylpentane (3-MP; CAS No. 96–14–0), 2,2-dimethylbutane (2,2-DMB; CAS No. 75–83–2), and 2,3-dimethylbutane (2,3-DMB; CAS No. 79–29–8) (Ref. 9). Commercial hexane is a narrow-boiling mixture of *n*-hexane, the isohexanes 2-MP, 3-MP, 2,2-DMB, 2,3-DMB, with MCP, cyclohexane (CAS No. 110–82–7), and benzene (CAS No. 17–43–2) (Ref. (0. Minor amounts of C_5 and C_7 hydrocarbons may be present (Refs. 9) and 13). Refer to Figure 1 below.

7. Methylcyclopentane (MCP)
CAS No. 96-37-7

8. Benzene
CAS No. 71-43-2

B. Production

1. *MCP.* MCP occurs naturally in crude oil and natural gas liquids and therefore is a constituent of some refinery hydrocarbon processing streams, e.g., straight-run gasoline, and finished petroleum products, e.g., jet fuel and hexane solvent (Ref. 7). MCP also is present as a nonisolated, in-stream component of a feed stream used in the production of hexane isomers, e.g., *n*-hexane, and cyclohexane, from C_6 hydrocarbon petroleum fractions in a closed-loop system (Refs. 8, 21, and 22). Phillips Petroleum Co. (Phillips), the sole manufacturer of isolated MCP, once separated MCP from the naphtha stream that was used to produce 98-percent cyclohexane. This naphtha stream consisted of benzene and C_6 naphthenes, 60 to 80 percent of which is MCP. While Phillips no longer isolates MCP for sale, production of MCP by this process was incidental to the production of cyclohexane (Ref. 20) and continues to occur.

According to the public portion of the TSCA Inventory, production of MCP in 1977 was 50 to 100 million pounds (Ref. 15). Phillips' Philtex Plant in Borger, Texas, is cited in the 1985 SRI Directory of Chemical Producers as the sole manufacturer of MCP (Ref. 16). However, Phillips pointed out that there has been no production of pure MCP in over 3 years, and that during each of the last years it was manufactured, 1980 through 1982, an average of 435 pounds of pure MCP was sold to laboratories for research (Ref. 8). This amount reflects the 0 to 1,000 pounds of MCP listed in the TSCA Inventory.

In addition, Phillips stated that the 50–100 million pounds of MCP reported in the TSCA Inventory as having been produced at its Sweeney, Texas, plant does not reflect production of pure MCP for sale, but reflects the amount of MCP used as an in-stream component which is converted into cyclohexane (Ref. 8).

The second manufacturer listed on the TSCA Inventory, Ashland Chemical Co., produced a maximum of 17,000 pounds of MCP per year as a byproduct of the manufacture of a high-energy fuel, RJ4, in previous years (Ref. 17). Ashland has recently lost the RJ4 contract to Koch Chemical Company and so will not produce any MCP for at least the next 4 years (Ref. 18). Koch chemical claims that its RJ4 fuel does not contain MCP (Ref. 50). Ashland used the byproduct MCP as a boiler fuel (Ref. 17).

Since the 1977 TSCA Inventory was conducted, PGP Gas Products, the third manufacturer listed on the TSCA Inventory, has split into two companies,

Valero Energy Corp. and Perry Gas Processors, both of Houston, Texas. Neither company currently produces MCP (Ref. 19).

2. *Commercial hexane.* There are three major types of commercial hexane, each produced in a different manner (Ref. 9). The composition of a commercial hexane depends upon the choice of feedstock and the process used to separate components (Ref. 9). The three most commonly used feedstocks are staight-run gasolines distilled from crude oil, the higher boiling portion of the liquid product stripped from natural gas, and a refinery stream known as "BTX raffinate," which is the paraffinic portion that remains after the removal of benzene, toluene, and xylene from a naphtha which has been refined to convert naphthalenes to aromatics (Ref. 41). While there is no current production of pure MCP, it is a major component of commercial hexane (8–19 percent), a high-volume solvent (Ref. 9). According to the International Trade Commission, approximately 500 million pounds of hexane were produced in 1984 (Ref. 10). This translates into 40–95 million pounds of MCP. Most of the exposures occur to the commercial hexane mixture rather than to pure MCP.

Commercial hexane A, or solvent grade, derived from the fractionation of straight-run gasoline (Ref. 41), has high benzene and sulfur contents and contains approximately 64 liquid volume percent *n*-hexane and 19 liquid volume percent MCP (Ref. 9). Commercial hexane B, or food grade, recovered in a refinery operation, is purer than A and is low in benzene, sulfur, and olefins (Ref. 9). It contains approximately 81 liquid volume percent *n*-hexane and 12 liquid volume percent MCP. Commercial hexane C, or reaction grade, is the result of extremely close fractionation of a natural gas liquid stock (Ref. 41). This relatively pure commercial hexane is low in impurities and contains approximately 88 liquid volume percent *n*-hexane and 8 liquid volume percent MCP (Ref. 9). EPA notes that as the percent of *n*-hexane increases, the percent of MCP decreases in commercial hexane.

According to EPA's economic analysis for this proposed rule (Ref. 23), commercial hexane is produced by several companies. Individual plant capacities are not available, but producers include Phillips Petroleum Co. (Borger, Texas, and Sweeney, Texas), Pennzoil Co. (Shreveport, Louisiana), Ashland Oil, Charter International Oil, Chemical Exchange Industries, Exxon Chemical Americas, Shell Oil, and Union Oil Co. of California. As industry conditions change from time to time, it is possible some of these producers do not currently manufacture hexane but they have been listed in trade sources as producers in recent years.

C. Uses

1. *MCP.* MCP can be used as a synthesis intermediate, as an extractive solvent, and as an azeotropic distillation agent (Ref. 5). Most of the in-stream MCP in the production of hexane isomers is converted into cyclohexane by Phillips (Ref. 8). Phillips at one time sold 99.9+ percent research grade, 99.5+ percent pure grade, 95+ percent technical grade, and 60 percent commercial grade MCP preparations to laboratories or research facilities (Ref. 20).

2. *Commercial hexane.* Commercial hexane A is used in motor fuels, commercial hexane B as a solvent to extract seed oils, and commercial hexane C as a reaction medium for various polymerization reactions and to formulate various products (Ref. 9). According to Kirk-Othmer (Ref. 9), the greatest volume of commercial hexane B is used during the extraction of oils from soybeans, cottonseed, flaxseed, safflower seed, corn germ, peanuts, and other minor crops. High solvency for the oil that is to be extracted, low boiling point to facilitate separation of the oil from the meal, low benzene content, and low cost are properties of commercial hexane B which have made it the predominant solvent for oil seed extraction (Ref. 9). These same properties apparently make commercial hexane B a desirable reaction medium and solvent in the manufacture of polyolefins, synthetic rubbers, and pharmaceuticals. When it is necessary to use a solvent which has been treated to reduce impurities to low levels, commercial hexane C may be used in polymerization reactions. It is also used as a component of quick-drying rubber cements and certain 2-solvent-system adhesives where it controls viscosity and reduces drying time. In addition, commercial hexane C is used in the preparation of lacquers and printing inks requiring a quick-drying diluent (Ref. 9).

D. Human Exposure

1. *Occupational exposure.* a. *MCP.* Although isolated MCP is currently not manufactured for sale, its presence in various hexane-containing refinery streams and products leads to widespread exposure of workers to MCP along with other C_6 hydrocarbons. The ITC's concern for occupational exposure to MCP was based upon the National Occupational Hazard Survey (NOHS) of 1972–74 in which 1,056,700 workers in 130 occupations were estimated to have been potentially exposed to MCP (Ref. 11). Phillips correctly noted that this estimate was high (Ref. 8). Only 3 percent of the observations had trade name products containing MCP. MCP was not seen in the workplace in its pure form.

Subsequently, the National Institute for Occupational Safety and Health (NIOSH) estimated that there are approximately 38,000 workers with potential exposure to either MCP itself or in a trade name product (Ref. 11). The data from the survey indicate that occupations involving contact with petroleum-based products, i.e., fuels, paints, and solvents, contain the largest number of exposed workers. A study by Brugnone *et al.* has established a correlation between environmental, alveolar, and blood MCP levels after exposure of shoe workers to solvents used in that industry (Ref. 40). EPA believes that this correlation, together with the NOHS survey and NIOSH exposure estimates, supports the concern for widespread worker exposure to MCP.

When Phillips examined 1,590 area samples at 104 locations and 5,589 personal samples at 72 locations for MCP, the average 8-hour time-weighted average (TWA) for all the samples was 0.25 ppm (Ref. 8). Personal sampling measurements for MCP ranged from <1ppm to 48 ppm (Ref. 12). These monitoring data were obtained from service stations, exploration/production facilities, chemical plants, and refineries (Ref. 12).

While EPA is not basing its findings upon MCP's presence in gasoline, gas station employees are expected to be exposed to MCP. Although no exposure data exist for these workers, the American Petroleum Institute (API) has predicted exposures ranging from 0.04 to 0.95 ppm (TWA) using an API theoretical model (Ref. 7). API stated that the high end of the range represented a worst-case exposure estimate (Ref. 7).

There is neither an Occupational Safety and Health Administration (OSHA) Permissible Exposure Limit (PEL) (29 CFR 1910.1000, Table Z–1) nor an American Conference of Governmental Industrial Hygienists (ACGIH) Threshold Limit Value (TLV) (Ref. 13) for MCP.

b. *Commercial hexane.* According to the National Occupational Exposure Survey (NOES) of April 3, 1985, 68,000 workers were estimated to have actual exposure to hexane solvents. Of these,

12,578 were women (Ref. 42). Since there is no CAS Number for commercial hexane, EPA presumes that the bulk of the NOES estimate represents exposure to commercial hexanes. There are neither OSHA PELs (29 CFR 1910.1000, Table Z–1) nor ACGIH TLVs (Ref. 13) for the major components of commercial hexane (MCP, 2-MP, and 3-MP) other than *n*-hexane. There is a 500 ppm PEL and a 50 ppm TLV for *n*-hexane. There is a 500 ppm TLV and a 1,000 ppm STEL for hexane isomers other than *n*-hexane. Phillips has a corporate standard of 100 ppm for hexanes (Ref. 14).

2. *General population exposure.* a. *MCP.* Although isolated MCP is currently not manufactured for sale, its presence in various hexane-containing refinery streams and products leads to widespread exposure of the general population to MCP along with other C_6 hydrocarbons. There are numerous human-generated sources of MCP. It is estimated that approximately 179 million pounds of MCP are released by oil spills, evaporation of gasoline from gasoline stations and hydrocarbon emissions from land transportation vehicles (Ref. 24). Other potential sources of MCP release that cannot be quantified are combustion of JP–4 jet fuel, deliberate venting of waste hydrocarbon gases, and dumping of formation waters (water produced with oil and gas) associated with offshore crude oil production operations.

MCP has been detected 9 times at <10μg/1 and once at 10 to 100 μg/1 in 63 samples of industrial waste water effluents (Ref. 38). MCP also has been detected and quantified in underwater hydrocarbon vents and formation water from offshore oil production facilities (Ref. 25). Having examined MCP's environmental fate, EPA believes that virtually all MCP released into the environment will partition into the atmosphere (Ref. 6).

Furthermore, a number of studies have been conducted in which MCP has been quantified or simply detected in air (Refer to Ref. 6). MCP has been detected both outdoors in air surrounding automotive painting plants when *n*-hexane is used as a paint diluent (Ref. 32) as well as in four indoor telephone control offices and one telephone business office in five States (ppb range) (Ref. 39). In addition, MCP is widespread in urban air, probably due to its presence in automobile exhaust, as discussed above. Although a measured atmospheric half-life of MCP is unavailable, the estimated half-life of 1.97 days suggests that released MCP will not persist in the atmosphere, although constant replenishment near urban areas and petroleum refining and processing facilities may establish steady-state concentrations (Ref. 6).

MCP has been detected as a constitutent (<1.0 liquid volume percent) of commercial hexane solvents used in chemical analyses (Ref. 31). *n*-Hexane of unspecified grade is used as a paint diluent (Ref. 5) and several studies indicate the release of MCP from automotive painting plants along with *n*-hexane, 2-MP, and 3-MP (Refs. 32, 33, and 34).

The potential for general population exposure to MCP is high, since the results of monitoring surveys indicate that MCP has been detected in air, water, and human body fluids. Results from an EPA monitoring survey of human breast milk indicated that three of the seven components of commercial hexane were qualitatively identified in breast milk samples: *n*-hexane—8/8 samples; MCP—6/8 samples; and cyclohexane—5/8 samples (Refs. 36 and 37). In this survey, samples of mother's milk were analyzed from five cities for volatile (purgeable) and semivolatile (extractable) organics using gas chromatography/mass spectrometry. Environmental pollutants were measured in the milk to evaluate the utility of using this body fluid in specific pollutant studies for populations living near chemical manufacturing plants. MCP was present in breast milk samples collected from women in 3 States.

The investigators pointed out that the small sample size (no attempt was made to develop a statistically valid sample), the lack of control over participants (subjects were volunteers), and the selection of sites as having a high probability of detecting pollutants (urban areas with hydrocarbon pollutants) preclude extrapolating these data to the general population.

Despite these noted limitations, EPA believes that the results from this survey are valuable because they indicate that: (1) *n*-hexane, cyclohexane, and MCP are present in a body fluid, indicating their absorption and transport to breast milk; and (2) *n*-hexane, cyclohexane, and MCP were detected in samples collected from three States, indicating potentially widespread exposure.

b. *Commercial hexane.* Between 1979 and 1984, annual production of commercial hexane increased from 390 to 470 million pounds (Ref. 10). Approximately 32 percent of this production was used in vegetable oil extraction, 25 percent in polyolefin manufacturing, 22 percent in elastomer manufacturing, and 21 percent in adhesives and other uses (Ref. 9). Fifty percent of that used for vegetable oil extraction alone is lost through evaporation from seals and equipment (Ref. 23). In addition, motor fuels contain commercial hexane A. Such uses and losses likely contribute to general population exposure to commercial hexane and various C_6 isomers. Although the volume of commercial hexane in motor fuels is not known, the Agency expects this to be the major source of exposure to the general population.

The Agency is basing its estimation of general population exposure to commercial hexane not only on the production and use figures cited above but also on the assumption that the general population exposure as discussed above (Unit II.D.2.a.) is indicative of widespread general population exposure to commercial hexane and other hexane containing refininery streams and products.

3. *Consumer exposure.* a. *MCP.* EPA believes that consumer exposure to MCP may occur during the use of commercial hexane-based petroleum solvents, paints, and thinners. In addition, MCP has been detected in an unspecified adhesive (Ref. 35), wherein it probably occurs due to the commercial hexane contained in the adhesive. Liquid adhesives may, therefore, constitute another source of consumer exposure to MCP.

b. *Commercial hexane.* EPA believes that widespread consumer exposure to commercial hexane may occur during the use of petroleum solvents, paints, thinners, and other consumer products containing commercial hexane. Although EPA lacks specific data on the amount of such solvents in consumer products, their widespread use in industrial products as indicated by NOES data (Ref. 42) suggests that such solvents probably are used in a variety of similar products available to consumers.

E. Health Effects

1. *Pharmacokinetics.* The Agency has reviewed several absorption, distribution, and metabolism studies and has found them insufficient to predict the inhalation and dermal pharmacokinetics behavior of either MCP or commercial hexane.

a. *Absorption and distribution.* In order to compare alveolar and blood monitoring to environmental monitoring for solvents, Brugnone *et al.* (Ref. 40) studied the simultaneous exposure of Italian shoe factory workers to five solvents, i.e., acetone, *n*-hexane, MCP, 2–MP, and 3–MP, over a 4.5 hour period of the work shift. The authors reported that alveolar and blood concentrations

as well as lung uptake were significantly correlated with environmental air samples taken at selected times during the workshift for all five solvents.

Perbellini *et al.* [Ref. 44] determined the partition coefficients of several industrial aliphatic hydrocarbon compounds in various human tissues. The partition coefficient between blood and air is a determinant of inhalation absorption efficiency. The tissue/air partition coefficients for MCP were as follows (mean±standard deviation): fat (176±10.0); liver (7.8±1.0); brain (7.3±0.8); muscle (5.0±0.8); kidney (4.7±1.1); heart (1.9±0.8); lung (1.7±0.04); and blood (0.86±0.08). The high fat/air partition coefficient (176) and the estimated log octanol/water partition coefficient of 3.31 (Ref. 6) suggest that MCP is lipophilic.

These data concur with the results of a survey in which MCP was detected in breast milk (Refs. 36 and 37) (See Unit II.D.3. above). EPA believes that these results are valuable in terms of absorption because they indicate that inhaled MCP and other components of commercial hexane are present in a body fluid, and suggest transport of these components to breast milk.

Naruse (Ref. 35) studied the effects on mice of exposure to four unspecified adhesives containing various quantities and types of organic solvents. "Adhesive D" contained the following organic solvents as percents of the total adhesive: cyclohexane (36.3), acetone (15.3), isopropyl acetate (7.1), *n*-hexane (6.8), MCP (1.5), 3-MP (1.0), 2,3-DMB + 2-MP (0.8), and toluene (0.5).

An unspecified number of male "ddY" mice were exposed for 1 hour to 1 of 3 doses of vapors of the adhesive coated on aluminum foil strips. The air inside the chamber was sampled at intervals throughout the exposure period and analyzed for concentration of organic solvents and for oxygen. Blood samples were taken from the mice before exposure, at the middle and at the end of the 1-hour exposure period, and at 0.5, 1, 2, 3, 6, 12, 18, and 24 hours after cessation of exposure. Air sampling measurements indicated that acetone concentration rapidly increased immediately after the onset of exposure, reaching a maximum level in approximately 15 minutes. The other organic solvents reached maximum concentrations in air proportional to the concentration of adhesive vapor after approximately 30 minutes. Blood sampling measurements immediately after cessation of exposure to vapors of "Adhesive D" indicated that acetone, isopropyl alcohol, and cyclohexane were the major compounds found in blood. MCP and toluene were not detectable in the blood of mice exposed to 30 ml of adhesive vapor (detection level of 1 g/ml), but were detectable within 30 minutes in animals exposed to 50 and 70 ml of vapor. 2,3-DMB, 2-MP, and 3-MP were below detectable levels at all 3 exposure levels. Within 30 minutes after cessation of exposure, *n*-hexane, isopropyl acetate, toluene, and MCP concentrations in blood dropped below detectable levels. Cyclohexane was detected at 2 to 8 hours after cessation of exposure; acetone and isopropyl alcohol were detected at 6 to 12 hours after cessation of exposure. All solvents, however, dropped below detectable levels at 24 hours after cessation of exposure. No other tissues were studied. The Agency believes that this study indicates that these components of commercial hexane were absorbed in the blood following inhalation exposures.

b. *Metabolism and elimination.* Perbellini *et al.* (Refs. 47, 48, and 49) performed a series of studies in which urine samples from Italian shoe factory workers exposed to commercial hexane and to other solvents were analyzed by gas chromatography. However, the authors only looked for substances they thought would be present. No actual pharmacokinetic data obtained from labeled compounds were presented. No urinary metabolites of MCP or 2,3-DMB were specifically identified in these studies.

2. *Acute toxicity.* The Agency has reviewed the acute inhalation toxicity studies available and has found them inadequate to predict the acute toxicity of either MCP or commercial hexane. Based on the chemical profiles, production, and uses of commercial hexane, the most likely route of exposure is by inhalation.

3. *Subchronic toxicity.* The Agency has reviewed available subchronic studies and has found them either inadequate to predict or suggestive of the subchronic toxicity of MCP and commercial hexane.

Phillips (Ref. 8, Att. IV) provided a copy of a pathology report of an API-sponsored 4-week oral nephrotoxicity screening study of numerous test materials, including MCP, 2,3-DMB, and 2-MP. Twenty male F-344 rats were randomly distributed into 2 treatment groups of 10 animals. The two groups received either 0.5 g/kg or 2g/kg of test material by gavage 5 days per week for 4 weeks. Physiological saline (2.0 g/kg) was administered at the same time to 10 control rats. Histopathologic evaluations were performed on kidneys removed the day immediately following final administration of the test material. Lesions associated with experimental hydrocarbon nephropathy, such as hyaline droplet change, regenerative epithelium, and tubular dilation with granular material, were used to grade the extent of nephropathic changes. Rats treated with 2,3-DMB exhibited moderate hydrocarbon nephropathy scores (7.6 at a dose of 0.5 g/kg and 6.1 at a dose of 2.0 g/kg). Rats treated with 2-MP exhibited nephropathy scores slightly above those of controls (4.6 at 0.5 g/kg and 5.9 at 2.0 g/kg). The MCP nephropathy scores (2.9 at 0.5 g/kg and 3.4 at 2.0 g/kg), however, were comparable to those of the saline control group (3.0). EPA believes that this study is inadequate to predict the nephrotoxicity of either MCP or commercial hexane because of the small number of animals, short duration (28 vs. 90 days), and oral rather than inhalation administration.

In addition, the API study (Ref. 8, Att. III), discussed below under neurotoxicity, provides suggestive evidence of the subchronic toxicity potential of MCP and commercial hexane.

4. *Chronic toxicity.* No data on the chronic toxicity of either MCP or commercial hexane have been found in the literature.

5. *Oncogenicity.* No data on the oncogenic effects of either MCP or commercial hexane have been found in the literature.

6. *Developmental and reproductive toxicity.* No data on the developmental and reproductive effects of either MCP or commercial hexane have been found in the literature.

7. *Mutagenicity.* No data on the mutagenic effects of either MCP or commercial hexane have been found in the literature.

8. *Neurotoxicity.* In Italy and in Japan, commercial hexane is used as a solvent for leather adhesives and constitutes a ubiquitous pollutant in shoe-manufacturing industries (Ref. 49). Although *n*-hexane was once believed to have been of low toxicity, outbreaks of peripheral neuropathies in industrial workers exposed to commercial hexane focused attention on occupational exposure to *n*-hexane and its metabolites (Refs. 47 and 49).

It has been well documented that workers exposed to repeatedly high levels of commercial hexane solvents have developed peripheral neuropathies. The first documented cases were Japanese workers who developed polyneuropathy after 3 to 10 months of exposure to industrial atmospheres with high amounts (1,000 to 2,500 ppm) of hexane isomers (Ref. 46). Subsequently, similar cases appeared in U.S. and

European workers. These cases were supplemented by case reports of polyneuropathies following the intentional inhalation of glue vapors containing commercial hexanes and other solvents (Ref. 46). Clinically observed effects included fatigue, poor appetite, and weight loss, followed by impaired sense of touch and loss of strength in the extremities. Physiological effects included reduced nerve conduction velocities and denervation. Histopathological examinations revealed evidence of axonal degeneration, thereby confirming clinical observations.

Chronic exposure of rats to *n*-hexane has resulted in polyneuropathy (Ref. 43 and 46). When hexacarbon metabolites of *n*-hexane, methyl *n*-butyl ketone and 2,5-hexane-dione, were shown to induce the same type of neuropathy seen in rats exposed to *n*-hexane, other hexacarbon compounds found in commercial hexane were suspected of being neurotoxic (Ref. 43). Consequently, the following studies were performed to determine the neuropathic potential of the other hydrocarbon components of commercial hexane.

Ono *et al.* (Ref. 43) conducted a study to determine the comparative neurotoxicities of *n*-hexane (a known neurotoxicant) and certain of its isomers (2–MP, 3–MP, and MCP) commonly present in commercial hexane mixtures. The chemicals (>99 percent pure) were diluted in olive oil and orally administered to male Wistar rats (5 to 7 per group) daily for 8 weeks. Doses were increased at 4 weeks and at 6 weeks to accommodate the normal weight gain (measured at biweekly intervals) of the animals. For the first 4 weeks of the experiment, animals received 0.4 ml (approximately 700 mg/kg/day) of the appropriate chemical and 0.6 ml of olive oil per day. For weeks 5 and 6, they received 0.6 ml (approximately 1,000 mg/kg/day) of a chemical and 0.4 ml of olive oil per day and for weeks 7 and 8 they received 1.2 ml (approximately 2,000 mg/kg/day) of a chemical and 0.8 ml of olive oil per day. Controls received olive oil alone.

The conduction velocity of the peripheral nerve was measured in the animals' tails at biweekly intervals. Rats were immobilized without anesthesia and three electrodes were inserted in the nerve: the first was placed 3 cm down from the anus (A); the second was 7 to 10 cm down from the first (B); and the third was 5 cm down from the second and 3 to 4 cm up from the tail end (C). After insertion of the electrodes, the tail was immersed in a paraffin bath maintained at 37–38 °C. Motor nerve conduction velocity (MCV) and distal latency (DL) were measured by stimulating point A and point B in turn and observing the electromyogram (EMG) at point C. Mixed nerve conduction velocities (MNCV) were measured by stimulating the nerve at C and observing and summing the nerve impulses at A and B.

No significant differences were observed in body weight between groups over the course of the experiment. MCV in the *n*-hexane group was significantly less than control at 4 weeks ($p<0.05$) and at 8 weeks ($p<0.01$) after the beginning of the study but not at 6 weeks. MCV in the MCP group was significantly less than controls at 8 weeks ($p<0.05$). No significant differences were noted for the other test compounds. No significant differences in DL were noted for any test group when compared with controls. In the *n*-hexane group, MHCV (distal) was significantly less than controls at 4, 6, and 8 weeks ($p<0.05$). No significant differences were noted for the other test compounds. In the *n*-hexane group, MNCV (proximal) was significantly less than controls at 6 ($p<0.01$) and at 8 ($p<0.05$) weeks. In the MCP and 2-MP groups MNCV (proximal) was significantly less than controls at 8 weeks ($p<0.05$). No significant difference was noted for the 3-MP group. No behavioral changes were noted in any group throughout the course of the study.

EPA believes that this study provides suggestive evidence of MCP's and possibly 2-MP's neurotoxic potential. While *n*-hexane distinctly impaired the motor nerve conduction velocities of the peripheral tail nerve of male Wistar rats, MCP slightly, but significantly ($p<0.05$), impaired them.

Egan *et al.* (Ref. 46) conducted a 6-month subchronic continuous inhalation toxicity study to determine whether a mixture of C_6 isomers virtually free of n-hexane could induce in rats a neuropathy similar to that seen in experimental studies in animals chronically exposed to pure *n*-hexane. The mixture of C_6 isomers consisted of: 24.6 percent MCP (431.0 mg/m³ nominal concentration); 35.3 percent 2-MP (618.0 mg/m³); 30.0 percent 3-MP (525.0 mg/m³); 6.2 percent cyclohexane (109.0 mg/m); 3.4 percent 2,3-DMB (60.0 mg/m³); and 0.3 percent *n*-hexane (5.3 mg/m³).

Male Sprague-Dawley rats were divided into four groups (6 per group): a sham-exposed group which received hydrocarbon-free air; a positive control which received methyl *n*-butyl ketone (98.66 percent pure) at 400 mg/m³ (100 ppm); a negative control which received methyl ethyl ketone (99.98 percent pure) at 1,475 mg/m³ (500 ppm); and an experimental group which received the mixture of C_6 isomers at 1,750 mg/m³ (500 ppm). Animals were exposed 22 hours/day, 7 days/week for 6 months. Two rats per group were used as the subjects of detailed neuropathological examinations following 2, 4, or 6 months of exposure.

No clinically observable disorders, including neurological impairment, were observed in either exposed or control animals throughout the 6-month course of exposure. After 4 months of exposure, animals exposed to methyl *n*-butyl ketone, the positive control, showed histopathological signs of hexacarbon-induced neuropathy in both the central and peripheral nervous systems. After 6 months of exposure, more advanced neuropathy was observed. Exposure to methyl ethyl ketone, the negative control, for up to 6 months did not produce any histopathological changes in the central or peripheral nervous systems.

Animals exposed to the mixure of C_6 isomers for up to 6 months showed no significant histopathological differences from controls. As above, nervous tissue sections examined after 2 months of exposure appeared normal. At 4 months, age-associated changes in the medulla oblongata and chronic traumatic damage to plantar nerves were observed, but these changes were not attributed to compound administration. Single teased nerve fiber preparations appeared normal (in contrast to the giant axonal swellings seen in preparations from positive controls).

EPA believes that this study is well-conducted. Egan *et al.* used appropriate control animals and carefully monitored actual exposure concentrations and other variables, such as diet. However, EPA believes that the doses used were too low to adequately demonstrate lack of neurotoxic potential of the C_6 isomer mixture. For any repeated exposure study to provide adequate evidence of a substance or mixture's lack of potential to cause a specific effect, EPA feels that exposure to a maximum tolerated dose is necessary. Therefore, the study was inadequate to reasonably predict the neurotoxic potential of either MCP or commercial hexane.

In 1982, API sponsored a two-part study of the neuropathic potential of *n*-hexane in the presence of other hexane isomers (Ref. 8, Att. II). The mixture of C_6 isomers consisted of 30 percent MCP, 30 percent 2-MP, 30 percent 3-MP, 5 percent cyclohexane, 5 percent 2,3-DMB, and less than 1 percent *n*-hexane. Phase I of the study was designed to determine

whether rats treated with non-neurotoxic doses of *n*-hexane would develop neuropathy when treated concurrently with a mixture of *n*-hexane-free C_6 isomers. Phase II of the study was designed to determine whether a mixture of *n*-hexane-free C_6 isomers would potentiate the neurotoxic effects of *n*-hexane given to rats in neurotoxic doses.

In Phase I, young adult male Charles River CD rats were exposed by inhalation to combinations of *n*-hexane and C_6 isomers for 22 hours/day, 7 days/week for up to 6 months at International Research and Development Corp. Animals were killed by perfusion with paraformaldehyde followed by glutaraldehyde, and dissected to remove the brain, spinal cord, and sciatic/tibial nerve complex. Tissues were examined by light microscopy.

A total of 54 animals in six groups were examined. The first group (controls) consisted of 14 animals; the second group (four animals) was exposed to 125 ppm *n*-hexane for 6 months; the third group (four animals) was exposed to 125 ppm *n*-hexane and 125 ppm C_6 isomers for 6 months; the fourth group (four animals) was exposed to 125 ppm *n*-hexane and 375 on ppm C_6 isomers (approximately 112.5 ppm MCP, 2-MP, and 3-MP, respectively) for 6 months; the fifth group (four animals) was exposed to 125 ppm *n*-hexane and 1,375 ppm C_6 isomers (approximately 412.5 ppm MCP, 2-MP, and 3-MP, respectively) for 6 months; and the sixth group (24 animals) was exposed to 500 ppm *n*-hexane. Selected animals from the first and sixth groups were killed at monthly intervals throughout the study.

Weight loss and/or functional signs of abnormality expressed as hindlimb weakness were observed in all animals treated with 500 ppm *n*-hexane beginning with the fourth month of exposure. All other animals were reported to appear normal. Microscopic examination of animals treated with 500 ppm *n*-hexane revealed early pathological changes in the tissues studied beginning with the 2-month exposure group. Characteristic *n*-hexane-induced pathological changes were observed at the third month, and advanced pathological changes were seen by the fourth month.

Of the animals in the other groups (subjected to different exposure levels and examined at 6 months), age-related dystrophic axons were observed in all groups, including the controls. In the groups exposed to 125 ppm *n*-hexane in combination with either 375 or 1,375 ppm C_6 isomers, scattered axonal swellings were also observed, but these were not considered by the investigators to have been pathological changes consistent with *n*-hexane-induced neuropathy.

In Phase II, young adult male Charles River CD rats were exposed to combinations of *n*-hexane and C_6 isomers by a protocol detailed in the companion study (Ref. 8, Att. III). This report details the findings of the light microscopy examination of the brain, spinal cord, and sciatic/tibial nerve complex of animals after 2 months and 6 months of exposure. Five animals were examined from each exposure group at each time point, making a total of 40 animals. The exposure groups included controls, animals exposed to 500 ppm C_6 isomers, animals exposed to 500 ppm *n*-hexane concurrently with 500 ppm C_6 isomers, and animals exposed to 500 ppm *n*-hexane alone. Animals were exposed for 22 hours/day, 7 days/week for 2- or 6-month periods. Sacrifice was by perfusion with 4-percent paraformaldehyde followed by 5-percent glutaraldehyde.

All of the animals receiving *n*-hexane either alone or in combination with C_6 isomers exhibited signs of abnormality. After 2 months of exposure, weight loss, flat-footedness, and poor fur texture were noted. After 6 months, weight loss and hindlimb weakness were observed. All other animals were reported to appear normal.

Upon microscopic examination, animals not exposed to *n*-hexane exhibited only age-related changes. Animals exposed to *n*-hexane alone displayed pathological changes consistent with *n*-hexane-induced neuropathy at 2 and 6 months of exposure. Animals exposed to *n*-hexane concurrently with other C_6 isomers did not display compound-related pathological changes at 2 months exposure. Compound-related changes typical of *n*-hexane-induced neuropathy were seen at 6 months and were reported to be similar in degree to changes induced by *n*-hexane alone.

In 1983, API sponsored a study designed to evaluate the inhalation toxicity, particularly neurotoxicity, of *n*-hexane alone and mixed with other C_6 isomers commonly found in commercial hexanes (Ref. 8, Att. III). The chemicals and mixtures under study were administered to male Charles River CD rats (20 per group) for approximately 22 hours/day, 7 days/week for 6 consecutive months. No rationale was given for the selection of exposure levels.

Four groups of rats were employed. Group VII was exposed to filtered air only (methods control); Group VIII was exposed to 500 ppm mixed hexanes; Group IX was exposed concurrently to 500 ppm *n*-hexane and 500 ppm mixed hexanes, making a total of 1,000 ppm; and Group X was exposed to 500 ppm *n*-hexane (positive control). Two lots of *n*-hexane were employed during the course of the study. The purity of *n*-hexane was 99.3 to 99.4 weight percent. The major contaminant was MCP at 0.4 to 0.5 weight percent. Two lots of mixed hexanes were also used, consisting of approximately 30 percent MCP, 30 percent 2-MP, 30 percent 3-MP, 5 percent cyclohexane, 5 percent 2,3-DMB, and less than 1 percent *n*-hexane. Minor amounts of 2,2-DMB and an unknown component were reported in one lot.

After 2 months and 6 months of exposure, five animals/group were removed from this study for independent examination of the brain, spinal cord and sciatic/tibial nerve complex. These results are reported separately in the 1982 API study (Ref. 6, Att. II).

After 6 months of exposure, all surviving animals were killed by intraperitoneal administration of sodium pentobarbital followed by exsanguination. All animals (including those that died during the course of the study or were killed *in extremis*) were subjected to complete necropsy.

The only treatment-related pharmacotoxic sign observed was abnormal gait, which first appeared at week 16 in one animal from Group X and at week 17 in one animal from Group IX. The incidence and severity increased over time in both animals. Group IX (15 percent MCP and 50 percent *n*-hexane) and X (*n*-hexane only) had significantly ($p<0.01$) lower body weights than either Group VII (controls) or VIII (30 percent MCP). The difference first became significant at week 5 in Group IX and by week 26 was about 25 percent less than controls. In Group X, significance was first noted at week 7, and at week 26 was about 30 percent less than controls.

In all three experimental groups, kidney weights were significantly increased when compared with controls. Upon microscopic examination, a slightly increased incidence of chronic nephritis was observed which was considered to be consistent with the increase in weight. The severity of the condition was also increased in treated animals when compared with controls, but it was unclear whether this was due to amplification of the process seen in control animals or to additional tubular injury caused by the administered hexanes and typically seen in hydrocarbon-induced renal disease.

Groups IX and X, but not Group VIII, exhibited other organ weight variations,

BEST COPY AVAILABLE

but no significant alterations were noted upon histological examination. These variations were considered to be reflections of decreased body weight gain.

Abnormal gait was observed in 8/15 rats in Group IX and 9/15 rats in Group X by week 25 of the study. Microscopic examination revealed peripheral nerve lesions including atrophy, axonal degeneration, and mono-nuclear cell infiltration, in some cases accompanied by secondary skeletal muscle atrophy. These microscopic lesions and the clinical sign of abnormal gait were found only in the groups receiving *n*-hexane, either alone or in combination with mixed hexanes. Administration of mixed hexanes without *n*-hexane (Group VIII) did not result in detectable signs of neurotoxicity.

EPA believes that while the experimental protocol and exposure information in the 1982 API Study (Ref. 8, Att. II) were minimally presented, the 1983 API Study (Ref. 8, Att. III) appears to be well-conducted, with careful monitoring of actual exposure concentrations. Both these studies allow a comparison of effects in male rats after inhalation exposure for up to 6 months to C_6 isomers less *n*-hexane versus *n*-hexane alone. EPA further believes that these studies indicate that *n*-hexane produces clear clinical signs, e.g. abnormal gait, and neuropathy at 500 ppm, the OSHA, PEL, but not at 125 ppm. Exposure to up to 1,375 ppm C_6 isomers produced neither clinical signs nor neuropathy. For any repeated exposure study to provide adequate evidence of a substance or mixture's lack of potential to cause a specific effect, however, EPA believes that a maximum tolerated dose is necessary, and was not used in these studies. Therefore, these studies were inadquate to predict the neurotoxic potential of either MCP or commercial hexane.

F. Ongoing Testing

n-Hexane and its metabolites, methyl *n*-butyl ketone and 2, 5-hexanedione, have been shown to induce polyneuropathy in rats (Refs. 43 and 46). The National Toxicology Program (NTP) is conducting a subchronic inhalation toxicity test of *n*-hexane in B6C3F$_1$ mice (Ref. 26). There is continuous exposure at the low dose of 1,000 ppm. Exposure to 4,000 and 10,000 ppm occurs for 6 hours/day, 5 days/week for 13 weeks (90 days). Because Cavender *et al.* (Ref. 27), sponsored by the Chemical Industry Institute of Toxicology (CIIT), have published the results of a subchronic (13-week) inhalation toxicity study in Fischer rats exposed to 0, 3,000, 6,500, and 10,000 ppm of *n*-hexane for 6 hours/day, 5 days/week. NTP will evaluate the need for chronic toxicity testing (oncogenicity) after reviewing CIIT's data in rats and their own data in mice (Ref. 26). In addition, NTP has arranged for reproductive and developmental toxicity testing of *n*-hexane by inhalation (Ref. 26). Finally, NIOSH is testing potential motor and sensorimotor effects of acute inhalation exposures of rats to *n*-hexane, methyl ethyl ketone, and methyl amyl ketone (Ref. 29).

III. Findings

EPA is basing proposed testing requirements upon TSCA section 4(a)(1)(A) for MCP and upon section 4(a)(1)(B) for commerical hexane.

1. Under section 4(a)(1)(A)(i), EPA finds that the manufacture, processing, and use of MCP, whether as an isolated product or as a substantial component of mixed hexane products, may present an unreasonable risk of neurotoxicity and subchronic toxicity. Ono *et al.* (Ref. 43) reported impaired motor nerve conduction velocities in rats exposed to MCP, providing suggestive evidence of the neurotoxic potential of MCP. API (Ref. 8, Att. III) reported that a mixture of C_6 isomers virtually free of *n*-hexane caused significantly increased kidney weights and increased incidence in severity of chronic nephritis, providing suggestive evidence of the subchronic toxicity potential of MCP which was a major constituent of this mixture. Although isolated MCP has not been sold in the U.S. since 1982 (Ref. 8), MCP is a substantial component of various hexane-containing refinery streams and products whose manufacture, processing, and use result in extensive exposure of workers, consumers, and the general population to MCP as described in Unit II. D.

Under section 4(a)(1)(A)(ii), EPA finds that existing data and experience are inadequate to reasonably determine or predict the potential for exposure to MCP resulting from its manufacture, processing, and use, either as an isolated product or as a substantial component of mixed hexane products, to produce neurotoxicity, subchronic toxicity, and pharmacokinetic effects. EPA believes that the studies conducted by Egan *et al.* (Ref. 6) and API (Ref. 8, Att. II and Att. III) are inadequate because animals were not exposed to maximum tolerated doses of the test substance. EPA believes that exposure to maximum tolerated doses is necessary in order for such studies to provide adequate evidence of a substance or mixture's lack of potential to cause a specific effect. Thus, these studies cannot refute the positive findings of neurotoxicity provided by Ono *et al.* (Ref. 43) or the kidney effects provided by API (Ref. 8, Att. III). Furthermore, EPA believes that the nephrotoxicity oral screening study (Ref. 8, Att. IV) is inadequate to predict the nephrotoxicity of MCP because of the small number of animals, short duration (28 vs. 90 days), and oral rather than inhalation administration. In addition, while the absorption, distribution, and metabolism studies of MCP and other C_6 isomers indicate the absorption of MCP in blood, they are inadequate to predict to pharmacokinetic behavior of MCP.

Under section 4(a)(1)(A)(iii), EPA finds that testing of MCP for neurotoxicity, subchronic toxicity, and pharmacokinetic behavior is necessary to develop adequate data to assess the effects of human exposure to MCP resulting from its manufacture, processing, and use.

2. EPA also believes that there is substantial production of MCP as a component of mixed hexane products and that it could find that there is substantial human exposure to MCP from the manufacture, processing, and use of such products. Although isolated MCP is currently not manufactured for sale, its presence in various hexane-containing refinery streams and products leads to widespread exposure of workers, consumers, and the general population to MCP along with other C_6 hydrocarbons. Under a section 4(a)(1)(B) finding, EPA could require testing of MCP for additional health effects (e.g., reproductive effects) for which data currently do not exist and for which a section 4(a)(1)(A) finding of potential unreasonable risk cannot be made. However, because EPA simultaneously is proposing testing of commercial hexane for all such effects, and because such testing of commercial hexane will screen for the potential of MCP and other components of commercial hexane to produce any of these effects, the Agency is proposing to limit the testing of MCP at this time to neurotoxicity, subchronic toxicity, and pharmacokinetics under section 4(a)(1)(A). EPA believes that this limited testing will provide enough information to determine MCP's effective dose on various target organs and provide a basis for determining the need for any additional testing if the results of this testing and that on commercial hexane indicate other effects.

3. Under section 4(a)(1)(B) , EPA finds that commercial hexane is produced in substantial quantities and that there is substantial human exposure from its manufacture, processing, and use. Approximately 500 million pounds of hexanes were produced in 1984 (Ref. 10).

In addition, according to the National Occupational Exposure Survey of 1985 (NOES), 83,000 workers are estimated to have actual exposure to hexane solvents. Of these, 12,576 are women (Ref. 42). Commercial hexanes are used as a component of motor fuels, lacquers, printing inks, and adhesives, and as a seed oil extractant (Ref. 9). Such uses may result in potentially widespread exposure to workers and consumers, and the general public may be exposed through fugitive emissions from anthropogenic sources.

While EPA believes that there may be substantial human exposure to C_6 hydrocarbons in gasoline, EPA is not considering exposure to the finished gasoline as part of its basis for finding substantial human exposure to commercial hexane. The Agency believes that exposures associated with the manufacture and processing of commercial hexanes and use of solvents containing significant concentrations of C_6 isomers provide sufficient basis for a finding of substantial human exposure under TSCA section 4(a)(1)(B)(i) for commercial hexane.

EPA finds that there are insufficient data to reasonably determine or predict the acute, subchronic, oncogenic, reproductive, developmental, mutagenic, neurotoxic, and pharmacokinetic effects of human exposure to commercial hexane resulting from its manufacture, processing, and use. EPA further finds that testing is necessary to develop such data.

IV. Proposed Rule

A. Proposed Testing and Test Standards

The Agency is proposing that testing be conducted in accordance with specific test guidelines set forth in sections in Title 40 of the Code of Federal Regulations (CFR) as enumerated below. Test methods under new Parts 796, 797, and 798 were published in the **Federal Register** of September 27, 1985 (50 FR 39252). Proposed revisions to these guidelines were published in the **Federal Register** of January 14, 1986 (51 FR 1522). Elsewhere in this issue of the **Federal Register**, new Part 795—Provisional Test Guidelines is being proposed.

On the basis of the findings presented above for health effects testing, the Agency is proposing that MCP be tested under TSCA section 4(a)(1)(A) for: (1) neurotoxicity by inhalation using the tests specified in §§ 795.250, 798.6050, 798.6200, 798.6400, and 798.6500; (2) subchronic inhalation toxicity using the test specified in § 798.2450; and (3) inhalation and dermal pharmacokinetics using the test specified in § 795.232 of this chapter.

Acute neurological effects are of concern because such effects may increase accident proneness, impair self-rescue, or reduce work efficiency (Ref. 45). This is of particular concern to the 38,000 workers potentially exposed to either actual MCP or MCP in a trade name product (Ref. 11). In order to assess the acute neurologic effects of inhaled MCP at low levels on behavior, the Agency is proposing that the neurotoxicity testing include a schedule-controlled operant behavior study (§ 798.6500). In order to assess the effects of repeated inhalation exposures to MCP, the Agency is proposing a subchronic neurobehavioral toxicity evaluation, consisting of neuropathologic evaluation of tissues perfused *in situ* (§ 798.6400), a functional observation battery (§ 798.6050), and measurement of motor activity (§ 798.6200). Furthermore, EPA believes that MCP's presence in breast milk samples raises concerns for neonates and children, whose developing neurological systems may be more susceptible to damage from exposure to MCP than adults. Therefore, in order to assess potential functional and morphological hazards to the nervous system which may arise in neonates from exposure of the mother to MCP during pregnancy and lactation, the Agency is proposing that MCP be tested for developmental neurotoxicity (§ 795.250), which is being proposed elsewhere in this issue of the **Federal Register**.

In order to assess the degree of toxicological activity of MCP upon various target organs, the Agency is proposing that MCP be tested for subchronic toxicity by inhalation (§ 798.2450).

In order to compare actual uptake levels by inhalation of MCP vapors and by dermal absorption following contact with liquid MCP in solvents, testing to compare inhalation and dermal pharmacokinetics (§ 795.232) is also proposed. Because MCP is moderately water soluble (Ref. 2) while *n*-hexane is insoluble (Ref. 4), EPA is concerned that dermal exposure to commercial hexane in solvents by workers and the general population could cause greater exposure to MCP than to *n*-hexane. The Agency believes that this testing will allow it to determine the pharmacokinetic behavior of MCP through solvent use.

On the basis of the findings presented above for health effects testing, the Agency also is proposing that commercial hexane be tested under TSCA section 4(a)(1)(B) for: (1) acute inhalation toxicity using the test specified in § 798.1150; (2) subchronic inhalation toxicity using the test specified in § 798.2450; (3) oncogenicity by inhalation using the test specified in § 798.3300; (4) reproductive toxicity by inhalation using the test specified in § 798.4700; (5) developmental toxicity by inhalation using the test specified in § 798.4350; (6) neurotoxicity by inhalation using the tests specified in §§ 798.6050, 798.6200, 798.6400, and 798.6500; and (7) inhalation and dermal pharmacokinetics using the test specified in § 795.232 of this chapter.

To assess the potential for commercial hexane to cause gene mutations, the Agency is proposing that a reverse mutation assay in *Salmonella typhimurium* be conducted with and without metabolic activation using the procedures specified in § 798.5265. If the results from the *Salmonella typhimurium* test are negative, a gene mutation test in mammalian cells in culture will be required with and without metabolic activation using the procedures specified in § 798.5300. Unless the results of both the *Salmonella typhimurium* test and the mammalian cells in culture test are negative, a sex-linked recessive lethal test in *Drosophila melanogaster* will be required using the procedures specified in § 798.5275. A positive result in the sex-linked recessive lethal test will trigger a mouse specific locus test using the procedures specified in § 798.5200. If the sex-linked recessive lethal test is negative, then the mouse specific locus test will not be required.

To asess the potential for commercial hexane to cause chromosomal aberrations, the Agency is proposing that *in vitro* cytogenetic assays be conducted on commercial hexane as specified in § 798.5375. Unless the results of the *in vitro* test are negative, a dominant-lethal assay will be required using the procedures specified in § 798.5450. A positive result in the dominant-lethal assay will trigger a heritable translocation assay using the procedures specified in § 798.5460. If the *in vitro* cytogenetics assay is negative, an *in vivo* bone marrow assay using procedures specified in § 798.5385 will be required. Should the *in vivo* bone marrow test results prove negative, no further chromosomal aberration testing would be required. A non-negative result in the *in vivo* bone marrow test would trigger the dominant-lethal assay. Again, if the dominant-lethal test is positive, a heritable translocation assay will be required. If the dominant-lethal test is negative, no further chromosomal

aberration testing will be required for commercial hexane.

Before testing is initiated in one or both of the endpoint mutagenicity tests, EPA will hold a public program review, if the results of the previous tier tests are positive. Public participation in this program review will be in the form of written public comments or a public meeting. Request for public comments or notification of a public meeting will be published in the **Federal Register**. Should EPA determine, based on the available weight of evidence, that proceeding to the mouse specific locus or to the heritable translocation test is no longer warranted, the Agency would propose to repeal these testing requirements and, after public comment, issue a final amendment to rescind these requirements.

For a more detailed discussion concerning mutagenicity-tiered testing and public program review procedures see EPA's final test rule for the C_6 aromatic hydrocarbon fraction published in the **Federal Register** of May 17, 1985 (50 FR 20662).

Because of the large exposures to commercial hexane, the requirement for oncogenicity testing will be independent of the outcome of the mutagenicity testing, and the deadline for its completion will be based on its intiation immediately after completion of the subchoronic study.

The Agency is proposing that the above-referenced TSCA health effects test guidelines be employed as the test standards for the purposes of the proposed tests for MCP and commercial hexane. The TSCA test guidelines for health effects testing specify generally accepted minimal conditions for determining the health effects for substances like MCP and commercial hexane to which humans are expected to be exposed. The Agency's review of the TSCA Test Guidelines, which occurs on a yearly basis according to the process described at 47 FR 41857 (September 22, 1982), has found no reason to conclude that these protocols need to be modified significantly. However, because of the high volatility of commercial hexane and because human exposure occurs primarily by inhalation, EPA is proposing chemical-specific modifications to the proposed mutagenicity tests that take into account these factors. In addition, because of the numerous components of commercial hexane, EPA is proposing chemical-specific modifications to the proposed inhalation and dermal pharmacokinetics testing to facilitate identification of the radiolabeled components of the mixture.

EPA published in the **Federal Register** certain proposed revisions to these TSCA Test Guidelines to provide more explicit guidance on the necessary minimum elements for each study (51 FR 1522; January 14, 1986). In addition, these revisions will avoid repetitive chemical-by-chemical changes to the guidelines in their adoption as test standards for chemical-specific test rules. EPA is proposing that these modifications be adopted in the test standards for MCP and commercial hexane.

B. Test Substance

EPA is proposing under TSCA sections 4(a)(1)(A) that methylcyclopentane (MCP; CAS No. 96-37-7) of at least 99.9 percent purity be used as the test substance. EPA has specified a relatively pure substance for testing because the Agency is interested in evaluating the effects attributable to MCP itself. Because Phillips stated that it sold 99.9+ percent research grade MCP preparations to laboratories or research facilities (Ref. 20), EPA believes that this research grade MCP is readily available for testing purposes. Radiolabeled MCP will be needed for the inhalation and dermal pharmacokinetics testing.

EPA is proposing under TSCA section 4(a)(1)(B) that commercial hexane A, or solvent grade, derived from the fractionation of straight-run gasoline and consisting of no more than 64 liquid volume percent *n*-hexane and no less than 19 liquid volume percent MCP, be used as the test substance. According to Kirk-Othmer (Ref. 9), commercial hexane A, or solvent grade, consists of the following components: 63.91 liquid volume percent *n*-hexane (CAS No. 110-54-3); 19.43 liquid volume percent methylcyclopentane (MCP; CAS No. 96-37-7); 9.38 liquid volume percent 3-methylpentane (3-MP; CAS No. 96-14-0); 3.48 liquid volume percent 2-methylpentane (2-MP; CAS No. 107-83-5); 2.81 liquid volume percent benzene (CAS No. 71-43-2); 0.78 liquid volume percent cyclohexane (CAS No. 110-82-7); 0.16 liquid volume percent 2,2- and 2,4-dimethylpentane (2,2-DMP; CAS No. 590-35-2; 2,4-DMP; CAS No. 108-08-7), 0.05 liquid volume percent 2,3-dimethylbutane (2,3-DMB; CAS No. 79-29-8); and 25 ppm sulfur (CAS No. 7704-34-9). EPA believes that commercial hexane A is readily available for testing purposes. Radiolabled components of commercial hexane A will be needed for the inhalation and dermal pharmacokinetics testing.

Because of the numerous kinds of exposure to the C_6 hydrocarbon fraction and because of the variability in composition of commercial hexanes, EPA believes that specifying commercial hexane A as the test substance will alleviate the problem of selecting an appropriate C_6 mixture as the test substance under section 4(a)(1)(B). There are several reasons which led to the proposal of commercial hexane A as the test substance. First, the Agency feels that testing is needed to characterize the toxicity of a type of commercial hexane to which people are actually exposed, rather than a synthetic blend of C_6 hydrocarbons. Second, because the neurotoxic and other effects of *n*-hexane are under study by the National Toxicology Program (NTP), the Agency believes that industry may reduce the *n*-hexane content in C_6 hydrocarbon solvents, thereby increasing exposure to the other constituents, but primarily to MCP. Third, the Agency believes that testing commercial hexane A is more appropriate than testing commercial hexanes B or C because commercial hexane A has the greatest MCP content and the highest solvent use.

C. Persons Required To Test

Section 4(b)(3)(B) specifies that the activities for which the Agency makes section 4(a) findings (manufacture, processing, distribution, use and/or disposal) determine who bears the responsibility for testing. Manufacturers are required to test if the findings are based on manufacturing ("manufacture" is defined in section 3(7) of TSCA to include "imports"). Processors are required to test if the findings are based on processing ("process" is defined in section 3(10) of TSCA as the preparation of a chemical substances or mixture, after its manufacture, for distribution in commerce). Both manufacturers and processors are required to test if the exposures giving rise to the potential risk occur during use, distribution, or disposal.

Because EPA has found that there are insufficient data and experience to reasonably determine or predict the effects on human health of the manufacture, processing, and use of MCP and commercial hexane, EPA is proposing that persons who manufacture and/or process, or who intend to manufacture and/or process, MCP or commercial hexane other than as impurities at any time from the effective date of the final test rule to the end of the reimbursement period be subject to the testing requirements in this proposed rule. In addition, manufacturers and processors of MCP or commercial hexane who do so in the course of producing gasoline or other motor or heating fuels are subject to this rule because the Agency's section 4(a)(1)

(A)(ii) and (B)(ii) findings are based on the manufacture, processing, and use of MCP and commercial hexane. The end of the reimbursement period will be 5 years after the last final report is submitted or an amount of time equal to that which was required to develop data if more than 5 years after the submission of the last final report required under the test rule.

Because TSCA contains provisions to avoid duplicative testing, not every person subject to this rule must individually conduct testing. Section 4(b)(3)(A) of TSCA provides that EPA may permit two or more manufacturers or processors who are subject to the rule to designate one such person or a qualified third person to conduct the tests and submit data on their behalf. Section 4(c) provides that any person required to test may apply to EPA for an exemption from the requirement. The Agency anticipates that the current manufacturers of MCP or commercial hexane will form the reimbursement pool and sponsor the required testing. EPA promulgated procedures for appyling for TSCA section 4(c) exemptions in 40 CFR Part 790.

Manufacturers (including importers) subject to this rule are required to submit either a letter of intent to perform testing or an exemption application within 30 days after the effective date of the final test rule. The required procedures for submitting such letters and applications are described in 40 CFR Part 790.

Processors subject to this rule, unless they are also manufacturers, will not be required to submit letters of intent or exemption applications, or to conduct testing, unless manufacturers fail to submit notices of intent to test or later fail to sponsor the required tests. The Agency expects that the manufacturers will pass an appropriate portion of the costs of testing on to processors through the pricing of their products or reimbursement mechanisms. If manufacturers perform all the required tests, processors will be granted exemptions automatically. If manufacturers fail to submit notices of intent to test or fail to sponsor all the required tests, the Agency will publish a separate notice in the Federal Register to notify processors to respond; this procedure is described in 40 CFR Part 790.

EPA is not proposing to require the submission of equivalence data as a condition for exemption from the proposed testing for MCP and commercial hexane. As noted in Unit IV.B. above EPA is interested in evaluating the neurotoxic and subchronic effects of MCP itself and has specified a relatively pure substance for testing. In addition, the Agency has proposed a specific type of commercial hexane for testing and believes that testing of commercial hexane A will allow reasonable prediction of the potential of various commercial hexane products to cause the effects to be studied.

Manufacturers and processors who are subject to this test rule must comply with the test rule development and exemption procedures in 40 CFR Part 790 for single-phase rulemaking.

D. Reporting Requirements

EPA is proposing that all data developed under this rule be reported in accordance with its TSCA Good Laboratory Practice (GLP) standards which appear in 40 CFR Part 792.

In accordance with 40 CFR Part 790 under single-phase rulemaking procedures, test sponsors are required to submit individual study plans at least 45 days prior to the initiation of each study.

EPA is required by TSCA section 4(b)(1)(C) to specify the time period during which persons subject to a test rule must submit test data. The Agency is proposing specific reporting requirements for each of the proposed test standards in Table 1 as follows:

TABLE 1.—REPORTING REQUIREMENTS

Test	Reporting deadline for final report (No. of months after the effective date of the final rule)	No. of interim (6-mo) reports required
1. Testing for MCP:		
A. Neurotoxicity tests: §§ 795.250, 798.6050, 798.6200, 798.6400, and 798.6500	12	1
B. Inhalation and dermal pharmacokinetics: § 795.252	12	1
C. Subchronic inhalation toxicity: § 798.2450	15	2
2. Testing for commercial hexane:		
A. Acute inhalation toxicity: § 798.1150	6	0
B. Subchronic inhalation toxicity: § 798.2450	15	2
C. Oncogenicity: § 798.3300	53	8
D. Reproduction and fertility effects: § 798.4700	29	4
E. Inhalation developmental toxicity: § 798.4350	12	1
F. *Salmonella typhimurium*: § 798.5265	4	0
G. Mammalian cells in culture: § 798.5300	12	1
H. *Drosophila* sex-linked recessive lethal: § 798.5275	24	1
I. Mouse specific locus: § 798.5200	48	8
J. *In vitro* cytogenetics: § 798.5375	4	0
K. *In vivo* cytogenetics: § 798.5385	12	1
L. Dominant lethal assay: § 798.5450	24	1
M. Heritable translocation assay: § 798.5460	48	8
N. Neurotoxicity tests: §§ 798.6050, 798.6200, 798.6400, and 798.6500	12	1
O. Inhalation and dermal pharmacokinetics: § 795.232	12	1

TSCA section 14(b) governs Agency disclosure of all test data submitted pursuant to section 4 of TSCA. Upon receipt of data required by this rule, the Agency will publish a notice of receipt in the Federal Register as required by section 4(d).

Persons who export a chemical substance or mixture which is subject to a section 4 test rule are subject to the export reporting requirements of section 12(b) of TSCA. Final regulations interpreting the requirements of section 12(b) are in 40 CFR Part 707 (45 FR 82844). In brief, as of the effective date of this test rule, an exporter of MCP or commercial hexane must report to EPA the first export or intended export of MCP or commercial hexane to a particular country in a calendar year. EPA will notify the foreign country concerning the test rule for the chemical.

E. Enforcement Provisions

The Agency considers failure to comply with any aspect of a section 4 rule to be a violation of section 15 of TSCA. Section 15(1) of TSCA makes it unlawful for any person to fail or refuse to comply with any rule or order issued under section 4. Section 15(3) of TSCA makes it unlawful for any person to fail or refuse to: (1) Establish or maintain records, (2) submit reports, notices, or other information, or (3) permit access to or copying of records required by the Act or any regulation or rule issued under TSCA.

Additionally, TSCA section 15(4) makes it unlawful for any person to fail or refuse to permit entry or inspection as required by section 11. Section 11 applies to any "establishment, facility, or other premises in which chemical substances or mixtures are manufactured, processed, stored, or held before or after their distribution in commerce. * * *" The Agency considers a testing facility to be a place where the chemical is held or stored, and therefore, subject to inspection.

Laboratory inspections and data audits will be conducted periodically in accordance with the authority and procedures outlined in TSCA section 11 by duly designated EPA representatives to determine compliance with any final rule for MCP and commercial hexane. These inspections may be conducted for purposes which include verification that testing has begun, that schedules are being met, that reports accurately reflect the underlying raw data and interpretations and evaluations to determine compliance with TSCA GLP standards under 40 CFR Part 792 and the test standards established in the rule.

EPA's authority to inspect a testing facility also derives from section 4(b)(1) of the TSCA, which directs EPA to promulgate standards for the development of test data. These standards are defined in section 3(12)(B) of TSCA to include those requirements necessary to assure that data developed under testing rules are reliable and adequate, and such other requirements as are necessary to provide such assurance. The Agency maintains that laboratory inspections are necessary to provide this assurance.

Violators of TSCA are subject to criminal and civil liability. Persons who submit materially misleading or false information in connection with the requirement of any provision of this rule may be subject to penalties which may be calculated as if they never submitted their data. Under the penalty provision of section 16 of TSCA, any person who violates section 15 could be subject to a civil penalty of up to $25,000 for each violation with each day of operation in violation constituting a separate violation. This provision would be applicable primarily to manufacturers or processors that fail to submit a letter of intent or an exemption request and that continue manufacturing or processing after the deadlines for such submissions. This provision would also apply to processors who fail to submit a letter of intent or an exemption application and continue processing after the Agency has notified them of their obligation to submit such documents (See 40 CFR 790.28(b)). Intentional violations could lead to the imposition of criminal penalties of up to $25,000 for each day of violation and imprisonment for up to 1 year. In determining the amount of penalty, EPA will take into account the seriousness of the violation and the degree of culpability of the violator as well as all the other factors listed in section 16. Other remedies are available to EPA under section 17 of TSCA, such as seeking an injunction to restrain violations of TSCA section 4.

Individuals as well as corporations could be subject to enforcement actions. Sections 15 and 16 of TSCA apply to "any person" who violates various provisions of TSCA. EPA may, at its discretion, proceed against individuals as well as companies themselves. In particular, this includes individuals who report false information or who cause it to be reported. In addition, the submission of false, fictitious, or fraudulent statements is a violation under 18 U.S.C. 1001.

V. Issues for Comment

1. Are there health effects studies on commercial hexane A which would adequately characterize its potential to cause any of the effects for which EPA has proposed testing?

2. Which substance should be tested to characterize the toxicity of commercial hexane under section 4(a)(1)(B): commercial hexane A or *n*-hexane-free C_6 isomers?

Normally, EPA would require testing of the most representative substance to which people are exposed. In this proposed rule, EPA has specified commercial hexane A, or solvent grade, as the test substance because there is actual exposure to it and because it contains the highest amount of MCP, 1 of its 2 largest constituents. The largest constituent, *n*-hexane, is a known neurotoxicant undergoing testing by NTP and NIOSH for other toxicological endpoints. EPA is concerned that the presence of *n*-hexane (64 liquid volume percent) in commercial hexane A may mask the adverse health effects of the other components. In addition, benzene, a known carcinogen, is present in commercial hexane A at 2.81 liquid volume percent.

EPA seeks comment on whether testing *n*-hexane-free C_6 isomers may be a more appropriate test substance. If industry should consider reformulating commercial hexane to reduce its *n*-hexane content, the content of the other C_6 isomers (MCP, 2–MP, and 3–MP) would increase in the mixture. Testing of *n*-hexane-free C_6 isomers would complement the ongoing testing of *n*-hexane because it would characterize the toxicity of the other components collectively. In fact, this synthetic blend has been tested by API and has no benzene and less than 1 liquid volume percent *n*-hexane. On the other hand, because this is a synthetic mixture, testing would provide toxicological information on a mixture to which there currently is no actual exposure.

3. The authors of the EPA monitoring study raised concerns that infants might be uniquely susceptible to some pollutants because of their small body weights and their metabolic systems which differ from those of adults. Is additional testing of MCP and/or commercial hexane needed to assess potential adverse health effects upon neonates, who may be exposed to hexanes and MCP through mother's milk, and whose developing neurological systems may be more susceptible to damage from exposure to these compounds? What test methods should be used for such testing?

4. Since the API study (Ref. 8, Att. III) showed significantly increased kidney weights in rats dosed for 22 hours per day, 7 days per week for 6 consecutive months, should the subchronic test standard for MCP be modified to follow this dosing regimen?

VI. Economic Analysis of Proposed Rule

To assess the economic impact of this rule, EPA has prepared an economic analysis (Ref. 23) that evaluates the potential for significant economic impacts on the industry as a result of the required testing. The economic analysis estimates the costs of conducting the required testing and evaluates the potential for significant adverse economic impact as a result of these test costs by examining four market characteristics of commercial hexane: (1) price sensitivity of demand, (2) industry cost characteristics, (3) industry structure, and (4) market expectations. If these indications are negative for commercial hexane, no further economic analysis is performed. However, if the first level of analysis indicates a potential for significant economic impact, a more comprehensive and detailed analysis is conducted which more precisely predicts the magnitude and distribution of the expected impact.

Testing costs for the proposed testing of MCP are estimated to range from $297,000 to $559,000 and for commercial hexane are estimated from $2,016,000 to $3,310,000, for a total estimated testing cost for the proposed rule of $2,313,000 to $3,869,000. The annualized test costs (using a cost of capital of 25 percent over a period of 15 years) range from $0.6 to $1.0 million. Based on 1984 production of 470 million pounds, the unit test costs range from $0.0013 to $0.0021 per pound. Relative to a current list price of $0.20 per pound of commercial hexane, these costs are equivalent to 0.7 to 1.1 percent of price.

Based on these costs and the market characteristics of commercial hexane, the economic analysis indicates that the potential for significant adverse economic impact as a result of this test

rule is low. This conclusion is based on the following observations:

1. The annual unit cost of the testing required in this rule is low;

2. Demand for commercial hexane is relatively inelastic with respect to price in all of its major uses; and

3. Market expectations for commercial hexane are positive.

Refer to the economic analysis for a complete discussion of the potential for economic impact resulting from these costs.

VII. Availability of Test Facilities and Personnel

Section 4(b)(1) of TSCA requires EPA to consider "* * * the reasonably foreseeable availability of the facilities and personnel needed to perform the testing required under the rule." Therefore, EPA conducted a study to assess the availability of test facilities and personnel to handle the additional demand for testing services created by section 4 test rules. Copies of the study, Chemical Testing Industry: Profile of Toxicological Testing, can be obtained through the NTIS (PB 82–140773). On the basis of this study, the Agency believes that there will be available test facilities and personnel to perform the testing in this proposed rule.

VIII. Public Meetings

If persons indicate to EPA that they wish to present oral comments on this proposed rule to EPA officials who are directly responsible for developing the rule and supporting analyses, EPA will hold a public meeting subsequent to the close of the public comment period in Washington, DC. Persons who wish to attend or to present comments at the meeting should call the TSCA Assistance Office (TAO): Toll Free: (800–424–9065); In Washington, DC: (554–1404); Outside the U.S.A. (Operator—202–554–1404), by June 30, 1986. A meeting will not be held if members of the public do not indicate that they wish to make oral presentations. While the meeting will be open to the public, active participation will be limited to those persons who arranged to present comments and to designated EPA participants. Attendees should call the TAO before making travel plans to verify whether a meeting will be held.

Should a meeting be held, the Agency would transcribe the meeting and include the written transcript in the public record. Participants are invited, but not required, to submit copies of their statements prior to or on the day of the meeting. All such written materials will become part of EPA's record for this rulemaking.

IX. Public Record

EPA has established a record for this rulemaking, (docket number OPTS–42064). This record contains the basic information considered by the Agency in developing this proposal, and appropriate Federal Register notices.

This record includes the following information:

A. Supporting Documentation

(1) Federal Register notices pertaining to this proposed rule consisting of:

(a) Notice containing the ITC designation of MCP to the Priority List (50 FR 20930; May 21, 1985).

(b) Rules requiring TSCA section 8(a) and 8(d) reporting on MCP (50 FR 20909; May 21, 1985).

(c) Notice of final rule on EPA's TSCA Good Laboratory Practice Standards (48 FR 53922; November 29, 1983).

(d) Notice of interim final rule on single-phase test rule development and exemption procedures (50 FR 20652; May 17, 1985).

(e) Notice of final rule on data reimbursement policy and procedures (48 FR 31786; July 11, 1983).

(f) Notice of proposed rule revising TSCA test guidelines (51 FR 1522; January 14, 1986).

(2) Support documents consisting of:

(a) MCP technical support document for proposed rule.

(b) Economic impact analysis of NPRM for MCP and commercial hexane.

(3) TSCA test guidelines cited as test standards for this rule.

(4) Communications before proposal consisting of:

(a) Written public comments and letters.

(b) Contact reports of telephone conversations.

(c) Meeting summaries.

(5) Reports—published and unpublished factual materials.

X. Other Regulatory Requirements

A. Executive Order 12291

Under Executive Order 12291, EPA must judge whether a regulation is "Major" and therefore subject to the requirement of a Regulatory Impact Analysis. EPA has determined that this test rule is not major because it does not meet any of the criteria set forth in section 1(b) of the Order; i.e., it will not have an annual effect on the economy of at least $100 million, will not cause a major increase in prices, and will not have a significant adverse effect on competition or the ability of U.S. Enterprises to compete with foreign enterprises.

This proposed regulation was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291. Any written comments from OMB to EPA, and any EPA response to those comments, are included in the rulemaking record.

B. Regulatory Flexibility Act

Under the Regulatory Flexibility Act (15 U.S.C. 601 *et seq.*, Pub. L. 96–354, September 19, 1980), EPA is certifying that this test rule, if promulgated, will not have a significant impact on a substantial number of small businesses because: (1) They are not likely to perform testing themselves, or to participate in the organization of the testing effort; (2) they will experience only very minor costs in securing exemption from testing requirements; and (3) they are unlikely to be affected by reimbursement requirements.

C. Paperwork Reduction Act

The Office of Management and Budget (OMB) has approved the information collection requirements contained in this proposed rule under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, and has assigned OMB control number 2070–0033. Submit comments on these requirements to the Office of Information and Regulatory Affairs: OMB; 726 Jackson Place, NW., Washington DC 20503, marked "Attention: Desk Officer for EPA." The final rule will respond to any OMB or public comments on the information collection requirements.

List of Subjects in 40 CFR Parts 795 and 799

Testing, Environmental protection, Hazardous substances, Chemicals, Reporting and recordkeeping requirements.

Dated: May 2, 1986.

Victor J. Kimm,

Deputy Assistant Administrator for Pesticides and Toxic Substances.

Therefore, it is proposed that 40 CFR Chapter I be amended as follows:

PART 795—[AMENDED]

1. In proposed Part 795:

a. The authority citation continues to read as follows:

Authority: 15 U.S.C. 2603, 2611, 2625.

b. By adding new § 795.232 to read as follows:

§ 795.232 Inhalation and dermal pharmocokinetics.

(a) *Purpose.* The purpose of these studies is to:

(1) Determine bioavailability of the test substance after dermal or inhalation administration.

(2) Ascertain whether the metabolism of the test substance is similar after dermal or inhalation administration.

(3) Examine the effects of repeated dosing on the metabolism of the test substance.

(b) *Definitions.* (1) Pharmacokinetics is the study of the kinetics of absorption, distribution, metabolism, and exertion of a test substance in animals.

(2) Bioavailability refers to the rate and relative amount of administered test substance which reaches the systemic circulation.

(c) *Test procedures*—(1) *Animal selection*—(i) *Species.* The rat shall be used for pharmacokinetics testing because it has been used extensively for absorption, metabolism, and toxcicological studies. For dermal penetration studies, the female guinea pig shall also be used to provide additional information on dermal absorption.

(ii) *Animal strains.* Adult male and female Fischer 344 rats and female Hartley guinea pigs shall be used. At 7 to 9 weeks of age, the male rats shall weigh 125 to 175 grams and the female rats 110 to 150 grams. The female guinea pigs, 5 to 7 weeks old, shall weigh between 400 and 500 grams. The animals should be purchased from a reputable dealer and shall be identified with ear tags upon arrival. The animals shall be selected at random for the testing groups, and any animal showing signs of ill health shall not be used.

(iii) *Animal care.* (A) Animal care and housing shall be in accordance with DHEW Publication No. NIH)–78–23, 1978, "Guidelines for the Care and Use of Laboratory Animals."

(B) The animals shall be housed in environmentally controlled rooms with 10 to 15 air changes per hour. The rooms shall be maintained at a temperature of 25± 2°C and humidity of 5±10 percent with a 12-hour light/dark cycle per day. The rats shall be kept in a quarantine facility for at least 7 days prior to use.

(C) During the acclimatization period, the rats and guinea pigs shall be housed in suitable cages on hardwood chip bedding. All animals shall be provided with certified feed and tap water *ad libitum.* The guinea pig diet shall be supplemented with adequate amounts of ascorbic acid in the drinking water.

(2) *Administration*—(i) *Test substance.* The proposed study will require the use of both nonradioactive and radiolabled (preferably^{14}) test substance.

(ii) *Dosage and treatment.* (A) In the inhalation studies, three concentrations shall be used. The higher two concentrations should ideally induce some overt symptoms of toxicity after the exposure period is over, although the intermediate level of exposure may be excluded from this condition. The low concentration should not induce any observable signs of toxicity and, ideally, should approximate the human exposure level.

(B) Inhalation treatment shall be conducted using a "nose-cone" apparatus or other method that minimizes dermal exposure of the rats to the test substance. This procedure is preferable to a "bell jar" type, since rats "groom" themselves and could increase the dosage by licking their coat and swallowing the test substance.

(C) For dermal treatment, the doses shall be administered in a suitable vehicle and applied at a volume adequate to deliver the prescribed doses. The backs of the animals shall be lightly shaved with an electric clipper 24 hours before treatment. The dose shall be applied with a micropipette on a specific area (2 cm_2 for rats, 5 cm_2 for guinea pigs, or at least 10 percent of body surface) of the intact shaven skin. The dosed areas shall be concluded with a suitable patch which is secured in place.

(iii) *Washing efficiency study.* Before initiation of the dermal absorption studies described in paragraphs (c)(2)(iv) (A)(*2*) and (B) of this section, an initial washing efficiency experiment shall be conducted to assess the removal of the applied test compound by washing the exposed skin area with soap and water or organic solvents. Four rats and four guinea pigs shall be lightly anesthetized and then the test compound applied at the low dose level to a specific area. After application (5 to 10 minutes), the areas shall be washed with soap and water (2 rats, 2 guinea pigs) or appropriate solvent (2 rats, 2 guinea pigs), and the animals then housed in individual cages for excreta collection. Urine and feces shall be collected at least once following dosing. The amount of test substance recovered shall be determined to assess efficacy of the test substance removal by washing of the skin.

(iv) *Determination of pharmacokinetics*—(A) *Rat studies.* Each experimental group shall contain at least 4 animals of each sex for a total of at least 8 rats.

(*1*) *Inhalation studies* (6-hour exposure periods).

(*i*) Group A shall be exposed to a mixture of radioactive test substance in air at the low concentration.

(*ii*) Group B shall be exposed to a mixture of radioactive test substance in air at the intermediate concentration.

(*iii*) Group C shall be exposed to a mixture of radioactive test substance in air at the high concentration.

(*iv*) Group D—identical to paragraph (c)(2)(iv)(A)(*1*)(*i*) of this section.

(*v*) Group E—identical to paragraph (c)(2)(iv)(A)(*1*)(*ii*) of this section.

(*vi*) Group F—identical to paragraph (c)(2)(iv)(A)(*1*)(*iii*) of this section.

(*vii*) *Kinetic studies.* Groups A, B, and C shall be used to determine the kinetics of absorption of the test substance through the lungs. The concentration of the test substance in inspired and expired air and blood shall be measured at selected time intervals during and after inhalation exposure. The values for the test substance's retention, body burden, and saturability shall be calculated from these experiments.

(*viii*) *Metabolism studies.* At the end of the exposure periods, rats from Groups D, E, and F shall be placed in individual metabolic cages. Excreta (urine, feces, and expired air) shall be collected at 8, 24, 48, 72, and 96 hours post-treatment.

(*2*) *Dermal studies.* Two doses shall be used in this study. The high dose should, if possible, induce some overt toxicity, while the low dose should not. If feasible, the high and low doses for the dermal studies should be equivalent to the applied high and low doses administered during the inhalation studies.

(*i*) Group G shall be dosed once dermally with the low dose of the test substance (combination of radiolabeled and nonradiolabeled test substance components).

(*ii*) Group H shall be dosed once dermally with the high dose of the test substance (combination of radiolabeled and nonradiolabeled test substance components).

(*iii*) For the dermal studies, the test substance shall be kept on the skin for a

minimum of 8 hours, or as determined by the absorption properties of the compound. After application, each animal shall be placed in a separate metabolic cage for excreta collection. Urine and feces shall be collected at 8, 24, 48, 72, and 96 hours. At the time of removal of the patch, the occluded area shall be washed with an appropriate solvent to remove any test substance which may remain on the skin surface. At the termination of the experiments, each animal shall be sacrificed and the exposed skin area removed. The skin (or an appropriate section) shall be solubilized and assayed for radioactivity to ascertain if the skin acts as a reservoir for the test substance.

(B) *Guinea pig studies.* The dermal studies conducted on groups G and H as specified in paragraph (c)(2)(iv)(A)(*2*) of this section shall be repeated using female guinea pigs. Groups I and J shall each contain at least 4 female guinea pigs.

(v) *Repeated dosing study.* Group K (4 rats, 2 of each sex) shall receive a series of single daily inhalation doses of nonradioactive test compound over a period of at least 14 days, followed at 24 hours after the last dose by a single inhalation dose of radiolabeled test compound. Each dose shall be at the low dose level.

(3) *Observation of animals*—(i) *Bioavailability.* The levels of radioisotope shall be determined in whole blood and blood plasma or blood serum at 8, 24, 48, 72, and 96 hours or at other time intervals necessary for completion of the study after dosing rats as specified in paragraph (c)(2) (iv)(A) and (v) of this section and guinea pigs as specified in paragraph (c)(2)(iv)(B) of this section. Four animals from each group shall be used for this purpose.

(ii) *Urinary and fecal excretion.* The quantities of radioisotope excreted in the urine and feces by rats dosed as specified in paragraph (c)(2) (iv)(A) and (v) of this section and guinea pigs dosed as specified in paragraph (c)(2)(iv)(B) of this section after dosing, and if necessary, daily thereafter until at least 90 percent of the applied dose has been excreted or until 7 days after dosing (whichever occurs first). Four animals from each group shall be used for these analyses.

(iii) *Biotransformation after inhalation and dermal dosing.* Appropriate qualititaive and quantatitive methods shall be used to assay urine and fecal specimens collected from rats dosed as specified in paragraph (c)(2)(iv)(A) of this section. Efforts shall be made to identify any metabolite which comprises 10 percent or more of the dose excreted.

(iv) *Changes in biotransformation.* Appropriate qualitative and quantitative assay methodology shall be used to compare the composition of radiolabeled compounds in excreta (collected 24 and 48 hours after dosing) from rats dosed as specified in paragraph (c)(2)(iv)(A)(*1*)(*iv*) of this section with those in the excreta (collected at 24 and 48 hours after the radiolabeled dose) from rats in the repeated-dose study as specified in paragraph (c)(2)(v) of this section.

(d) *Data and reporting*—(1) *Treatment of results.* Data shall be summarized in tabular form.

(2) *Evaluation of results.* All observed results, quantitative or incidental, shall be evaluated by an appropriate statistical method.

(3) *Test report.* In addition to the reporting requirements as specified in the TSCA Good Laboratory Practice Standards under Part 792 of this chapter, the following specific information shall be reported:

(i) Species and strains of laboratory animals.

(ii) Information on the degree (i.e., specific activity for a radiolabel) and site(s) of labeling of the test substance.

(iii) A full description of the sensitivity and precision of all procedures used to produce the data.

(iv) Percentage absorption of radiolabeled test substance after inhalation and dermal exposures to rats and dermal exposure to guinea pigs.

(v) Quantity of isotope, together with percent recovery of administered dose of feces, urine, blood and skin and skin washings (dermal study only for last two portions of rats and guinea pigs).

(vi) Quantity and distribution of radiolabeled test substance in various tissues of rats, including bone, brain, fat, gonads, heart, kidney, liver, lung, muscle, spleen, and in residual carcass.

(vii) Biotransformation pathways and quantities of test substance and metabolites in excreta collected after administering single high, intermediate, and low inhalation and high and low dermal doses to rats.

(viii) Biotransformation pathways and quantities of test substance and metabolites in excreta collected after administering repeated low inhalation doses of test substance to rats.

PART 799—[AMENDED]

2. In Part 799:

a. The authority citation continues to read as follows:

Authority: 15 U.S.C. 2003, 2611, 2625.

b. By adding new § 799.2535 to read as follows:

§ 1799.2535 Methylcyclopentane.

(a) *Identification of test substance.* (1) Methylcyclopentane (MCP; CAS No. 96-37-7) shall be tested in accordance with this section.

(2) MCP of at least 99.9-percent purity shall be used as the test substance.

(b) *Persons required to submit study plans, conduct tests, and submit data.* All persons who manufacture or process, or intend to manufacture or process, MCP, other than as an impurity, and all persons who manufacture or process commercial hexane, other than as an impurity, from the effective date of this rule (44 days after the publication date of the final rule in the Federal Register) to the end of the reimbursement period shall submit letters of intent to conduct testing, submit study plans, conduct tests in accordance with Part 792 of this chapter, and submit data or submit exemption applications as specified in this section, Subpart A of this Part, and Part 790 of this chapter for single-phase rulemaking.

(c) *Health effects testing*—(1) *Neurotoxicity*—(i) *Required testing.* Neurotoxicity tests shall be conducted with MCP in accordance with §§ 795.250, 798.6050, 798.6200, 798.6400, and 798.6500 of this chapter.

(ii) *Reporting requirements.* (A) The study plans for the neurotoxicity tests must be submitted at least 45 days before the initiation of testing.

(B) The neurotoxicity tests shall be completed and the final results submitted to the Agency within 12 months of the effective date of the final rule.

(C) Progess reports shall be submitted 6 months from the effective date of the final rule.

(2) *Inhalation and dermal pharmacokinetics*—(i) *Required testing.* An inhalation and dermal pharmacokinetics test shall be conducted with MCP in accordance with § 795.232 of this chapter.

(ii) *Reporting requirements.* (A) The study plan for the inhalation and dermal pharmacokinetics test must be submitted at least 45 days before initiation of testing.

(B) The inhalation and dermal pharmacokinetics testing shall be completed and the final results submitted to the Agency within 12 months of the effective date of the final rule.

(C) Progress reports shall be submitted 6 months from the effective date of the final rule.

(3) *Subchronic inhalation toxicity*—(i) *Required testing.* A subchronic inhalation toxicity test shall be

conducted with MCP in accordance with § 798.2450 of this chapter.

(ii) *Reporting requirements.* (A) The study plan for the subchronic inhalation toxicity test must be submitted at least 45 days before initiation of testing.

(B) The subchronic inhalation toxicity test shall be completed and the final results submitted to the Agency within 15 months of the effective date of the final rule.

(C) Progress reports shall be submitted at 6-month intervals beginning 6 months after the effective date of the final rule.

PART 799—[AMENDED]

2. In Part 799: By adding § 799.2155 to read as follows:

§ 799.2155 Commercial hexane.

(a) *Identification of test substance.* (1) "Commercial hexane," for purposes of this rule, is a product obtained from crude oil, natural gas liquids, or petroleum refinery processing which consists primarily of six-carbon alkanes or cycloalkanes and contains at least 50 liquid volume percent *n*-hexane (CAS No. 110–54–3) and at least 5 liquid volume percent methylcyclopentane (MCP; CAS No. 96–37–7).

(2) The test substance shall be commercial hexane A, or solvent grade, derived from the fractionation of straight-run gasoline, and shall consist of no more than 64 liquid volume percent *n*-hexane and no less than 19 liquid volume percent MCP.

(b) *Persons required to submit study plant, conduct tests, and submit data.* All persons who manufacture or process, or intend to manufacture or process, commercial hexane, other than as an impurity, from the effective date of this rule (44 days after the publication date of the final rule in the Federal Register) to the end of the reimbursement period shall submit letters of intent to conduct testing, submit study plans, conduct tests in accordance with Part 792 of this chapter, and submit data, or submit exemption applications, as specified in this section, Subpart A of this Part, and Part 790 of this chapter for single-phase rulemaking.

(c) *Health effects testing*—(1) *Acute inhalation toxicity*—(i) *Required testing.* An acute inhalation toxicity test shall be conducted with commercial hexane in accordance with § 798.1150 of this chapter.

(ii) *Reporting requirements.* (A) The study plan for the acute inhalation toxicity test must be submitted at least 45 days before the initiation of testing.

(B) The acute inhalation toxicity test shall be completed and the final results submitted to the Agency within 6 months of the effective date of the final rule.

(2) *Subchronic inhalation toxicity*—(i) *Required testing.* A subchronic inhalation toxicity test shall be conducted with commercial hexane in accordance with § 798.2450 of this chapter.

(ii) *Reporting requirements.* (A) The study plan for the subchronic inhalation toxicity test must be submitted at least 45 days before initiation of testing.

(B) The subchronic inhalation toxicity test shall be completed and the final results submitted to the Agency within 15 months of the effective date of the final rule.

(C) Progress reports shall be submitted at 6-month intervals beginning 6 months after the effective date of the final rule.

(3) *Oncogenicity*—(i) *Required testing.* An oncogenicity test shall be conducted by inhalation with commercial hexane in accordance with § 798.3300 of this chapter.

(ii) *Reporting requirements.* (A) The study plan for the oncogenicity test must be submitted at least 45 days before the initiation of testing.

(B) The oncogenicity test shall be completed and the final results submitted to the Agency within 53 months of the effective date of the final rule.

(C) Progress reports shall be submitted at 6-month intervals beginning 6 months after the effective date of the final rule.

(4) *Reproduction and fertility effects*—(i) *Required testing.* A reproduction and fertility effects test shall be conducted by inhalation with commercial hexane in accordance with § 798.4700 of this chapter.

(ii) *Reporting requirements.* (A) The study plan for the reproduction and fertility effects test must be submitted at least 45 days before the initiation of testing.

(B) The reproduction and fertility effects test shall be completed and the final results submitted to the Agency within 29 months of the effective date of the final rule.

(C) Progress reports shall be submitted at 6-month intevals beginning 6 months after the effective date of the final rule.

(5) *Inhalation developmental toxicity*—(i) *Required testing.* An inhalation developmental toxicity test shall be conducted with commercial hexane in accordance with § 798.4350 of this chapter.

(ii) *Reporting requirements.* (A) The study plan for the inhalation developmental toxicity test must be submitted at least 45 days before the initiation of testing.

(B) The inhalation developmental toxicity test shall be completed and the final results submitted to the Agency within 12 months of the effective date of the final rule.

(C) Progress reports shall be submitted 6 months from the effective date of the final rule.

(6) *Mutagenic effects—gene mutations*—(i) *Required testing.* (A)(*1*) A *Salmonella typhimurium* reverse mutation assay shall be conducted with commercial hexane both with and without metabolic activation in accordance with § 798.5265 of this chapter and as modified in paragraph (c)(6)(i)(A)(*2*) of this section.

(*2*) Test standard modifications. The requirement under § 798.5265 of this chapter is modified so that the assay shall be performed using the desiccator method described as follows: The agar overlay plates shall be placed uncovered in a 9-liter desiccator. A volume of the liquid test substance shall be added to the glass Petri dish suspended beneath the porcelain shelf of the desiccator. A magnetic stirring bar to serve as a fan to assure rapid distribution and even distribution of the vapor shall be placed on the bottom of the inside of the desiccator. The desiccator shall be placed on a magnetic stirrer within a 37° C room or chamber for 7 to 10 hours. The plates shall then be removed, their lids replaced, followed by incubation for an additional 40 hours at 37° C before counting.

(B)(*1*) A gene mutation test in mammalian cells shall be conducted with commercial hexane both with and without metabolic activation as specified in § 798.5300 of this chapter and as modified in paragraph (c)(6)(i)(B)(*2*) of this section if the results from the *Salmonella typhimurium* test conducted pursuant to paragraph (c)(6)(i)(A) of this section are negative.

(*2*) Test standard modifications. The requirement under § 798.5300 of this chapter is modified to read as follows: Cells should be exposed to the test substance both with and without metabolic activation. Treatment flasks shall be incubated on a rocker panel to insure maximum contact between the cells and the test agent. Incubation shall be at 37° C for 18 hours for experiments without metabolic activation and for 5 hours for experiments with activation. Each flask shall be closed with a cap with a rubber septum. Headspace samples shall be taken at the beginning and the end of exposure period and analyzed to determine the amount of test substance in each flask.

(C)(*1*) A sex-linked recessive lethal test in *Drosophila melanogaster* shall be conducted with commercial hexane in accordance with § 798.5275 of this chapter and as modified in paragraph (c)(6)(i)(C)(*2*) of this section unless the results of both the *Salmonella typhimurium* test conducted pursuant to paragraph (c)(6)(i)(A) of this section and the mammalian cells in the culture gene mutation test conducted pursuant to paragraph (c)(6)(i)(B) of this section, if required, are negative.

(*2*) Test standard modifications. The requirement under § 798.5275 of this chapter is modified so that the route of administration shall be inhalation.

(D)(*1*) A mouse specific locus test shall be conducted with commercial hexane by inhalation in accordance with § 798.5200 of this chapter and as modified in paragraph (c)(6)(i)(D)(*2*) of this section if the results of the sex-linked recessive lethal test conducted pursuant to paragraph (c)(6)(i)(C) of this section are positive.

(*2*) Test standard modifications. The requirement under § 798.5200 of this chapter is modified so that the duration of exposure shall be for 6 hours per day.

(ii) *Reporting requirements.* (A) The study plans for each gene mutation test must be submitted at least 45 days before the initiation of testing.

(B) Gene mutation tests shall be completed and final results submitted as follows: *Salmonella typhimurium*, 4 months; mammalian cells in culture, 12 months; *Drosophila* sex-linked recessive lethal, 24 months; and mouse specific locus, 48 months.

(C) Except for the *Salmonella typhimurium* test, progress reports shall be submitted at 6-month intervals beginning 6 months after the effective date of the final rule.

(7) *Mutagenic effects—chromosomal aberrations*—(i) *Required testing.* (A)(*1*) An *in vitro* cytogenetics test shall be conducted with commercial hexane in accordance with § 798.5375 of this chapter and as modified in paragraph (c)(7)(i)(A)(*2*) of this section.

(*2*) Test standard modifications. The requirement under § 798.5375 of this chapter is modified so that the assay shall be performed using flasks flushed with commercial hexane vapors, then closed with a cap with a rubber septum.

(B)(*1*) An *in vivo* cytogenetics test shall be conducted with commercial hexane by inhalation in accordance with § 798.5385 of this chapter and as modified in paragraph (c)(7)(i)(B)(*2*) of this section if the *in vitro* test conducted pursuant to paragraph (c)(7)(i)(A) of this section is negative.

(*2*) Test standard modifications. The requirement under § 798.5385 of this chapter is modified so that the duration of exposure shall be for 6 hours per day for 5 consecutive days.

(C)(*1*) A dominant lethal assay shall be conducted with commercial hexane by inhalation in accordance with § 798.5450 of this chapter and as modified in paragraph (c)(7)(i)(C)(*2*) of this section unless both the *in vitro* and *in vivo* cytogenetics tests conducted pursuant to paragraphs (C)(7)(i) (A) and (B) of this section are negative.

(*2*) Test standard modifications. The requirement under § 798.5450 of this chapter is modified so that the duration of exposure shall be for 6 hours per day for 5 consecutive days.

(D) A heritable translocation test shall be conducted with commercial hexane by inhalation in accordance with § 798.5460 of this chapter if the results of the dominant lethal assay conducted pursuant to paragraph (c)(7)(i)(C) of this section are positive.

(ii) *Reporting requirements.* (A) The study plans for each chromosomal aberration test must be submitted at least 45 days before the initiation of testing.

(B) Chromosomal aberration tests shall be completed and final results submitted as follows: *in vitro* cytogenetics, 4 months; *in vivo* cytogenetics, 12 months; dominant lethal assay, 24 months; and heritable translocation assay, 48 months.

(C) Except for the *in vitro* cytogenetics test, progress reports shall be submitted beginning 6 months after the effective date of the final rule.

(8) *Neurotoxicity*—(i) *Required testing.* Neurotoxicity tests shall be conducted with commercial hexane in accordance with §§ 798.6050, 798.6200, 798.6400, and 798.6500 of this chapter.

(ii) *Reporting requirements.* (A) The study plan for the neurotoxicity tests must be submitted at least 45 days before the initiation of testing.

(B) The neurotoxicity tests shall be completed and the final results submitted to the Agency within 12 months of the effective date of the final rule.

(C) Progress reports shall be submitted 6 months from the effective date of the final rule.

(9) *Inhalation and dermal pharmacokinetics*—(i) *Required testing.* (A) An inhalation and dermal pharmacokinetics test shall be conducted with commercial hexane in accordance with § 795.232 of this chapter.

(B) Test standard modifications. The requirement under § 795.232 (c)(2)(i) of this chapter is modified to read as follows:

(*2*) *Administration of test substance*—(i) *(test substance.* Since the test substance is a mixture of *n*-hexane; MCP; 3-MP; 2-MP; benzene; cycolohexane; 2,2- and 2,4-DMp; 2,3-DMB; and sulfur, the experiments shall be conducted in groups using ^{14}C and ^{3}H labeled components. This type of labeling can be conducted in groups of 2 components. For example, in the first groups, *n*-hexane may be labeled with ^{14}Cv and MCP with tritium with the remaining components unlabeled. The kinetic and metabolic studies would then be run on the test substance and analyzed for *n*-hexane and MCP as described below. In the second group, 3-MP may be labeled with tritium and 2-MP labeled with ^{14}C. The third group would have benzene labeled with ^{14}C and cyclohexane labeled with tritium, etc. If it is feasible from an analytical standpoint, one of the higher liquid volume percent components (*n*-hexane, MCP, or 3-MP) could be labeled with deuterium and a gas chromatograph/mass spectrometer (GC/MS) used to follow the disposition of the deuterium-labeled component of the test substance. This procedure would permit the investigators to use fewer experimental groups to obtain the same amount of information.

(ii) *Reporting requirements.* (A) The study plan for the inhalation and dermal pharmacokinetics test must be submitted at least 45 days before the initiation of testing.

(B) The inhalation and dermal pharmacokinetics test shall be completed and the final results submitted to the Agency within 12 months of the effective date of the final rule.

(C) Progress reports shall be submitted 6 months from the effective date of the final rule.

(Information collection requirements have been approved by the Office of Management and Budget under control number 2070-0033)

[OPTS-42083; FRL-2998-5]

Tetrabromobisphenol A; Proposed Test Rule

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing that manufacturers and processors of tetrabromobisphenol A (TBBPA, CAS No. 79-94-7) be required, under section

4 of the Toxic Substances Control Act (TSCA), to perform testing for chemical fate and environmental effects. The proposed testing includes biodegradation studies and a number of environmental effects studies including a study to determine the effects of TBBPA on microorganisms in activated sludge, acute toxicity studies in freshwater algae, fish, and invertebrates, chronic toxicity studies in fish and invertebrates, and bioconcentration potential studies in fish and invertebrates. This proposed rule is in response to the Interagency Testing Committee's (ITC's) designation of TBBPA for priority consideration for chemical fate and environmental effects testing.

DATES: Submit written comments on or before July 14, 1986. If persons request an opportunity to submit oral comment by June 30, 1986, EPA will hold a public meeting on this rule in Washington, DC. For further information on arranging to speak at the meeting see Unit VII of this preamble.

ADDRESS: Submit written comments, identified by the document control number (OPTS–42083), in triplicate to: TSCA Public Information Office (TS–793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E–108, 401 M St., SW., Washington, DC 20460.

A public version of the administrative record supporting this action (with any confidential business information deleted) is available for inspection at the above address from 8 a.m. to 4 p.m., Monday through Friday except legal holidays.

FOR FURTHER INFORMATION CONTACT: Edward A. Klein, Director, TSCA Assistance Office (TS–799), Office of Toxic Substances, Rm. E–543, 401 M St., SW., Washington, DC 20460, Toll free: (800–424–9065); In Washington, DC: (554–1404), Outside the USA: (Operator—202–554–1404).

SUPPLEMENTARY INFORMATION: EPA is issuing a proposed test rule under section 4(a) of TSCA in response to the ITC's designation of TBBPA for chemical fate and environmental effects testing consideration.

I. Introduction

A. ITC Recommendation

TSCA (Pub. L. 94–469, 90 Stat. 2003 *et seq.*; 15 U.S.C. 2601 *et seq.*) established the ITC under section 4(e) to recommend to EPA a list of chemicals to be considered for testing under section 4(a) of the Act.

The ITC designated TBBPA (CAS No. 79–94–7) for priority consideration in its 16th Report submitted to EPA on May 2, 1985. The report was published in the **Federal Register** of May 21, 1985 (50 FR 20930). The ITC recommended that TBBPA be considered for chemical fate testing, including water solubility, soil adsorption coefficient, and persistence; and environmental effects testing, including acute and chronic toxicity to fish, aquatic invertebrates and algae, and bioconcentration potential in fish.

ITC's rationale for chemical fate testing was the lack of definitive data to characterize the effects of concern for TBBPA in the environment.

The ITC's rationale for ecological effects testing was: (1) TBBPA is highly toxic to fish under acute conditions; (2) there is a lack of acute data for invertebrates and algae; (3) TBBPA is expected to be chronically toxic to fish and aquatic invertebrates at very low concentrations (i.e., <0.10 mg/L), and (4) there is the potential for TBBPA to bioconcentrate based on its high log P value of 4.5.

No health effects tests were recommended by the ITC. According to the ITC, TBBPA has been found to have a low level of toxicity to animals by the oral and inhalation routes, microbial genotoxicity tests with TBBPA have been negative, and the potential for human exposure is low.

B. Test Rule Development Under TSCA

Under section 4(a) of TSCA, EPA shall by rule require testing of a chemical substance or mixture to develop appropriate test data if the Agency finds that:

> (A)(i) the manufacture, distribution in commerce, processing, use, or disposal of a chemical substance or mixture, or that any combination of such activities, may present an unreasonable risk of injury to health or the environment,
>
> (ii) there are insufficient data and experience upon which the effects of such manufacture, distribution in commerce, processing, use, or disposal of such substance or mixture or of any combination of such activities on health or the environment can reasonably be determined or predicted, and
>
> (iii) testing of such substance or mixture with respect to such effects is necessary to develop such data; or
>
> (B)(i) a chemical substance or mixture is or will be produced in substantial quantities, and (I) it enters or may reasonably be anticipated to enter the environment in substantial quantities or (II) there is or may be significant or substantial human exposure to such substance or mixture,
>
> (ii) there are insufficient data and experience upon which the effects of the manufacture, distribution in commerce, processing, use, or disposal of such substance or mixture or of any combination of such activities on health or the environment can reasonably be determined or predicted, and
>
> (iii) testing of such substance or mixture with respect to such effects is necessary to develop such data.

EPA uses a weight-of-evidence approach in making a section 4(a)(1)(A)(i) finding; both exposure and toxicity information are considered in determining whether available data support a finding that the chemical may present an unreasonable risk. For the finding under section 4(a)(1)(B)(i), EPA considers only production, exposure and release information to determine whether there is or may be substantial production and significant or substantial human exposure or substantial release to the environment. For the findings under section 4(a)(1) (A)(ii) and (B)(ii), EPA examines toxicity and fate studies to determine whether existing information is adequate to reasonably determine or predict the effects of human exposure to, or environmental release of, the chemical. In making the finding under section 4(a)(1) (A)(iii) or (B)(iii) that testing is necessary, EPA considers whether ongoing testing will satisfy the information needs for the chemical and whether testing which the Agency might require would be capable of developing the necessary information.

EPA's process for determining when these findings apply is described in detail in EPA's first and second proposed test rules as published in the **Federal Register** of July 18, 1980 (45 FR 48524) and June 5, 1981 (46 FR 30300). The section 4(a)(1)(A) findings are discussed at 45 FR 48524 and 46 FR

30300 and the section 4(a)(1)(B) findings are discussed at 46 FR 30300.

In evaluating the ITC's testing recommendations for TBBPA, EPA considered all available relevant information including the following: Information presented in the ITC's report recommending testing consideration and any public comments on the ITC's recommendations; production volume, use, exposure, and release information reported by manufacturers of TBBPA under the TSCA section 8(a) Preliminary Assessment Information Rule (40 CFR Part 712); health and safety studies submitted under the TSCA section 8(d) Health and Safety Data Reporting Rule (40 CFR Part 716) concerning TBBPA; and published and unpublished data available to the Agency. From its evaluation, as described in this proposed rule, EPA is proposing chemical fate and environmental effects testing requirements for TBBPA under section 4(a)(1)(A). By this action, EPA is responding to the ITC's designation of TBBPA for priority testing consideration.

II. Review of Available Data

A. Profile

TBBPA is a white, free-flowing or crystalline powder that is soluble in many organic solvents but has a low solubility in water (Refs. 1 and 2). The experimentally determined water solubility values for TBBPA at 15 °C, 25 °C, and 35 °C are 0.72 ppm, 4.16 ppm, and 1.77 ppm respectively (Ref. 3). At 25 °C, TBBPA has an estimated vapor pressure of 4.15×10^{-8} mm Hg and an estimated Henry's Law constant of 4.46×10^{-8} atm–m³/mole (Ref. 4). Its experimentally determined log octanol-water partition coefficient (K_{ow}) value is 4.5 (Ref. 5). The estimated log soil adsorption coefficient (K_{oc}) value is 4.29 (Ref. 4).

B. Production

TBBPA is manufactured by reacting gaseous bromine with bisphenol A in a low molecular weight solvent; it is then crystallized by adding water. The solvent can be an alcohol, aqueous acetic acid, a non-polar solvent, or a two-phase water-organic system (Ref. 6). Ethyl Corporation uses a continuous batch operation which involves a closed vessel procedure during the reaction and drying cycles (Ref. 2).

TBBPA is produced domestically by two corporations, Ethyl Corporation and Great Lakes Chemical Corporation, with a combined production capacity of 85 million pounds per year (Ref. 7). The actual production volumes for 1984 have been submitted by the two companies under section 8(a) of TSCA as confidential business information (CBI). Importation of the compound from 1979 to 1983 ranged from approximately 1.3 to 2.6 million pounds per year (Ref. 8). At the present time, Ameribrom appears to be the only importer of TBBPA (Ref. 9).

C. Uses

TBBPA is used primarily as a reactive flame retardant and to a lesser extent as an additive flame retardant. In general, when used as a reactive flame retardant, TBBPA reacts chemically with other compounds to form a polymer, leaving little opportunity for the TBBPA to be released once it has been incorporated into the polymer. TBBPA is used as a reactive flame retardant in the manufacture of epoxy resins, polycarbonates, and unsaturated polyesters (Refs. 1 and 2). A principal use of TBBPA epoxy resins, where the TBBPA content may be 34 percent, is in printed circuit boards (Ref. 10). Polycarbonates are used in communication and electronics equipment, lighting fixtures and signs (Ref. 11). Unsaturated polyesters are used for making simulated marble, floor tiles, bowling balls, furniture parts, sewer pipe coupling compound, automotive patching compounds, buttons, and for encapsulating electrical devices (Ref. 12).

TBBPA is coated on or mixed with other compounds when used as an additive flame retardant. Approximately six to eight million pounds of TBBPA is believed to be used annually as an additive flame retardant (Ref. 7). Because TBBPA does not chemically react with the other compounds when used in this manner, it may leach out of the finished products when they are in use and/or following disposal of these products. No information is available on whether TBBPA leaches out of products or the extent of leaching. Ethyl Corporation, in response to Agency questions concerned with leaching of TBBPA, submitted the statements that no leaching of TBBPA is expected for products containing TBBPA and that there is no consumer exposure from using products containing TBBPA (Ref. 13). TBBPA is used as an additive in ABS (acrylonitrile-butadiene-styrene) thermoplastics, in polystyrene, and in phenolic resins (Ref. 2). Recommended starting levels of TBBPA in ABS (medium to high impact) are 17.6 to 22 percent and 14 percent in high impact polystyrene (Ref. 14). ABS resins are used in automotive parts, pipe and fittings, refrigerators, other appliances, business machines, and telephones (Ref. 15). Polystyrene is used in packaging, consumer products, disposables, electrical and electronics equipment, furniture, and building and construction materials (Ref. 16). TBBPA is also reportedly used as a flame retardant in paper and textile applications, and as a plasticizer (Refs. 17 and 18).

D. Release and Exposure

TBBPA is expected to enter the environment mainly as a result of wastewater released from processes where TBBPA is made and used. A limited amount of TBBPA is likely to enter the environment as a result of its release into the atmosphere from activity in the packaging area of plants and from the use of TBBPA as an additive flame retardant. Release levels have been submitted by the manufacturers of TBBPA under section 8(a) of TSCA as confidential business information (CBI).

According to one process described for manufacturing TBBPA, bisphenol A is brominated in an anhydrous methanol solvent and then crystallized by adding water. The crystals are filtered, washed, and dried. Wastewater generated from the crystallization and washing steps may be treated to recover the excess bromide and solvent. The methanol solvent may be recovered by neutralizing the waste stream and then distilling. The still bottoms contain polyhalongenated phenolics such as TBBPA. An oxidizing agent can be used to initiate a polymerization reaction among polyhalogenated phenolic compounds present in the waste liquid. The polymerized product settles rapidly in the waste liquid and may be disposed of in a sanitary landfill. However, the efficiency of this process to polymerize the polyhalogenated phenolics and the precent of the total wastewater being treated in this manner has not been reported (Ref. 6).

Evidence of TBBPA exposure to the environment has been found in sediment, soil, and air samples collected in the vicinity of a company manufacturing the compound. The concentrations reported at these sites were from 0.03 to 330 ppm in the sediments, 2 to 150 ppm in the soil, and 28 to 1800 ng/m³ in the air (Ref. 19). Although levels of TBBPA as high as 150 ppm in the soil have been reported, on the basis of sampling locations information provided in the monitoring study, it is very likely that the presence of TBBPA in the soil is limited to the area surrounding the production facility and may result from releases during packaging and loading operations. Therefore, it does not appear to the Agency at this time that terrestrial exposure to TBBPA presents a concern.

E. Chemical Fate

Based on its high log K_{oc} and log K_{ow} values and low water solubility, TBBPA is expected to partition to compartments with high concentrations of organic matter or lipids. In water, TBBPA will partition to sediments or biological tissues; on land, it will partition to soils. Volatilization of TBBPA is expected to be fairly slow and partitioning from soil and water to air is not expected to be important because of the low estimated values for the vapor pressure and the Henry's law constant (Refs. 4, 9 and 20).

The Environmental Partitioning Model (ENPART) and the Exposure Analysis Model (EXAMS 2) were used to estimate the relative partitioning of TBBPA between air, water, soil and sediment. The ENPART results show that the highest concentration of TBBPA will be in soil but the largest mass will be in water (this is due to the much greater volume of water in comparison to the volume of soil). Ambient monitoring data for TBBPA in the sediment are available. For a sediment concentration of 24 ppm, TBBPA concentrations in the water column are estimated to be 125 ppb by the EXAMS 2 model. Partitioning of TBBPA to the atmosphere will be insignificant. The estimated atmospheric half-life for TBBPA, using the Fate of Atmospheric Pollutants (FAP) model, is 1.79 days (Refs. 4 and 9).

The persistence of TBBPA trapped in soils, sediments and sludges is not well defined. One study from Japan classified TBBPA as not very biodegradable; however, no experimental details were available (Ref. 21). The ENPART estimate for 50 percent mass reduction of TBBPA present in the environment at steady state, after loading ceases, is 3 months (Ref. 4).

F. Environmental Effects

1. *Acute toxicity*—a. *Fish and aquatic invertebrates.* Static studies (96-hr) are available for bluegill sunfish (*Lepomis macrochirus*) and rainbow trout (*Salmo gairdneri*) using nominal concentrations of TBBPA (Ref. 22). The 96-hour LC_{50} values for bluegill sunfish and rainbow trout are reported to be 0.51 mg/L and 0.40 mg/L respectively. These values indicate a high order of acute toxicity towards freshwater fish. The no-effect levels (based on the lack of abnormal behavioral observations) were reported as 0.18 mg/L for bluegill and 0.10 mg/L for trout.

Static acute toxicity of TBBPA to *Daphnia magna* has been investigated using a range of nominal test concentrations (Ref. 23). The 48-hour LC_{50} value for *Daphnia* is reported to be 0.96 mg/L. The no effect level (based on zero deaths) was observed to be <0.32 mg/L.

The static test conditions used for the above studies are satisfactory because TBBPA has an extremely low volatility and the biological loading in the test vessels is well below a maximum loading of 1.0 g/L recommended in EPA's TSCA test guidelines. Although the use of nominal concentrations may have actually underestimated the acute toxicity of TBBPA, the Agency believes that these data are adequate to reasonably predict the high acute toxicity of TBBPA towards the two freshwater fish (bluegill sunfish and rainbow trout) and *Daphnia*. However, when a high order of acute toxicity is demonstrated from initial static acute tests, as is the case of existing data on TBBPA, the Agency believes that further acute testing also appears to be indicated in alternate species for making a final assessment of the acute safety hazard.

b. *Marine algae.* Preliminary data for effects of TBBPA on growth of three species of marine unicellular algae in several different media were received from an EPA lab (Ref. 24). The 72-hour EC_{50} values of two species, *Skeletonema costatum* and *Thalassiosira pseudonana*, were, in most instances, well below 1 mg/L. The EC_{50} values of less than 1 mg/L indicate that TBBPA is highly toxic to these species. No EC_{50} values could be calculated for TBBPA when tested with *Chlorella*. The highest concentration, 1.5 mg/L, did not inhibit growth of *Chorella* by 50 percent in any medium.

2. *Chronic toxicity.* No information was found on the chronic toxicity of TBBPA to aquatic organisms. However, the available data on the compound's acute toxicity to aquatic organisms indicate that TBBPA is highly toxic under acute conditions. In the acute study with rainbow trout, fish mortality increased throughout the duration of the study suggesting that, if the study had continued, mortalities may have occurred at even lower concentrations. On the basis of this information and the reported high log k_{ow} value, TBBPA is expected to be chronically toxic to fish at very low concentrations.

3. *Bioconcentration.* No useful experimental data were located on the bioconcentration of TBBPA in aquatic organisms. Using the equation (log BCF=0.85 log P-0.70) developed by Veith (Ref. 25), the bioconcentration factor (BCF) for TBBPA in fish was estimated to be approximately 1,300. This estimate indicates that TBBPA may bioconcentrate to a significant degree.

III. Findings

EPA is basing its proposed chemical fate and environmental effects testing for TBBPA on the authority of section 4(a)(1)(A) of TSCA.

EPA finds that the release of TBBPA which likely results from its manufacture, processing, use and disposal may present an unreasonable risk of exposure and injury to the organisms in the environment, on the basis of information presented in Unit II above showing that TBBPA has the potential to be persistent, it may bioconcentrate, and it is highly toxic under acute conditions to aquatic organisms. Studies performed to determine acute toxicity of TBBPA to fish, *Daphnia*, and marine unicellular algae show that it is highly toxic (i.e., LC_{50} less than 1 mg/L or ppm). The reported high log k_{ow} of 4.5 and the high acute toxicity data reported for fish and *Daphnia* suggest that TBBPA can be expected to be chronically toxic to fish and aquatic invertebrates at very low concentrations. TBBPA concentrations up to 330 ppm in sediment samples have been detected in the vicinity of a company manufacturing the compound.

In addition, modeling indicates that TBBPA may be present in the water column in ppb levels, which could be of concern. The primary release of TBBPA to the environment is expected to be via wastewater generated from processes where TBBPA is made and used. In the aquatic environment, TBBPA partitions mainly to sediments. The Agency is particularly concerned with the effects of TBBPA on benthic organisms, i.e., organisms which remain in intimate contact with the sediments.

There is also the potential for TBBPA to bioconcentrate in aquatic organisms based on its estimated bioconcentration factor of 1,300.

The structure of TBBPA suggests by analogy to other polyhalogenated compounds that TBBPA might be persistent. As noted in Unit II.E., one study from Japan, with no experimental details provided, classified TBBPA as not very biodegradable.

Based on EPA's evaluation, the experimental data available for water solubility, log K_{ow}, and acute toxicity to marine unicellular algae appear to be adequate to reasonably determine or predict these characteristics for TBBPA. The log K_{ow} can be estimated reasonably well if the experimental value for the log K_{ow} is available. The Agency has further determined that data are inadequate to fully characterize the degradability of TBBPA present in soils, sediments, sludges, and water; toxicity

of TBBPA to microorganisms in activated sludge; toxicity of TBBPA to freshwater algae under acute conditions; chronic toxicity of TBBPA to fish and invertebrates and bioconcentration potential of TBBPA in fish and invertebrates. In addition, because acute toxicity values below 1 mg/L (ppm) have been found for the two fish (bluegill Sunfish and rainbow trout) and *Daphnia*, additional acute tests with alternate species of fish and invertebrates are required for making a final assessment of the acute hazard. Testing is necessary to develop these data.

IV. Proposed Rule

A. Proposed Testing and Test Standards

On the basis of the findings given in Unit III, EPA is proposing chemical fate and environmental effects testing for TBBPA. The tests are to be conducted in accordance with EPA's TSCA Good Laboratory Practice standards in 40 CFR Part 792 and specific TSCA test guidelines as enumerated in 40 CFR Parts 796 and 797, published in the Federal Register of September 27, 1985 (50 FR 39252), or other published test methods as specified in this test rule for TBBPA. Proposed revisions to the TSCA test guidelines were published in the Federal Register of January 14, 1986 (51 FR 1522); the Agency is proposing that these revisions be adopted in the test standards for TBBPA.

The chemical fate tests to be conducted for TBBPA are: (1) Biodegradability in water, using the eco-core method described by Bourquin *et al.* (Ref. 28); (2) the aerobic and anaerobic biodegradability in soil, using the guideline at 40 CFR 796.3400; and (3) the biodegradability in sludge systems, using the guideline at 40 CFR 796.3341.

Environmental effects tests to be conducted for TBBPA are: (1) The effect of test substance on activated sludge, using the guideline entitled "Activated Sludge, Respiration Inhibition Test" proposed at 40 CFR 795.170, and published with this rule. (2) The acute toxicity to freshwater alga, *Selenastrum capricornutum*, using the test guideline at 40 CFR 797.1050, and as modified under § 799.4000(d)(2)(i)(B). (3) The acute toxicity to the amphipod *Gammarus*, using the guideline at 40 CFR 797.1310. (4) The acute toxicity to *Pimephales promelas* (fathead minnow) in a flow-through system, using the guideline at 40 CFR 797.1400.

EPA is also proposing that: (5) The invertebrate *Daphnia* shall be tested in a flow-through system to determine the chronic toxicity of TBBPA using the guideline at 40 CFR 797.1330. (6) The testing for early life stage toxicity to fish be conducted in a flow-through system using the guideline at 40 CFR Part 795. The test species shall be fathead minnow (*Pimephales promelas*) if the 96-hour LC_{50} for fathead minnow is equal to or less than 0.40 mg/L; the test species shall be rainbow trout if the 96-hour LC_{50} for fathead minnow is greater than 0.40 mg/L.

EPA further proposes that: (7) A bioconcentration test in the fathead minnow (*Pimephales promelas*) be conducted using the guideline at 40 CFR 797.1520, and (8) a bioconcentration test in the oyster (*Crassostrea virginica*) be conducted using the guideline at 40 CFR 797.1830.

The Agency is proposing that the above referenced chemical fate and environmental effects test guidelines and modifications and other cited methods be considered the test standards for the purposes of the proposed testing for TBBPA. The TSCA test guidelines for chemical fate and aquatic toxicity testing specify generally accepted minimal conditions for determining chemical fate and aquatic animal toxicities for substances like TBBPA to which aquatic life is expected to be exposed.

The proposed eco-core method of Bourquin *et al.* (1977) for testing the biodegradability of TBBPA in water specifies generally accepted minimal conditions. The Agency believes that this test reflects the current state-of-the-art methodology for testing the fate of chemicals such as TBBPA in aquatic systems.

B. Test Substance

EPA is proposing that TBBPA of at least 99 percent purity be used as the test substance; EPA has specified a relatively pure substance for testing because the Agency is interested in evaluating the effects attributable to TBBPA itself. In a separate rulemaking, EPA is proposing to require testing and submission of data on the presence of dioxins and furans in TBBPA (50 FR 51794; December 19, 1985). If contamination of TBBPA with these substances is confirmed, the purity of the test substance for this test rule may need to be further defined to limit levels of contamination.

C. Persons Required to Test

Section 4(b)(3)(B) specifies that the activities for which the EPA makes section 4(a) findings (manufacture, processing, distribution, use and/or disposal) determine who bears the responsibility for testing. Manufacturers are required to test if the findings are based on manufacturing ("manufacture" is defined in section 3(7) of TSCA to include "import"). Processors are required to test if the findings are based on processing. Both manufacturers and processors are required to test if the findings are based on distribution, use, or disposal.

Because EPA has found that there are insufficient data and experience to reasonably determine or predict the effects of the manufacture, processing, use and disposal of TBBPA on the environment, EPA is proposing that persons who manufacture and/or process, or who intend to manufacture and/or process, TBBPA at any time from the effective date of the final test rule to the end of the reimbursement period be subject to the testing requirements contained in this proposed rule. The end of the reimbursement period will be 5 years after the last final report is submitted or an amount of time after the submission of the last final report required under the test rule equal to that which was required to develop data, if more than 5 years.

Because TSCA contains provisions to avoid duplicative testing, not every person subject to this rule must individually conduct testing. Section 4(b)(3)(A) of TSCA provides that EPA may permit two or more manufacturers or processors who are subject to the rule to designate one such person or a qualified third person to conduct the tests and submit data on their behalf. Section 4(c) provides that any person required to test may apply to EPA for an exemption from the requirement. EPA promulgated procedures for applying for TSCA section 4(c) exemptions in 40 CFR Part 790.

Manufacturers (including importers) subject to this rule are required to submit either a letter of intent to perform testing or an exemption application within 30 days after the effective date of the final test rule. The required procedures for submitting such letters and applications are described in 40 CFR Part 790.

Processors subject to this rule, unless they are also manufacturers, will not be required to submit letters of intent or exemption applications, or to conduct testing unless manufacturers fail to submit notices of intent to test or later fail to sponsor the required tests. The Agency expects that the manufacturers will pass an appropriate portion of the costs of testing on to processors through the pricing of their products or reimbursement mechanisms. If manufacturers perform all the required tests, processors will be granted exemptions automatically. If manufacturers fail to submit notices of

intent to test or fail to sponsor all the required tests, the Agency will publish a separate notice in the Federal Register to notify processors to respond; this procedure is described in 40 CFR Part 790.

EPA is not proposing to require the submission of equivalence data as a condition for exemption from the proposed testing for TBBPA. As noted in Unit IV.B, EPA is interested in evaluating the effects attributable to TBBPA itself and has specified a highly pure substance for testing.

Manufacturers and processors who are subject to this test rule must comply with the test rule development and exemption procedures in 40 CFR Part 790 for single-phase rulemaking.

D. Reporting Requirements

EPA is proposing that all data developed under this rule be reported in accordance with its TCSA Good Laboratory Practice (GLP) standards which appear in 40 CFR Part 792.

In accordance with 40 CFR Part 790 under single-phase rulemaking procedures, test sponsors are required to submit individual study plans at least 45 days prior to the initiation of each study.

EPA is required by TSCA section 4(b)(1)(C) to specify the time period during which persons subject to a test rule must submit test data. The Agency is proposing specific reporting requirements for each of the proposed test standards as follows:

1. The biodegradation tests, the test for toxicity to microorganisms in activated sludge, the acute toxicity tests in fresh water algae, fish, and invertebrates, and the bioconcentration tests in fish and invertebrates shall be completed, and the final reports submitted to EPA within 1 year of the effective date of the final test rule. Quarterly progress reports shall be required.

2. The early life stage toxicity test in aquatic vertebrates and a chronic toxicity test in invertebrates shall be completed, and the final reports submitted to EPA within 2 years of the effective date of the final test rule. Quarterly progress reports shall be required.

TSCA section 14(b) governs Agency disclosure of all test data submitted pursuant to section 4 of TSCA. Upon receipt of data required by this rule, the Agency will publish a notice of receipt in the Federal Register as required by section 4(d).

Persons who export a chemical substance or mixture which is subject to a section 4 test rule are subject to the export reporting requirements of section 12(b) of TSCA. Final regulations interpreting the requirements of section 12(b) are in 40 CFR Part 707. In brief, as of the effective date of the final test rule, an exporter of TBBPA must report to EPA the first annual export or intended export of TBBPA to any one country. EPA will notify the foreign country concerning the test rule for the chemical.

E. Enforcement Provisions

The Agency considers failure to comply with any aspect of a section 4 rule to be a violation of section 15 of TSCA. Section 15(1) of TSCA makes it unlawful for any person to fail or refuse to comply with any rule or order issued under section 4. Section 15(3) of TSCA makes it unlawful for any person to fail or refuse to: (1) Establish or maintain records, (2) submit reports, notices, or other information, or (3) permit access to or copying of records required by the Act or any regulation or rule issued under TSCA.

Additionally, TSCA section 15(4) makes it unlawful for any person to fail or refuse to permit entry or inspection as required by section 11. Section 11 applies to any "establishment, facility, or other premises in which chemical substances or mixtures are manufactured, processed, stored, or held before or after their distribution in commerce . . . ." The Agency considers a testing facility to be a place where the chemical is held or stored, and therefore, subject to inspection. Laboratory inspections and data audits will be conducted periodically in accordance with the authority and procedures outlined in TSCA section 11 by duly designated representatives of the EPA for purpose of determining compliance with any final rule for TBBPA. These inspections may be conducted for purposes which include verification that testing has begun, that schedules are being met, that reports accurately reflect the underlying raw data and interpretations and evaluations, and to determine compliance with TSCA GLP standards and the test standards established in the rule.

EPA's authority to inspect a testing facility also derives from section 4(b)(1) of the TSCA, which directs EPA to promulgate standards for the development of test data. These standards are defined in section 3(12)(B) of TSCA to include those requirements necessary to assure that data developed under testing rules are reliable and adequate, and to include such other requirements as are necessary to provide such assurance. The Agency maintains that laboratory inspections are necessary to provide this assurance.

Violators of TSCA are subject to criminal and civil liability. Persons who submit materially misleading or false information in connection with the requirement of any provision of this rule may be subject to penalties which may be calculated as if they never submitted their data. Under the penalty provisions of section 16 of TSCA, any person who violates section 15 could be subject to a civil penalty of up to $25,000 for each violation with each day of operation in violation constituting a separate violation. This provision would be applicable primarily to manufacturers that fail to submit a letter of intent or an exemption request and that continue manufacturing after the deadlines for such submissions.

This provision would also apply to processors that fail to submit a letter of intent or an exemption application and continue processing after the Agency has notified them of their obligation to submit such documents (see 40 CFR 790.28(b)). Intentional violations could lead to the imposition of criminal penalties of up to $25,000 for each day of violation and imprisonment for up to 1 year. In determining the amount of penalty, EPA will take into account the seriousness of the violation and the degree of culpability of the violator as well as the other factors listed in section 16. Other remedies are available to EPA under section 17 of TSCA, such as seeking an injunction to restrain violations of TSCA section 4.

Individuals as well as corporations could be subject to enforcement actions. Section 15 and 16 of TSCA apply to "any person" who violates various provisions of TSCA. EPA may, at its discretion, proceed against individuals as well as companies themselves. In particular, this includes individuals who report false information or who cause it to be reported. In addition, the submission of false, fictitious, or fraudulent statements is a violation under 18 U.S.C. 1001.

V. Issues for Comment

This proposed rule specifies TSCA test guidelines and independent, published test methods as the test standards for chemical fate and environmental effects. The Agency is soliciting comments as to whether the chemical fate and environmental effects test guidelines and the independent methods are appropriate and applicable for the testing of TBBPA. Also regarding the testing of TBBPA, the Agency requests comments on:

1. The availability of appropriate test methods and facilities for testing the toxicity of this chemical to benthic organisms (i.e. organisms which remain

in intimate contact with the sediment). Because TBBPA is expected to partition strongly to sediment, the Agency believes that determining the toxicity of TBBPA to benthic organisms is important in characterizing the environmental effects of aquatic releases of TBBPA. The Agency believes that sediment bioassay methods using freshwater invertebrates, such as those published by Nebeker *et al.* (Ref. 27) and Adams *et al.* (Ref. 28) or, as an alternative, relevant microcosm test protocols (Refs. 29 and 30) may be useful for characterizing the effects of TBBPA on benthic organisms. The Agency is requesting comments on the effectiveness and availability of these or other methods and which, if any, would be most appropriate for testing of TBBPA. If the comments indicate the appropriate test methods and facilities are available, the Agency is proposing that it will include tests to determine the toxicity of TBBPA to benthic organisms in the final rule for TBBPA.

2. The adequacy of the proposed testing to characterize the environmental fate and environmental effects of TBBPA.

3. The reporting times for the identified chemical fate and environmental effects tests.

4. The purity of the test substance to be used in light of the possible presence of the dioxin/furan contamination.

5. Whether there are any other testing approaches which should be considered.

VI. Economic Analysis of Proposed Rule

To evaluate the potential economic impact of test rules, EPA has adopted a two-stage approach. All candidates for the test rules go through a Level I analysis. This consists of evaluating each chemical or chemical group on four principal market characteristics: (1) Demand sensitivity, (2) cost characteristics, (3) industry structure, and (4) market expectations. The results of the Level I analysis, along with the consideration of the costs of the required tests, indicate whether the possibility of a significant adverse economic impact exists. Where the indication is negative, no further economic analysis is done for the chemical substance or group. However, for those chemical substances or groups where the Level I analysis indicates a potential for significant economic impact, a more comprehensive and detailed analysis is conducted. This Level II analysis attempts to predict more precisely the magnitude of the expected impact.

Total testing costs for the proposed rule for TBBPA are estimated to range from $59,520 to $144,580. This estimate includes the costs for both the required minimum series of tests as well as any conditional ones. The annualized test costs (using a cost of capital of 25 percent over a period of 15 years) range from $15,400 to $37,500. Based on an estimated production volume range of 56.6 million pounds to 83.7 million pounds the unit test costs range from 0.026 to 0.063 cents per pound. In relation to the current list price of $1.15 per pound (99 percent purity) of TBBPA, these costs are equivalent to 0.02 to 0.05 percent of price.

Based on these costs and market characteristics of TBBPA, the economic analysis indicates that the potential for significant adverse economic impact as a result of this test rule is low. This conclusion is based on the following observations: (1) The annual unit cost of the testing required in this rule is very low; and (2) the market expectations for TBBPA are optimistic.

Refer to the economic analysis which is contained in the public record for this rulemaking for a complete discussion of test cost estimation and potential for economic impact resulting from these costs.

VII. Public Meetings

If persons indicate to EPA that they wish to present oral comments on this proposed rule to EPA officials who are directly responsible for developing the rule and supporting analyses, EPA will hold a public meeting subsequent to the close of the public comment period in Washington, DC. Persons who wish to attend or to present comments at the meeting should call the TSCA Assistance Office (TAO): Toll Free: (800-424-9065); In Washington, DC: (554-1404); Outside the U.S.A. (Operator—202-554-1404), by June 30, 1986. A meeting will not be held if members of the public do not indicate they they wish to make oral presentation. While the meeting will be open to the public, active participation will be limited to those persons who arranged to present comments and to designated EPA participants. Attendees should call the TAO before making travel plans to verify whether a meeting will be held.

Should a meeting be held, the Agency will transcribe the meeting and include the written transcript in the public record. Participants are invited, but not required, to submit copies of their statements prior to or on the day of the meeting. All such written materials will become part of EPA's record for this rulemaking.

VIII. Availability of Test Facilities and Personnel

Section 4(b)(1) of TSCA requires EPA to consider "the reasonably foreseeable availability of the facilities and personnel needed to perform the testing required under the rule." Therefore, EPA conducted a study to assess the availability of test facilities and personnel to handle the additional demand for testing services created by section 4 test rules. Copies of the study, Chemical Testing Industry: Profile of Toxicological Testing, can be obtained through the NTIS (PB 82-140773). On the basis of this study, the Agency believes that there will be available test facilities and personnel to perform the testing in this proposed rule.

IX. Public Record

EPA has established a record for this rulemaking, (docket number OPTS-42083). This record contains the basic information considered by the Agency in developing this proposal and appropriate Federal Register notices.

This record includes the following information:

A. Supporting Documentation

(1) Federal Register notices pertaining to this rule consisting of:

(a) Notice containing the ITC designation of TBBPA to the Priority List (50 FR 20930; May 21, 1985).

(b) Rules requiring TSCA section 8(a) and 8(d) reporting on TBBPA (50 FR 20910; May 21, 1985).

(c) TSCA test guidelines cited as test standards for this rule.

(d) Notice containing revision of TSCA test guidelines cited as test standards for this rule.

(2) Communications before proposal consisting of:

(a) Written public comments and letters.

(b) Contact reports of telephone conversations.

(c) Meeting summaries.

(3) Reports—published and unpublished factual materials.

Confidential Business Information (CBI), while part of the record, is not available for public review. A public version of the record, from which CBI has been deleted, is available for inspection in the OPTS Reading Rm. E–107, 401 M St., SW., Washington, D.C., from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays. The Agency will supplement this record periodically with additional relevant information received.

X. Other Regulatory Requirements

A. Executive Order 12291

Under Executive Order 12291, EPA must judge whether a regulation is "Major" and therefore subject to the requirement of a Regulatory Impact Analysis. EPA has determined that this test rule is not major because it does not meet any of the criteria set forth in section 1(b) of the Order, i.e., it will not have any annual effect on the economy of at least $100 million, will not cause a major increase in prices, and will not have a significant adverse effect on competition or the ability of U.S. enterprise to compete with foreign enterprises.

This proposed regulation was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291. Any written comments from OMB to EPA, and any EPA response to those comments, are included in the rulemaking record.

B. Regulatory Flexibility Act

Under the Regulatory Flexibility Act (15 U.S.C. 601 *et seq.*, Pub. L. 96–354, September 19, 1980), EPA is certifying that this test rule, if promulgated, will not have a significant impact on a substantial number of small businesses because: (1) There are no known small manufacturers, (2) any small processors are not expected to perform testing themselves or to participate in the organization of the testing effort, (3) they will experience only very minor cost in securing exemption from testing requirements, and (4) they are unlikely to be affected by reimbursement requirements.

C. Paperwork Reduction Act

The information collection requirements contained in this rule have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, and have been assigned OMB number 2070–0033. Comments on these requirements should be submitted to the Office of Information and Regulatory Affairs; OMB; 726 Jackson Place, NW., Washington, DC 20503 marked "Attention: Desk Officer for EPA." The final rule package will respond to any OMB or public comments on the information collection requirements.

List of Subjects in 40 CFR Parts 795 and 799

Testing, Environmental protection, Hazardous substances, Chemicals,

Environmental effects, Recordkeeping and reporting requirements.

Dated: May 2, 1986.

Victor J. Kimm,

Acting Assistant Administrator for Pesticides and Toxic Substances.

PART 795—[AMENDED]

Therefore, it is proposed that 40 CFR Chapter I be amended as follows:

1. In proposed Part 795:

a. The authority citation of Part 795 continues to read as follows:

Authority: 15 U.S.C. 2603.

b. By adding § 795.170 to read as follows:

§ 795.170 Activated sludge, respiration inhibition test modified test for chemical substances that have low water solubility.

(a) *Introductory information.*—(1) *Prerequisites.*

(i) Water solubility.

(ii) Vapor pressure.

(2) *Guidance information.* (i) Information on the structural formula of the test substance will be useful.

(ii) Purity of the test substance shall be specified in the test rule in 40 CFR Part 798.

(3) *Recommendation.* Activated sludge may contain potentially pathogenic organisms and should be handled with care.

(4) *Standard documents.* This test guideline has been based on the references in (d) (1) thru (6) of this section.

(b) *Method*—(1) *Introduction, purpose, scope, relevance, application and limits of test.* (i) *Introduction.* (A) The method described in this test guideline assesses the effect of a test substance on microorganisms by measuring the respiration rate under defined conditions in the presence of different concentrations of the test substance. The method is based on that described by the Ecological and Toxicological Association of the Dyestuffs Manufacturing Industry, in which activated sludge obtained from a sewage treatment plant is used as the microbial source.

(B) The purpose of this test guideline is to provide a rapid screening method whereby substances which may adversely affect aerobic microbial treatment plants can be identified and to indicate suitable non-inhibitory concentrations of test substances to be used in biodegradability tests.

(C) A range-finding test may precede a definitive test. It provides information about the range of concentrations to be used in the main test.

(D) Two controls without test substance are included in the test design, one at the start and the other at the end of the test series. Each batch of activated sludge should also be checked using a reference substance.

(ii) *Definitions*—(A) *Respiration rate.* The oxygen consumption of aerobic sludge or wastewater microorganisms, generally expressed as mg O_2 per liter per hour.

(B) *Effective concentration* (EC_{xx}). In this test guideline, the concentration of the test substance at which the respiration rate is 50 percent of that shown by the control under conditions in this guideline.

(iii) *Reference substances.* 3,5-dichlorophenol (a known inhibitor of respiration) shall be used as a reference substance and tested for EC_{50} on each batch of activated sludge as a means of checking that the sensitivity of the sludge is not abnormal.

(iv) *Principal of the test method.* The respiration rate of an activated sludge fed with a standard amount of synthetic sewage feed is measured after a contact time of 30 minutes or 3 hours, or both. The respiration rate of the same activated sludge in the presence of various concentrations of the test substance under otherwise identical conditions is also measured. The inhibitory effect of the test substance at a particular concentration is expressed as a percentage of the mean respiration rates of two controls. An EC_{50} value is calculated from determinations at different concentrations.

(v) *Conditions for the validity of the test.* (A) The test results are valid if the two control respiration rates are within 15 percent of each other.

(B) The EC_{50} (3 hours) of 3,5-dichlorophenol must be in the accepted range 5 to 30 mg/L.

(2) *Description of the test procedure*—(i) *Preparations*—(A) *Equipment.* Normal laboratory equipment and especially the following is necessary:

(*1*) Measuring apparatus (flat bottom flask, stirrer bar, magnetic stirrer, oxygen electrode, and recorder).

(*2*) Aeration device.

(*3*) pH-Electrode and measuring equipment.

(*4*) O_2-Electrode.

(B) *Solutions of the test substance.* (*1*) Solutions of the test substance are freshly prepared at the start of the study using a stock solution. A stock solution concentration of 0.5 g/L is appropriate if the procedure recommended below is followed. [Note: A solution of 3,5-dichlorophenol can be conveniently prepared by dissolving 0.5 g 3,5-dichlorophenol in 10 ml of 1N NaOH, diluting to approximately 30 ml with distilled water, adding under stirring 1N H_2SO_4 to the point of incipient precipitation—and finally diluting the mixture to one liter with distilled water. The pH should then be in the range 7 to 8].

(*2*) If the test substance is not sufficiently soluble to allow preparation of a concentrated stock solution in water, it should be added directly to test vessels or, alternatively, as a concentrated stock solution in an organic solvent. Direct addition is recommended. If an organic solvent is used, the solvent must neither significantly inhibit nor contribute to respiration. Further, a control containing activated sludge and solvent but no test substance is required.

(C) *Test concentrations.* At least five concentrations, spaced by a constant factor preferably not exceeding 3.2, should be used.

(D) *Synthetic sewage feed.* (*1*) A synthetic sewage feed is made by dissolving the following amounts of substances in 1 liter of water:

(*i*) 16 g peptone.

(*ii*) 11 g meat extract.

(*iii*) 3 g urea.

(*iv*) 0.7 g NaCl.

(*v*) 0.4 g $CaCl_2.2\ H_2O$.

(*vi*) 0.2 g $MgSO_4.7\ H_2O$.

(*vii*) 2.8 g K_2HPO_4.

(*2*) This synthetic sewage is a 100-fold concentrate of that described in the OECD Technical Report "Proposed method for the determination of the biodegradability of surfactants used in synthetic detergents" June 11, 1976, with dipotassium hydrogen phosphate added.

(ii) *Test system.* Activated sludge from a sewage treatment plant is normally used as the microbial innoculum for the test. Where possible, activated sludge should be obtained from a sewage work treating predominantly domestic sewage. If this is not possible, the activated sludge may be obtained from sewage works treating predominantly industrial waste water but used only following deadaptation. Even so, results obtained with activated sludge from works treating industrial waste waters may be atypical. On return to the laboratory the sludge is washed, if necessary, with tap water or an isotonic solution. After centrifuging the supernatant is decanted. This procedure is repeated three times. A small amount of the washed sludge is weighed and dried. From this result the amount of wet sludge can be calculated which must be suspended in water in order to obtain an activated sludge with a mixed liquor suspended solids level of 4 g/L(±10 percent). This level gives a concentration of 1.6 g/L in the test medium if the procedure recommended below is followed. If the sludge cannot

be used on the day of collection, 50 ml synthetic sewage is added to each liter of the activated sludge prepared as described above; this is then aerated overnight at 20±2°C. It is then kept aerated for use during the day. Before use the pH is checked and buffered, if necessary to pH 6.0 to 8.0 using sodium bicarbonate solution. The mixed liquor suspended solids should be determined as described in the preceeding paragraph. If the same batch of sludge is required to be used on subsequent days (maximum 4 days), a further 50 ml of synthetic sewage feed is added at the end of each working day.

(iii) *Test conditions.* The following conditions apply to the test system.

(A) Duration/contact time: 30 minutes and/or 3 hours, during which aeration takes place.

(B) Vessels: Beakers are suitable.

(C) Water: Drinking water (dechlorinated if necessary).

(D) Air supply: Clean oil-free air. Air flow 0.5 to 1 liter/minute.

(E) Measuring apparatus: Flat bottom flask such as a BOD-flask.

(F) Oxygen meter: Polarographic oxygen electrode, connectable to a potentiometric recorder. (200 mv range).

(G) Nutrient solution: Synthetic sewage feed (see above).

(H) Test substance: The test solution is freshly prepared at the start of the test.

(I) Reference substance: e.g. 3,5-dichlorophenol (at least 3 concentrations).

(J) Controls: Innoculated sample without test substance.

(K) Temperature: 20± 2°C.

(iv) *Performance of the test.* A suggested experimental procedure which may be followed for both the test and reference substance for the 3-hour contact period is given below:

(A) Several vessels (e.g. 1-liter beakers) are used.

(B) At time "0", 16 ml of the synthetic sewage feed are made up to 300 ml with water. Two hundred ml of microbial innoculum are added and the total mixture (500 ml) poured into a first vessel (first control C_1). Aeration at 0.5 to 1 liter per minute is commenced using a Pasteurpipete as aeration device.

(C) (*1*) At time "15 min" (15 minutes is an arbitrary, but convenient, interval) the above is repeated, except that 100 ml of the test substance stock solution are added to the 16 ml of synthetic sewage before adding water to 300 ml and microbial innoculum to make a volume of 500 ml. This mixture is then poured into a second vessel and aerated as described in (B) above. This process is repeated at 15-minute intervals with different volumes of the test substance stock solution to give a series of vessels containing different concentrations of the test substance. Finally, a second control (C_2) is prepared.

(*2*) If the test substance is not sufficiently soluble to allow addition from a stock solution in water, the appropriate proportion of the 100 ml-volume of test substance stock solution referred to above is replaced with water. For example, if 10 ml of an insoluble liquid test substance or solvent containing test substance is added directly to the test vessels, 90 ml of water is added. If insoluble solid test substance is added to the test vessel, 100 ml of water is added. If test substance is added as a stock solution in an organic solvent, a third control, containing the appropriate amount of solvent plus water to a total of 100 ml, is required, in addition to the series of test vessels containing different concentrations of the test substances.

(D) After 3 hours the contents of the first vessel are poured into the measuring apparatus and the respiration rate is measured over a period of up to 10 minutes; the measuring can also be carried out directly in the vessel.

(E) This determination is repeated on the contents of each vessel at 15-minute intervals, in such a way that the contact time in each vessel is three hours.

(*1*) The reference substance is tested on each batch of microbial innoculum in the same way. A different regime (e.g. more than one oxygen meter) will be necessary when measurements are to be made after 30 minutes of contact.

(*2*) If measurement of the chemical oxygen consumption is required, further vessels are prepared containing test substance, synthetic sewage feed and water, but no activated sludge.

(v) *Observations.* Oxygen consumption is measured and recorded after an aeration time of 30 minutes and/or 3 hours contact time.

(c) *Data and reporting*—(1) *Treatment of results.* (i) The respiration rate is calculated from the recorder trace as mg O_2/L.h between approximately 6.5 mg O_2/L and 2.5 mg O_2/L, or over a 10-minute period when the respiration rate is low. The portion of the respiration curve over which the respiration rate is measured should be linear. In order to calculate the inhibitory effect of a test substance at a particular concentration, the respiration rate is expressed as a percentage of the mean of the two control respiration rates:

Formula:

$$\left(1-\frac{2R_s}{Rc_1+Rc_2}\right)\cdot 100=\text{percent inhibition}$$

where

R_s = oxygen-consumption rate at tested concentration of test substance

R_{c1} = oxygen-consumption rate, control 1

R_{c2} = oxygen-consumption rate, control 2

(ii) If the respiration rates of the two controls are not within 15 percent of each other or the EC_{50} (3h) of the reference substance is not in the accepted range (5 to 30 mg/L for 3,5-dichlorophenol), the test is invalid and must be repeated. The percent inhibition is calculated at each test concentration using the formula shown above. The percent inhibition is plotted against concentration on log-normal (or log-probability) paper and an EC_{50} value derived. Ninety five percent confidence limits for the EC_{50} values can be determined using standard procedures. In view of the variability often observed in the results, it is recommended that the results be expressed in orders, of magnitude, e.g. less than 1, 1 to 10, 10 to 100, etc. (in mg/L).

(2) *Interpretation of results.* The EC_{50} value should be regarded merely as a guide to the likely toxicity of the test substance either to activated sludge sewage treatment or to wastewater microorganisms, since the complex interactions occurring in the environment cannot be accurately simulated in a laboratory test.

(3) *Test report.* The test report should include the following information.

(i) Test substance: Chemical identification data.

(ii) Test system: Source, concentration and any pretreatment of the activated sludge.

(iii) Test conditions: Test temperature, test duration, reference substance and its measured EC_{50}, and abiotic oxygen uptake, if any.

(iv) Results: All measured data; inhibition curve and method for calculation of EC_{50}; EC_{50}, and if possible, 95 percent confidence limits; EC_{20} and EC_{80}; all observations and any deviations from this test guideline which could have influenced the result.

PART 799—[AMENDED]

2. Part 799 is amended as follows:

a. The authority citation for Part 799 continues to read as follows:

Authority: 15 U.S.C. 2603, 2611, 2625.

b. By adding § 799.4000 to read as follows:

§ 799.4000 Tetrabromobisphenol A.

(a) *Identification of test substance.* (1) Tetrabromobisphenol A (TBBPA CAS No. 79–94–7) shall be tested in accordance with this section.

(2) Tetrabromobisphenol A of at least 99 percent purity shall be used as the test substance.

(b) *Persons required to submit study plans, conduct tests, and submit data.* All persons who manufacture (import) or process tetrabromobisphenol A, other than as an impurity, after the effective date of this rule (44 days after publication of the final rule in the **Federal Register**) to the end of the reimbursement period submit exemption applications, submit study plans, conduct tests, and submit data as specified in this section, Subpart A of this Part, Parts 790 and 792 of this chapter for single-phase rulemaking.

(c) *Chemical fate*—(1) *Biodegradability in water*—(i) *Required testing.* Biodegradation testing in water shall be conducted with TBBPA in accordance with the method described in Bourquin *et al.* "Developments in Industrial Microbiology" 18, 185–191, 1977. The method is available from the Office of the Federal Register Information Center, 11th and L St., NW., Washington, DC 20408, and in the EPA OPTS Reading Room, Rm. E–107, 401 M St., SW., Washington, DC 20460. This incorporation by reference was approved by the Director of the Federal Register on [date]. The method is incorporated as it exists on the effective date of this rule and a notice of any change to the method will be published in the **Federal Register.**

(ii) *Reporting requirements.* (A) The biodegradation test in water shall be completed and the final report submitted to the Agency within 1 year of the effective date of the final rule.

(B) Quarterly progress reports shall be submitted to the Agency beginning 90 days after the effective date of the final rule.

(2) *Inherent biodegradability in soil*—(i) *Required testing.* Inherent biodegradability in soil tests to assess aerobic and anaerobic biodegradability shall be conducted with TBBPA in accordance with § 796.3400 of this chapter.

(ii) *Reporting requirements.* (A) The inherent biodegradability in soil tests shall be completed and the final report submitted to the Agency within 1 year of the effective date of the final rule.

(B) Quarterly progress reports shall be submitted to the Agency beginning 90 days after the effective date of the final test rule.

(3) *Biodegradability in sludge systems*—(i) *Required testing.* Biodegradability tests in sludge systems shall be conducted with TBBPA in accordance with § 796.3341 of this chapter.

(ii) *Reporting requirements.* (A) The biodegradability tests in sludge systems shall be completed and the final results submitted to the Agency within 1 year of the effective date of the final rule.

(B) Quarterly progress reports shall be submitted to the Agency beginning 90 days after the effective date of the final test rule.

(d) *Environmental effects*—(1) *Respiration inhibition in activated sludge*—(i) *Required testing.* A respiration inhibition test in activated sludge system shall be conducted with TBBPA in accordance with the guideline specified in § 795.170 of this chapter.

(ii) *Reporting requirements.* (A) The respiration inhibition test in activated sludge system shall be completed and the final results submitted to the Agency within 1 year of the effective date of the final rule.

(B) Quarterly progress reports shall be submitted to the Agency beginning 90 days after the effective date of the final test rule.

(2) *Algal acute toxicity*—(i) *Required testing.* (A) Algal acute toxicity testing shall be conducted with TBBPA using *Selenastrum capricornutum* in accordance with § 797.1050 of this chapter and the modification specified in paragraph (d)(2)(i)(B) of this section.

(B) Modification. The requirements under § 797.1050 (c)(1)(ii) and (c)(6)(i)(B) of this chapter are modified to require that the agal cells at the end of 24, 48, and 72 hours also be enumerated and that the algal cells at the end of 24, 48, cells from the test solution be done using an ultrafiltration (e.g. 0.45 micrometer pore size) technique.

(ii) *Reporting requirements.* (A) The algal acute toxicity test shall be completed and the final report submitted to the Agency within 1 year of the effective date of the final rule.

(B) Quarterly progress reports shall be submitted to the Agency beginning 90 days after the effective date of the final test rule.

(3) *Gammarus acute toxicity*—(i) *Required testing. Gammarus* acute toxicity testing shall be conducted with TBBPA using *G. lacustris, G. fasciatus,* or *G. pseudolimnaeous* in accordance with § 797.1310 of this chapter.

(ii) *Reporting requirements.* (A) The *Gammarus* acute toxicity test shall be completed and the final report submitted to the Agency within 1 year of the effective date of the final rule.

(B) Quarterly progress reports shall be submitted to the Agency beginning 90 days after the effective date of the final test rule.

(4) *Fish acute toxicity*—(i) *Required testing.* Fish acute toxicity testing shall be conducted with TBBPA using *Pimephales promelas* (fathead minnow) in accordance with § 797.1400 of this chapter.

(ii) *Reporting requirements.* (A) The fish acute toxicity test shall be completed and the final report submitted to the Agency within 1 year of the effective date of the final rule.

(B) Quarterly progress reports shall be submitted to the Agency beginning 90 days after the effective date of the final test rule.

(5) *Daphnid chronic toxicity*—(i) *Required testing.* Daphnid chronic toxicity testing shall be conducted with TBBPA using *Daphnia magna* or *D. pulex* in accordance with § 797.1330 of this chapter.

(ii) *Reporting requirements.* (A) The daphnid chronic toxicity test shall be completed and the final report submitted to the Agency within 2 years of the effective date of the final rule.

(B) Quarterly progress reports shall be submitted to the Agency beginning 90 days after the effective date of the final test rule.

(6) *Fish early life stage toxicity*—(i) *Required testing.* A fish early life stage toxicity test shall be conducted with TBBPA using fathead minnow (*Pimephales promelas*) if the 96-hour LC_{50} for fathead minnow conducted in accordance with paragraph (d)(4) of this section is equal to or less than 0.40 mg/L; the test species shall be rainbow trout if the 96-hour LC_{50} for fathead minnow is greater than 0.40 mg/L. The fish early life stage toxicity test shall be conducted in accordance with § 797.1600 of this chapter.

BEST COPY AVAILABLE

(ii) *Reporting requirements.* (A) The fish early life stage toxicity test shall be completed and the final report submitted to the Agency within 2 years of the effective date of the final rule.

(B) Quarterly progress reports shall be submitted to the Agency beginning 90 days after the effective date of the final test rule.

(7) *Bioconcentration in fish*—(i) *Required testing.* A bioconcentration test shall be conducted with TBBPA using *Pimephales promelas* (fathead minnow) in accordance with § 797.1520 of this chapter.

(ii) *Reporting requirements.* (A) The bioconcentration test in fish shall be completed and the final report submitted to the Agency within 1 year of the effective date of the final rule.

(B) Quarterly progress reports shall be submitted to the Agency beginning 90 days after the effective date of the final test rule.

(8) *Bioconcentration in oyster*—(i) *Required testing.* A bioconcentration test shall be conducted with TBBPA using *Crassostrea virginica* (oyster) in accordance with § 797.1830 of this chapter.

(ii) *Reporting requirements.* (A) The bioconcentration test in oyster shall be completed and the final report submitted to the Agnecy within one year of the effective date of the final rule.

(B) Quarterly progress reports shall be submitted to the Agency beginning 90 days after the effective date of the final test rule.

(Information collection requirements have been approved by the Office of Management and Budget under Control Number 2070-0033)

40 CFR Part 799

[OPTS-42080; FRL-3001-6]

Triethylene Glycol Monomethyl, Monethyl, and Monobutyl Ethers; Proposed Test Rule

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing that manufacturers and processors of triethylene glycol monomethyl ether (CAS No. 112-35-6), triethylene glycol monomethyl ether (CAS No. 112-50-5), and triethylene glyclo monobutyl ether (CAS No. 143-22-6) be required, under section 4 of the Toxic Substances Control Act (TSCA), to perform testing for these three chemicals for subchronic toxicity, developmental toxicity, neurotoxicity and developmental neurotoxicity, mutagenicity, reproductive toxicity, and oncogenicity. This is a two-stage rule. The subchronic toxicity, developmental toxicity and developmental neurotoxicity, the neurotoxicity and the lower-tier mutagenicity are in the first stage. Following the receipt of the first-stage data, EPA will review it and decide what further testing needs to be done in stage two. This proposed rule responds to the Interagency Testing Committee's (ITC's) designation of these three compounds for priority consideration for health effects testing.

DATES: Submit written comments on or before July 14, 1986. If persons request an opportunity to submit oral comment by June 30, 1986. EPA will hold a public meeting on this rule in Washington, DC. For further information on arranging to speak at the meeting see Unit VIII of this preamble.

ADDRESS: Submit written comments, identified by the document control number (OPTS-42080), in triplicate to: TSCA Public Information Office (TS-793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E-106, 401 M St., SW., Washington, DC 20460.

A public version of the administrative record supporting this action (with any confidential business information deleted) is available for inspection at the above address from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: Edward A. Klein, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Rm. E-543, 401 M St., SW., Wasington, DC 20460, Toll free: (800-424-9065); In Washington, DC: (554-1404); Outside the USA: (Operator—202-554-1404).

SUPPLEMENTARY INFORMATION: EPA is issuing a proposed test rule under section 4(a) of TSCA in response to the ITC's designation of triethylene glycol monomethyl, monoethyl, and monobutyl ether for health effects testing consideration.

I. Introduction

A. ITC Recommendation

TSCA (Pub. L. 94-469, 90 Stat. 2003 *et seq.*; 15 U.S.C. 2601 *et seq.*) established ITC under section 4(e) to recommend to EPA a list of chemicals to be considered for testing under section 4(a) of the Act.

ITC designated the three triethylene glycol ethers for priority testing consideration in its Sixteenth Report, published in the **Federal Register** of May 21, 1985 (50 FR 20930). ITC recommended pharmacokinetic and metabolic studies. Dependent upon the results of the pharmacokinetic and metabolic work, subchronic studies with emphasis on hematologic effects, as well as reproductive and developmental toxicity studies, should be performed. This document responds to ITC's designation.

B. Test Rule Development Under TSCA

Under section 4 (a) of TSCA, EPA shall by rule require testing of a chemical substance or mixture to develop appropriate test data if it finds that:

(A) (i) the manufacture, distribution in commerce, processing, use, or disposal of a chemical substance or mixture, or that any combination of such activities, may present an unreasonable risk of injury to health or the environment,

(ii) there are insufficient data and experience upon which the effects of such manufacture, distribution in commerce, processing, use, or disposal of such substance or mixture or of any combination of such activities on health or the environment can reasonably be determined or predicted, and

(iii) testing of such substance or mixture with respect to such effects is necessary to develop such data; or

(B) (i) a chemical substance or mixture is or will be produced in substantial quantities, and (I) it enters or may reasonably be anticipated to enter the environment in substantial quantities or (II) there is or may be significant or substantial human exposure to such substance or mixture,

(ii) there are insufficient data and experience upon which the effects of the manufacture, distribution in commerce, processing, use, or disposal of such substance or mixture or of any combination of such activities on health or the environment can reasonably be determined or predicted, and

(iii) testing of such substance or mixture with respect to such effects is necessary to develop such data.

In making section 4(a)(1)(A) findings, EPA considers both exposure and toxicity information to make the finding that the chemical may present an unreasonable risk. For the second finding under section 4(a)(1)(A), EPA examines toxicity studies to determine whether existing information is adequate to reasonably determine or predict the effects of human exposure to the chemical. In making the third finding that testing is necessary, EPA considers whether any ongoing testing will satisfy the information needs for the chemical and whether testing which the Agency might require would be capable of developing the necessary information.

EPA's approach to determining when these findings are appropriately made is described in detail in EPA's first and second proposed test rules as published in the **Federal Register** of July 18, 1980 (45 FR 48528) and June 5, 1981 (46 FR 30300).

For the finding under section 4(a)(1)(B)(i), EPA considers only production, exposure, and release information to determine if there is or may be substantial production and significant or substantial human exposure. For the findings under section 4(a)(1)(B)(ii), EPA examines toxicity and fate studies to determine if existing information is adequate to reasonably determine or predict the effects of human exposure to the chemical. In making the finding under section 4(a)(1)(B)(iii) that testing is necessary, EPA considers whether ongoing testing will satisfy the information needs for the chemical and whether testing which the Agency might require would be capable of developing the necessary information.

EPA's process for determining when these findings apply is described in detail in its second proposed test rule [See the **Federal Register** of June 5, 1981 (46 FR 30300)].

In evaluating ITC's testing recommendations for the three triethylene glycol ethers, EPA considered all available relevant information including the following: information presented in ITC's report recommending testing consideration; production volume, use, exposure, and release information reported by manufacturers of these compounds under TSCA section 8(a) Preliminary Assessment Information Rule (40 CFR Part 712); health and safety studies submitted under the TSCA section 8(d) Health and Safety Data Reporting Rule (40 CFR Part 716); and published and unpublished data available to the Agency. From its evaluation, as described in this proposed rule, EPA is proposing health effects testing requirements for triethylene glycol monomethyl, monoethyl, and monobutyl ethers under sections 4(a)(1)(A) and 4(a)(1)(B). By these actions, EPA is responding to ITC's designation of triethylene glycol monomethyl, monoethyl, and monobutyl; ethers for priority testing consideration.

II. Review of Available Data

A. Physicochemical Information

These three compounds are liquids, with very low estimated vapor pressures (Ref. 1).

Triethylene glycol monomethyl ether—2.90×10^{-3} mm Hg
Triethylene glycol monoethyl ether—2.90×10^{-3} mm Hg
Triethylene glycol monobutyl ether—2.50×10^{-3} mm Hg

B. Production and Use

These three chemicals are primarily co-produced during the manufacture of lower molecular weight glycol ethers. About 5 percent of the production is purified further for use as chemical intermediates, but the majority of production is sold in a technical grade for use as a diluent in brake fluids. The glycol ethers comprise 95–97 percent of the market for brake fluid diluents (Ecomomic Analysis Support Document). The International Trade Commission (1985) has estimated the 1984 production levels of these compounds to be as follows (Economic Analysis Support Document):

Triethylene glycol monomethyl ether—27 million lbs.
Triethylene glycol monoethyl ether—24 million lbs.
Triethylene glycol monobutyl ether—11 million lbs.

C. Exposure and Release

Preliminary data from the National Occupational Exposure Survey (NOES) conducted by the National Institute for Occupational Safety and Health (NIOSH) from 1980–1983 indicate that 248,333 workers, including 8,107 females, were potentially exposed to brake fluids in the workplace in 1980 (Ref. 2).

There are no data on levels of dermal exposure in the workplace or on release to the environment. However, the nature of brake system maintenance and repair suggests that complete exposure of both hands occurs regularly, even daily, for many professional mechanics. Furthermore, there is a potential for consumer exposure, since some individuals can be expected to add brake fluid or perform brake maintenance on their automobiles.

D. Health Effects

Acute toxicity tests have been done on all these chemicals by the oral, dermal and inhalation routes, although in different species. Oral and dermal median lethal doses (LD_{50}'s) for each compound are of the same order of magnitude, which indicates that the compound is dermally absorbed. While these studies differ in some respects from the corresponding TSCA test guidelines, EPA believes that the data are sufficient to predict the acute effects of these compounds, and that further acute studies need not be performed.

However, a complete health effects profile of these three triethylene glycol ethers is not established. Only triethylene glycol monoethyl ether has been tested in other than acute tests. Kondratyuk *et al.* (Ref. 3) gave a brief summary of the results of a 6-month gavage study in rats. Hypochromatic anemia, leucocytosis, eosinophilia, lymphocytopenia and monocytopenia, and liver and kidney dysfunction were seen at 0.775 and 7.75 mg/kg. A no-observed-effect level (NOEL) was seen at 0.0775 mg/kg. These data indicate a potential for chronic blood and organ effects for triethylene glycol monoethyl ether, as well as for the chemically related triethylene glycol monomethyl ether and triethylene glycol monobutyl ether, but the information available is insufficient for EPA to evaluate the possible risks to humans, as no specific histopathologic or biochemical data are provided.

Fetotoxicity and testicular atrophy have been noted with ethylene glycol monomethyl ether, a congener of triethylene glycol monomethyl ether (Ref. 4). Behavioral and neurochemical alterations have been seen in rats exposed *in utero* to the same chemical (Ref. 5), as well as encephalopathy in humans exposed in a work situation (Ref. 6). Another congener, diethylene glycol monobutyl ether, has given a positive response in the mammalian cells in culture gene mutation assay using mouse lymphoma cells (Ref. 7).

III. Findings

EPA is basing its proposed health effects testing of these glycol ethers on the authority of sections 4(a)(1)(A) and 4(a)(1)(B) of TSCA.

Under section 4(a)(1)(A) EPA finds that the use of the triethylene glycol ethers listed above may present an unreasonable risk of chronic toxicity based upon the chronic toxicity in the hematopoietic system and kidney and liver dysfunction seen with triethylene glycol monoethyl ether. The 4(a)(1)(A) findings for mutagenicity, developmental toxicity, neurotoxicity, developmental neurotoxicity and reproductive toxicity are based on positive results seen for related chemicals (Unit II.D).

Under section 4(a)(1)(B) of TSCA the Agency finds that triethylene glycol monomethyl, monoethyl, and monobutyl ethers are produced in substantial quantities and that there is substantial human exposure in the workplace as a result of the use of these substances in brake fluid.

The Agency also finds that the available data are insufficient to reasonably predict or determine the effects of the use of these compounds, and that testing is necessary to develop such data.

IV. Proposed Rule

A. Proposed Testing and Test Standards

The Agency is proposing that health effects testing be conducted on triethylene glycol monomethyl, monoethyl, and monobutyl ethers in accordance with specific guidelines set forth in Title 40 Part 798 published in the **Federal Register** of September 27, 1985 (50 FR 39252) as modified in the **Federal Register** of January 14, 1986 (51 FR 1522), as enumerated below. As all of these chemicals will be proposed for the same tests, the term "glycol ether" will refer to each of them as discussed below.

All the tests that can be performed by the dermal route are being proposed by that route because the expected human exposure is dermal. The rabbit has been proposed for the subchronic test because in studies done with related compounds, the rabbit was more sensitive to dermal exposure than the rat.

This proposed rule is a two-stage rule. The following tests will be incorporated in the first stage: subchronic toxicity, neurotoxicity, developmental toxicity and developmental neurotoxicity, and the lower-tier mutagenicity. The Agency will review all these data as received, decide which of the second-stage tests should be finalized, and publish a notice of that decision requesting public comment. EPA will hold a public meeting to discuss this decision if it is requested.

The second-stage tests may include the two-generation reproductive toxicity test, the heritable translocation test, the mouse specific locus test and the oncogenicity test.

All of the tests will be proposed at this time, but the final rule will include only the first-stage tests. The second-stage tests which EPA believes are needed following review of the first-stage tests will be made final following the public meeting and time for public comment.

Each glycol ether will be tested for subchronic toxicity, with special testing for liver dysfunction, kidney dysfunction, hematologic effects and reproductive effects. Exposure will be by the dermal route in the rabbit. Special organs of the reproductive tract to be weighed and evaluated are listed in § 799.4440. Urinalyses in all animals will be done before dosing begins, at day 30 and day 90 in order to examine kidney function. The details for the liver dysfunction tests and the special hematologic studies are given in § 799.4440. Subchronic dermal neurotoxicity studies will be performed in the rat: A functional observational battery (section 798.6050), motor activity (section 798.6200), and neuropathology (section 798.6400). These neurotoxicity tests may be combined, using 10 animals for each dose and sex.

To assess the potential for gene mutations, the Agency is proposing mutagenicity testing in the *Salmonella* reverse mutation assay as specified in § 798.5265 for all three glycol ethers. In each case, if the *Salmonella* result is negative, a mammalian cells in culture test shall be done (section 798.5300). If the mammalian cells in culture test is negative, no further gene mutation studies need be done.

If either the *Salmonella* or mammalian cells in culture test is non-negative, a *Drosophila* sex-linked recessive lethal test (section 798.5275) shall be performed for the chemical. If the sex-linked recessive lethal test is negative, no further gene mutation studies need be done. If the *Drosophila* test is positive, EPA will consider requiring a mouse visible specific locus test (section 798.5200) in the second-stage rule.

For testing for chromosomal aberrations, each of the glycol ethers shall undergo a tiered testing scheme. The first test is the *in vitro* cytogenetic chromosomal aberration test (section 798.5375). If this test is negative, the chemical shall be tested in the *in vivo* cytrogenetic assay (section 798.5385). If this test is also negative, no further testing for chromosomal effects need be done. If either the *in vitro* or *in vivo* test is non-negative for any chemical, then a dominant lethal study in the rat shall be performed (section 798.5450). If the dominant lethal study is negative, no further chromosomal aberration studies need be done, and if the dominant lethal test is positive, then EPA will consider requiring a mouse heritable translocation test (§ 798.5460) in the second stage final rule.

EPA is requiring developmental toxicity testing in the rabbit and the rat, according to § 798.4900. This study shall be by the dermal route of exposure. Another dermal rat developmental neurotoxicity study, according to § 795.250 shall be performed in which the offspring shall be allowed to go to parturition, and those offspring shall be evaluated for behavioral alterations at various stages following birth. The developmental neurotoxicity test shall be performed after the developmental toxicity study has been done in order to determine appropriate doses, i.e., the developmental neurotoxicity study shall be performed at doses lower than those

which induce severe teratogenic or fetal effects.

The Agency is proposing that an oral two-generation reproductive test (section 798.4700) be required in the rat if the results of gross or histopathologic evaluation of the reproductive tissue in male or female exposed rabbits from the subchronic exposure test show adverse effects. Following the completion of the subchronic study, a public review of the data will be held to determine if the Agency should promulgate a final rule requiring a two-generation study.

If either the Drosophila sex-linked recessive lethal or the dominant lethal test for any of these compounds is positive, a public program review will be held before the final tier testing for mutagenicity of that compound is required.

Oncogenicity studies (section 798.3300) for each of these three chemicals may be required in the mouse and rat by dermal absorption. EPA will review the mutagenicity data and all other available data related to oncogenicity and hold a public program review before publishing a final rule on oncogenicity.

B. Test Substance

EPA is proposing testing of the triethylene glycol ethers of at least 90-percent purity. The EPA believes that test materials of this purity are available at reasonable cost. The Agency has specified relatively pure substances for testing because it is interested in evaluating the effects attributable to the subject compounds themselves. This requirement would lessen the likelihood that any effects seen are due to impurities.

C. Persons Required to Test

Section 4(b)(3)(B) of TSCA specifies that the activities for which the Agency makes section 4(a) findings (manufacture, processing, distribution, use and/or disposal) determine who bears the responsibility for testing. Manufacturers are required to test if the findings are based on manufacturing, which includes production of these chemicals as a co-product ("manufacture" is defined in section 3(7) of TSCA to include "import"). Processors are required to test if the findings are based on processing. Both manufacturers and processors are required to test if the exposures causing the potential risk occur during use, distribution, or disposal.

Because EPA has found that existing data are inadequate to assess the health risks from the use of these compounds, the EPA is proposing that persons who manufacture and/or process, or who intend to manufacture and/or process, these glycol ethers at any time from the effective date of the final test rule to the end of the reimbursement period be subject to the testing requirements in this proposed rule. The end of the reimbursement period will be 5 years after the last final report is submitted or an amount of time equal to that which was required to develop data, if more than 5 years, after the submission of the last final report required under the test rule.

Because TSCA contains provisions to avoid duplicative testing, not every person subject to this rule must individually conduct testing. Section 4(b)(3)(A) of TSCA provides that EPA may permit two or more manufacturers or processors who are subject to the rule to designate one such person or a qualified third person to conduct the tests and submit data on their behalf. Section 4(c) provides that any person required to test may apply to EPA for an exemption from the requirement. EPA promulgated procedures for applying for TSCA section 4(c) exemptions in 40 CFR Part 790.

Manufacturers (including importers) subject to this rule are required to submit either a letter of intent to perform testing or an exemption application within 30 days after the effective date of the final test rule. The required procedures for submitting such letters and applications are described in 40 CFR Part 790.

Processors subject to this rule, unless they are also manufacturers, will not be required to submit letters of intent or exemption applications, or to conduct testing, unless manufacturers fail to submit notices of intent to test or later fail to sponsor the required tests. The Agency expects that the manufacturers will pass an appropriate portion of the costs of testing on to processors through the pricing of their products or reimbursement mechanisms. If manufacturers perform all the required tests, processors will be granted exemptions automatically. If manufacturers fail to submit notices of intent to test or fail to sponsor all the required tests, the Agency will publish a separate notice in the Federal Register to notify processors to respond; this procedure is described on 40 CFR Part 790.

EPA is not proposing to require the submission of equivalence data as a condition for exemption from the proposed testing for these glycol ethers. As noted in Unit IV.B. of this preamble, the EPA is interested in evaluating the effects attributable to the specified compounds and has proposed relatively pure substances for testing.

Manufacturers and processors subject to this test rule must comply with the test rule development and exemption procedures in 40 CFR Part 790 for single-phase rulemaking.

D. Reporting Requirements

EPA is proposing that all data developed under this rule be reported in accordance with its TSCA Good Laboratory Practice (GLP) standards, which appear in 40 CFR Part 792.

In accordance with 40 CFR Part 790 under single-phase rulemaking procedures, test sponsors are required to submit individual study plans at least 45 days before the start of each study.

EPA is required by TSCA section 4(b)(1)(C) to specify the time period during which persons subject to a test rule must submit test data. The Agency is proposing specific reporting requirements for each of the proposed tests as follows:

1. The subchronic toxicity and subchronic neurotoxicity tests shall be completed and the final results submitted to the Agency within 15 months of the effective date of the final test rule.

2. The lower-tier mutagenicity studies shall be completed and final results submitted to the Agency within the deadlines specified in the rule. These range from 4 months after the effective date of the final test rule for the *in vitro* cytogenetics assay to 24 months for the *Drosophila* sex-linked recessive lethal assay and the dominant lethal assay.

3. The upper-tier mutagenicity tests shall be completed and final results submitted to the Agency within 12 months of the effective date of a final test rule requiring these studies.

4. The developmental toxicity studies shall be completed and final results submitted to the Agency within 12 months of the effective date of the final test rule.The developmental neurotoxicity test shall be completed and final results submitted to the Agency within 24 months of the effective date of the final test rule.

5. The oncogenicity tests shall be completed and the final results submitted to the Agency within 53 months of the effective date of a final test rule requiring this study.

6. The two-generation reproductive study shall be completed and the final results submitted to the Agency within 29 months of the effective date of a final test rule requiring that study.

Progress reports on these tests will be required at 6-month intervals beginning 6 months from the effective date of the final rule requiring that study.

TSCA section 14(b) governs Agency disclosure of all test data submitted pursuant to section 4 of TSCA. Upon receipt of data required by this rule, the Agency will publish a notice of receipt in the Federal Register as required by section 4(d).

Persons who export a chemical substance or mixture which is subject to a section 4 test rule are subject to the export reporting requirements of section 12(b) of TSCA. Final regulations interpreting the requirements of section 12(b) are in 40 CFR Part 707. In brief, as of the effective date of this test rule, an exporter of any of the three triethylene glycol ethers referred to in this rule must report to EPA the first annual export or intended export of the compound to any one country. EPA will notify the foreign country about the test rule for the chemical.

E. Enforcement Provisions

The Agency considers failure to comply with any aspect of a section 4 rule to be a violation of section 15 of TSCA. Section 15(1) of TSCA makes it unlawful for any person to fail or refuse to comply with any rule or order issued under section 4. Section 15(3) of TSCA makes it unlawful for any person to fail or refuse to: (1) establish or maintain records (2) submit reports, notices, or other information, or (3) permit access to or copying of records required by the Act or any regulation or rule issued under TSCA.

Additionally, TSCA section 15(4) makes it unlawful for any person to fail or refuse to permit entry or inspection as required by section 11. Section 11 applies to any "establishment, facility, or other premises in which chemical substances or mixtures are manufactured, processed, stored, or held before or after their distribution in commerce * * *." The Agency considers a testing facility to be a place where the chemical is held or stored and, therefore, subject to inspection. Laboratory inspections and data audits will be conducted periodically in accordance with the authority and procedures outlined in TSCA section 11 by duly designated EPA representatives to determine compliance with any final rule for these glycol ethers. These inspections may be conducted for purposes which include verification that testing has begun, that schedules are being met, and that reports accurately reflect the underlying raw data and interpretations and evaluations to determine compliance with TSCA GLP standards and the test standards established in the rule.

EPA's authority to inspect a testing facility also derives from section 4(b)(1) of the TSCA, which directs EPA to promulgate standards for the development of test data. These standards are defined in section 3(12)(B) of TSCA to include those requirements necessary to assure that data developed under testing rules are reliable and adequate, and such other requirements as are necessary to provide such assurance. The Agency maintains that laboratory inspections are necessary to provide this assurance.

Violators of TSCA are subject to criminal and civil liability. Persons who submit materially misleading or false information in connection with the requirement of any provision of this rule may be subject to penalties which may be calculated as if they never submitted their data. Under the penalty provision of section 16 of TSCA, any person who violates section 15 could be subject to a civil penalty of up to $25,000 for each violation with each day of operation in violation constituting a separate violation. This provision would be applicable primarily to manufacturers or processors that fail to submit a letter of intent or an exemption request and that continue manufacturing or processing after the deadlines for such submissions. This provision would also apply to processors that fail to submit a letter of intent or an exemption application and continue processing after the Agency has notified them of their obligation to submit such documents (see 40 CFR 790.28(b)). Intentional violations could lead to theimposition of criminal penalties of up to $25,000 for each day of violation and imprisonment for up to 1 year. In determining the amount of penalty, EPA will take into account the seriousness of the violation and the degree of culpability of the violator as well as all the other factors listed in section 16. Other remedies are available to EPA under section 17 of TSCA, such as seeking an injunction to restrain violations of TSCA section 4.

Individuals as well as corporations could be subject to enforcement actions. Sections 15 and 16 of TSCA apply to "any person" who violates various provisions of TSCA. At its discretion, EPA may proceed against individuals as well as companies. In particular, this includes individuals who report false information or who cause it to be reported. In addition, the submission of false, fictitious, or fraudulent statements is a violation under 18 U.S.C.1001.

V. Issues for Comment

1. EPA is proposing the rat as the species in which to perform an oral two-generation reproductive toxicity study, although the normal human exposure is dermal. Should the reproductive study be done dermally? The rabbit has proved to be more sensitive to the effects of related glycol ethers than the rat when treated dermally. However, some persons feel that the rabbit is inappropriate for doing two-generation reproductive toxicity studies, either dermally or orally, because rabbits do not breed well in captivity. The Agency invites comment on these issues.

2. EPA is proposing that the *in vivo* cytogenetics and the dominant lethal mutagenicity tests be done by the dermal route because humans are expected to be exposed dermally. However, mutagenicity testing by the dermal route has little precedent. Furthermore, the mouse specific locus test and the heritable translocation test are being proposed by the oral route because no historical controls are available for the dermal route. The Agency invites comment on the desirability of dermal administration of the glycol ethers in the mutagenicity tests.

3. This test rule may result in three oncogenicity tests, one for each glycol ether being tested. Is it appropriate to consider in that case requiring oncogenicity testing for only the most potent chemical as determined from the first-stage mutagenicity testing to share the costs and reduce the economic impact, and regulating all three on that basis? Should this approach be considered for the other stage-two tests proposed in this rule?

4. Although the Level I economic analysis indicates a potential for significant economic impact (see Unit VI), EPA will not be performing a Level II economic analysis until after proposal of this rule. In order to refine the economic analysis, EPA requests comments on the economic impact on the manufacturers, processors and users.

5. EPA is proposing in this notice a two-stage test rule. The first stage will include the subchronic toxicity test, the developmental toxicity tests, neurotoxicity tests and the lower-tier mutagenicity tests. EPA will review the data after it is received, approximately two years from the final rule, and will then hold a public review meeting to discuss EPA's decisions as to which of the second-stage tests are necessary. The second-stage testing includes oncogenicity, mouse specific locus, heritable translocation and two-generation reproductive toxicity tests. The Agency believes that this approach provides needed flexibility in dealing with this group of chemicals and requests comment from interested parties.

6. EPA is proposing extensive testicular histopathology in the 90-day subchronic, because members of this class of compounds are known to cause testicular atrophy. The effects seen have been described in detail and the modifications proposed in this notice specifically address these concerns. However, the chemicals tested for reproductive toxicity have affected the female as much as the male in some cases. Because it is more difficult to predict reproductive effects from standardized subchronic histopathology on the female reproductive organs, EPA has not routinely used such testing to trigger a two-generation reproductive test. However, for these glycol ethers, EPA is considering requiring data on the estrous cycle in exposed animals by performing vaginal cytology over the last two weeks of exposure in the 90-day subchronic (Ref. 8), and more detailed histopathologic analysis of the ovary to evaluate oocyte toxicity (Ref. 9). The Agency requests comments on whether EPA should require the cyclicity study and the detailed female histopathology, and on the availability of test facilities with experience in such studies.

7. It has been suggested that the rats in the subchronic neurotoxicity tests also be examined for reproductive effects. Most of the available research has been performed in the rat, which would make the results easier to evaluate. In addition, EPA could require a satellite group for reproduction and fertility study. The Agency requests comments on the usefulness of these proposed protocol changes to predict reproductive toxicity.

8. EPA is proposing that the developmental neurotoxicity screen be performed using the dermal route of exposure. Because exposure of the dams will continue through lactation, dermal administration to the dams may result in the pups being exposed directly to the compound, either dermally or orally, instead of just indirectly through the milk. Should this study be performed using the oral route?

9. It has further been suggested that the oral route be used for all the tests. The reason for proposing the dermal route has been discussed earlier (see Unit IV.A. and Issues 1. and 2.). Dermal and oral disposition and metabolism tests may give the Agency the option to require oral testing and use the comparative oral and dermal chemical disposition and metabolism testing to estimate the appropriate dermal dose an individual might receive. Should the Agency evaluate this option?

10. If this option is considered, what are the pros and cons of using an *in vitro* percutaneous absorption study rather than an *in vivo*? Using an *in vitro* study would allow the tester to use human skin to measure absorption which may more effectively simulate human exposure. However, there is some indication that using skin from different individuals may result in widely varying figures, whereas using skin samples from an in-bred rat strain gives very reproducible results.

11. Recently the Chemical Manufacturers Association (CMA) informed EPA about three studies it is sponsoring on these triethylene glycol ethers, a 14-day dermal limit test, an *in vitro* percutaneous absorption study, and a Chernoff-Kavlock teratogenicity bioassay. The Agency is requesting comments on the use of the Chernoff-Kavlock assay specifically for the glycol ether chemical class as a screen for further testing needs, or as a replacement for one of the species in the standard developmental toxicity assay.

12. The Agency prefers to require testing of commercially available substances of the highest purity, rather than proposing that the manufacturers purify the compounds to a pre-designated level. However, if the impurities in the triethylene glycol ethers are the monoethylene congeners, which are known toxicants, it is possible that the perceived toxicity of the test substances might be increased. Should the EPA require in this case that a greater than commercial purity be achieved, or that no other glycol ethers be found as impurities in the test substance?

VI. Economic Analysis of Proposed Rule

To evaluate the potential economic impact of test rules, EPA has adopted a two-stage approach. All candidates for test rules go through a Level I analysis. This consists of evaluating each chemical or chemical group on four principal market characteristics: (1) Demand sensitivity, (2) cost characteristics, (3) industry structure, and (4) market expectations. The results of the Level I analysis, along with the consideration of the costs of the required tests, indicate whether the possibility of a significant adverse economic impact exists. Where the indication is negative, no further economic analysis is done for the chemical substance or group. However, for those chemical substances or groups where the Level I analysis indicates a potential for significant economic impact, a more comprehensive and detailed analysis is conducted. This Level II analysis attempts to predict more precisely the magnitude of the expected impact.

Total testing costs for the proposed rule for each triethylene glycol ether are estimated to range from $1,292,006 to $1,838,190. This estimate includes the costs for the required minimum series of tests as well as the conditional ones. The annualized test costs (using a cost of capital of 25 percent over a 15-year product life) range from $334,781 to $476,306 for each chemical. When broken down into the two stages proposed in this rule, the total testing costs for the first stage are estimated to range from $318,946 to $496,966, and the annualized test costs from $82,645 to $128,512. The total testing costs for the second stage are estimated to range from $973,060 to $1,342,230 and the annualized test costs from $252,136 to $347,794. Based on the estimated 1984 production volumes listed in Unit II.A., the unit test costs, the average selling price and the relative costs are listed below for each glycol ether.

For the first stage testing for each chemical:

Triethylene glycol monomethyl ether: unit test cost 0.48 cent per pound, average selling price $0.44 per pound, relative cost 1.08 percent of price.

Triethylene glycol monoethyl ether: unit test cost 0.54 cent per pound, average selling price $0.50 per pound, relative cost 1.07 percent of price.

Triethylene glycol monobutyl ether: unit test cost 1.2 cents per pound, average selling price $0.43 per pound, relative cost 2.72 percent of price.

For the total testing for each chemical:

Triethylene glycol monomethyl ether: unit test cost 1.8 cents per pound, average selling price $0.44 per pound, relative cost 4.01 percent of price.

Triethylene glycol monoethyl ether: unit test cost 2.0 cents per pound, average selling price $0.50 per pound, relative cost 3.97 percent of price.

Triethylene glycol monobutyl ether: unit test cost 4.3 cents per pound, average selling price $0.43 per pound, relative cost 10.07 percent of price.

The two-stage testing proposal has mitigated the economic impact for all three chemicals to some extent, so that a potential for significant economic impact is not expected for triethylene glycol monomethyl ether and triethylene glycol monoethyl ether for the first-stage testing. However, a Level II economic analysis will be done on triethylene glycol monobutyl ether after receiving comments on this proposal. Following completion of the first-stage testing, EPA will evaluate the results and decide whether the importance of the potential adverse health effects outweighs the possible adverse economic effects.

before requiring the second stage of testing.

VII. Availability of Test Facilities and Personnel

Section 4(b)(1) of TSCA requires EPA to consider "the reasonably foreseeable availability of the facilities and personnel needed to perform the testing required under the rule". Therefore, EPA conducted a study to assess the availability of test facilities and personnel to handle the additional demand for testing services created by section 4 test rules. Copies of the study, Chemical Testing Industry: Profile of Toxicological Testing, can be obtained through the NTIS (PB 82–140773). On the basis of this study, the Agency believes that there will be available test facilities and personnel to perform the testing specified in this proposed rule.

VIII. Public Meetings

If persons indicate to EPA that they wish to present oral comments on this proposed rule to EPA officials who are directly responsible for developing the rule and supporting analyses, EPA will hold a public meeting after the close of the public comment period in Washington, DC. Persons who wish to attend or to present comments at the meeting should call the TSCA Assistance Office (TAO): Toll Free: (800—424–9065); In Washington, DC: (554–1404); Outside the U.S.A. (Operator—202–554–1404), by June 30, 1986. A meeting will not be held if members of the public do not indicate that they wish to make oral presentations. While the meeting will be open to the public, active participation will be limited to those persons who arranged to present comments and to designated EPA participants. Attendees should call the TAO before making travel plans to verify whether a meeting will be held.

Should a meeting be held, the Agency will transcribe it and include the written transcript in the public record. Participants are invited, but not required, to submit copies of their statements prior to or on the day of the meeting. All such written materials will become part of EPA's record for this rulemaking.

IX. Public Record

EPA has established a record for this rulemaking, (docket number OPTS–42080). This record contains the basic information considered by the Agency in developing this proposal and appropriate Federal Register notices.

This record includes the following information:

A. Supporting Documentation

(1) Federal Register notices pertaining to this rule consisting of:

(a) Notice containing the ITC designation of triethylene glycol monomethyl, monoethyl, and monobutyl ethers.

(b) Rules requiring TSCA section 8 (a) and (d) reporting on triethylene glycol monomethyl, monoethyl, and monobutyl ethers.

(c) Notice of final rule on EPA's TSCA good laboratory practice standards (48 FR 53922; November 29, 1983).

(d) Notice of interim final rule on single-phase test rule development and exemption procedures (50 FR 20652; May 17, 1985).

(e) Notice of final rule on data reimbursement policy and procedures (48 FR 31786; July 11, 1983).

(2) Support document consisting of triethylene glycol monomethyl, monethyl, and monobutyl ethers' economic analysis.

(3) TSCA test guidelines and other test methodologies cited as test standards for this rule (50 FR 39252; September 27, 1985; 51 FR 1522; January 14, 1986.)

(4) Communications before proposal consisting of:

(a) Written public comments and letters.

(b) Contact reports of telephone conversations.

(c) Meeting summaries.

(5) Reports—published and unpublished factual materials.

Confidential Business Information (CBI), while part of the record, is not available for public review. A public version of the record, from which CBI has been deleted, is available for inspection in the OPTS Reading Rm. E–107, 401 M St., SW., Washington, DC, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

X. Other Regulatory Requirements

A. Executive Order 12291

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. EPA has determined that this test rule is not major because it does not meet any of the criteria set forth in section 1(b) of the Order, i.e., it will not have an annual effect on the economy of at least $100 million, will not cause a major increase in prices, and will not have a significant adverse effect on competition or the ability of U.S. enterprises to compete with foreign enterprises.

This proposed regulation was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291. Any written comments from OMB to EPA, and any EPA response to those comments, are included in the rulemaking record.

B. Regulatory Flexibility Act

Under the Regulatory Flexibility Act (15 U.S.C. 601 *et seq.*, Pub. L. 96–354, September 19, 1980), EPA is certifying that this test rule, if promulgated, will not have a significant impact on a substantial number of small businesses because: (1) They are not expected to perform testing themselves, or to participate in the organization of the testing effort; (2) they will experience only very minor costs in securing exemption from testing requirements; and (3) they are unlikely to be affected by reimbursement requirements.

C. Paperwork Reduction Act

The information collection requirements contained in this rule have been approved by OMB under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, and have been assigned OMB number 2070–

0033. Comments on these requirements should be submitted to the Office of Information and Regulatory Affairs of OMB; 726 Jackson Place, NW., Washington, DC 20503 marked "Attention: Desk Officer for the EPA". The final rule package will respond to any OMB or public comments on the information collection requirements.

List of Subjects in 40 CFR Parts 795 and 798

Testing, Environmental protection, Hazardous substances, Chemicals, Recordkeeping and reporting requirements.

Dated: May 2, 1986.

Victor J. Kimm,

Deputy Assistant Administrator for Pesticides and Toxic Substances.

Therefore, it is proposed that 40 CFR Chapter I be amended as follows:

PART 795—[AMENDED]

1. In proposed Part 795:

a. The authority citation continues to read as follows:

Authority: 15 U.S.C. 2603, 2611, 2625.

b. New § 795.250 is added to read as follows:

§ 795.250 Developmental neurotoxicity screen.

(a) *Purpose.* In the assessment and evaluation of the toxic characteristics of a chemical, it is important to determine when acceptable exposures in the adult may not be acceptable to a developing organism. This study is designed to provide information on the potential functional and morphologic hazards to the nervous system which may arise in the offspring from exposure of the mother during pregnancy and lactation. If effects are detected, further studies may be required to characterize and assess the risk(s).

(b) *Principle of the test method.* The test substance is administered to several groups of pregnant animals during gestation and lactation, one dose level being used per group. Offspring are randomly selected from within litters for neurotoxicity evaluation. The evaluation includes observation to detect gross neurologic and behavioral abnormalities, determination of motor activity, neurophathological evaluation, and brain weight. Measurements are carried out periodically during both postnatal development and adulthood.

(c) *Test procedures*—(1) *Animal selection*—(i) *Species and strain.* Testing shall be performed in the rat.

(ii) *Age.* Young adult animals (nulliparous females) shall be used.

(iii) *Sex.* Pregnant animals shall be used at each dose level.

(iv) *Number of animals.* A sufficient number of pregnant rats shall be exposed to ensure that an adequate number of offspring are produced for neurotoxicity evaluation. Sample size should be based on the test requiring the greatest number of offspring to achieve sensitivity. The test should be able to detect a 20 percent difference in the test group relative to the control group with 90 percent power at the 5 percent level. For most designs, calculations can be made according to Dixon and Massey (1957) under paragraph (e)(3) of this section, Neter and Wasserman (1974) under paragraph (e)(7) of this section, Sokal and Rohlf (1969) under paragraph (e)(8) of this section, or Jensen (1972) under paragraph (e)(5) of this section. The size of each litter shall be adjusted as outlined in the Toxic Substances Control Act (TSCA) reproduction and fertility effects guideline, 40 CFR 798.4700, as published in the Federal Register of September 27, 1985 (50 FR 39432). One male and one female shall be randomly selected from each litter for interim sacrifice at weaning. One male and one female shall be randomly selected from each litter for behavioral assessment and terminal sacrifice. It is also recommended that additional males and females randomly selected from each litter be assigned to different tasks to eliminate any confounding from multiple testing. If the behavioral tasks are conducted in the same animal, then the sequence should be locomotor activity, auditory startle, maze performance. A minimum of 1–2 days should separate each test.

(2) *Control group.* A concurrent control group shall be used. This group shall be a sham treated control group, or, if a vehicle is used in administering the test substance, a vehicle control group. Animals in the control group(s) shall be handled in an identical manner to test group animals. The vehicle shall neither be developmentally toxic nor have effects on reproduction.

(3) *Dose levels and dose selection.* (i) At least 3 dose levels with a control (vehicle control, if vehicle is used) shall be used.

(ii) If the substance has been shown to be developmentally toxic, either in a standard developmental toxicity study or a pilot study, the highest dose level shall be the maximum dose which will not induce *in utero* or neonatal death or malformations sufficient to preclude a meaningful evaluation of neurotoxicity.

(iii) In the absence of standard developmental toxicity, unless limited by the physicochemical nature or biological properties of the substance, the highest dose level shall induce some overt maternal toxicity such as a 20 percent reduction in weight gain throughout gestation and lactation.

(iv) The lowest dose level should not produce any grossly observable evidence of either maternal or developmental neurotoxicity.

(v) The intermediate dose(s) shall be equally spaced between the highest and lowest dose, on a log scale.

(4) *Dosing period.* Day 0 in the test is the day on which a vaginal plug and/or sperm are observed. The dose period shall cover the period from Day 6 of gestation through weaning (21 days).

(5) *Administration of test substance.* The test substance or vehicle is usually administered orally, by intubation, unless the chemical or physical characteristics of the test substance or pattern of human exposure suggest a more appropriate route of administration. The test substance shall be administered at the same time each day. The animals shall be weighed periodically and the dosage based on the most recent weight determination.

(6) *Observation of dams.* (i) A gross examination of the dams shall be made at least once each day, before daily treatment. The animals shall be observed each day by the same trained technician, who shall be blind with respect to the animals' treatment.

(ii) During the treatment and observation periods, cage-side observations shall include:

(A) Any unusual responses with respect to body position, activity level, coordination of movement, and gait.

(B) Any unusual or bizarre behavior, including, but not limited to, headflicking, headsearching, compulsive biting or licking, self-mutilation, circling, and walking backwards.

(C) The presence of:

(*1*) Convulsions;

(*2*) Tremors;

(*3*) Increased levels of lacrimation and/or red-colored tears;

(*4*) Increased levels of salivation;

(*5*) Piloerection;

(*6*) Pupillary dilation or constriction;

(*7*) Unusual respiration (shallow, labored, dyspneic, gasping, and retching) and/or mouth breathing;

(*8*) Diarrhea;

(*9*) Excessive or diminished urination;

(*10*) Vocalization.

(iii) Signs of toxicity shall be recorded as they are observed, including the time of onset, the degree and duration.

(iv) Animals shall be weighed at least weekly.

(7) *Study conduct.* (i) Physical landmarks of development. Offspring shall be weighed at birth, days 12, 17, 21, and biweekly thereafter. The age of the

following physical landmarks shall be determined:

(A) Eye opening;
(B) Incisor eruption;
(C) Vaginal opening;
(D) Testes descent.

General procedures for these determinations may be found in Adams *et al.* (1985) under paragraph (e)(1) of this section.

(ii) Motor activity shall be monitored on days 13, 17, 21, 30, 45, and 60. Motor activity must be monitored by an automated activity recording apparatus. The device used must be capable of detecting both increases and decreases in activity, i.e., baseline activity as measured by the device must not be so low as to preclude decreases nor so high as to preclude increases. Each device shall be tested by standard procedure to ensure, to the extent possible, reliability of operation across devices and across days for any one device. In addition, treatment groups must be balanced across devices.

(A) Each animal shall be tested individually. The test session shall be long enough for motor activity to approach asymptotic levels by the last 20 percent of the session for most treatments and animals' activity counts shall be collected in equal time periods of no greater than 10 minutes duration. All sessions shall have the same duration. Treatment groups shall be counter-balanced across test times.

(B) Efforts shall be made to ensure that variations in the test conditions are minimal and are not systematically related to treatment. Among the variables which can effect motor activity are sound level, size and shape of the test cage, temperature, relative humidity, lighting conditions, odors, use of home cage or novel test cage, and environmental distractions. Tests shall be executed by an appropriately trained individual.

(C) Additional information on the conduct of a motor activity study may be obtained in the TSCA motor activity guideline, 40 CFR 798.6200, as published in the **Federal Register** of September 27, 1985 (50 FR 39460).

(iii) Observation of offspring. (A) The offspring shall be examined cage-side daily for gross signs of mortality and morbidity.

(B) The offspring shall be examined outside the cage for gross signs of toxicity whenever they are weighed or removed from their cages for behavioral testing. As a minimum, the endpoints outlined in paragraph (6)(ii) shall be used.

(C) Any gross signs of toxicity in the offspring shall be recorded as they are observed, including the time of onset, the degree and duration.

(iv) An auditory startle habituation test shall be performed on the offspring on days 22 and 60. Details on the conduct of this testing may be obtained in Kellog *et al.* (1980) under paragraph (e)(6) of this section and Adams *et al.* (1985) under paragraph (e)(1) of this section.

(v) The Biel water maze paradigm shall be conducted beginning at approximately day 55 of age. Details on the conduct of this testing may be obtained in Vorhees *et al.* (1978) under paragraph (e)(11) of this section.

(8) *Post-mortem evaluation*—(i) *Age of animals.* One male and one female per litter shall be sacrificed at weaning and the remainder following the last behavioral measures. Both neuropathology and brain weight determinations shall be made at both time points.

(ii) *Neuropathology.* Details for the conduct of neuropathology may be obtained in 40 CFR 798.6400, as published in the **Federal Register** of September 27, 1985 (50 FR 39461). At least 6 offspring per dose group shall be randomly selected from each sacrificed group (weaning and adulthood) for neuropathologic evaluation. These animals shall be balanced across litters and equal numbers of males and females shall be used. The remaining sacrificed animals shall be used to determine brain weight. Animals shall be perfused *in situ* by a generally recognized technique. After perfusion, the brain and spinal cord shall be removed and gross abnormalities noted. Cross-sections of the following areas shall be examined: The forebrain, the center of the cerebrum and midbrain, the cerebellum and pons, and the medulla oblongata; the spinal cord at cervical and lumbar swelling; Gasserian ganglia, dorsal root ganglia, dorsal and vertral root fibers, proximal sciatic nerve (mid-thigh and sciatic notch), sural nerve (at knee), and tibial nerve (at knee). Tissue samples from both the central and peripheral nervous system shall be further immersion-fixed and stored in appropriate fixative for further examination. After dehydration, tissue specimens shall be cleared with xylene and embedded in paraffin or paraplast. Tissue sections shall be prepared from the tissue blocks. The following general testing sequence is proposed for gathering histopathological data:

(A) *General staining.* A general staining procedure shall be performed on all tissue specimens in the highest treatment group. Hematoxylin and eosin (H&E) shall be used for this purpose. The staining shall be differentiated properly to achieve bluish nuclei with pinkish background.

(B) *Special stains.* Based on the results of the general staining, selected sites and cellular components shall be further evaluated by the use of specific techniques. If H&E screening does not provide such information, a battery of stains shall be used to assess the following components in all appropriate required samples: neuronal body (e.g., Einarson's gallocyanin), axon (e.g., Kluver's Luxol Fast Blue) and neurofibrils (e.g., Bielchosky). In addition, nerve fiber teasing shall be used. A section of normal tissue shall be included in each staining to assure that adequate staining has occurred. Any changes shall be noted and representative photographs shall be taken. If a lesion(s) is observed, the special techniques shall be repeated in the next lower treatment group until no further lesion is detectable.

(C) *Alternative technique.* If the anatomical locus of expected neuropathology is well-defined, epoxy-embedded sections stained with toluidine blue may be used for small sized tissue samples. This technique obviates the need for special stains.

(iii) *Brain weight.* Animals that are not sacrificed for histopathology shall be used to determine brain weight. The animals shall be decapitated and the brains carefully removed, blotted, chilled and weighed. The following dissection shall be performed on an ice-cooled glass plate: First the rhombencephalon is separated by a transverse section from the rest of the brain and into the cerebellum and the medulla oblongata/pons. A transverse section is made at the level of the 'optic chiasma' which delimits the anterior part of the hypothalamus and passes through the anterior commissure. The cortex is peeled from the posterior section and added to the anterior section. This divides the brain into four sections, the telencephalon, the diencephalon/mid-brain, the medulla oblongata + pons, and the cerebellum. Sections shall be weighed as soon as possible after dissection to avoid drying. Detailed methodology is available in Glowinski and Iversen (1966) under paragraph (e)(4) of this section.

(d) *Data reporting and evaluation.* In addition to the reporting requirements specified under 40 CFR Part 792, Subpart J, the final test report must include the following information.

(1) *Description of system and test methods.* (i) A detailed description of the procedures used to standardize observation and operational definitions for scoring observation.

(ii) Positive control data from the laboratory performing the test that demonstrate the sensitivity of the procedures being used. These data do not have to be from studies using prenatal exposures. However, the laboratory must demonstrate competence in testing neonatal animals perinatally exposed to chemicals and establish test norms for the appropriate age group.

(iii) Procedures for calibrating and assuring the equivalence of devices and balancing treatment groups.

(iv) A short justification explaining any decisions where professional judgement is involved such as fixation technique and choice of stains.

(2) *Results.* The following information must be arranged by test group dose level.

(i) In tabular form, data for each animal must be provided showing:

(A) Its identification number and litter from which it came.

(B) Its body weight and score on each sign at each observation time; total session activity counts; intrasession subtotals for each date measured; time and cause of death (if appropriate); location(s), nature of, frequency, and severity of the lesion(s); total brain weight; absolute weight of each of four sections; and weight of each section as a percentage of total brain weight. A commonly used scale such as 1+, 2+, 3+, and 4+ for degree of severity of lesions ranging from very slight to extensive may be used for morphologic evaluation. Any diagnoses derived from neurologic signs and lesions, including naturally occurring diseases or conditions, shall also be recorded.

(ii) Summary data for each group must include:

(A) The number of animals at the start of the test.

(B) Body weights of the dams during gestation and lactation.

(C) Litter size and mean weight at birth.

(D) The number of animals showing each observation score at each observation time.

(E) The percentage of animals showing each abnormal sign at each observation time.

(F) The mean and standard deviation for each continuous endpoint at each observation time. These will include body, weight, motor activity counts, acoustic startle responses, maze performance, and brain weights (both absolute and relative).

(G) The number of animals in which any lesion was found.

(H) The number of animals affected by each different type of lesion, the average grade of each type of lesion and the frequency of each different type and/or location of lesion.

(3) *Evaluation of data.* An evaluation of the test results must be made. The evaluation shall include the relationship between the doses of the test substance and the presence or absence, incidence, and severity of any neurotoxic effects. The evaluation shall include appropriate statistical analyses. The choice of analyses shall consider tests appropriate to the experimental design and needed adjustments for mulitple comparisons.

(e) *References.* For additional background information on this test guideline the following references shall be consulted:

PART 799—[AMENDED]

2. In Part 799:

a. The authority citation continues to read as follows:

Authority: 15 U.S.C. 2603, 2611, 2625.

b. New § 799.4440 is added to read as follows:

§ 799.4440 Triethylene glycol ethers.

(a) *Identification of test substances.* (1)Triethylene glycol monomethyl ether (CAS No. 112–35–6), triethylene glycol monomethyl ether (CAS No. 112–50–5), and triethylene glycol monobutyl ether (CAS No. 143–22–6) shall be tested in accordance with this section.

(2) Compounds of at least 90 percent purity shall be used as the test substances.

(b) *Persons required to submit study plans, conduct tests, and submit data.* (1) All persons who manufacture or process one or more of the listed chemicals, other than as an impurity, from the effective date of this section (44 days after the publication date of the final rule in the **Federal Register**) to the end of the reimbursement period shall submit letters of intent to conduct testing on the chemical or chemicals they manufacture or exemption applications, submit study plans, conduct tests in accordance with Part 792 of this chapter, and submit data as specified in this section, Subpart A of this Part, and Part 790 of this chapter.

(2) [Reserved].

(c) *Health effects testing*—(1) *Neurotoxicity*—(i) *Required testing.* Neurotoxicity tests shall be conducted in accordance with §§ 798.6050, 798.6200 and 798.6400 of this chapter with each of the chemicals listed in paragraph (a)(1) of this section. The tests shall be performed in the rat by dermal administration as specified under § 798.3300(b)(6)(ii) of this chapter for a period of 90 days.

(ii) *Modifications.* The following modification to these three sections shall apply: These three tests may be combined, using 10 animals per sex per dose level.

(iii) *Reporting requirements.* (A) The neurotoxicity tests shall be completed and final results submitted to the Agency within 15 months of the effective date of the final rule.

(B) Progress reports shall be submitted to the Agency at 6-month intervals, beginning 6 months after the effective date of the final rule.

(2) *Developmental toxicity*—(i) *Required testing.* Developmental toxicity tests shall be performed on rats and rabbits by dermal application as specified under § 798.3300(b)(6)(ii) of this chapter with each of the chemicals listed in paragraph (a)(1) of this section in accordance with § 798.4900 of this chapter.

(ii) *Reporting requirements.* (A) The developmental toxicity tests shall be completed and the results submitted to the Agency within 12 months of the final test rule.

(B) Progress reports shall be submitted to the Agency at 6-month intervals, beginning 6 months after the effective date of the final rule.

(3) *Developmental neurotoxicity*—(i) *Required testing.* Developmental neurotoxicity tests shall be performed in rats by dermal application as specified under § 798.3300(b)(6)(ii) of this chapter, with each of the chemicals listed in paragraph (a)(1) of this section, in accordance with § 795.250 of this chapter, following completion of the developmental toxicity study.

(ii) *Reporting requirements.* (A) The developmental neurotoxicity study shall be completed and the final results submitted to the Agency within 24 months of the effective date of the final test rule.

(B) Progress reports shall be submitted to the Agency at 6-month intervals, beginning 6 months after the receipt by the Agency of the final report of the developmental toxicity test.

(4) *Mutagenicity*—(i) *Required testing.* (A) An Ames test in *Salmonella* shall be done in accordance with § 798.5265 of this chapter for each of the chemicals listed in paragraph (a)(1) of this section.

(B) A gene mutation test in mammalian cells shall be done for each chemical listed in paragraph (a)(1) of this section as specified in § 798.5300 of this chapter if the results from the Ames test specified in paragraph (c)(4)(i)(A) of this section for that chemical are negative.

(C) A sex-linked recessive lethal test in *Drosophila melanogaster* shall be performed for each chemical listed in paragraph (a)(1) of this section using the guidelines in § 798.5275 of this chapter if the results of either the Ames test specified in paragraph (c)(4)(i)(A) of this section or the mammalian cells in culture gene mutation assay as specified in paragraph (c)(4)(i)(B) of this section are non-negative for that chemical.

(D) An *in vitro* cytogenetics test shall be conducted in accordance with § 798.5375 of this chapter for each chemical listed in paragraph (a)(1) of this section.

(E) An *in vivo* cytogenetics test shall be done for each chemical listed in paragraph (a)(1) of this section by dermal absorption as specified under § 798.3300(b)(6)(ii) of this chapter, in accordance with § 798.5385 of this chapter if the *in vitro* test as specified in paragraph (c)(4)(i)(D) of this section for that chemical is negative.

(F) A dominant-lethal assay for each chemical listed in paragraph (a)(1) of this section shall be conducted by dermal application as specified under § 798.3300(b)(6)(ii) of this chapter, in accordance with § 798.5450 of this chapter if a non-negative result occurs in either the *in vitro* or *in vivo* cytogenetics test as specified in paragraphs (c)(4)(i)(D) and (E) of this section for that chemical.

(ii) *Reporting requirements.* (A) Mutagenicity tests shall be completed and final results submitted as follows: *Salmonella*, 5 months; mammalian cells in culture, 12 months; *Drosophila* sex-linked recessive lethal, 24 months; *in vitro* cytogenetics, 4 months; *in vivo* cytogenetics, 12 months; and dominant-lethal assay, 24 months.

(B) Progress reports are required at 6-month intervals, beginning 6 months after the effective date of the final rule.

(5) *Subchronic toxicity*—(i) *Required testing.* (A) A subchronic toxicity test shall be performed on the rabbit for each chemical listed in paragraph (a)(1) of this section by dermal application in accordance with § 798.2250 of this chapter.

(B) *Modifications.* The following modifications shall be incorporated in § 798.2250 of this chapter for testing each of the triethylene glycol ethers listed in paragraph (a)(1) of this section.

(*1*) *Observations.* The requirement under § 798.2250(e)(9)(iv) of this chapter is modified so that cage-side observations shall include daily examination for hematuria.

(*2*) *Hematology.* The requirement under § 798.2250(e)(10)(i)(A) of this chapter is modified so that hematology determinations shall be carried out 24 to 48 hours following initiation of dosing in addition to the other times specified. At all hematologic determinations additional measurements shall include a platelet count and mean corpuscular volume.

(*3*) *Clinical biochemistry.* The requirement under § 798.2250(e)(10)(i)(B) of this chapter is modified so that clinical biochemistry determinations shall be carried out 24 to 48 hours following initiation of dosing in addition to the other times specified.

(*4*) *Urinalysis.* The requirement under § 798.2250(e)(10)(ii)(B) of this chapter is modified so that urinalyses shall be done at least three times during the test period: just prior to initiation of dosing (baseline data), after approximately 30 days on test and just prior to terminal sacrifice at the end of the test period. The animals shall be kept in metabolism cages, and the urine shall be examined microscopically for the presence of erythrocytes and renal tubular cells, in addition to measurement of urine volume, specific gravity, glucose, protein/albumin and blood.

(*5*) *Liver-function tests.* The requirement under § 798.2250(e)(10)(ii) of this chapter is modified to add required testing for liver function using five rabbits per sex per dose with sulfobromophthalein (BSP) and a like number using indocyanine green (ICG). The same animals shall be tested at three times during the test period: just prior to initiation of dosing (baseline data), after approximately 30 days on test and just prior to terminal sacrifice at the end of the test period.

(*6*) *Organ weights.* The requirement under § 798.2250(e)(11)(ii) of this chapter is modified so that the prostate gland, the epididymes, the seminal vesicles, and pituitary gland weights shall be determined wet, as soon as possible after dissection.

(*7*) *Gross pathology.* The requirement under § 798.2250(e)(11)(iii) of this chapter is modified so that the following additional organs shall be preserved in a suitable medium for future histopathologic examination: the vas deferenes, the oviducts and the vagina.

(*8*) *Histopathology.* The requirement under § 798.2250(e)(12)(i) of this chapter is modified so that the accessory genital organs (epididymes, prostate, seminal vesicles) and the vagina shall be examined histopathologically. In addition, preparations of testicular and associated reproductive organ samples for histology shall follow the recommendations of Lamb and Chapin (1985) under paragraph (d)(1) of this section, or an equivalent procedure, with particular attention directed toward achieving optimal quality in the fixation and embedding, and including an evaluation of the spermatogenic pattern. Spermatid counts shall be performed as described by Johnson *et al.* (1980) and Blazak *et al.* (1985) under paragraph (d) (2) and (3) of this section or an equivalent procedure. Epididymal sperm count and sperm morphology shall also be done.

(ii) *Reporting requirements.* (A) The subchronic test shall be completed and the final results submitted to the Agency within 15 months of the effective date of the final test rule.

(B) Progress reports shall be submitted at 6-month intervals, beginning 6 months after the rule is made final.

(d) *References.* For additional background information the following references should be consulted:

National Oceanic and Atmospheric Administration

50 CFR Part 215
Subsistence Taking of North Pacific Fur Seals; Proposed Rule

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 215

[Docket No. 60473-6073]

Subsistence Taking of North Pacific Fur Seals; Proposed Restriction

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Proposed rule.

SUMMARY: The NMFS is proposing a rule regarding the subsistence taking of North Pacific fur seals (*Callorhinus ursinus*) by Indians, Aleuts, and Eskimos who live on the Pribilof Islands. This action is necessary to protect the breeding stock of this declining species. This rule places restrictions upon the subsistence taking of fur seals allowed under the Marine Mammal Protection Act and the Fur Seal Act, and provides that the harvest may be suspended once the substance needs of the Pribilovians have been satisfied.

EFFECTIVE DATES: Comments on this proposed rule must be received by June 16, 1986.

ADDRESS: Assistant Administrator for Fisheries, National Marine Fisheries Service, NOAA, Department of Commerce, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Michael Gosliner (Principal Attorney), 202-634-4224 or Georgia Cranmore (Program Official), 202-634-7278.

SUPPLEMENTARY INFORMATION:

Background

From 1957 through 1984, a harvest of fur seals on the Pribilof Islands was conducted under the authority of the Interim Convention on Conservation of North Pacific Fur Seals (Convention). The parties to the Convention, the United States, Canada, Japan, and the Soviet Union, agreed to prohibit pelagic (at-sea) harvesting of seals, conduct limited land harvests and share the commercially valuable seal skins. The Convention came into force on October 14, 1957, and was extended in 1963, 1969, 1976, and 1980. Prior to the entry into force of the Convention, harvests were conducted under the 1911 Convention for the Preservation and Protection of Fur Seals. The 1911 treaty was interrupted prior to World War II by the withdrawal of Japan, but the Pribilof Islands seal herd was protected between 1941 and 1957 by a provisional agreement between the United States and Canada.

The subsistence needs of the Pribilovians for seal meat have traditionally been met from seals taken in the commercial skin harvest conducted under the Convention. The level of the commercial harvest historically has exceeded the estimated subsistence needs of the islanders. In 1984, for example, the commercial harvest on the Pribilof Islands totalled over 22,000 seals. Since 1973, no commercial take has been allowed on St. George Island and only a limited subsistence harvest has been authorized to protect ongoing fur seal population research. The resultant shortfall in meeting the St. George residents' subsistence requirements has been offset by providing them with meat from the St. Paul harvest.

Under the terms of the 1980 extension of the Convention, the Convention expired on October 14, 1984. On October 12, 1984, the parties to the Convention signed a protocol that, upon acceptance by all four parties, would extend the Convention until October 13, 1988. Japan, Canada, and the Soviet Union have ratified the 1984 protocol. On March 20, 1985, the President transmitted the protocol to the Senate, requesting its advice and consent. On June 12, 1985, a hearing was held on the protocol before the Senate Committee on Foreign Relations, but no final action has been taken on the protocol.

In consultation with the Departments of State and Justice, and the Marine Mammal Commission, NOAA determined that no commercial harvest could be conducted under existing domestic law, absent Senate ratification of a protocol extending the Convention or provisional application of the protocol. Accordingly, on July 8, 1985 (50 FR 27914), NOAA promulgated an emergency interim rule to govern subsistence taking of North Pacific fur seals under the authority of section 105(a) of the Fur Seal Act (FSA). The purpose of the interim rule was to limit the take of seals to a level providing for the legitimate subsistence needs of the Pribilovians and to restrict taking by sex, age, and season for herd management purposes. One important element of the interim rule was the maintenance of the humane harvest methods developed during the years of the commercial harvests. These proposed regulations are similar to the emergency interim rule published on July 8, 1985 (50 FR 27914).

Just prior to the expiration of the 19-day harvest season, the NMFS received an urgent request to extend the season for one additional day (August 6, 1985). Due to delays which occurred at the outset of the harvest period, several potential harvest days were lost. Consequently, the number of seals harvested by August 5 failed to reach even the lower bound of the subsistence need estimate provided in the preamble of the July 8 emergency rule. The Pribilovians were granted an emergency one-day extension on August 6, 1985 (50 FR 32205). During the 1985 season, 3,384 seals were taken for subsistence on St. Paul Island and 329 on St. George. A theoretical mean consumption of 0.4 lbs. of seal meat per person per day for one year was possible for residents of St. Paul Island based on the amount of edible meat removed from seal carcasses and retained on that island.

Applicable Laws

Two statutes are potentially applicable to the taking of fur seals on the Pribilof Islands absent the Convention, the Marine Mammal Protection Act (MMPA), 16 U.S.C. 1361, and the FSA, 16 U.S.C. 1151. Both statutes provide for the subsistence taking of fur seals by Alaskan Indians, Aleuts, and Eskimos, but their provisions are not identical.

Section 101(b) of the MMPA, 16 U.S.C. 1371(b), provides that marine mammals may be taken

> By any Indian, Aleut or Eskimo who resides in Alaska and who dwells on the coast of the North Pacific Ocean or the Arctic Ocean if such taking—
>
> (1) Is for subsistence purposes; or
>
> (2) Is done for the purposes of creating and selling authentic native articles of handicrafts and clothing . . .; and
>
> (3) In each case, is not accomplished in a wasteful manner.

Notwithstanding this provision, the Secretary of Commerce may prescribe regulations to limit the taking of marine mammals by Alaskan Natives if he determines the species to be depleted. Any regulations issued under the MMPA to restrict the native taking rights must be promulgated by formal, on-the-record rulemaking after an opportunity for an agency hearing.

The FSA provides for the subsistence take of fur seals under section 103, 16 U.S.C. 1153. Under the terms of section 103(a)

> Indians, Aleuts, and Eskimos who dwell on the coasts of the North Pacific Ocean are permitted to take fur seals [if] . . . the seals are taken for subsistence uses as defined in section 109(f)(2) of the [MMPA] (16 U.S.C. 1379), and only in canoes . . . propelled entirely by oars, paddles, or sails, and manned by not more than five persons each, in the way hitherto practiced and without the use of firearms.

It is arguable that this section does not apply to the Pribilovians since they have

harvested fur seals on land for nearly 200 years and have not "hitherto practiced" canoe-based hunting. Moreover, section 103(b) more specifically addresses the subsistence harvest of fur seals on the Pribilof Islands and would appear to take precedence over the more general provisions of section 103(a).

Section 103(b) of the FSA states that

> Indians, Aleuts, and Eskimos who live on the Pribilof Islands are authorized to take fur seals for subsistence purposes as defined in section 109(f)(2) of the [MMPA] (16 U.S.C. 1379), under such conditions as recommended by the Commission and accepted by the Secretary of State. . . .

No such recommendations on the taking of fur seals for subsistence purposes by Pribilovians have been made by the Commission and accepted by the Secretary of State.

Subsistence takings allowed under section 109(f)(2) of the MMPA differ from those authorized by MMPA section 101(b). Section 109(f)(2) defines "subsistence uses" as

> The customary and traditional uses by rural Alaska residents of marine mammals for direct personal or family consumption as food, shelter, fuel, clothing, tools, or transportation; for the making and selling of handicraft articles out of nonedible byproducts of marine mammals taken for personal or family consumption; and for barter, or sharing for personal or family consumption.
>
> The term "family" means all persons related by blood, marriage, or adoption, or any person living within a household on a permanent basis.
>
> The term "barter" means the exchange of marine mammals or other parts, taken for subsistence uses—(i) for other wildlife or fish or their parts, or (ii) for other food or for nonedible items other than money if the exchange is of a limited and noncommercial nature.

Section 101(b) allows the taking of marine mammals for the creation of handicrafts and clothing for sale, whereas section 109(f)(2) only permits handicraft articles to be made if the marine mammals were initially taken for consumption.

The definition of subsistence contained in the regulations which implement section 101(b) of the MMPA (50 CFR 216.3) allows marine mammal parts to be used by anyone who depends upon the taker to provide them with subsistence. In contrast, section 109(f)(2) allows personal or family consumption, or barter, or sharing for personal or family consumption.

Section 105(a) of the FSA empowers the Secretary of Commerce to "prescribe such regulations with respect to the taking of fur seals on the Pribilof Islands . . . as he deems necessary and appropriate for the conservation, management, and protection of the fur seal population. . . ." It is under this broad authority that these regulations are issued. The MMPA management scheme of section 109(f)(2), as referenced in section 103 of the FSA, was followed in the 1985 emergency rule and has been adopted in this rule.

Need for Subsistence Regulations

The Pribilof Island fur seal population is currently declining at the rate of about 6 percent annually and is below levels which would result in maximum productivity. Extensive research conducted under the terms of the Convention indicates that a harvest of females, pups, or harem bulls could have a disastrous effect on the already declining fur seal population. One of the causes of the population decline observed prior to the 1970s is the female harvest which occurred between 1956 and 1968. In contrast, based on available information, a harvest of subadult males at levels which allow for the future reproductive needs of the population will have no negative impact on long-term population trends. Additional research is needed to determine the effect, if any, of the harvest on overall population trends.

Without this proposed rule, the age and sex classes of fur seals that may be taken would not be limited. Females, pups, and harem bulls would be subject to harvesting as well as the subadult male fur seals that were the sole target of the commercial harvest since 1969. Absent this regulation, the harvest would not be limited in time and place, but could continue as long as seals were available at any location where they congregate.

This rule provides harvest restrictions to ensure that none of the haulout areas of the bachelor males is overharvested. Hauling grounds on St. Paul Island may be harvested only once each week. Since, at any one time, many of the subadult male seals are away from the islands and are feeding at sea, the rotation of harvest sites is intended to allow a sufficient number of young seals to escape the harvest to return to breed in later years.

Under this rule, only taking by traditional harvesting methods is allowed. These methods have been determined to be painless and humane by a number of prominent veterinarians, including the Panel of Euthanasia of the American Veterinary Medical Association. By restricting the harvest to traditional techniques, taking will be humane and it is believed that the disruption of the fur seal rookeries will be minimized and that the risk of mistakenly taking female seals will be reduced.

Comments on the Interim Rule

Of the 16 letters of comment the NMFS received on the emergency interim rule, 15 contained statements of qualified or complete support for the adopted subsistence regime. One commenter supported a continuation of the commercial harvest and opposed limiting the harvest to subsistence purposes only. Five letters included a recommendation to extend the 1985 harvest season due to extenuating circumstances. Three commenters opposed any extension of the harvest past August 5 because of the possibility of increased taking of females.

One animal welfare group stated that, "NMFS has a duty to ensure, to the extent possible, waste-free and complete utilization of these animals for the subsistence purposes for which their taking is being permitted." This commenter suggested that 100 percent utilization of all edible parts is mandatory and that the sample size used in our monitoring program may not be adequate to ensure complete utilization of each animal. The Pribilovians on the other hand, strongly objected to what they called "oppressive supervision" of subsistence-use practices. They requested that harvest management be accomplished by their own leadership.

While several commenters recommended the establishment of a permanent reporting system for subsistence use, one commenter criticized the practice of weighing all meat taken for subsistence. This commenter suggested that we weigh enough carcasses to arrive at an average weight of all edible parts and then concentrate on visual inspection of each carcass. Two commenters recommended that we devise a system to monitor and record actual consumption of subsistence meat. One commenter recommended that an upper limit be established for the subsistence harvest and that all bacula (sealsticks) be destroyed to avoid providing an incentive to harvest more seals than needed for food.

While one commenter urged us to avoid waste of pelts due to any restrictions on their commercial use, others objected to the section of the interim rule concerning disposition of fur seal parts. Specifically, two commenters objected to the provision that would allow payment to Pribilovians for skin processing done on behalf of the United States Government. One commenter claimed that this provison could lead to

a "government subsidy of the 'subsistence' hunt." One commenter recommended that a limit of 6,600 skins be set for those skins that may be transferred to the government for final disposition. Any commercial use or potential commercial use that may be allowed was viewed by a number of commenters as a possible incentive for increased harvesting of seals beyond numbers needed for food.

One commenter, who had observed the 1985 harvest, noted that there were no seal handicrafts for sale on St. Paul Island. Since seal parts were generally not available to individual Pribilovians in the past, except at considerable cost, no tradition of seal handicrafts had developed. However, some handicrafts made from seal pelts, bones, and teeth are apparently in private use on St. Paul. Accordingly, this commenter recommended that the handicraft definition be amended by deleting the word "commonly" so as to encourage the production and sale of rare items, but not, presumably, the development of totally new products.

Two reviewers recommended that we rely on section 109(f)(2) of the MMPA for guidance on the regulation of subsistence take, rather than section 101(b). Section 101(b) allows the taking of marine mammals for the creation of handicrafts and clothing for sale, whereas section 109(f)(2) only permits handicraft articles to be made if the marine mammals were initially taken for consumption. The Marine Mammal Commission believes the application of section 101(b) procedures requiring formal rulemaking is appropriate in this instance. They further state, however, that, "Although it is the position of the Commission that the formal rulemaking requirements of the MMPA should be used if permanent regulations are determined to be necessary, we recommend that consideration be given to the alternative approach of developing a cooperative agreement with the Pribilovians to govern the taking of fur seals for subsistence purposes."

The Marine Mammal Commission provided a formal recommendation to designate the Pribilof Island population of North Pacific fur seals as depleted under the MMPA. Four other commenters also requested a finding of depletion. The MMPA defines "depletion", among other things, to mean "any case in which the Secretary, after consultation with the Marine Mammal Commission and the Committee of Scientific Advisors on Marine Mammals established under . . . this Act, determines that a species or population stock is below its optimum sustainable population . . .".

A status review of the North Pacific fur seal conducted under the Endangered Species Act of 1973, and published in the **Federal Register** on March 6, 1985 (50 FR 9232), contained findings on the current population status in relation to its optimum sustainable population (OSP). Since the current population is below 50 percent of the levels observed in the 1940s and early 1950s, the population is believed to be below a level which can maintain maximum net productivity, the lower bound of the OSP range as defined at 50 CFR 216.3.

A finding of depletion is a condition precedent to regulation of a subsistence harvest under section 101(b) of the MMPA, but not the FSA. Accordingly, such a finding will not be part of the present rulemaking under section 105 of the FSA. As noted by the Marine Mammal Commission in comments on the emergency rule, the designation of depleted status carries with it certain restrictions which affect the interests of private parties and other Federal and state agencies. Interested parties should therefore be provided with an opportunity to review and comment on any proposed designation. When the NMFS determines that the designation of this population as depleted is appropriate, we intend to make use of notice-and-comment rulemaking procedures. The use of informal rulemaking to make a depletion designation is supported by the recommendation of the Marine Mammal Commission.

Discussion of Regulatory Provisions

Definitions. Several definitions are added to § 215.2 to accompany the substantive regulatory changes of other sections. Also, the definition of "director" and "convention" are deleted since the former term is obsolete and the latter is defined in the FSA. The most important definitional additions are those for "subsistence uses", and "wasteful manner". The definition of "wasteful manner" is functionally identical to that for the same term used in the MMPA regulations at 50 CFR 216.3. The only modifications are the restriction of the definition to the Pribilof Islands and to the taking of fur seals and a change to conform to the definition of subsistence used in this rule. The definition of subsistence is taken from section 109(f)(2) of the MMPA. The definition of "handicraft articles" is functionally identical to that contained in 50 CFR 216.3 for "authentic native articles of handicrafts and clothing".

Conforming provisions. The penalty provisions of § 215.3 are amended to bring them into conformity with changes made to the enforcement section of the FSA in 1983. This is merely a technical amendment and no discretion is exercised in its adoption.

Subsistence Harvest of Fur Seals

Section 215.31 states the general conditions under which fur seals may be harvested by Pribilovians. As noted above, the MMPA management scheme contained in section 109(f)(2), and referenced in section 103 of the FSA, is adopted in this rule. Its definition of subsistence provides the most harmonious resolution of the conflicting provisions of the two acts. Under this proposed rule permissible takings must be for subsistence uses as defined in section 109(f)(2) of the MMPA and repeated in § 215.3 of this rule. Subsistence uses include the customary and traditional use of fur seals for food, shelter, fuel, clothing, tools, or transportation. The definition also specifies that seal parts may be used for barter or sharing for personal or family consumption. Additionally, handicraft articles may be made and sold if they are fashioned from nonedible byproducts of marine mammals taken for personal or family consumption.

Section 215.31(c) requires that any takings may not be accomplished in a wasteful manner. There are three facets to the definition of the term "wasteful manner". First, it means any taking which is likely to result in the killing of fur seals beyond those needed for subsistence purposes. Second, wasteful manner includes takings which result in the waste of a substantial portion of the fur seal. Lastly, it means the employment of a taking method which is not likely to assure the killing and retrieval of the fur seal.

The harvesting method employed by the Pribilovians has been shown to be a very effective means of taking fur seals that virtually guarantees that the targeted seals will be killed and retrieved. Provided that the traditional harvesting techniques are followed, the provisions of the last facet of the wasteful manner definition is clearly satisfied.

In order to determine if taking is wasteful under the first criterion, the level of taking which is necessary to meet the subsistence needs of the Pribilovians must be established. Also, it should be noted that the second standard of wastefulness closely relates to this determination. As part of accurately estimating subsistence needs, one must have some idea of what

portion of a fur seal is reasonably usable for subsistence purposes. These determinations are crucial to the operation of this rule since the Assistant Administrator is authorized by § 215.32(a) to suspend the harvest when he determines that the subsistence needs of the Pribilovians have been satisfied or that the harvest is otherwise being conducted in a wasteful manner.

Since the commercial harvest of fur seals on the Pribilof Islands historically exceeded the subsistence needs of the Pribilovians, no accurate record of the extent of that need was developed. Whereas the levels of the commercial harvest were documented each year, no such figures were kept concerning the eventual fate of non-commercial seal parts. The excess availability of seal carcasses for subsistence resulted in the selective use of prime seal meat portions and the discard or other use of less desirable parts.

Prior to the 1985 subsistence harvest, the NMFS had limited data on the amount of seal meat actually consumed by Pribilovians. Estimates presented in the preamble to the interim rule were derived from a variety of historical records, from extrapolations based on certain subsistence-use data recently recorded for St. George Island, and from contemporary testimony and written reports provided by the Pribilovians. Two assumptions were used to derive the subsistence use estimates cited in the 1985 rule: (1) That the current *native* population is 483 on St. Paul Island and 153 on St. George Island (U.S. Bureau of Census, 1980); and (2) that a subadult male fur seal dresses to 25 pounds of meat. *See* Hearings before the Committee on Expenditures in the Department of Commerce, "Investigations of the Fur Seal Industry", 63rd Cong. 2d Sess., (1914) at 514.

Estimates of the annual subsistence need for fur seals by Pribilovians published in the 1985 interim rule ranged from 3,358 to over 15,000 seals. During the 15 day subsistence harvest on St. Paul Island in 1985, 3,384 subadult seals were taken. About 80 percent were 3-year-olds and all but five were males. A detailed report on the 1985 harvest has been provided by Drs. Steven T. Zimmerman and James D. Letcher. Dr. Zimmerman is the Chief of the Marine Mammals and Endangered Species Division, Alsaka Region, NMFS. Dr. Letcher is a private veterinarian (currently affiliated with the Baltimore Zoo) who agreed to observe the 1985 subsistence harvest on St. Paul. (*See* Zimmerman and Letcher, A Report on the 1985 Subsistence Harvest of Northern Fur Seals on St. Paul Island, Alaska, *Marine Fisheries Review*, In Press).

The total weight of meat taken on St. Paul Island for subsistence purposes was 93,435 lbs. An unmeasured percentage of this total was taken each day for immediate personal consumption. The remainder was sent to St. George Island (about 18,000 lbs.), sent to other Aleut Villages (about 4,000 lbs.), or preserved for use on St. Paul Island by salting (about 8,500 lbs.) or freezing (about 50,000 lbs.). Approximately 10,500 lbs. of the meat sent to St. George Island spoiled. An estimated 7,500 lbs. of the meat on St. Paul Island spoiled before it could be preserved. In both cases spoilage resulted from packing meat into large boxes while it was still too warm.

An average of 27.5 lbs. of meat (with bone) was butchered from each seal. This is 43.8 percent of the total mean weight of a harvested seal (62.8 lbs.) and 55.7 percent of the seal's weight minus pelt and attached blubber (49.4 lbs.). During the 1984 commercial harvest, Dr. Zimmerman had observed that front flippers, hearts, livers, and shoulders comprised most of what was taken from the seal carcasses for consumption. During the 1985 season, Dr. Zimmerman was able to determine that the combined weights of these most prized parts constituted 30 percent of the animals by weight. The difference between the 43.8 percent use of carcasses in 1985 and the estimated 30 percent use of some carcasses in 1984 is due to the fact that backs, ribs, and chests were taken in 1985 in addition to flippers, hearts, livers, and shoulders. The relatively high yield of meat (27.5 lbs.) from each animal killed during 1985 appeared to result from diligent attempts by Pribilovians to avoid wasting meat during the butchering process.

After losses due to spoilage and transfer to other villages, about 64,000 lbs. of seal meat remained available for subsistence on St. Paul Island at the conclusion of the 1985 harvest. This would allow for a theoretical annual daily consumption of approximately 0.4 lbs. of seal meat (with bone) per person per year. The amount of meat harvested per person was less than that recorded in other northern and western Alaska villages which depend on subsistence lifestyles.

During the week of March 2, 1986, the NMFS conducted an informal survey of subsistence use of seal meat taken on St. Paul Island. About two-thirds of the approximately 50,000 lbs. of meat stored in the community freezer from the 1985 harvest is believed to remain on the island. About 80 percent consists of ribs and back portions. Some native leaders have concluded that only the front flippers, liver, hearts, and shoulders are desired for subsistence purposes, and that these are the seal parts that have been traditionally used for island subsistence.

Under the terms of this rule not only must the subsistence harvest not exceed the subsistence needs of the Pribilovians, but there must be substantial use made of each seal taken. Since no one target number has been set for the subsistence needs, the NMFS believes that the best way to ensure that the harvest is accomplished in a non-wasteful manner is to continue to monitor the use of those seals which are taken.

The NMFS representatives that will be on thePribilof Islands during the annual harvest will collect three types of information to aid in making the findings required by § 215.32(a). Each day it will be noted how many seals are killed. Then, with the cooperation of the Pribilovians, the NMFS officials will weigh a representative sample of carcasses before and after meat has been removed for human consumption. This will be done to estimate the percent use which is being made of seals. At the end of each day's harvest, a visual survey will be made of the remaining carcasses to see that substantial utilization has been made of each animal taken. Substantial use of a carcass will mean that it has been dressed out and that the front flippers, shoulders, and most other readily obtainable and utilizable tissues and organs have been removed for subsistence uses. If this monitoring program indicates that the carcasses are not being utilized or that the subsistence needs of the islanders have been satisfied, the Assistant Administrator intends to exercise his authority under § 215.32(a) to suspend the harvest.

During the period of the harvest, an unbiased estimate of the average percentage of utilization of seal carcasses will be made. Based upon a daily random sample of approximately 10–20 percent of all seals killed, the following data will be collected:

1. The weight of the animals immediately following exsanguination,
2. The weight of the pelt with blubber still attached, and
3. The weight of organs and tissues not removed for food purposes.

Section 215.32(b)(1) provides that only traditional methods of harvesting may be used to take fur seals. These methods consist, in part, of organized drives of subadult male fur seals from the haulout

sites to killing fields located some distance inland. Drives are conducted only in the early morning hours when the temperature is low and the stress placed upon the seals is minimal. Once at the killing fields, the driven animals are separated into smaller groups and selected individuals are stunned by a sharp blow to the head with a long club. The stunning is followed immediately by exsanguination.

Limiting the harvest to the use of traditional methods will ensure that humane methods are used, will minimize the disruption to rookeries which may result from other methods of taking, and will lessen the risk that female seals will be taken. Since the discontinuation of the female harvest in 1968, this method of harvesting has resulted in an accidental taking of females well below one percent of the total take. In 1985, only five females were accidentally taken during the total harvest of 3,384 seals.

Section 215.32 (b)(2) clarifies that only subadult male fur seals may be taken. The Scientific Committee of the Commission, since 1969, had recommended that only this component of the fur seal population be harvested. The rule specifies that no adult fur seals or pups may be taken. Because of difficulties in distinguishing between immature male and female fur seals, the rule provides for the occasional accidental taking of a subadult female fur seal which may arise during the harvest so long as the historic low level of females taken is maintained. Intentional taking of subadult females, however, is not allowed.

NOAA's fur seal research program has yielded much valuable data necessary for the management and conservation of the fur seal, and a major goal of the program is to determine the cause of the continuing decline in the fur seal population. Data from the harvest have been used to monitor the rate of entanglement in debris and to determine body weight, body length, tooth size, levels of toxic substances, and changes in the age structure of the male portion of the population. These data are also used to assess the status of the population, to monitor population trends, to evaluate rates of population interchange between the islands, and to seek explanations for the observed dynamics of the population. The harvest has also been used to retrieve tags applied for various research purposes.

To insure that new data are comparable to existing data and not confounded by procedural changes, it was deemed advisable, in the interim rule, to maintain as much continuity in the harvest methods as possible. Where possible, every effort was made to ensure that the specific procedures of the subsistence harvest follow historic practices.

This rule seeks to continue the accommodation of the research program to the extent possible. However, greater latitude in choosing harvest days and locations is being provided in the proposed rule. For example, only a recommended harvest schedule is provided. No one haulout area may be harvested more than once each week, however, regardless of the rotation schedule chosen.

Aside from research motives, seasonal restrictions have been adopted to avoid an unacceptable taking of female fur seals. Under this rule, no fur seals may be taken on St. Paul Island after the first week in August. At this time, immature fur seals of both sexes begin to arrive on St. Paul Island in significant numbers. Also, the harem structure breaks down in early August and many females begin using the haulout areas. Extending the harvest period could result in a marked increase in the accidental take of female seals without additional controls on harvest methods. As illustrated by the population decline which coincided with the female harvests of the 1950s and 1960s, any increase in the taking of females is likely to have a detrimental effect on the fur seal population. The first 3-year-olds arrive on the islands early in July, and are available for harvest. Beginning the subsistence harvest much earlier than July would tend to select for older males which arrive on the Pribilofs earlier in the season.

The provisions applicable to the St. George Island harvest are drawn from past practice and are incorporated into this rule primarily to safeguard the research program which has been conducted on the Pribilof Islands since 1973. So as not to jeopardize this research, which compares the dynamics of harvested and unharvested populations, it has been recommended that the harvest level on St. George be reduced in proportion to the overall decline in the population. In 1984, the St. George quota was 350 and was reduced to 329 in 1985 to match the approximate six percent decline in the population that year. Since the three year running average decline rate remains at six percent, the St. George quota is lowered to 309 for 1986. As with St. Paul Island, only subadult males may be taken. Restrictions are also placed on the location of drives and the number of seals that may be taken per day.

The harvest restrictions placed upon St. George Island in this rule may not allow its residents to take enough fur seals to satisfy their subsistence requirements. To mitigate any burden placed on St. George residents, the NMFS is proposing to provide free air transportation between St. George and St. Paul Islands at least once a week throughout the duration of the St. Paul harvest to allow St. George residents to obtain additional quantities of fresh meat for subsistence purposes. However, the NMFS recognizes that St. George residents are being asked to accept greater restrictions on subsistence taking than those placed on residents of St. Paul Island. Consequently, while the quota system for St. George, established in 1973 and carried over into the 1985 interim rule, has been adopted in this proposed rule, the NMFS is prepared to consider alternatives. We solicit comments on this issue during the public review period.

Section 215.33 governs the disposition of fur seal parts to any person other than an Alaskan Native. Fur seal parts, under this rule may be transferred from the taker to other Alaskan Natives in accordance with section 109(f)(2) of the MMPA. No part of a fur seal may be sold to a non-native unless it is a nonedible byproduct of a seal taken for personal or family consumption that has first been converted into an article of handicraft as defined in § 215.2(e). For example, the bacula of male seals (sealsticks) cannot be sold as aphrodisiacs and excess seal meat cannot be converted into dog food. Skins that have been retained from the subsistence take for conversion into handicrafts may be transferred to a registered tannery for processing, as long as they are returned directly to the Privilovians from whom they were obtained.

The NMFS is considering the promulgation of an interpretive rule that will further delineate the uses that may be made of nonedible byproducts. Comments on the necessity of such a rulemaking are invited.

In accordance with section 103(b) of the FSA, only Pribilovians are authorized to engage in the land based harvesting of fur seals. All other Native Alaskans who harvest fur seals must conform to the provisions of section 103(a) of the FSA which allows fur seals to be taken only from canoes not

propelled by motors and manned by not more than five persons each. No numerical limit is placed upon the level of fur seals that may be harvested by the Pribilovians. Seals may be taken so long as the taking is for a "subsistence use" and is not accomplished in a "wasteful manner".

No reporting requirements are placed upon the Pribilovians under this rule. However, § 215.34 requires those who take fur seals to cooperate with NMFS representatives in compiling scientific information and other data regarding the extent of taking and uses to which seal parts are being put. The compilation and analysis of this information is essential to the Assistant Administrator's monitoring of the harvest and will be used to determine the point at which subsistence needs have been satisfied. These data may also be used as evidence that the harvest is or is not otherwise being conducted in a wasteful manner.

Classification

The NMFS prepared an environmental assessment (EA) of this proposed rule and concluded that it will result in no significant impacts on the environment other than those already discussed in the final environmental impact statement (EIS) on the Interim Convention on Conservation of North Pacific Fur Seals, published in April 1985. A copy of the EA/EIS may be obtained by writing to the address listed above.

The NOAA Administrator determined that this proposed rule is not a "major rule" requiring a regulatory impact analysis under Executive Order 12291. This rule will *not* result in a) an annual effect on the economy of $100 million or more; b) a major increase in costs or prices; or c) a significant adverse effect on the U.S. economy. A regulatory impact review concludes that this rule will have no economic effects save those nondiscretionarily mandated by statute. Consequently, the General Counsel of the DOC certified to the Small Business Administration that this proposed rule if adopted, will *not* have a significant economic impact on a substantial number of small entities. Additionally, this rule does not contain a collection of information requirement subject to the Paperwork Reduction Act.

List of Subjects in 50 CFR Part 215

Administrative practice and procedure, Marine mammals, Penalties, Pribilof Islands, Reporting and recordkeeping requirements.

Dated: May 12, 1986.

Carmen J. Blondin,

Deputy Assistant Administrator for Fisheries Resource Management, National Marine Fisheries Service.

PART 215—[AMENDED]

Accordingly, 50 CFR Part 215 is amended as follows:

1. The authority citation is revised to read as follows:

Authority: 16 U.S.C. 1151–1175, 16 U.S.C. 1361–1384.

2. Section 215.2 is revised to read as follows:

§ 215.2 Definitions.

In addition to definitions contained in the Act, and unless the context otherwise requires, in this Part:

(1) *Act* means the Fur Seal Act, as amended, 16 U.S.C. 1151–1175.

(b) *Alaskan Native* has the identical meaning under this section as in 50 CFR 216.3.

(c) *Assistant Administrator* means the Assistant Administrator for Fisheries, National Marine Fisheries Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce.

(d) *Fur seal* means North Pacific fur seal, scientifically known as *Callorhinus ursinus*.

(e) *Handicraft articles* means items made by an Indian, Aleut, or Eskimo from the nonedible byproducts of fur seals taken for personal or family consumption which: (1) Were commonly produced by Alaskan Natives on or before October 14, 1983, and (2) Are composed wholly or in some significant respect of natural materials, and (3) Are significantly altered from their natural form and which are produced, decorated, or fashioned in the exercise of traditional native handicrafts without the use of pantographs, multiple carvers, or similar mass copying devices. Improved methods of production utilizing modern implements such as sewing machines or modern tanning techniques at a tanner registered under 50 CFR 216.23(c) may be used so long as no large scale mass production industry results. Traditional native handicrafts include, but are not limited to, weaving, carving, stitching, sewing, lacing, beading, drawing, and painting. The formation of traditional native groups, such as a cooperative, is permitted so long as no large scale mass production results.

(f) *Public display* means, with respect to fur seals, display, whether or not for profit, for the purposes of education or exhibition.

(g) *Pribilovians* means Indians, Aleuts, and Eskimos who live on the Pribilof Islands.

(h) *Subsistence uses* means the customary and traditional uses of fur seals taken by Pribilovians for direct personal or family consumption as food, shelter, fuel, clothing, tools or transportation; for the making and selling of handicraft articles out of nonedible byproducts of fur seals taken for personal or family consumption; and for barter, or sharing for personal or family consumption. As used in this definition—

(1) *Family* means all persons related by blood, marriage, or adoption, or any person living within a household on a permanent basis.

(2) *Barter* means the exchange of fur seals or their parts, taken for subsistence uses—(i) for other wildlife or fish or their parts, or (ii) for other food or for nonedible items other than money if the exchange is of a limited and noncommercial nature.

(i) *Wasteful manner* means any taking or method of taking which is likely to result in the killing of fur seals beyond those needed for subsistence uses or which results in the waste of a substantial portion of the fur seal and includes, without limitation, the employment of a method of taking which is not likely to assure the capture or killing of a fur seal or which is not immediately followed by a reasonable effort to retrieve the fur seal.

3. Section 215.3 is revised to read as follows:

§ 215.3 Penalties.

(a) *Criminal penalties.* Any person who knowingly violates any provision of the Act or of any permit issued thereunder or regulation contained in this Part will, upon conviction, be fined not more than $20,000 for such violation, or be imprisoned for not more than one year, or both.

(b) *Civil penalties.* Any person who violates any provision of the Act or of any permit issued thereunder or regulation contained in this Part may be assessed a civil penalty of not more than $10,000 for each such violation.

4. A new Subpart D is added to read as follows:

Subpart D—Taking for Subsistence Purposes

Sec.

215.31 Allowable take of fur seals.
215.32 Restrictions on taking.
215.33 Disposition of fur seal parts.
215.34 Cooperation with federal officials.

BEST COPY AVAILABLE

Subpart D—Taking for Subsistence Purposes

§ 215.31 Allowable take of fur seals.

Pribilovians may take fur seals on the Pribilof Islands if such taking is

(a) For subsistence uses, and

(b) Not accomplished in a wasteful manner.

§ 215.32 Restrictions on taking.

(a) The Assistant Administrator is authorized to suspend the take provided for in § 215.31 when he determines that the subsistence needs of the Pribilovians have been satisfied or that the harvest is otherwise being conducted in a wasteful manner.

(b)(1) No fur seal may be taken except by experienced sealers using the traditional harvesting methods, including organized drives of subadult male fur seals to killing fields and separation into smaller groups for selective stunning followed immediately by exsanguination.

(2) Only subadult male fur seals may be taken. Any taking of adult fur seals or pups, or the intentional taking of subadult female fur seals is prohibited.

(3) The following schedule and take limits shall apply:

(i) *St. Paul Island*—Any harvest of fur seals on St. Paul Island must be conducted in accordance with the following provisions:

(A) The harvest season opens June 30 of each year and closes on August 8 or upon suspension of the harvest by the Assistant Administrator under the provisions of § 215.32(a), whichever occurs first.

(B) No haulout area may be harvested more than once each week. The following is a suggested harvest schedule:

Monday—Zapadni
Tuesday—English Bay
Wednesday—Northwest Point
Thursday—Polovina, Little Polovina, Lukanin, Kitovi
Friday—Reef

(C) Only subadult male seals 124.5 centimeters or less in length may be taken.

(D) Seals with tags and/or entangling debris may only be taken if so directed by scientists studying fur seal entanglement.

(ii) *St. George Island*—Any harvest of fur seals on St. George Island must be conducted in accordance with the following provisions:

(A) Fur seals may only be taken at the east haulout area of the North Rookery. No more than two drives may be conducted per week and no more than 50 seals may be taken per day.

(B) Only subadult male seals 124.5 centimeters or less in length may be taken.

(C) The total take on St. George Island must not exceed 309 seals in 1986, and will vary in subsequent years in accordance with the rate of seal population growth or decline, as determined by the NMFS. To meet their subsistence needs, air transportation between St. George and St. Paul Islands will be made available to St. George native residents free of charge at least once per week during the St. Paul harvest to allow them to obtain additional quantities of fresh meat, if needed for subsistence uses.

§ 215.33 Disposition of fur seal parts.

No part of a fur seal taken for subsistence uses may be sold or otherwise transferred to any person other than an Alaskan Native unless it is a nonedible byproduct which

(a) Has been transformed into an article of handicraft, or

(b) Is being sent by an Alaskan Native directly, or through a registered agent, to a tannery registered under 50 CFR 216.23(c) for the purpose of processing, and will be returned directly to the Native Alaskan, or

(c) Is being sold or transferred to an agent registered under 50 CFR 216.23(c) for resale or transfer to a Native Alaskan who will convert the seal part into a handicraft.

§ 215.34 Cooperation with federal officials.

Pribilovians who engage in the harvest of seals are required to cooperate with scientists engaged in fur seal research on the Pribilof Islands who may need assistance in recording tag data and collecting tissue or other fur seal samples for research purposes. In addition, Pribilovians who take fur seals for subsistence uses must, consistent with 5 CFR 1320.7(k)(3), cooperate with the NMFS representatives on the Pribilof Islands who are responsible for compiling the following information on a daily basis:

(a) The number of sales taken each day in the subsistence harvest,

(b) The extent of the utilization of fur seals taken, and

(c) Other information determined by the Assistant Administrator to be necessary for determining the subsistence needs of the Pribilovians or for making determinations under § 215.32(a).

Part IV

Department of Education

34 CFR Part 300

Assistance to States for Education of Handicapped Children; Final Rule

DEPARTMENT OF EDUCATION

34 CFR Part 300

Assistance to States for Education of Handicapped Children

AGENCY: Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary amends the regulations for the Assistance to States for Education of Handicapped Children program authorized by Part B of the Education of the Handicapped Act (EHA-B). These final regulations establish procedures for disapproval of a State plan under section 613(c) of the EHA-B.

EFFECTIVE DATE: These regulations will take effect either 45 days after publication in the Federal Register or later if Congress takes certain adjournments. If you want to know the effective date of these regulations, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: Mr. William Tyrrell, Special Education Programs, Department of Education, 400 Maryland Avenue SW. (Switzer Building, Room 3611), Washington, DC 20202; Telephone: (202) 732–1014.

SUPPLEMENTARY INFORMATION: Pub. L. 94–142, enacted on November 29, 1975, substantially revised Part B of the Education of the Handicapped Act (20 U.S.C. 1401, 1411, *et seq.*). Part B authorizes formula grants to States and, through States, to local educational agencies and intermediate educational agencies to assist them in the education of handicapped children. The purposes of the Act, as amended by Pub. L. 94–142, are: to ensure that a free appropriate public education is made available to all handicapped children, to ensure that the rights of handicapped children and their parents are protected, to assist States and localities to provide for the education of handicapped children, and to assess and ensure the effectiveness of efforts to educate those children.

In order to receive assistance under the EHA–B, section 613(a) of the Act requires a State to submit, and have approved, a State plan. Under section 613(c) of the EHA–B, the Secretary is required to approve a State plan which meets the requirements of the Act and to disapprove a State plan which does not. The Secretary may not finally disapprove a State plan until the State has been given reasonable notices and an opportunity for a hearing. Section 616(b) provides a right to judicial review of the final decision of the Secretary.

If the Secretary determines that a State plan should be disapproved, it will be necessary to advise the affected State of its opportunity for a hearing and the exact procedures, including timelines, to be followed. Currently, these procedures and timelines are not established, either in the EHA-B statute or regulations, or in the Education Department General Administrative Regulations (EDGR) provision (34 CFR 76.202) generally applicable to the disapproval of plans submitted under the Department's State-administered programs. A notice of proposed rulemaking for this program was published on November 23, 1984 (49 FR 46252). A summary of the comments received on the proposed regulations and the Department's responses to those comments are included in the appendix to these regulations.

These final regulations expand upon the procedures that were in effect for the disapproval of the EHA-B State plans prior to the promulgation of EDGAR in 1980. *See* 45 CFR 121a.580–121a.583 (1980); 42 FR 42499–42500 (August 23, 1977). These regulations clarify the procedures to be followed, the rights of the parties, and the duties of the Hearing Official or Panel. The Secretary believes that these final regulations will ensure that hearings under these provisions are conducted in a manner consistent with the procedures followed by the Department in similar proceedings.

A summary of these final regulations follows:

- Section 300.580 *(Opportunity for a hearing)* is removed because the cross-referenced sections under paragraphs (a) and (b) of this section were revoked in 1980. Section 300.589(g) is also amended to reflect the removal of § 300.580.
- Sections 300.581–300.587 describe the notice, opportunity for hearing, and judicial review provisions and contain the following information:

1. Section 300.581 (*Disapproval of a State plan*) states that the Secretary must provide the State with written notice and an opportunity for a hearing before disapproving a State plan.

2. Section 300.582 (*Content of notice*) describes the content of the written notice, the procedures for sending the notice to the State educational agency, and the Secretary's acknowledgement of a State's request for a hearing.

3. Section 300.583 (*Hearing Official or Panel*) describes how the Secretary appoints the Hearing Panel or Hearing Official and includes an impartiality requirement for those officials. It also describes the circumstances under which a hearing may proceed before the Education Appeal Board.

4. Section 300.584 (*Hearing procedures*) describes the scope of authority of the Hearing Official or Panel; procedures to be followed during the hearing; and the rights of the parties.

5. Section 300.585 (*Initial decision; final decision*) provides procedures for reaching and issuing a decision after the hearing.

6. Section 300.586 (*Judicial review*) provides procedures for a State dissatisfied with the Secretary's decision to seek judicial review. These procedures are specified in Section 616(b)(1) of the EHA–B.

- Section 300.589 (*Waiver of requirement regarding supplementing and supplanting with Part B funds*) is amended by removing the cross-reference to §§300.580–300.583 as the authority for a hearing under this section. Hearing procedures relating to waivers of the nonsupplanting requirement would be determined on a case-by-case basis, as needed.

In issuing these final regulations, the Secretary recognizes that it is desirable to consolidate and simplify the various different procedures for affording administrative review to recipients of Federal assistance under different programs. The Department has therefore recently added to the United Agenda of Federal Regulations an entry calling for an overall assessment of the Department's administrative review procedures, with an aim toward a future consolidation of the Department's divergent review procedures into a smaller number of procedures of more general applicability. This examination of Departmental administrative review regulations is scheduled to begin later this year, and at that time, the Department expects to reassess whether a more general set of procedures may be preferable to these regulations as the future vehicle for providing States with administrative review of State plan disapprovals under the EHA–B. Until such procedures are established through additional rulemaking, however, these regulations will govern such review.

Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the Order.

Paperwork Reduction Act of 1980

These regulations do not contain any information collection requirements under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96–511).

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79 (48 FR 29158; June 4, 1983). The objective of the Executive Order is to foster an intergovernmental partnership and a strengthened federalism by relying on State and local processes for State and local government coordination and review of proposed Federal finanical assistance.

In accordance with the Order, this document is intended to provide early notificiation of the Department's specific plans and actions for this program.

List of Subjects in 34 CFR Part 300

Administrative practice and procedure, Education, Education of handicapped, Equal education opportunity, Grant program-education, Privacy, Private schools, Reporting and recordkeeping requirements.

Citation of Legal Authority

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these final regulations.

(Catalog of Federal Domestic Assistance Number 84.027; Assistance to States for Education of Handicapped Children)

Dated: May 12, 1986.

William J. Bennett,

Secretary of Education.

PART 300—ASSISTANCE TO STATES FOR EDUCATION OF HANDICAPPED CHILDREN

The Secretary amends Part 300 of Title 34 of the Code of Federal Regulations as follows:

1. The table of contents of Part 300 is amended by adding headings for new sections 300.580–300.586, to read as follows:

* * * * *

Subpart E—Procedural Safeguards

* * * * *

Department Procedures

Sec.
300.580 [Reserved]
300.581 Disapproval of a State plan.
300.582 Content of notice.
300.583 Hearing official or panel.
300.584 Hearing procedures.
300.585 Initial decision; final decision.
300.586 Judicial review.
300.587—300.589 [Reserved]

Authority: Part B of the Education of the Handicapped Act, Pub. L. 91–230, Title VI, as amended, 89 Stat. 776–794 (20 U.S.C. 1411–1420) unless otherwise noted.

§ 300.580 [Removed and reserved]

2. Section 300.580 is removed and that section is reserved.

3. New §§ 300.581–300.586 are added to read as follows:

§ 300.581 Disapproval of a State plan.

Before disapproving a State plan, the Secretary gives the State educational agency written notice and an opportunity for a hearing.

(20 U.S.C. 1413(c))

§ 300.582 Content of notice.

(a) In the written notice, the Secretary—

(1) States the basis on which the Secretary proposes to disapprove the State plan;

(2) May describe possible options for resolving the issues;

(3) Advises the State educational agency that it may request a hearing and that the request for a hearing must be made not later than 30 calendar days after it receives the notice of proposed disapproval; and

(4) Provides information about the procedures followed for a hearing.

(b) The Secretary sends the written notice to the State educational agency by certified mail with return receipt requested.

(20 U.S.C. 1413(c))

§ 300.583 Hearing Official or Panel.

(a) If the State educational agency requests a hearing, the Secretary designates one or more individuals, either from the Department or elsewhere, not responsible for or connected with the administration of the program under this part, to conduct a hearing.

(b) If more than one individual is designated, the Secretary designates one of those individuals as the Chief Hearing Official of the Hearing Panel. If one individual is designated, that individual is the Hearing Official.

(c) If the State has an appeal pending with the Education Appeal Board on a matter arising out of the same State plan, or on the same issue arising from a prior plan, the State may contest the disapproval of its plan before the Education Appeal Board in accordance with 34 CFR Part 78.

(20 U.S.C. 1413(c))

§ 300.584 Hearing procedures.

(a) As used in §§ 300.581–300.586 the term "party" or "parties" means the following:

(1) A State educational agency that requests a hearing regarding the proposed disapproval of its State plan under this part.

(2) The Department of Education official who administers the program of financial assistance under this part.

(3) A person, group or agency with an interest in and having relevant information about the case who has applied for and been granted leave to intervene by the Hearing Official or Panel.

(b) Within 15 calendar days after receiving a request for a hearing, the Secretary designates a Hearing Official or Panel and notifies the parties.

(c) The Hearing Official or Panel may regulate the course of proceedings and the conduct of the parties during the proceedings. The Hearing Official or Panel takes all steps necessary to conduct a fair and impartial proceeding, to avoid delay, and to maintain order, including the following:

(1) The Hearing Official or Panel may hold conferences or other types of appropriate proceedings to clarify, simplify, or define the issues or to consider other matters that may aid in the disposition of the case.

(2) The Hearing Official or Panel may schedule a prehearing conference of the Hearing Official or Panel and parties.

(3) Any party may request the Hearing Official or Panel to schedule a prehearing or other conference. The Hearing Official or Panel decides whether a conference is necessary and notifies all parties.

(4) At a prehearing or other conference, the Hearing Official or Panel and the parties may consider subjects such as—

(i) Narrowing and clarifying issues;

(ii) Assisting the parties in reaching agreements and stipulations;

(iii) Clarifying the positions of the parties;

(iv) Determining whether an evidentiary hearing or oral argument should be held;

(v) Setting dates for—

(A) The exchange of written documents;

(B) The receipt of comments from the parties on the need for oral argument or evidentiary hearing;

(C) Further proceedings before the Hearing Official or Panel (including an evidentiary hearing or oral argument, if either is scheduled);

(D) Requesting the names of witnesses each party wishes to present at an evidentiary hearing and estimation of time for each presentation; or

(E) Completion of the review and the initial decision of the Hearing Official or Panel.

(5) A prehearing or other conference held under paragraph (b)(4) of this section may be conducted by telephone conference call.

(6) At a prehearing or other conference, the parties shall be prepared

to discuss the subjects listed in paragraph (b)(4) of this section.

(7) Following a prehearing or other conference the Hearing Official or Panel may issue a written statement describing the issues raised, the action taken, and the stipulations and agreements reached by the parties.

(d) The Hearing Official or Panel may require parties to state their positions and to provide all or part of the evidence in writing.

(e) The Hearing Official or Panel may require parties to present testimony through affidavits and to conduct cross-examination through interrogatories.

(f) The Hearing Official or Panel may direct the parties to exchange relevant documents or information and lists of witnesses, and to send copies to the Hearing Official or Panel.

(g) The Hearing Official or Panel may receive, rule on, exclude, or limit evidence at any stage of the proceedings.

(h) The Hearing Official or Panel may rule on motions and other issues at any stage of the proceedings.

(i) The Hearing Official or Panel may examine witnesses.

(j) The Hearing Official or Panel may set reasonable time limits for submission of written documents.

(k) The Hearing Official or Panel may refuse to consider documents or other submissions if they are not submitted in a timely manner unless good cause is shown.

(l) The Hearing Official or Panel may interpret applicable statutes and regulations but may not waive them or rule on their validity.

(m)(1) The parties shall present their positions through briefs and the submission of other documents and may request an oral argument or evidentiary hearing. The Hearing Official or Panel shall determine whether an oral argument or an evidentiary hearing is needed to clarify the positions of the parties.

(2) The Hearing Official or Panel gives each party an opportunity to be represented by counsel.

(n) If the Hearing Official or Panel determines that an evidentiary hearing would materially assist the resolution of the matter, the Hearing Official or Panel gives each party, in addition to the opportunity to be represented by counsel—

(1) An opportunity to present witnesses on the party's behalf; and

(2) An opportunity to cross-examine witnesses either orally or with written questions.

(o) The Hearing Official or Panel accepts any evidence that it finds is relevant and material to the proceedings and is not unduly repetitious.

(p)(1) The Hearing Official or Panel—

(i) Arranges for the preparation of a transcript of each hearing;

(ii) Retains the original transcript as part of the record of the hearing; and

(iii) Provides one copy of the transcript to each party.

(2) Additional copies of the transcript are available on request and with payment of the reproduction fee.

(q) Each party shall file with the Hearing Official or Panel all written motions, briefs, and other documents and shall at the same time provide a copy to the other parties to the proceedings.

(20 U.S.C. 1413(c))

§ 300.585 Initial decision; final decision.

(a) The Hearing Official or Panel prepares an initial written decision which addresses each of the points in the notice sent by the Secretary to the State educational agency under § 300.582.

(b) The initial decision of a Panel is made by a majority of Panel members.

(c) The Hearing Official or Panel mails by certified mail with return receipt requested a copy of the initial decision to each party (or to the party's counsel) and to the Secretary, with a notice stating that each party has an opportunity to submit written comments regarding the decision to the Secretary.

(d) Each party may file comments and recommendations on the initial decision with the Hearing Official or Panel within 15 calendar days of the date the party receives the Panel's decision.

(e) The Hearing Official or Panel sends a copy of a party's initial comments and recommendations to the other parties by certified mail with return receipt requested. Each party may file responsive comments and recommendations with the Hearing Official or Panel within seven calendar days of the date the party receives the initial comments and recommendations.

(f) The Hearing Official or Panel forwards the parties' initial and responsive comments on the initial decision to the Secretary who reviews the initial decision and issues a final decision.

(g) The initial decision of the Hearing Official or Panel becomes the final decision of the Secretary unless, within 25 calendar days after the end of the time for receipt of written comments, the Secretary informs the Hearing Official or Panel and the parties to a hearing in writing that the decision is being further reviewed for possible modification.

(h) The Secretary may reject or modify the initial decision of the Hearing Official or Panel if the Secretary finds that it is clearly erroneous.

(i) The Secretary conducts the review based on the initial decision, the written record, the Hearing Official's or Panel's proceedings, and written comments. The Secretary may remand the matter for further proceedings.

(j) The Secretary issues the final decision within 30 calendar days after notifying the Hearing Official or Panel that the initial decision is being further reviewed.

§ 300.586 Judicial review.

If a State is dissatisfied with the Secretary's final action with respect to its State plan, the State may, within 60 calendar days after notice of that action, file a petition for review with the United States court of appeals for the circuit in which the State is located.

(20 U.S.C. 1416(b)(1))

§§ 300.587–300.588 [Removed]

4. Sections 300.587 and 300.588 are removed.

5. In § 300.589, paragraph (g) is revised to read as follows:

§ 300.589 Waiver of requirement regarding supplementing and supplanting with Part B funds.

* * * * *

(g) The State may request a hearing with regard to any final action by the Secretary under this section.

(20 U.S.C. 1411(c)(3); 1413(e)(9)(B))

Appendix—Summary of Comments and Responses

Note.—This Appendix will not be codified in the Code of Federal Regulations.

The following is a summary of the comments received on the notice of proposed rulemaking for the Assistance to States for Education of Handicapped Children program published on November 23, 1984. Each comment is followed by a response that indicates a change has been made or why no change is considered necessary. Specific comments are arranged in order of the sections of the final regulations to which they pertain.

Section 300.581—Disapproval of a State plan.

Comment. A number of commenters felt that § 300.581 should include a timeline stating how long the Secretary may take to make a decision on the approval or disapproval of a State plan starting from the time it is received in the Department.

Response. No change has been made. The timeline would depend on the date

by which a State educational agency submitted its State plan to the Secretary, the number of revisions made to the State plan since the State's last plan was approved, and other factors not under the control of the Secretary. However, the Department makes every effort to give a State educational agency early notification if the Secretary proposes to disapprove its State plan.

Comment. A number of commenters felt that State educational agencies should be given an opportunity to take corrective action before the Secretary disapproves a State plan. Traditionally, the Department has used informal procedures to negotiate with a State educational agency when differences have arisen during the review of a State plan. One commenter felt that this informal negotiating process should be exhausted before a State plan is disapproved. Several other commenters felt that the regulations should include mediation procedures which could be used prior to the disapproval of a State plan. One commenter recommended adding an opportunity for an informal hearing prior to the written notice of a proposed disapproval.

Response. No change has been made. The Department will continue to use informal procedures to negotiate differences that arise during the State plan review process. State plan disapproval is a drastic step that will only be used as a last resort when all other attempts to resolve an issue have failed.

Informal negotiation will generally be conducted before a written notice is sent to a State. Requiring informal negotiation following the written notice would lengthen and delay the State plan disapproval procedure.

Section 300.582—Content of notice.

Comment. One commenter recommended changes to the language and content of § 300.582: (1) to inform State educational agencies of the criteria the Secretary will use to disapprove a State plan; and (2) to provide the State educational agency with the criteria used by the Education Appeal Board, and the Department's administrative procedures.

Response. No change has been made. The criteria for State plan disapproval are provided in Section 613(c) of the EHA–B and the implementing regulations for Part B. The procedures used by the Education Appeal Board appear at 34 CFR Part 78. These procedures are only applicable in the circumstances described in § 300.583(c) where an appeal is already pending before the Education Appeal Board. The Department's administrative procedures for State-administered programs are provided in the Education Department General Administrative Regulations (EDGAR) at 34 CFR Parts 74, 76, 77, 78, and 79.

Comment. Several commenters asked that the written notice to a State educational agency include: (1) A full explanation of the reasons for the disapproval, with specific references to statutory or regulatory provisions and copies of these provisions; (2) options for resolving the issue; (3) factors related to the disapproval; (4) an explanation of the hearing procedures, including timelines; and (5) an explanation of rights and responsibilities to the State educational agency.

Response. A change has been made. Section 300.582(a)(1) as proposed states that the written notice of a proposed State plan disapproval includes the basis on which the Secretary proposes to disapprove a State plan. A new § 300.582(a)(2) is added and states that the notice may identify options for resolving the issues which are preventing the approval of a State plan. Section 300.582(a)(4) also has been added to the regulations and states that information about the procedures followed for a hearing will be included with the written notice.

Comment: One commenter asked for the timeframe for the number of days between the State educational agency's request for a hearing and the hearing date.

Response: A change has been made. A new § 300.584(b) is added stating that within 15 calendar days after receiving a request for a hearing, the Secretary designates a Hearing Official or Panel and notifies the parties. To afford the opportunity for a preliminary conference before a hearing, no hearing date is required at this stage.

Section 300.583—Hearing Official or Panel.

Comment. One commenter felt that neither the persons serving on a Hearing Panel nor the individual serving as a Hearing Official should be connected with or employed by the Department in order to insure impartiality. Another commenter wanted to eliminate the possibility that Hearing Panel members or the Hearing Official could come from outside of the Department.

Response. No change has been made. The Secretary believes that, as presently worded, § 300.583(a) will meet the intent of the provisions at Section 613(c) of the EHA–B since it allows for fair proceedings and impartiality by barring individuals responsible for or connected with the EHA–B program from serving as Hearing Panel members or as the Hearing Official.

Limiting the appointment of a Hearing Official or Panel to only the Department's employees or nonemployees would constrict the pool of otherwise qualified candidates, and could raise questions concerning the impartiality of the proceeding. The Secretary intends to use non-employees of the Department except in emergency situations where those persons were unavailable.

Comment. One commenter felt that, to ensure impartiality, there should be a three-member panel, with no more than one representative from the Department. The commenter also recommended that the Panel include a representative from the State educational agency. Another commenter asked the Secretary to specify how many people should serve on a Hearing Panel (i. e., an uneven number of members should be appointed to avoid a deadlock).

Response. No change has been made. Neither the statute nor these regulations specifically preclude designating State educational agency or Federal employees as Panel members. Section 300.583 provides for the impartiality of the Hearing Official or Panel.

Comment. A number of commenters felt that § 300.583(a) should include criteria stating: (1) When a Hearing Official should be appointed; (2) the qualifications of individuals who may serve on a Hearing Panel or as a Hearing Official to ensure a fair and impartial hearing; and (3) how the State educational agency is involved in the selection of a Hearing Official or Panel. One commenter felt that the Hearing Official or Panel should be knowledgeable about compliance, planning, implementation, and the administration of special education programs. Another commenter felt that the State educational agency should have the opportunity to review and challenge the appointments of the Hearing Official or Panel to assure that there is no bias. The commenter suggested that objections should be presented to the Secretary.

Response. No change has been made. The selection of a Hearing Official or Panel is made on a case-by-case basis. A Hearing Panel or Hearing Official is selected from a pool of candidates knowledgeable in relevant areas, such as the fields of education of the handicapped, general education, or law. This process is consistent with EDGAR procedures which have been effective in ensuring that the individuals selected are fair and impartial. As in any administrative proceeding, a designated

individual will be disqualified if there is an actual or potential conflict of interest.

Comment. One commenter asked for clarification of the relationship between the Hearing Official or Panel and the Education Appeal Board (see 34 CFR Part 78). Another commenter recommended that an appeal before the Education Appeal Board supersede that of an appeal to the Panel convened to hear a case regarding the disapproval of a State plan.

Response. No change has been made. The Hearing Official or Panel described in these regulations hears only cases regarding the disapproval of a State Plan submitted for EHA–B funding. These separate hearing procedures are established for such cases so that the Secretary can provide the State educational agency with an expeditious hearing and final decision regarding the proposed disapproval of its State plan. The procedures used for an EHA–B State plan disapproval hearing are, in part, modeled upon the procedures used by the Education Appeal Board. The type of cases which the Education Appeal Board hears are described at 34 CFR 78.2. The provision under § 300.583(c) is included to avoid the time, expense, energy, and inconvenience of having parties involved in more than one proceeding where there are similar claims involved. A State educational agency has the option of contesting the disapproval of a State plan before the Education Appeal Board if the State has an appeal pending with that Board on a matter arising out of the same State plan or on the same issue arising from a prior State plan.

Section 300.584—Hearing procedures.

Comment. One commenter felt that timelines are needed from the time of the appointment of the Hearing Official or Panel through the rendering of an initial decision.

Response. A change has been made. A new § 300.584(c)(4) is added and states that a Hearing Official or Panel or a party to the hearing may request a conference with the Hearing Official or Panel and the parties to consider subjects such as: (1) Narrowing and clarifying issues; (2) assisting the parties in reaching agreements and stipulations; (3) clarifying the positions of the parties; (4) setting dates for the exchange of written documents; and (5) setting dates for the receipt of comments from the parties on the need for oral argument, an evidentiary hearing, or further proceedings before the Hearing Official or Panel. Timelines and completion dates for the review and initial decision by the Hearing Official or Panel may be set on a case-by-case basis that assist in the expeditious resolution of disputes.

The following timelines, including those previously proposed and newly inserted, are specifically designated in these regulations: (1) The State educational agency may request a hearing not later than 30 calendar days after it receives the notice of proposed State plan disapproval; (2) within 15 calendar days after receiving a request for a hearing, the Secretary designates a Hearing Official or Panel and notifies the parties; (3) the parties to a hearing have 15 calendar days to comment on an initial decision and seven calendar days to respond to each other's comments; (4) the initial decision of the Hearing Official or Panel becomes the final decision of the Secretary unless, within 25 calendar days after the end of the time for receipt of written comments, the Secretary informs the Hearing Official or Panel and the parties to a hearing in writing that the decision is being further reviewed for possible modification; (5) the Secretary issues the final decision within 30 calendar days after notifying the Hearing Official or Panel that the initial decision is being further reviewed; and (6) the State educational agency has 60 days after the Secretary's final decision in a case to file a petition for review with the United States court of appeals. The Secretary believes that these timelines are sufficient to protect the rights of the parties involved in a State plan disapproval hearing. However, the provision which is added to these final regulations at § 300.584(b)(4) allows the parties to a case to confer with the Hearing Official or Panel and to establish timelines for various other steps in the proceedings. A single set of timelines would not provide the flexibility necessary to review cases.

Comment. Several commenters felt that a timeline should be set for scheduling a hearing after a State educational agency is notified of a proposed disapproval. One commenter felt that the Secretary and State educational agency should be permitted to suspend, delay, or terminate the hearing with prior approval from the Hearing Official or Panel.

Response. No change has been made. The Secretary believes that the commenters' recommendations are accommodated by the change made to § 300.584(c)(4). A State educational agency can propose timelines that will fit its unique circumstances under this new provision.

Comment. Several commenters felt that the rights and responsibilities of a State educational agency should be included in the regulations, and they recommended adding a new section that includes: (1) The right to be accompanied and advised by counsel or other knowledgeable individuals; (2) the right to present evidence and confront and cross-examine witnesses at a hearing; (3) the right to subpoena and compel the attendance of witnesses; and (4) the right to prohibit evidence that was not part of the Secretary's denial letter or was not disclosed to the State educational agency before the hearing; (5) the right to provide evidence related to the case; and (6) the right to a written record of the proceedings at the Secretary's expense within a specified timeline (i.e., five days).

Response. A change has been made. Section 300.584(m)(2) already provides that the parties to a hearing have the opportunity to be represented by counsel. A new § 300.584(n) is added to these final regulations requiring the Hearing Official or Panel to accept any evidence that is relevant and material to the proceedings and is not unduly repetitious. If a formal hearing is held, the parties to the hearing also have the opportunity to present and cross-examine witnesses. The decision to hold a formal hearing can be made at the conference provided for under § 300.584(c)(4).

The Hearing Official or Panel does not have the statutory or regulatory authority to issue subpoenas or compel the attendance of witnesses. The Hearing Official or Panel cannot prohibit the introduction of evidence that was not a part of the Secretary's notice under § 300.582 or that was not disclosed to the State educational agency before a hearing.

A new § 300.584(p) is added to these regulations which states, among other things, that the Hearing Official or Panel will arrange for the preparation of a transcript of a hearing and will provide a copy of the transcript to the parties. This is consistent with the procedures of the Education Appeal Board. (*See* 34 CFR 78.48). A timeline has not been specified, because the length of time necessary for transcribing the hearing record will vary depending upon factors such as the length of the hearing. However, every effort will be made to ensure that copies of the written record are provided in a timely manner.

Comment. One commenter felt that the term "each party" should be clarified to specify who is involved in the hearing process. The commenter felt that the parties to the hearing should include only the Department and the State educational agency.

Response. A change has been made. A definition is added at § 300.584(a) to

clarify that, as used in this part, the term "party" or "parties" means the State educational agency, the Department officials who administer the EHA-B program, or an intervening party. The Secretary believes that the Hearing Official or Panel should have the discretion to allow intervention in appropriate cases.

Comment. One commenter felt that the Hearing Official or Panel should arrange a time, date, and site for a hearing that is convenient to both parties.

Response. No change has been made. Hearings are generally held in Washington, DC. In exceptional circumstances, the Hearing Officer or Panel may determine that a hearing should be held at one of the Department's regional offices or another facility convenient to the State educational agency.

Comment. One commenter asked if only written testimony is determined necessary by the Hearing Official or Panel, allowing part of the testimony to be provided in writing, how else can the other part of the testimony be provided if not by oral testimony?

Response. A change has been made. Each party to a hearing has an opportunity, as § 300.584(m)(1) currently provides, to present arguments to the Hearing Official or Panel through briefs and other documents.

The Hearing Official or Panel determines if oral argument or evidentiary hearing is also needed. The Secretary believes that the commenter's concern is accommodated by the change made to § 300.584(c)(4). Under that provision, the Hearing Official or Panel and the parties to a hearing may consider whether oral testimony by witnesses having relevant information about the case will materially assist in the resolution of the dispute and whether an informal conference should be scheduled for a specific case. A decision may then be made for a schedule for conducting an oral argument or an evidentiary hearing.

Comment. Several commenters asked for a definition of "informal conference" (prehearing conference) and asked for a description of the procedures or criteria to follow in determining whether a formal or informal conference would be held and how. These commenters suggested that both parties should be equally involved in determining the hearing procedures to be followed. Several commenters felt that a Hearing Official or Panel should not have the authority to deny a State educational agency a formal means of resolving disagreements involving the disapproval of a State plan. One commenter asked if a State Educational agency can contest the Department's refusal to hold a formal hearing if one is requested and the request is denied.

Response. A change has been made. The term "informal conference" has been changed to "preliminary conference." Section 300.584(c) is intended to allow a Hearing Official or Panel to conduct proceedings that: (1) Are less technical in nature than proceedings conducted by administrative law judges or courts of law; and (2) admit all information needed to aid a Hearing Official or panel in reaching a decision on a case.

Comment. One commenter recommended rewording § 300.584(n) to state that either party may request that the Hearing Official or Panel make a decision based upon: (1) A review of the State plan; (2) the Secretary's basis for denial of approval; and (3) the written response from the State educational agency. The State educational agency should be given 30 days to provide its arguments, in whole or in an informal conference, before the Hearing Official or Panel. The commenter also felt that if the Hearing Official or Panel decides that testimony would assist the resolution of a case, the parties to the hearing should have the opportunity to present witnesses, cross-examine witnesses, and provide evidence in the case.

Response. No change has been made. The Secretary believes that the commenter's recommendations are substantially accomodated by the change made in § 300.584(c)(4). The State educational agency, the Departmental official, and the Hearing Official or Panel can establish the issues in the case and propose timelines that will fit the unique circumstances of a case under this new provision.

Section 300.585—Initial decision; final decision.

Comment. A number of commenters asked for a timeline specifying how long the Hearing Official or Panel has to issue an initial written decision.

Response. No change has been made. The Secretary believes that the commenters' recommendations are accommodated by the change made in § 300.584(c)(4). The Hearing Official or Panel can establish timelines which will fit the circumstances of each case.

Comment. One commenter felt that a hearing should be suspended at any point upon written agreement by the State educational agency and the Secretary, without prior approval from the Hearing Official or Panel.

Response. No change has been made. Once appointed, the Hearing Official or Panel has jurisdiction to regulate the course of the proceedings and rule on motions and other issues at any stage of the proceedings. However, if the Department made a redetermination that the State's plan was approvable, the Department and the State would merely notify the Hearing Official or Panel that the proceeding was withdrawn.

Comment. One commenter felt that the initial decision of a Panel should be rendered by majority agreement.

Response. A change has been made. Language has been added to § 300.585(b) to clarify that the decision of a Hearing Panel is made by a majority of the Panel members.

Comment. Several commenters felt that § 300.585 should be amended to add a specific timeline from the receipt of the initial decision to the submission of written comments to the Secretary. Commenters felt that the language "within a specified reasonable time" is too vague.

Response. A change has been made. Section 300.585(d) has been added stating that each party has 15 calendar days from the date that the party receives the Hearing Official's or Panel's initial decision to file comments and recommendations on that decision. The Hearing Official or Panel then sends a copy of these comments and recommendations to the other parties by certified mail with return receipt requested. A new § 300.585(e) states that each party then has seven days from the date the party receives copies of these comments and recommendations to file responsive comments and recommendations with the Hearing Official or Panel. These changes have been made in the final regulations in order to establish standard timelines to ensure the expeditious resolution of cases.

Comment. A number of commenters felt that § 300.585 should specify the criteria the Secretary uses to review a Hearing Official's or Panel's initial decision.

Response. A change has been made. Section 300.585(i) is modified to state that the "Secretary may reject or modify the initial decision of the Hearing Official or Panel if the Secretary finds that it is clearly erroneous." This establishes the standard for the Secretary's review of an initial decision.

Comment. A number of commenters felt that the State educational agency should have the opportunity to request a review of the initial decision. Several commenters recommended adding a timeline for a State educational agency to request a review of the Hearing

Official's or Panel's initial decision in a hearing. The commenter also suggested that the Hearing Official or Panel be given the authority to extend the timelines if petitioned by either party involved in a hearing. One commenter felt that a party to a hearing should be permitted to appeal the review within 15 days of the receipt of the decision.

Response. No change has been made. Under § 300.585(d), the State educational agency has the opportunity to submit written comments to the Secretary which could include a request for Secretarial review. The regulations provide timelines for the receipt of written comments and for the Secretary's review. In order to ensure speedy resolution of cases, the Secretary has adopted recommendations of commenters to establish specific timelines for the receipt of comments on the initial decision.

Comment. A number of commenters felt that the 25 day timeline in § 300.585(g) should be clarified to specify 25 calendar days.

Response. A change has been made. Section 300.585(g) is modified to make it clear that the timeline is 25 calendar days.

Comment. One commenter felt that the Secretary should have the authority to request additional evidence as well as to accept, reject, or modify an initial decision of the Hearing Panel or Hearing Official.

Response. A change has been made. Each party has the responsibility of offering evidence supporting its position to the Hearing Official or Panel during the hearing proceedings. However, the Secretary may remand the case for additional proceedings if necessary.

Comment. One commenter felt that language should be added stating that the Secretary should be required to inform the State educational agency, as well as the Hearing Official or Panel, of the fact that a hearing decision is being reviewed.

Response. A change has been made. The Secretary notifies the parties in writing of the fact that a hearing decision regarding the disapproval of a State plan is being reviewed for the purpose of accepting, rejecting or modifying the decision.

Comment. One commenter stated that no remedy other than judicial review is specified in the regulations. The commenter felt that the Secretary's decision should specify the corrective action required of the State. Such corrective action should be implemented unless a judicial review is invoked.

Response. No change has been made. The decision of the Hearing Official or Panel will indicate where deficiencies exist or do not exist in the State plan and whether changes must be made before a State plan is finally approved. A State educational agency may reapply for funding under the program by submitting an approvable State plan if the final decision upholds the Secretary's decision to disapprove the plan that was in controversy.

Comment. One commenter asked how much time after a formal hearing will be allowed before a decision is required.

Response. No change has been made. The Secretary believes that the commenter's concern is accommodated by the change made in § 300.585(c)(4) which permits the parties and the Hearing Official or Panel to establish reasonable timelines.

Comment. Several commenters felt that the regulations should clarify which review process is being referenced in § 300.585(f) as it appeared in the notice of proposed rulemaking. One commenter felt that § 300.585(f) should be combined with that portion of § 300.585 which deals with the Secretary's decision to review the initial decision of the Hearing Official or Panel.

Response. A change has been made. The order of the provisions in § 300.585 has been changed to clarify that the review refers to the Secretary's review of the Hearing Official or Panel's initial decision on a case. Clarifying language has also been added to make clear that the Secretary reviews the initial decision and either adopts the decision or decides to reject, modify or remand the decision.

Comment. Several commenters felt that the rights and options of a State educational agency during the review process should be included in § 300.585.

Response. No change has been made. The Secretary believes that the procedures set forth in § 300.585 provide a detailed description of the rights and options of a State eductional agency.

Section 300.586—Judicial review.

Comment. One commenter felt that § 300.586 should state who is responsible for court costs for a judicial review. The commenter asked whether the Department pays for the judicial review if the decision is in favor of the appealing State educational agency.

Response. No change has been made. Each party is responsible for the cost of litigation unless the court determines otherwise.

General

Comment. One commenter asked what the Department wishes to accomplish as a consequence of these regulations.

Response. No change has been made. When the EHA–B regulations were published in the Federal Register on August 23, 1977, specific procedures for a State plan disapproval hearing were included in the regulations. When the Education Department General Administrative Regulations (EDGAR) were promulgated in April, 1980, these EHA–B State plan hearing procedures were revoked but were not replaced with specific procedures. *See* 34 CFR 76.202. The propose of these regulations is to establish specific procedures so that if a State plan for EHA–B funding is disapproved, the Department will not have to rely on *ad hoc* procedures on an emergency basis and so that State educational agencies will know what to expect if a State plan is disapproved. These procedures have been developed at this time because when the 1984–1986 State plans for EHA–B funding were reviewed, a few States received approval for only one year of funding. Second and third year fundings were made contingent upon certain modifications being made to these State plans. It is possible that, in some cases, all attempts at mediation could be exhausted, and it may be necessary to disapprove a State plan.

Comment. One commenter felt that because small States cannot afford lengthy hearings, they will be less likely to contest findings that would result in disapproval of a State plan.

Response. No change has been made. The Secretary will make every attempt to expedite the hearing process and to avoid delays in the resolution of issues which resulted in the proposed disapproval of a State plan. The hearing procedures have been kept flexible to the extent feasible by allowing for informal conferences, which could be conducted by conference calls to conserve time and resources.

Comment. A commenter asked what the consequences are if a State plan is disapproved.

Response. No change has been made. If the Secretary disapproves a State plan and this decision is upheld, the State educational agency is not authorized to receive its allotment of funds under the EHA–B programs until an approvable State plan has been submitted to the Secretary. If a State chooses not to resubmit its State plan, then the Secretary may reallocate the funds reserved for that State among the other participating States.

Comment. One commenter felt that a section should be added to the regulations stating whether the Department has the authority to revoke a State plan at any time during the

three-year period for an approved State plan.

Response. No change has been made. Under the EHA–B program, States submit three-year State plans to the Secretary and, under normal circumstances, the fully approved State plan is effective for three fiscal years. There may, however, be circumstances where a State plan is approved for a period of less than three years, and the full approval of the plan for three fiscal years is contingent on meeting specified conditions. If those conditions are not met, the Secretary may disapprove the State plan for the remaining fiscal years. If a State plan was fully approved for a period of three fiscal years, the Secretary may act, under the authority of section 616(a) of the EHA–B, to withhold further payments to that State, if the Secretary finds: (1) That there has been a failure to comply substantially with any provision of sections 612 or 613; or (2) that in the administration of the State plan there is a failure to comply with any provision of the EHA–B or with any requirements set forth in the application of a local educational agency or intermediate educational unit approved by the State educational agency pursuant to the State plan.

Comment. One commenter felt that the regulations focus on process rather than the outcome of the hearing.

Response. No change has been made. The outcome of a hearing will be a decision on the substantive issues involved in the Secretary's decision to disapprove a State plan. These regulations are designed to provide the process by which the Secretary's determination can be appealed and reviewed.

Comment. One commenter felt that a section should be added to the regulations regarding: (1) The pendency of the State plan in entering a new grant year during the appeal process; and (2) the continued distribution of EHA–B funds to the State educational agency during the appeal process.

Response. No change has been made. Under section 613(c) of the EHA–B, the Secretary disapproves a State plan that does not meet the requirements of sections 613 (a) and (b) of the Act. If the Secretary's decision to disapprove a State plan is upheld by the Hearing Official or Panel, then the Secretary may not award funds for the disapproved State plan, and the State must return unobligated funds issued under an expired prior State plan.

DEPARTMENT OF EDUCATION

Office of Special Education and Rehabilitative Services

Postsecondary Education Programs for Handicapped Persons—Regional Centers for Deaf Individuals

AGENCY: Department of Education.

ACTION: Notice of Establishment of geographic regions for operation of regional centers for deaf individuals.

SUMMARY: The Secretary announces the establishment of geographic regions for Fiscal Year 1986 awards under the Postsecondary Education Programs for Handicapped Persons—Regional Centers for Deaf Individuals. The Secretary will support the operation of four regional centers for deaf individuals including models of comprehensive supportive services to those indiviudals.

EFFECTIVE DATE: This notice takes effect either 45 days after publication in the **Federal Register** or later if Congress takes certain adjournments. If you want to know the effective date of this notice, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: Dr. Joseph Rosenstein, Postsecondary Education Programs for Handicapped Persons, Division of Innovation and Development, Special Education Programs, Department of Education, 330 C Street, SW. (Switzer Building,-Room 3511–M/2313), Washington, DC 20202. Telephone: (202) 732–1176.

SUPPLEMENTARY INFORMATION: Under section 625(a)(2) of Part C of the Education of the Handicapped Act, the Secretary gives priority consideration to four regional centers for deaf individuals, in addition to other activities supported under section 625 of the Act. Three years ago, the Department began making the four awards on a competitive, open basis.

In fiscal year 1983, the Department published a notice which established two regions for the purpose of making the four awards under this program in the fiscal year. This notice establishes the same regional structure as the basis for making the four awards in fiscal year 1986.

Projects that operate regional centers for deaf individuals provide regional models of comprehensive supportive services to deaf students who desire postsecondary education and vocational technical training. Comprehensive supportive services for deaf students in postsecondary regional educational settings may include: interpreters, tutors, notetakers, counseling, placement, speech, and hearing services, special classes, vocational development, supervised housing, and opportunities for faculty and students to learn special techniques for communicating with the deaf students with whom they come into contact.

A notice of proposed establishment of geographic regions was published in the **Federal Register** on January 30, 1986 at 51 FR 3900. The public was given thirty days in which to comment. No comments were received.

Postsecondary Education Programs for Handicapped Persons—Regional Centers for Deaf Individuals. The program regulations at 34 CFR 338.10(a)(1) and 338.30(a) establish that the Secretary gives priority consideration to four regional centers for deaf individuals, including models of comprehensive supportive services to those individuals.

In accordance with the Education Department General Administrative Regulations at 34 CFR 75.105(b)(2)(i), the Secretary issues these awards on the basis of geographical regions, as listed below. The making of awards on a regional basis is contemplated by the authorizing legislation and is consistent with program history. *See also,* S. (conference) Rep. No. 1026, 93rd Cong., 2nd Sess. 194 (1974). Each application will be considered in competition with those of applicants from the same region. The Secretary makes two awards per region, but will not make any award for a region for which he determines that no application is of sufficient quality to merit approval.

The regions are:

Western Region: Alaska, American Samoa, Arizona, California, Colorado, Guam, Hawaii, Idaho, Kansas, Montana, Nebraska, Nevada, New Mexico, North Dakota, Northern Marianas, Oklahoma, Oregon, South Dakota, Texas, Trust Territories of the Pacific Islands, Utah, Washington, and Wyoming.

Eastern Region: Alabama, Arkansas, Connecticut, Delaware, District of Columbia, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Puerto Rico, South Carolina, Rhode Island, Tennessee, Vermont, Virginia, Virgin Islands, West Virginia, and Wisconsin.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79 (48 FR 29158; June 24, 1983). The objective of the Executive Order is to foster an intergovernmental partnership and a strengthened federalism by relying on State and local government coordination and review of proposed Federal financial assistance.

In accordance with the Order, this document is intended to provide early notification of the Department's specific plans and action for this program.

(20 U.S.C. 1424a)

(Catalog of Federal Domestic Assistance Number 84.078; Postsecondary Education Programs for Handicapped Persons)

Dated: May 12, 1986.

William J. Bennett,

Secretary of Education.

LIST OF PUBLIC LAWS

Last List May 13, 1986

This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202-275-3030).

H.R. 1116/Pub. L. 99-294

Garrison Diversion Unit Reformulation Act of 1986. (May 12, 1986; 100 Stat. 418; 9 pages) Price: $1.00

S. 1952/Pub. L. 99-295

Young Astronaut Program Medal Act. (May 12, 1986; 100 Stat. 427; 2 pages) Price: $1.00

S.J. Res. 187/Pub. L. 99-296

Designating Patrick Henry's last home and burial place, known as Red Hill, in the Commonwealth of Virginia, as a National Memorial to Patrick Henry. (May 12, 1986; 100 Stat. 429; 2 pages) Price: $1.00

S.J. Res. 285/Pub. L. 99-297

To designate the week of May 11, 1986, through May 17, 1986, as "National Osteoporosis Awareness Week of 1986". (May 12, 1986; 100 Stat. 431; 1 page) Price: $1.00

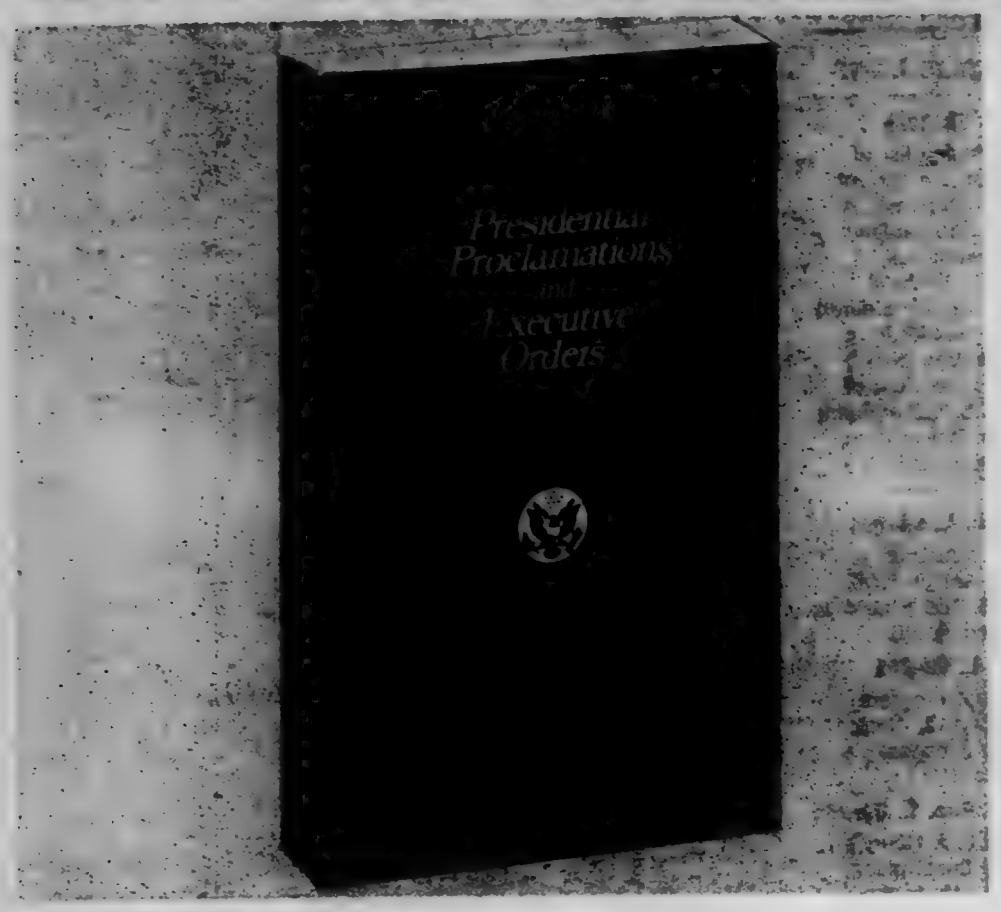
S. 2309/Pub. L. 99-298

To authorize the President of the United States to award congressional gold medals to Natan (Anatoly) and Avital Shcharansky in recognition of their dedication to human rights, and to authorize the Secretary of the Treasury to sell bronze duplicates of those medals. (May 13, 1986; 100 Stat. 432; 2 pages) Price: $1.00

BEST COPY AVAILABLE

VOL 51 ISS 94 MY 15 1986 UMI

New edition now available....



For those of you who must keep informed about **Presidential Proclamations and Executive Orders**, there is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period January 20, 1961, through January 20,1985, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1961-1985 period—along with any amendments—an indication of its current status, and, where applicable, its location in this volume.

Published by the Office of the Federal Register, National Archives and Records Administration

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 51, No. 95
Friday, May 16, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1240

Honey Research, Promotion, and Consumer Information Order; Final Procedures for the Conduct of Referenda and Rules of Practice Governing Proceedings on Petitions To Modify or To Be Exempted From Such Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Honey Research, Promotion, and Consumer Information Act (7 U.S.C. 4601–4612) authorizes a program of research and promotion to be developed through the promulgation of an order. Based on evidence received at a public hearing, the U.S. Department of Agriculture recently concluded that an order be issued. To become effective, however, the order must be approved by honey producers and importers in a referendum. This rule establishes procedures for the conduct of referenda and rules of practice governing proceedings on petitions to modify or to be exempted from the order.

EFFECTIVE DATE: May 16, 1986.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, Washington, DC 20250, (202) 447–5697.

SUPPLEMENTARY INFORMATION: This rule has been reviewed under USDA guidelines implementing Executive Order 12291 and Departmental Regulation 1512-1 and has been designated a "non-major" rule under criteria contained therein. Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities. The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened.

The Honey Research, Promotion, and Consumer Information Order and rules issued thereunder are unique in that they are brought about through group action of essentially small entities for their own benefit. The great majority of handlers and importers of honey or honey products may be classified as small entities. While this action may impose some costs on affected handlers and importers and the number of such firms may be substantial, the added burden on small entities, if present at all, is not significant. Furthermore, an exemption from regulation is provided for small producers, producer-packers, and importers who produce or import less than 6,000 pounds of honey or honey products annually.

The Honey Research, Promotion, and Consumer Information Act (Pub. L. 98–590, 98th Congress, approved October 30, 1984, 7 U.S.C. 4601–4612) authorizes the development of a nationally coordinated program of research, promotion, and consumer education designed to expand markets for honey and honey products. A public hearing was held on a proposed honey research, promotion, and consumer information order in July of 1985. Based on the record of the hearing, a recommended decision and a final decision were issued which concluded that the proposed order would effectuate the purposes of the Act. The final decision directed that a referendum be conducted among producers and importers to determine whether they favor the proposed order. This final rule sets forth, among other things, procedures for the conduct of such referendum.

A rule proposing this action was published in the April 2, 1986 issue of the **Federal Register** (51 FR 11313) which provided a comment period which ended April 17, 1986. Two comments were received. Binford Weaver, Chairman of the Honey Research, Promotion, and Consumer Information Order Promulgation Committee and Frank A. Robinson, Secretary-Treasurer, American Beekeeping Federation, Inc., submitted written comments on the proposed rulemaking. Both commentors suggested that in deciding how balloting is to be done, a combination of polling places and mail ballots would be the most satisfactory for beekeepers because those who were near their polling place could cast their ballots there, while others could handle it entitely by mail. However, it has been determined that the referendum will be conducted during the period May 19–31, 1986, by mail ballot and not at polling places. This procedure is not expected to cause any inconvenience to producers since ballots will be mailed to all known eligible producers and importers of honey. In addition, ballots will be available at county Agricultural Stabilization and Conservation offices. All ballots must be returned to the Secretary's designated referendum agents in Washington, D.C. for tabulation and verification.

Mr. Robinson also objected to the definition of "Eligible producer" in § 1240.201(h) of the Subpart-Procedure for the Conduct of Referenda. He correctly pointed out that a producer eligible to participate in a referendum under the proposed order should include any person defined as a producer under the Act and order and not exempt from assessments under section 7(e)(2) of the Act (i.e. a producer or producer-packer who produces, or handles, or produces and handles 6,000 pounds or more of honey each year.) The proposal defined an eligible producer as a person with total *sales* of 6,000 pounds or more. Therefore, the definition of "Eligible producer" in § 1240.201(h) is revised accordingly.

The definition of "Eligible importer" should also be modified by inserting the word "importation" into the definition of "Eligible importer" in place of the word "sales" in § 1240.201(i) to conform with the Act and the proposed order.

The referendum is scheduled to be conducted May 19–31, 1986, and these procedures need to be finalized in order to make preparations to conduct the referendum. Therefore, this rule is to become effective upon publication in the **Federal Register.**

This action also establishes rules for proceedings on petitions to modify or be exempted from the order. Such procedures are necessary to meet the requirements of the Act.

List of Subjects in 7 CFR Part 1240

Honey, Agricultural research, Reporting and recordkeeping requirements, Market development, and Consumer information.

Part 1240 is added to 7 CFR Ch. XI to read as follows:

PART 1240—HONEY RESEARCH, PROMOTION, AND CONSUMER INFORMATION ORDER

Subpart—Procedure for the Conduct of Referenda in Connection With the Honey Research, Promotion, and Consumer Information Order

Subpart—Rules of Practice Governing Proceedings on Petitions to Modify or To Be Exempted From the Honey Research, Promotion, and Consumer Information Order

1240.250 Words in the singular form.
1240.251 Definitions.
1240.252 Institution of proceeding.

Authority: Pub. L. 98–500, 7 U.S.C. 4601–4612.

Subpart—Procedure for the Conduct of Referenda in Connection With the Honey Research, Promotion, and Consumer Information Order

§ 1240.200 General.

Referenda to determine whether eligible producers and importers favor the issuance, continuance, termination, or suspension of a Honey Research, Promotion, and Consumer Information Order shall be conducted in accordance with this subpart.

§ 1240.201 Definitions.

(a) "Act" means the Honey Research, Promotion, and Consumer Information Act, Pub. L. 98–590, 98th Congress, approved October 30, 1984, 7 U.S.C. 4601–4612.

(b) "Secretary" means the Secretary of Agriculture of the United States, or any officer or employee of the Department to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated, to act in the Secretary's stead; and "Department" means the U.S. Department of Agriculture.

(c) "Administrator" means the Administrator of the Agricultural Marketing Service, with power to redelegate, or any officer or employee of the Department to whom authority has been delegated or may hereafter be delegated to act in the Administrator's stead.

(d) "Order" means the order (including an amendment to the order) with respect to which the Secretary has directed that a referendum be conducted.

(e) "Referendum agent" means the individual or individuals designated by the Secretary to conduct the referendum.

(f) "Representative period" means the period designated by the Secretary pursuant to section 12 of the Act.

(g) "Person" means any individual, group of individuals, partnership, corporation, association, cooperative, or any other entity. For the purpose of this definition, the term "partnership" includes, but is not limited to: (1) A husband and wife who have title to, or leasehold interest in, honey bee colonies or beekeeping equipment as tenants in common, joint tenants, tenants by the entirety, or, under community property laws, as community property, and (2) so-called "joint ventures" wherein one or more parties to the agreement, informal or otherwise, contributed capital and others contribute labor, management, equipment, or other services, or any variation of such contributions by two or more parties, so that it results in the production or importation of honey or honey products for market and the authority to transfer title to the honey and honey products so produced or imported.

(h) "Eligible producer" means any person defined as a producer or producer-packer in the order who produces, or handles, or produces and handles 6,000 pounds or more of honey or honey products during the representative period and who: (1) Owns or shares in the ownership of honey bee colonies or beekeeping equipment resulting in the ownership of the honey produced; (2) rents honey bee colonies or beekeeping equipment resulting in the ownership of all or a portion of the honey produced; or (3) owns honey bee colonies or beekeeping equipment but does not manage them and, as compensation, obtains the ownership of a portion of the honey produced; (4) is a party in a lessor-lessee relationship or a divided ownership arrangement involving totally independent entities cooperating only to produce honey who share the risk of loss and receive a share of the honey produced. No other acquisition of legal title to honey shall be deemed to result in persons becoming eligible producers.

(i) "Eligible importer" means any person defined as an importer in the order, engaged in the importation of honey and/or honey products with total importation of 6,000 pounds or more during the representative period. Importation occurs when commodities originating outside the States are released from custody of the U.S. Customs Service and introduced into the stream of commerce within the States. Included are persons who hold title to foreign-produced honey and/or honey products immediately upon release by the Customs Service, as well as any persons who act on behalf of others, as agents or brokers, to secure the release of honey and/or honey products from Customs and introduce them into the current of commerce.

(j) "Honey Board" means the administrative board provided for under section 7(c) of the Act.

§ 1240.202 Voting.

(a) Each person who is an eligible producer or importer, as defined in this subpart, at the time of the referendum and during the representative period, shall be entitled to only one vote in the referendum. However, each producer in a landlord-tenant relationship or a divided ownership arrangement involving totally independent entities cooperating only to produce honey and/or honey products, in which more than one of the parties is a producer, shall be entitled to one vote in the referendum covering only his or her share of the ownership.

(b) Proxy voting is not authorized, but an officer or employee of a eligible corporate producer or importer, or an administrator, executor, or trustee of an eligible producing or importing estate may cast a ballot on behalf of such producer, importer or estate. Any individual so voting in a referendum shall certify that he or she is an officer or employee of the eligible producer or importer, or an administrator, executor, or trustee of an eligible producing or importing estate, and that he or she has the authority to take such action. Upon request of the referendum agent, the individual shall submit adequate evidence of such authority.

(c) Each eligible producer and importer shall be entitled to cast only one ballot in the referendum.

§ 1240.203 Instructions.

The referendum agent shall conduct the referendum, in the manner herein provided, under supervision of the Administrator. The Administrator may prescribe additional instructions, not inconsistent with the provisions hereof, to govern the procedure to be followed by the referendum agent. Such agent shall:

(a) Determine the time of commencement and termination of the period of the referendum, and the time when all ballots may be cast.

(b) Determine whether ballots may be cast by mail, at polling places, at meetings of producers or importers, or by any combination of the foregoing.

(c) Provide ballots and related material to be used in the referendum. Ballot material shall provide for recording essential information including that needed for ascertaining: (1) Whether the person voting, or on whose behalf the vote is cast, is an eligible voter, (2) the amount of honey produced by the voting producer during the representative period, (3) the total volume of honey and/or honey products produced and/or imported during the representative period, and (4) in a joint venture, names of the parties and each one's share of ownership.

(d) Give reasonable advance notice of the referendum: (1) By utilizing available media or public information sources without advertising expense (including but not limited to, press and radio facilities) announcing the dates, places, or methods of voting, eligibility requirements, and other pertinent information, and (2) by such other means as said agent may deem advisable.

(e) Make available to eligible producers and importers the instructions on voting, appropriate ballot and certification forms, and, except in the case of a referendum on the termination or continuance of an order, a summary of the terms and conditions of the order: *Provided,* That no person who claims to be eligible to vote shall be refused a ballot.

(f) If ballots are to be cast by mail, cause all the material specified in paragraph (e) of this section to be mailed to each eligible producer and importer whose name and address is known to the referendum agent.

(g) If ballots are to be cast at polling places or meetings, determine the necessary number of polling or meeting places, designate them, announce the time of each meeting or the hours during which each polling place will be open, provide the material specified in paragraph (e) of this section, and provide for appropriate custody of ballot forms and delivery to the referendum agent of ballot cast.

(h) At the conclusion of the referendum, canvass the ballots, tabulate the results, and except as otherwise directed, report the outcome to the Administrator and promptly thereafter submit the following:

(1) All ballots received by the agent and appointees, together with a certificate to the effect that the ballots forwarded are all of the ballots cast and received by such persons during the referendum period;

(2) A list of all challenged ballots deemed to be invalid; and

(3) A tabulation of the results of the referendum and a report thereon, including a detailed statement explaining the method used in giving publicity to the referendum and showing other information pertinent to the manner in which the referendum was conducted.

§ 1240.204 Subagents.

The referendum agent may appoint any person or persons deemed necessary or desirable to assist said agent in performing his or her functions hereunder. Each person so appointed may be authorized by said agent to perform, in accordance with the requirements herein set forth, any or all of the following functions (which, in the absence of such appointment, shall be performed by said agent):

(a) Give public notice of the referendum in the manner specified herein;

(b) Preside at a meeting where ballots are to be cast or as poll officer at a polling place;

(c) Distribute ballots and the aforesaid texts to producers and importers and receive any ballots which are cast; and

(d) Record the name and address of each person receiving a ballot from, or casting a ballot with, said subagent and inquire into the eligibility of such person to vote in the referendum.

§ 1240.205 Ballots.

The referendum agent and his or her appointees shall accept all ballots cast; but, should they, or any of them, deem that a ballot should be challenged for any reason, said agent or appointee shall endorse above his or her signature, on said ballot, a statement to the effect that such ballot was challenged, by whom challenged, the reasons therefor, the results of any investigations made with respect thereto, and the disposition thereof. Ballots invalid under this subpart shall not be counted.

§ 1240.206 Referendum report.

Except as otherwise directed, the Administrator shall prepare and submit to the Secretary a report on results of the referendum, the manner in which it was conducted, the extent and kind of public notice given, and other information pertinent to analysis of the referendum and its results.

§ 1240.207 Confidential information.

All ballots cast and the contents thereof (whether or not relating to the identity of any person who voted or the manner in which any person voted) and all information furnished to, compiled by, or in possession of, the referendum agent shall be treated as confidential.

Subpart—Rules of Practice Governing Proceedings on Petitions to Modify or To Be Exempted From the Honey Research, Promotion, and Consumer Information Order

§ 1240.250 Words in the singular form.

Words in this subpart in the singular form shall be deemed to import the plural, and vice versa, as the case may demand.

§ 1240.251 Definitions.

As used in this subpart, the terms as defined in the Act shall apply with equal force and effect. In addition unless the context otherwise requires:

(a) The term "Act" means the Honey Research, Promotion, and Consumer Information Act, Pub. L. 98–590, 98th Congress, approved October 30, 1984, 7 U.S.C. 4601–4612;

(b) The term "Department" means the U.S. Department of Agriculture;

(c) The term "Secretary" means the Secretary of Agriculture of the United States, or any officer or employee of the Department to whom authority has heretofore been delegated, or to whom authority may hereinafter be delegated, to act in the Secretary's stead;

(d) The term "judge" means any Administrative Law Judge in the Office of Administrative Law Judges, U.S. Department of Agriculture;

(e) The term "Administrator" means the Administrator of the Agricultural Marketing Service, with power to redelegate, or any officer or employee of the Department to whom authority has been delegated, or may hereafter be delegated, to act in the Administrator's stead;

(f) The term "order" means any order or any amendment thereto which may be issued pursuant to the Act;

(g) The term "person" means any individual, group of individuals, partnership, corporation, association, cooperative, or other entity subject to an order or to whom an order is sought to be made applicable, or on whom an obligation has been imposed or is sought to be imposed under an order;

(h) The term "proceeding" means a proceeding before the Secretary arising under Section 10 of the Act;

(i) The term "hearing" means that part of the proceeding which involves the submission of evidence;

(j) The term "party" includes the Department;

(k) The term "hearing clerk" means the Hearing Clerk, U.S. Department of Agriculture, Washington, DC;

(l) The term "decision" means the judge's report to the Secretary and includes the judge's proposed: (1) Findings of fact and conclusions with respect to all material issues of fact, law or discretion, as well as the reasons or basis therefor, (2) order, and (3) rulings on findings, conclusions, and orders submitted by the parties; and

(m) The term "petition" includes an amended petition.

§ 1240.252 Institution of proceeding.

(a) *Filing and service of petitions.* Any person subject to an order desiring to complain that any order or any provision of any such order or any obligation imposed in connection therewith is not in accordance with law, shall file with the hearing clerk, in quintuplicate, a petition in writing addressed to the Secretary. Promptly upon receipt of the petition, the hearing clerk shall transmit a true copy thereof to the Administrator and the General Counsel, respectively.

(b) *Contents of petitions.* A petition shall contain:

(1) The correct name, address, and principal place of business of the petitioner. If the petitioner is a corporation, such fact shall be stated, together with the name of the State of incorporation, the date of incorporation, and the names, addresses, and respective positions held by its officers and directors; if an unincorporated association, the names and addresses of its officers, and the respective positions held by them; if a partnership; the name and address of each partner;

(2) Reference to the specific terms or provisions of the order, or the interpretation or application thereof, which are complained of;

(3) A full statement of the facts (avoiding a mere repetition of detailed evidence) upon which the petition is based, and which it is desired that the Secretary consider, setting forth clearly and concisely the nature of the petitioner's business and the manner in which petitioner claims to be affected by the terms or provisions of the order or the interpretation or application thereof, which are complained of;

(4) A statement of the grounds on which the terms or provisions of the order, or the interpretation or application thereof, which are complained of, are challenged as not in accordance with law; and

(5) Requests for the specific relief which the petitioner desires the Secretary to grant.

(c) *A motion to dismiss petition—(1) Filing, contents, and responses thereto.* If the Administrator is of the opinion that the petition, or any portion thereof, does not substantially comply, in form or content, with the Act or with requirements of paragraph (b) of this section, the Admininstrator may, within 30 days after the filing of the petition, file with the hearing clerk a motion to dismiss the petition, or any portion thereof, on one or more of the grounds stated in this paragraph. Such motion shall specify the grounds of objection to the petition and if based, in whole or in part, on allegations of fact not appearing on the face of the petition, shall be accompanied by appropriate affidavits or documentary evidence substantiating such allegations of fact. The motion may be accompained by a memorandum of law. Upon receipt of such motion, the hearing clerk shall cause a copy thereof to be served upon the petitioner, together with a notice stating that all papers to be submitted in opposition to such motion, including any memorandum of law, must be filed by the petitioner with the hearing clerk not later than 20 days after the service of such notice upon the petitioner. Upon the expiration of the time specified in such notice, or upon receipt of such papers from the petitioner, the hearing clerk shall transmit all papers which have been filed in connection with the motion to the judge for his/her consideration.

(d) *Further proceedings.* Further proceedings on petitions to modify or to be exempted from the order shall be governed by §§ 900.52(c)(2) through 900.71 of this title (Rules of Practice Governing Proceedings on Petitions to Modify or to be Exempted From Marketing Orders) and as may hereafter be amended, and the same are incorporated herein and made a part hereof by reference. However, each reference to "marketing order" in the title shall mean "order".

Dated: May 28, 1986.

Joseph A. Gribbin,

Director, Fruit and Vegetable Division.

BILLING CODE 3410-02-M

Farmers Home Administration

7 CFR Part 1806

Multiple Family Housing; Real Property Insurance

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) amends its regulations governing the Real Property Insurance loss deductible clause for Multiple Family Housing Loan and Grant recipients. This action is taken to provide flexibility in selection of the level of loss deductible and keep insurance premiums at reasonable amounts. The intended effect is to help hold tenant rents from unreasonable escalation.

EFFECTIVE DATE: June 16, 1986.

FOR FURTHER INFORMATION CONTACT: James D. Tucker, Branch Chief, Multiple Family Housing Servicing and Property Management (MHSPM) Division, USDA, Room 5321–S, Farmers Home Administration, 14th and Independence Avenue, SW., Washington, DC 20250. Telephone: (202) 382–1618.

SUPPLEMENTARY INFORMATION:

Classification

This action has been reviewed under USDA procedures established in Departmental Regulation 1512–1 which implements Executive Order 12291, and has been determined "nonmajor." It will not result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions, or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States based enterprises to compete with foreign-based enterprises in domestic or export markets.

Environmental Impact Statement

This document has been reviewed according to 7 CFR Part 1940, Subpart G, "Environmental Program." It is determined by FmHA that this action does not constitute a major Federal action significantly affecting the quality of the human environment and according to the National Environmental Policy Act of 1969, Pub. L. 91–190, an Environmental Impact Statement is not required.

Intergovernmental Review

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.405, Farm Labor Housing Loans and Grants; 10.415, Rural Rental Housing Loans; and 10.427, Rural Rental Assistance Payments. For the reasons set forth in the final rule related notice(s) to 7 CFR Part 3015, Subpart V, 48 FR 29115, June 24, 1983, the program/activity is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Regulatory Flexibility Act

Vance L. Clark, Administrator, has determined that this action will not have a significant economic impact on a substantial number of small entities because it contains normal business recordkeeping requirements and minimal essential reporting requirements.

General Information

Background and Statutory Authority

This subpart prescribes the authorization, methods, and procedures for obtaining and servicing property insurance on buildings on owned or leased land securing the interest of Farmers Home Administration (FmHA) in connection with Farmer Program (FP), Rural Housing (RH), Labor Housing (LH), Rural Rental Housing (RRH), Rural Cooperative Housing (RCH), Recreation Loans (RL), Other Real Estate (ORE), Soil and Water (SW), Timber Development (TD), and Land Conservation and Development (LCD) loans. Farmer Program means direct and insured individual farm real estate, operating and emergency loans secured by real estate.

This change is to revise the amount of loss deductible allowable on Real Property Insurance Policies covering buildings securing RRH, RCH, and LH organization type loans securing FmHA financed projects.

FmHA has recently received a number of examples where dramatic increases in insurance premiums have adversely impacted the financial conditions of MFH projects. This rule is one response to this increase. By allowing for increased deductibles, a significant savings can be obtained for FmHA projects and tenants. This change will allow borrowers to purchase less expensive insurance.

Response to Public Comments

FmHA published a proposed rule on September 12, 1985 (50 FR 37200). The comment period ended November 12, 1985. FmHA received four comments on the proposed rule. All comments supported the change. Two of the commenters expressed a need to revise the proposed rules.

Both commenters wanted to be assured that FmHA will allow the use of funds from the replacement reserve account to cover the amount of the deductible, if needed. Current regulations (7 CFR Part 1930, Subpart C, Exhibit B, Paragraph XIIIB2c(5)(ii)), permit this and we find no need for additional regulatory clarification.

Both commenters were also concerned that FmHA grant quick rent increases to pay increased premiums or allow replacement reserve account funds to be used to pay rapidly escalating insurance premium costs. We find neither action is needed since there exists ample time within the current rent change process.

Both commenters felt that the escrow requirement to increase the deductible beyond Option (1) and (2), could be burdensome on financially troubled projects. We point out that increasing the deductible by an amount that would require an escrowed amount is entirely optional for a particular borrower and can be done only after FmHA feels it is a prudent action. Consequently, we find no reason to change this stipulation.

One commenter went further and expressed concern that borrowers recoup any funds that they deposit themselves in the replacement reserve account as an escrow to increase the amount of the deductible. While this rule does not encourage the use of borrower funds to increase the escrow, we have provided that they can be used and recouped based on actual savings. Again, the escrow increase in the replacement reserve account is a voluntary decision and the regulation is written to encourage borrowers to do this only when real savings in insurance can be obtained. Consequently, we have made no change in this requirement.

All comments indicated some confusion over the functions of Options (3) and (4), so they have been rewritten for clarification. Our intent is to require that only the amount needed to increase the deductible beyond the amount specified in Options (1) and (2) be placed in escrow in the project's reserve account. The deductible amount up to the maximum levels of Options (1) and (2) do need to be escrowed.

Finally, one commenter stated that FmHA should consider the establishment of "in-house" insurance to lower the cost of MFH insurance premiums. While the idea has merit, we choose not to consider it in the context of this particular rule making action.

List of Subjects in 7 CFR Part 1806

Insurance, Loan programs—Agriculture, Real property insurance, Rural areas.

Therefore, Subpart A of Part 1806, Chapter XVIII, Title 7, Code of Federal Regulations is amended as follows:

PART 1806—INSURANCE

1. The authority citation for Part 1806 is revised to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

2. In § 1806.2, paragraph (d)(1)(iii) is revised to read as follows:

§ 1806.2 Companies and policies.

* * * * *

(d) * * *

(1) * * *

(iii) *Loss Deductible Clause.* (A) For all loans other than RRH, RCH, and LH organizations this clause generally provides that loss to each building to the extent of the limitation is not recoverable. The company is liable only for loss to each building in excess of such limitation stated in the clause. This clause may be accepted where the limitation does not exceed $150, or one percent of the insurance coverage whichever is greater. In no case, however, may the limitation on any one building exceed $500.00.

(B) For RRH, RCH, and LH organization loans this clause generally provides that loss to each project to the extent of the limitation is not recoverable. The company is liable only for loss to each project in excess of such limitation stated in the clause. This clause may be accepted where the limitation does not exceed the option shown below that is chosen by the borrower and agreed to by the Loan Approving Official and properly annotated in the borrower file. The borrower and FmHA Official should consider the economic impact to the project when selecting the appropriate option.

(*1*) Option 1—Up to one-fourth of one percent (0.0025) of the insurable value. Maximum deductible $5,000.

(*2*) Option 2—Up to a maximum deductible of $500 on any project with an insurable value not exceeding $200,000.

(*3*) Option 3—Option 1 may be chosen and increased above the maximum deductible by an amount equivalent to funds specifically escrowed in the project replacement reserve account as an offset to the increased deductible.

(*4*) Option 4—Option 2 may be chosen and increased above the maximum

deductible by an amount equivalent to funds specifically escrowed in the project replacement reserve account as an offset to the increased deductible.

(5) The funds used to increase the deductible in Option 3 or Option 4 may be from project funds if it does not create an unsecure financial situation for the project. Also, non-project funds may be used for Option 3 or 4 and then repaid by withdrawal from the project at the rate of 75 percent of the annual insurance premium savings earned by the amount of escrow deposit, up to the amount deposited.

(6) The funds escrowed to increase the authorized deductible will be placed in the project reserve account as an increased amount in and above the amount required by the Loan Agreement/Resolution and so annotated in the borrower's accounting system.

Single and Multipe Family Housing and Farmer Program Loans; Interest Rates

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule; correction.

SUMMARY: The Farmers Home Administration (FmHA) corrects a final rule published February 20, 1986 [51 FR 6731]. In this rule, FmHA implemented the provisons of Pub. L. 99-88 for Single and Multiple Family Housing and Farmer Program Loans. A provision of Pub. L. 99-88 provides that applicants requesting FmHA assistance have the right to request that their FmHA loan close at the lower of the interest rates in effect at the time of loan approval or loan closing. In the preamble to the final rule, FmHA mistakenly stated that Pub. L 99-88 applies to transfers with assumption and credit sales. Pub. L. 99-88 does not apply to transfers with assumption or credit sales, however, FmHA administratively elected to adopt the regulation with provisions similar to those of Pub. L. 99-88 for credit sales involving Single Family Housing (SFH), Multiple Family Housing (MFH) and Farmer Program (FP) loans. Additionally, FmHA has administratively elected to adopt the provisions of Pub. L. 99-88 for transfers with assumption involving only SFH and FP loans. The intended effect of this action is to correct the aforementioned preamble of the final rule, by providing a correct interpretation of Pub. L. 99-88 and clarify the Agency's implementation of same.

FOR FURTHER INFORMATION CONTACT: David J. Villano, Senior Realty Specialists, Property Management Branch, Single Family Housing Servicing and Property Management Division, Farmers Home Administration, USDA, South Agriculture Building, Room 5309, Washington, DC 20250. Telephone: (202) 382-1452.

Dated: May 8, 1986.

BILLING CODE 3410-07-M

Animal and Plant Health Inspection Service

9 CFR Part 78

[Docket No. 86-042]

Brucellosis in Cattle; State and Area Classifications

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Interim rule.

SUMMARY: This document amends the regulations governing the interstate movement of cattle because of brucellosis by changing the classification of the States of New Jersey and West Virginia from Class A to Class Free. This action is necessary because it has been determined that these States meet the standards for Class Free status. The effect of this action is to relieve certain restrictions on the interstate movement of cattle from the States of New Jersey and West Virginia.

DATES: Effective date of the interim rule is May 16, 1986. Written comments must be received on or before July 15, 1986.

ADDRESSES: Written comments should be submitted to Thomas O. Gessel, Director, Regulatory Coordination Staff, APHIS, USDA, Room 728, Federal Building, Hyattsville, MD 20782. Comments should state that they are in response to Docket Number 86-042. Written comments may be inspected at Room 728 of the Federal Building between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. M.J. Gilsdorf, Cattle Diseases Staff, VS, APHIS, USDA, Room 817, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-5961.

SUPPLEMENTARY INFORMATION:

Background

The brucellosis regulations (contained in 9 CFR Part 78 and referred to below as the regulations) provide a system for classifying States or portions of States according to the rate of brucella infection present and the general effectiveness of a brucellosis control and eradication program. The classifications are Class Free, Class A, Class B, and Class C. States or Areas which do not meet the minimum standards for Class C are required to be placed under Federal quarantine. This document changes the classification of the States of New Jersey and West Virginia from Class A to Class Free.

The brucellosis Class Free classification is based on a finding of no known brucellosis in cattle for the period of 12 months preceding classification as Class Free. The Class C classification is for States or Areas with the highest rate of brucellosis, with Classes A and B in between. Restrictions on the movement of cattle are more stringent for movements from Class A States or Areas compared to movements from Free States or Areas, and are more stringent for movements from Class B States or Areas compared to movements from Class A States or Areas, and so on. The restrictions include testing for movement of certain cattle from other than Class Free States or Areas.

The basic standards for the different classifications of States or Areas concern maintenance of: (1) A State or Area-wide accumulated 12 consecutive month herd infection rate not to exceed a stated level; (2) a Market Cattle Identification (MCI) reactor prevalence rate not to exceed a stated rate (this concers the testing of cattle at auction markets, stockyards, and slaughtering establishments); (3) a surveillance system which includes a testing program for dairy herds and slaughtering establishments, and provisions for identifying and monitoring herds at high risk of infection, including herds adjacent to infected herds and herds from which infected animals have been

sold or received under approved action plans; and (4) minimum procedural standards for administering the program.

Prior to the effective date of this document, the States of New Jersey and West Virginia were classified as Class A States. It had been necessary to classify these States as Class A rather than Class Free because of the herd infection rate. To attain and maintain Class Free states, a State or Area must, among other things, remain free from brucellosis in cattle for the preceding 12-month period and the adjusted MCI reactor prevalence rate for such 12-month period must not exceed one reactor per 2,000 cattle tested (0.050 percent). A review of brucellosis program records establishes that the States of New Jersey and West Virginia should be changed to Class Free since these States now meet the criteria for classification as Class Free.

Executive Order and Regulatory Flexibility Act

This rule is issued in conformance with Executive Order 12291 and has been determined to be not a major rule. Based on information compiled by the Department, it has been determined that this rule will not have a significant effect on the economy, will not cause a major increase in costs or prices for consumers, individuals industries, Federal, State, or local government agencies, or geographic regions; and will not cause adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this action, the Office of Management and Budget has waived its review process required by Executive Order 12291.

Cattle moved interstate are moved for slaughter, for use as breeding stock, or for feeding. Changing the status of the States of New Jersey and West Virginia reduces certain requirements on the interstate movement of these cattle. Cattle from Certified Brucellosis-Free Herds moving interstate are not affected by the change in status. It has been determined that the changes in brucellosis status made by this document will not affect marketing patterns and will not have a significant economic impact on those persons affected by this document.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Effective Date

Dr. John K. Atwell, Deputy Administrator of the Animal and Plant Health Inspection Service for Veterinary Services, has determined that an emergency situation exists which warrants publication of this interim rule without prior opportunity for public comment. Immediate action is warranted in order to delete unnecessary restrictions on the interstate movement of certain cattle from the States of New Jersey and West Virginia.

Further, pursuant to the administrative procedure provisions in 5 U.S.C. 533, it is found upon good cause that prior notice and other public procedures with respect to this interim rule are impracticable and contrary to the public interest, and good cause is found for making this interim rule effective less than 30 days after publication of this document in the Federal Register.

Comments have been solicited for 60 days after publication of this document. A document discussing comments received and any amendments required will be published in the Federal Register.

List of Subjects in 9 CFR Part 78

Animal diseases, Brucellosis, Cattle, Hogs, Quarantine, Transportation.

PART 78—BRUCELLOSIS

Accordingly, 9 CFR Part 78 is amended as follows:

1. The authority citation for Part 78 continues to read as follows:

Authority: 21 U.S.C. 111–114a–1, 114g, 115, 117, 120, 121, 123–126, 134b, 134f; 7 CFR 2.17, 2.51, and 371.2(d).

§ 78.20 [Amended]

2. Section 78.20(a) is amended by adding "New Jersey;" immediately before "New York" and by adding "West Virginia;" immediately before "Wisconsin".

3. In § 78.20(b), "New Jersey," is removed and "Washington, and West Virginia" is changed to "and Washington."

Done at Washington, D.C., this 8th day of May 1986.

J. K. Atwell,

Deputy Administrator, Veterinary Services.

14 CFR Part 39

[Docket No. 85-ANE-14; Amdt. 39-5299]

Airworthiness Directives; Avco Lycoming LTS 101-600A-2, -600A-3, -650A-2, -650B-1, -650B-1A, -650C-2, -650C-3, -650-3A, -750A-1, -750A-3, -750B-2, and -750C-1 Turboshaft; and LTP101-600A-1A, and -700A-1A Turboprop Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule, request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires installation of an improved gas producer (G.P.) turbine rotor assembly incorporating metal blade dampeners on certain Avco Lycoming LT101 series turboshaft and turboprop engines. This AD is needed to reduce G.P. blade virbratory stresses to prevent blade failure leading to in-flight shutdowns.

DATE: Effective—May 16, 1986.

Compliance schedule—As prescribed in body of the AD.

Comments for inclusion in the docket must be received on or before June 16, 1986.

Incorporation by Reference—Approved by the Director of the Federal Register on May 16, 1986.

ADDRESSES: Comments on the amendment may be mailed in duplicate to: Federal Aviation Administration, New England Region, Office of the Regional Counsel, Attention: Rules Docket Number 86–ANE–14, 12 New England Executive Park, Burlington, Massachusetts 01803.

or delivered in duplicate to Room Number 311 at the above address.

Comments delivered must be marked: Docket Number 86–ANE–14.

Comments may be inspected at the New England Regional Office, Office of the Regional Counsel, Room Number 311, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

The applicable service bulletin (SB) may be obtained from Avco Lycoming Williamsport Division, 652 Oliver Street, Williamsport, Pennsylvania 17701. Attention: Customer Support.

A copy of the SB is contained in Rules Docket Number 86–ANE–14 in the Office of the Regional Counsel, New England Region, Federal Aviation Administration, 12 New England

Executive Park, Burlington, Massachusetts 01803, and may be examined between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Robbin Goulet, Engine Certification Branch, ANE-141, Engine Certification Office, Aircraft Certification Division, New England Region, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803, telephone (617) 273-7069.

SUPPLEMENTARY INFORMATION: The FAA has determined that the G.P. turbine blades in certain Avco Lycoming LT101 series turboshaft and turboprop engines are susceptible to excessive vibratory stresses in the speed range from 87 percent to 89 percent G.P. turbine speed.

Installation of the dampeners, between the turbine disc outer diameter and the underside of the blade platform, will reduce the vibratory stresses in the G.P. blades to an acceptable level. There have been 44 incidents of G.P. turbine blade failures. Fractures occur in the G.P. turbine blade shank, just above the ball root (blade attachment). Fatigue cracks initiate by high cycle fatigue. The blade life at time of failure has ranged from 110 hours to 1,211 hours. All G.P. blade failures have been contained. Seven of the 44 cases have resulted in airframe damage due to forced landings. Due to a higher failure rate, the compliance end date is more restrictive for the LTS101-600A-2, -600A-3, and -750C-1 engine models as compared to the other affected LT101 series engine models.

Since this condition is likely to exist or develop on other engines of the same type design, an AD is being issued which requires installation of an improved G.P. turbine rotor assembly incorporating metal blade dampeners on certain Avco Lycoming LT101 series turboshaft and turboprop engines.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impractical, and good cause exists for making this amendment effective in less than 30 days. Although this action is in the form of a final rule which involves requirements affecting immediate flight safety and, thus, was not preceded by notice and public procedures, comments are invited on the rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above.

All communications received on or before the closing date for comments will be considered by the Director. This rule may be amended in light of comments received. Comments that provide a factual basis supporting the views and suggestions presented are particularly helpful in evaluating the effectiveness of the AD and determining whether additional rulemaking is needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available for examination in the Rules Docket at the address given above. A report summarizing each FAA-public contact, concerned with the substance of this AD, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 86-ANE-14". The postcard will be date/time stamped and returned to the commenter.

Conclusion

The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required).

A copy of the final evaluation if filed, may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION CONTACT".

Engines, Air transportation, Aircraft, Aviation safety, Incorporation by reference.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration (FAA) amends Part 39 of the Federal Aviation Regulations (FAR) as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding to § 39.13 the following new airworthiness directive (AD):

Avco Lycoming: Applies to Avco Lycoming model LTS101-600A-2, -600A-3, -650A-2, -650B-1, -650B-1A, -650C-2, -650C-3, -650C-3A, -750A-1, -750A-3, -750B-2, and -750C-1 turboshaft; and LTP101-600A-1A, and -700A-1A turboprop engines.

Compliance is required on or before June 1, 1986, for engine models LTS101-600A-2, -600A-3, and -750C-1; and on or before September 30, 1986, for all other affected LT101 series engine models, unless already accomplished.

To prevent the failure of a gas producer (G.P.) blade due to fatigue cracking from excessive vibratory stresses, incorporate G.P. blade dampeners in accordance with Avco Lycoming Service Bulletin (SB) Number LT101-72-50-0079, Revision 1, dated April 21, 1986, or FAA approved equivalent.

Aircraft may be ferried in accordance with the provisions of FAR Parts 21.197 and 21.199 to a base where the AD can be accomplished.

Upon request, an equivalent means of compliance with the requirements of this AD may be approved by the Manager, Engine Certification Office, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803.

Upon submission of substantiating data by an owner or operator through an FAA maintenance inspector, the Manager, Engine Certification Office, New England Region, may adjust the compliance dates specified in this AD.

Avco Lycoming SB Number LT101-72-50-0079, Revision 1, dated April 21, 1986, identified and described in this document, is incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received this document from the manufacturer may obtain copies upon request to Avco Lycoming Williamsport Division, 652 Oliver Street, Williamsport, Pennsylvania 17701, Attention: Customer Support.

This document also may be examined at the Office of the Regional Counsel, Rules Docket Number 86-ANE-14, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday except Federal holidays.

This amendment becomes effective on May 16, 1986.

Issued in Burlington, Massachusetts, on April 24, 1986.

Robert E. Whittington,

Director, New England Region.

[FR Doc. 86-11002 Filed 5-15-86; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 85-ANE-16; Amdt. 39-5300]

Airworthiness Directives; Pratt & Whitney (PW) JT9D-3A, -7, -7H, -7A, -7AH, -7F, -7J, and -20 Series Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts an airworthiness directive (AD) that requires initial and repetitive eddy current inspections (ECI) of the diffuser case rear rail for cracks and removal of the diffuser case as necessary on certain PW JT9D series turbofan engines. This AD is needed to institute an inspection program that assures timely crack detection to prevent diffuser case rupture that can cause an uncontained engine failure.

DATES: Effective June 16, 1986.

Compliance schedule—As prescribed in body of AD.

Incorporation by Reference—Approved by the Director of the Federal Register on June 16, 1986.

ADDRESSES: The applicable service bulletins (SB's) may be obtained from Pratt & Whitney, Publication Department, P.O. Box 611, Middletown, Connecticut 06457. Copies of the SB's are contained in the Rules Docket Number 85-ANE-16, in the Office of the Regional Counsel, New England Region, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803, and may be examined between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Chris Gavriel, Engine Certification Branch, ANE-141, Engine Certification Office, Aircraft Certification Division, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803, telephone (617) 273-7084.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations (FAR) to include a new AD requiring an initial and repetitive inspections of the diffuser case rear rail and removal of the diffuser case as necessary on PW JT9D-3A, -7, -7H, -7A, -7AH, -7F, -7J, and -20 series turbofan engines was published in the **Federal Register** on June 28, 1985, (50 FR 26788). The proposal was prompted by an uncontained engine failure that was caused by an explosive diffuser case rupture, due to a rear rail crack that propagated undetected to critical length. The FAA has determined that this condition is likely to exist or develop on other engines of the same type design; therefore, a new AD is being issued which requires incorporation of PW SB 5591, Revision 4, dated March 6, 1986, and PW SB 5670, dated March 6, 1986. These SB's specify the procedures and the intervals at which the required inspection should be carried out and the criteria under which the diffuser case must be removed.

Interested persons have been afforded the opportunity to participate in the making of this amendment and due consideration has been given to all relevant data and comments received.

Seven responses were received concerning the proposed rule. Five of those were submitted through one commenter who conducted an industry-wide survey and received responses to the proposed rule. Based on the responses received and upon further review, several substantive changes as well as changes of an editorial and clarifying nature have been made on the proposed rule and the applicable engine manufacturer's SB's.

One commenter agreed with the proposed rule and urged the FAA to expedite rulemaking. The FAA is responding accordingly.

Five commenters requested that a fly back provision should be incorporated to allow adequate scheduling for engine removal and repair, following a confirmation of a three sensor crack. The FAA concurs and has coordinated with the engine manufacturer for the incorporation of such a provision into Revision 4, of PW SB 5591.

Three commenters requested a clarification be made regarding the in-shop inspection requirement for cases separated at "M" flange to require only a rear rail inspection and not an inspection of the entire diffuser case. The FAA concurs and that clarification has been made.

One commenter has requested that the inspection interval be altered for those engines in which PW SB 5055 has been incorporated. The FAA disagrees. During the development of this rule, this concern was addressed with the engine manufacturer. Since there are no conclusive data to support this proposal, a relaxed compliance for those engines is unwarranted.

One commenter requested that post weld repair x-ray data should be analyzed to expand the "C" sensor crack limit. Currently there is no data basis available supporting this proposal. Therefore the FAA will defer this item for consideration when such data becomes available to support an amendment of this rule.

One commenter has requested that a modified inspection requirement be adopted for the the PW JT9D-20 turbofan engine due to its unique design features. In coordination with the engine manufacturer, the FAA has learned that an additonal ECI probe be used to inspect the diffuser case rear rail front face and justifiably relax the repetitive inspection requirement for crack free cases. Since issuance of the Notice of Proposed Rulemaking, PW SB 5670 has been issued to establish the inspection requirements applicable only to the JT9D-20 turbofan engines. Because the inspection requirements of PW SB 5670 are relaxatory relative to the inspection requirements of PW SB 5591, Revision 1, dated May 22, 1985, no further notice is needed. Therefore, the FAA is incorporating the requirements of PW SB 5670, dated March 6, 1986, in this AD.

One commenter has requested minor editorial changes which have been incorporated.

Conclusion

The FAA has determined that this regulation involves 1,731 JT9D engines installed on Boeing 747 series aircraft and 75 JT9D engines installed on McDonnell Douglas DC-10 series 40 aircraft, and the approximate total annual cost is $157,000. It is also determined that few, if any, small entities within the meaning of the Regulatory Flexibility Act will be affected since the rule affects only operators using Boeing 747 aircraft and McDonnell Douglas DC-10 aircraft in which the JT9D engines are installed, none of which are believed to be small entities. Therefore, I certify that this action: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

A copy of the final evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the person

identified under the caption "FOR FURTHER INFORMATION CONTACT".

List of Subjects in 14 CFR Part 39

Engines, Air transportation, Aircraft, Aviation safety, Incorporation by reference.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration (FAA) amends Part 39 of the Federal Aviation Regulations (FAR) as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449 January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding to § 39.13 the following new airworthiness directive (AD):

Pratt & Whitney: Applies to Pratt & Whitney (PW) JT9D-3A, -7, -7H, -7A, -7AH, -7F, -7J, and -20 series turbofan engines.

Compliance is required as indicated, unless already accomplished.

To prevent diffuser case rupture resulting from diffuser case rear rail cracking, accomplish the requirements of the PW Service Bulletin (SB) 5591, Revision 4, dated March 6, 1986, or FAA approved equivalent, for the JT9D-3A, -7, -7H, -7A, -7AH, -7F, and -7J turbofan engines, and the requirements of PW SB 5670, dated March 6, 1986, or FAA approved equivalent, for the JT9D-20 turbofan engines as follows:

(a) Eddy current inspect the diffuser case rear rail for cracks within the next 500 cycles in service after the effective date of this AD.

(b) Reinspect the diffuser case rear rail for cracks, at the established reinspection intervals, as stated in the respective SB's.

(c) Remove from service, prior to further flight, diffuser cases cracked beyond the established acceptable limits as stated in the respective SB's.

(d) Eddy current inspect the diffuser case rear rail for cracks on engines separated at "M" flange, and repair cracked cases, prior to return to service.

Upon request, an equivalent means for compliance with the requirements of this AD may be approved by the Manager, Engine Certification Office, Aircraft Certification Division, New England Region, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803.

Aircraft may be ferried in accordance with the provisions of FAR Parts 21.197 and 21.199 to a base where the AD can be accomplished.

Upon submission of substantiating data by an owner or operator, through an FAA maintenance inspector, the Manager, Engine Certification Office, New England Region, may adjust the compliance schedule specified in this AD.

PW SB Number 5591, Revision 4, dated March 6, 1986, and PW SB 5670, dated March 6, 1986, identified and described in this document, are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1).

All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to Pratt & Whitney Group, Commercial Products Division, 400 Main Street, East Hartford, Connecticut 06108. These documents also may be examined at the Office of Regional Counsel, New England Region, FAA Room Number 311, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday except Federal holidays.

This amendment becomes effective on June 16, 1986.

Issued in Burlington, Massachusetts, on April 25, 1986.

Robert E. Whittington,

Director, New England Region.

[FR Doc. 86-11003 Filed 5-15-86; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 83-ANE-15; Amdt. 39-5301]

Airworthiness Directives; Rolls-Royce, Limited, Spey 555-15, -15H, -15N, and -15P Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which imposes reduced retirement lives for all stage 12 high pressure compressor (HPC) disks, stage 12 HPC rotor seals, and low pressure compressor (LPC) drive shafts, on certain Rolls-Royce Limited, Spey engines. The AD is needed to prevent failure of these components which can result from fatigue cracks. The recalculation of cyclic life using current in-service flight cycle profiles has shown the need to reduce the maximum cyclic life of the components due to a reduction in low cycle fatigue capabilities.

DATES: Effective June 20, 1986.

Compliance Schedule—As prescribed in the body of the AD.

Incorporation by Reference—Approved by the Director of the Federal Register on June 20, 1986.

ADDRESSES: The applicable service bulletin (SB) may be obtained from the Service Manager, Spey Engines, Rolls-Royce Limited, East Kilbride, Glasgow G74 4Pr, Scotland. A copy of the SB is contained in Rules Docket Number 83-ANE-15, in the Office of the Regional Counsel, New England Region, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803 and may be examined between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Chung C. Hsieh, Engine Certification Branch, ANE-141, Engine Certification Office, Aircraft Certification Division, New England Region, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803, telephone (617) 273-7091.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations (FAR) to include a new AD requiring cyclic life reduction on certain Rolls-Royce Spey turbofan engines was published in the **Federal Register** on September 4, 1985 (50 FR 35837). The proposal was prompted by the recalculation of low cycle fatigue capabilities of the affected components using current in-service flight cycle profiles. The maximum approved cyclic lives of all stage 12 HPC disks, stage 12 HPC rotor seals, and LPC drive shafts (pre-Mod. 4927) must be reduced to prevent failure. Since this condition is likely to exist on other engines of the same type design, the AD requires the removal of these disks, seals, and drive shafts from service, in accordance with Rolls-Royce Mandatory SB Number Sp 72-969, dated May 1984.

Interested persons have been afforded an opportunity to participate in the making of this amendment. One comment was received. The commenter was in agreement with the proposal. Accordingly, the proposal is adopted without change in the compliance requirements. Certain editorial changes have been made to clarify the relationship of the amendment and the SB which do not change the requirements or intent of the AD.

Conclusion

The FAA has determined that this regulation involves 78 Spey 555-15, -15H, -15N, and -15P engines, and the approximate cost for each engine is $511.00. It has also been determined that a substantial number of small entities are not affected as these engines are installed in the Fokker F28 aircraft. All of these aircraft are operated by large entities. Therefore, I certify that this action: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedure (44 FR 11034; February 26, 1979); and (3) will not have significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained by contacting

the person identified under the caption "FOR FURTHER INFORMATION CONTACT".

List of Subjects in 14 CFR Part 39

Engines, Air transportation, Aircraft, Aviation safety, Incorporation by reference.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration (FAA) amends Part 39 of the Federal Aviation Regulations (FAR) as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding to § 39.13 the following new airworthiness directive (AD):

Rolls-Royce Limited: Applies to Rolls-Royce Spey 555-15, -15H, -15N, and -15P turbofan engines.

Compliance is required as indicated unless already accomplished.

To prevent possible failure of the stage 12 high pressure compressor (HPC) disk, stage 12 HPC rotor seal, and low pressure compressor (LPC) drive shaft (Pre-Mod. 4927), accomplish the following in accordance with Rolls-Royce Service Bulletin (SB) Sp 72-969, dated May 1984, or FAA approved equivalent:

Remove stage 12 HPC disks and rotor seals, and LPC drive shafts (Pre-mod. 4927) from service on or before accumulating the cyclic lives (flights) specified below. Parts which have accumulated more cycles in service than those specified below on the effective date of this AD, must be removed prior to further flight.

CYCLIC LIVES

Part description	Modification	Number of flights—					
		A*	B*	C*	D*	E*	F*
High pressure compressor stage 12 rotor disks and seals		13,800	15,600	17,600	19,700	22,100	17,300
Low pressure compressor rotor drive shaft	Pre-Mod 4927	10,000	10,600	11,500	12,500	14,400	11,200

*Note.—Cyclic lives for each component are for flight profiles as denoted by A through F and defined below:
For engines with no N_2 monitoring:
A. Spey 555-15 and 555-15N full throttle
Spey 555-15H and 555-15P rated takeoff
For engines with N_2 monitoring:
B. Where 85% of takeoffs do not exceed 100% N_2
C. Where 85% of takeoffs do not exceed 99% N_2
D. Where 85% of takeoffs do not exceed 98% N_2
E. Where 85% of takeoffs do not exceed 97% N_2
F. Datum profile, average 99.5% N_2
Aircraft may be ferried in accordance with the provisions of FAR Parts 21.197 and 21.199 to a base where the AD can be accomplished.

Rolls-Royce SB Sp 72-969, dated May 1984, identified and described in this document, is incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received this document from the manufacturer may obtain copies upon request to the Service Manager, Spey Engine, Rolls-Royce Limited, East Kilbride, Glasgow G74-4PY, Scotland. This document also may be examined at the Office of the Regional Counsel, New England Region, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803, Room Number 311, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday except Federal holidays.

This amendment becomes effective on June 20, 1986.

Issued in Burlington, Massachusetts, on April 28, 1986.

Robert E. Whittington,

Director, New England Region.

Correction

In FR Doc. 86-9998 beginning on page 16610 in the issue of Monday, May 5, 1986, make the following corrections:

1. On page 16611, in the first column, in the third complete paragraph, in the first line, "SSR" should read "SSA".

2. On page 16612, in the first column, in the second complete paragraph, in the seventh line, "ACT" should read "ATC"; in the fourth complete paragraph, in the ninth line, "offset in" should read "offset is"; in the third column, in the third complete paragraph, in the fourteenth line, "ARSA" should read "TRSA".

3. On page 16615, in the first column, in the third complete paragraph under "*Indianapolis International Airport, IN*", in the eight line, "core" should read "outer core"; in the second column, in the first paragraph under "*Phoenix Sky Harbor International Airport, AZ*", in the third line from the bottom, "SPA" should read "APA".

4. On page 16617, in the third column, in the sixth line under "**Wichita Mid-Continent Airport, KS-[New]**", "feet to" should read "feet MSL to".

BILLING CODE 1505-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Part 200

[Docket No. R-86-1243; FR-2104]

Use of Materials Bulletin No. 44d; HUD Building Product Standards and Certification Program for Carpet and Carpet With Attached Cushion

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Final rule.

SUMMARY: This rule (1) adopts as part of HUD's Minimum Property Standards (MPS), a Use of Materials Bulletin (UM) that references nationally recognized standards for the manufacture of carpet and carpet with attached cushion; (2) provides for a labeling and third party certification program; (3) supplements HUD's Building Product Standards and Certification Program by requiring that certain additional information be included on a label, mark, or stamp which each manufacturer would apply to the certified products; and (4) specifies the frequency with which products must be tested in order to be acceptable to HUD.

EFFECTIVE DATE: June 23, 1986. The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of June 23, 1986.

FOR FURTHER INFORMATION CONTACT: Mr. Leslie H. Breden, Office of Manufactured Housing and Regulatory Functions, Department of Housing and Urban Development, Room 9151, 451 Seventh Street, SW., Washington, DC 20410-5000; telephone (202) 755-5929. (This is not a toll-free number).

SUPPLEMENTARY INFORMATION: On October 15, 1985, HUD published a proposed rule (50 FR 41699) which

would (1) adopt as part of HUD's Minimum Property Standards (MPS), a Use of Materials Bulletin (UM) that references nationally recognized standards issued by the American Society for Testing and Materials (ASTM), American Association of Textile Chemists and Colorists (AATCC) and National Bureau of Standards for the manufacture of carpet and carpet with attached cushion; (2) provide a labeling and third party certification program to assure that the product used in buildings under HUD programs meets these nationally recognized standards; (3) supplement HUD's Building Product Standards and Certification Program by requiring that certain additional information be included on a label, mark, or stamp which each manufacturer would apply to the certified products; and (4) specify the frequency with which carpet and carpet with attached cushion must be tested in order to be acceptable to HUD.

The Department received ten public comments on the proposed rule. All of the commenters favored the publication of the proposed rule except one, who stated that the rule would result in increased costs of fifty dollars per dwelling unit. The Department has determined that there is no factual basis for this comment.

Another commenter suggested upgrading the face weight of carpet by 20 percent. While this would be desirable, HUD has determined that such an addition to the initital cost of a house would not be cost effective. Furthermore, the present HUD carpet face weight requirements appear to have remained adequate since their adoption in 1978.

Finally, several technical and editorial suggestions were made by commenters interested in improving the clarity of the rule. These have been incorporated into the final rule.

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50, which implement Section 102(2)(C) of the National Environmental Policy Act of 1969, as amended. The Finding of No Significant Impact is available for public inspection of copying during regular business hours in the Office of the Rules Docket Clerk, at the above address.

This rule does not constitute a "major rule" as that term is defined in Section 1(b) of Executive Order 12291 on Federal Regulations, issued by the President on February 17, 1981. Analysis of the rule indicates that it does not: (1) Have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Under 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the Undersigned hereby certifies that this Rule would not have a significant economic impact on a substantial number of small entities. UM 44d adopts standards that are nationally recognized throughout the affected industry and will not create a burden on manufacturers currently meeting the standards.

This rule was listed as item number 855 in the Department's Semiannual Agenda of Regulations published on April 21, 1986 (51 FR 14036,14058) under Executive Order 12291 and the Regulatory Flexibility Act.

List of Subjects in 24 CFR Part 200

Administrative practice and procedures, Claims, Equal employment opportunity, Fair housing, Housing standards, Loan Program: Housing and community development, Mortgage insurance, Organization and functions (Government agencies), Reporting and recordkeeping requirements, Minimum property standards, and Incorporation by reference.

Accordingly, 24 CFR Part 200 is amended as follows:

PART 200—INTRODUCTION

1. The Authority citation for 24 CFR Part 200 continues to read as follows:

Authority: Titles I and II of the National Housing Act (12 U.S.C. 1701 through 1715z–18); section 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

2. A new § 200.942 is added, to read as follows:

§ 200.942 Supplementary specific procedural requirements under HUD building product standards and certification program for carpet and carpet with attached cushion.

(a) *Applicable standards.* (1) Carpet and carpet with attached cushion certified for this program shall be designed, manufactured and tested in accordance with the following standards:

(i) AATCC 20A–81—Fiber Analysis: Quantitative;

(ii) AATCC 16E–82—Colorfastness to Light: Water-Cooled Xenon-Arc Lamp, Continuous Light;

(iii) AATCC 8–85—Colorfastness to Crocking: AATCC Crockmeter Method;

(iv) AATCC 24–85—Insect, Resistance to Textiles to;

(v) ASTM D1335–67 (Reapproved 1972)—Standard Test Method for Tuft Bind of Pile Floor Coverings;

(vi) ASTM D3676–78 (Reapproved 1983)—Standard Specification for Rubber Cellular Cushion Used for Carpet or Rug Underlay;

(vii) ASTM E648–78—Standard Test Method for Critical Radiant Flux of Floor-Covering Systems Using a Radiant Heat Energy Source;

(viii) ASTM D2646–79—Standard Methods of Testing Backing Fabrics;

(ix) ASTM D3936–80—Standard Test Method for Delamination Strength of Secondary Backing of Pile Floor Coverings;

(x) ASTM D297–81—Standard Methods for Rubber Products—Chemical Analysis;

(xi) ASTM D418–82—Standard Methods of Testing Pile Yarn Floor Covering Construction; and

(xii) National Bureau of Standards DOC FF 1–70. (ASTM D2859–76)—Standard Test Method for Flammability of Finished Textile Floor Covering Materials.

(2) These standards have been approved by the Director of the Federal Register for incorporation by reference. They are available from the (i) American Association of Textile Chemists and Colorists (AATCC), P.O. Box 12215, Research Triangle Park, NC. 27709; (ii) American Society for Testing and Materials (ASTM), 1916 Race Street, Philadelphia, PA 19103; and (iii) U.S. Department of Commerce, National Bureau of Standards, Washington, DC 20234.

The standards are also available for inspection at the Office of the Federal Register, 1100 L Street, NW., Room 8401, Washington, DC 20408.

(b) *Labeling.* (1) Under the procedures set forth in § 202.935(d)(6), concerning labeling of a product, the administrator's validation mark and the manufacturer's certification of compliance with the applied standard is required to be on the certification label issued by the administrator to the manufacturer. In the case of carpet and carpet with attached cushion, the following additional information shall be included on the certification label, mark or stamp:

(i) Manufacturer's name or code identifying the manufacturing plant location; and

(ii) Manufacturer's statement of compliance with UM 44d.

(2) The certification mark shall be applied to each carpet at intervals of at

least every six feet, not less than one foot from the edge.

(c) *Periodic tests and quality control inspections.* (1) Five samples of carpet and carpet with attached cushion shall be tested annually by the administrator or by an administrator-approved laboratory. Three samples of each certified quality shall be taken from the plant annually. Of these, two shall be interim samples (taken every six months) and one an annual sample. In addition, two samples of each certified quality shall be taken annually from sources other than the manufacturer, *i.e.*, brought in the market place from distributors or stores, not from the factory. The administrator shall select samples for testing, and testing shall be conducted, in accordance with the applicable standards in a laboratory accredited by the National Voluntary Laboratory Accreditation Program (NVLAP) of the National Bureau of Standards, U.S. Department of Commerce.

(2) The administrator shall visit the manufacturer's facility at least once every six months to assure that the initially accepted quality control procedures continue to be followed.

Dated: April 24, 1986.

Silvio J. DeBartolomeis,

Acting General Deputy Assistant Secretary for Housing, Deputy Federal Housing Commissioner.

[FR Doc. 86-11019 Filed 5-15-86; 8:45 am]

BILLING CODE 4210-27-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[T.D. 8068]

Income Taxes; Temporary Regulations Under Section 338, Stock Acquisitions, Statements of Elections and Due Dates

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document contains temporary regulations primarily relating to section 338(g) of the Internal Revenue Code of 1954 ("Code") as added by the Tax Equity and Fiscal Responsibility Act of 1982 ("TEFRA"). The temporary regulations provide additional guidance to taxpayers concerning the filing of certain statements of election on or after December 9, 1985, and on or before July 15, 1986. An amendment to temporary regulation § 1.338-4T clarifies the application of the mitigation of limitations provisions.

The temporary regulations also extend the time for taking certain actions under section 338. The text of the temporary regulations set forth in this document also serves as the text of the proposed regulations cross-referenced in the notice of proposed rulemaking in the proposed rules section of this issue of the **Federal Register.**

DATES: The temporary regulations under section 338(g) and the amendments to the temporary regulations generally are effective with respect to stock acquisitions made after August 31, 1982. New paragraph (m) of § 1.338-1T is effective only with respect to elections under section 338 filed on or after December 9, 1985, and on or before July 15, 1986.

FOR FURTHER INFORMATION CONTACT: Thomas J. Kane of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC 20224 (Attention: CC:LR:T) or telephone 202-566-3458 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

This document amends temporary regulations §§ 1.338-1T, 1.338-2T, 1.338-4T, 1.338-5T, and 1.338(h)(10)-1T in Part 1 of Title 26 of the Code of Federal Regulations ("CFR"). Section 1.338-1T was published as T.D. 7942 in the **Federal Register** on February 8, 1984 (49 FR 4722), and was amended and redesignated (as § 1.338-1T) by temporary regulations published as T.D. 7975 in the **Federal Register** on September 6, 1984 (49 FR 35086). Section 1.338-1T also was amended by temporary regulations published as T.D. 8021 in the **Federal Register** on April 25, 1985 (50 FR 16402). The temporary regulations published on April 25, 1985, also added § 1.338-4T. Sections 1.338-1T and 1.338-4T were amended by temporary regulations published as T.D. 8068 in the **Federal Register** on January 8, 1986, and by temporary regulations published as T.D. 8072 in the **Federal Register** on January 29, 1986. The temporary regulations published on January 8, 1986, also added § 1.338(h)(10)-1T. All these temporary regulations were further amended by temporary regulations published as T.D. 8074 published in the **Federal Register** on February 12, 1986, which also added § 1.338-5T. The temporary regulations amended by this document will remain in effect until superseded by later temporary or final regulations relating to these matters.

The amendments made by this document are primarily under section 338(g). That provision was originally added by section 224 of TEFRA (Pub. L. No. 97-248; 96 Stat. 485) and was amended by section 712(k) of the Tax Reform Act of 1984 (Pub. L. 98-369; 98 Stat. 946). Other amendments are briefly discussed at the end of this preamble.

Operation of Section 338

In General

Section 338 generally provides that, if a corporation ("target") is acquired by another corporation ("purchasing corporation") in a qualified stock purchase, the purchasing corporation may elect (or may be deemed to elect under certain consistency rules) to have the target treated as if it: (1) Sold all of its assets (as "old target") at fair market value at the close of the day on which the qualified stock purchase occurred ("acquisition date") and (2) purchased those assets as a new corporation ("new target") at the beginning of the following day for an amount generally equal to the price paid by the purchasing corporation for target stock plus liabilities of target and other relevant items. Section 338 (a) and (b). The deemed sale of assets by old target generally is governed by the nonrecognition rule of section 337. In general, the tax attributes of old target are not available to new target. The net effect of a section 338 election is that the purchasing corporation obtains a basis in target assets that generally reflects the price it paid for target stock.

Effect of Section 338 Election on Taxable Year

Once a valid section 338 election has been made, old target's taxable year ends as of the close of business on the acquisition date. If the selling and purchasing groups each file separate returns (as opposed to consolidated returns) and the acquisition date occurs on a day other than the last day of target's regular taxable year, then the Federal income tax return (filed prior to making the section 338 election) for the relevant taxable year which includes the acquisition date should be amended and two separate amended returns should be filed as a result of the section 338 election. The first amended return would cover the portion of that relevant taxable year through the close of business on the acquisition date, which would include any additional Federal tax due because of target's deemed sale of assets under section 338. The second amended return would cover the balance of target's taxable year (relating

BEST COPY AVAILABLE

to target's operations) subsequent to the acquisition date.

The impact of a section 338 election on target's taxable year will be different if old target was a subsidiary in an affiliated group that filed a consolidated return for the period that included the acquisition date and an election under section 338(h)(10) is not made. In such case, the deemed sale will be the only transaction reported on old target's final return (called a "deemed sale return"). The Federal income tax consequences of target's operations through the close of business on the acquisition date shall continue to be reported on the selling group's consolidated return for the taxable period which included the acquisition date. Likewise, the Federal income tax consequences of target's operations for the remainder of target's regular taxable year shall continue to be reported either on the purchasing group's consolidated return or on a separate return for target if the purchaser was not included on a consolidated return.

Explanation of Provisions

These temporary regulations provide procedures in new paragraph (m) of § 1.338–1T for filing and for perfecting certain statements of election under section 338(g) for statements of election filed on or after December 9, 1985, and on or before July 15, 1986. The time for making such an election is extended by these regulations to the later of the 15th day of the ninth month beginning after the month in which the acquisition date occurs or July 15, 1986. See News Release IR–86–18, dated February 27, 1986.

For elections which do not require the filing of a deemed sale return, the procedures in new paragraph (m) condition the election on either filing consents which postpone the expiration of the statute of limitations or filing closing agreements which waive the expiration of the statute of limitations and extend the period for assessment. These new procedures are applicable for each relevant taxable year for which the statute of limitation of assessment has expired or will expire on or before November 15, 1986. A relevant taxable year is one for which a Federal income tax return was filed prior to filing the statement of section 338 election, but only if there would be an increase or decrease in Federal income tax as a result of the election. Additionally, new paragraph (m) conditions an effective section 338 election upon the filing of a closing agreement in situations where a deemed sale return must be filed as a result of the section 338 election. Standard language for these agreements is prescribed in this document for the convenience of both taxpayers and the Internal Revenue Service.

The procedures described in these regulations are required whether the tax for the period affected would be increased or decreased. Increased tax may arise, for example, by reasons of income or tax credit recapture caused by the deemed sale by old target and by tax attributes of old target not carrying over to new target. An example that results in a decrease in tax is higher depreciation or a similar deduction for new target that arises by reason of the deemed purchase under section 338 (a)(2) by new target of assets that had a tax basis in the hands of old target lower than new target's tax basis.

Statute of Limitations

As previously described, the section 338 election may create two taxable periods within a relevant taxable year which otherwise would be properly accounted for as a single taxable year before the statement of election was filed. If new target chooses the same taxable year that old target used, and if target had filed a tax return for the relevant taxable year which includes the acquisition date, the statute of limitations for any short period which may arise (as a consequence of the section 338 election) starts to run under new § 1.339–1T(m)(10) on the date on which target is considered to have filed under section 6501(b) its tax return for that relevant taxable year. For example, if target is a calendar year taxpayer and a qualified stock purchase of its stock is made on December 1, 1982, the statute of limitations for target's year ending December 1, 1982 (a short period which results from the section 338 election) would begin to run on the date target is considered to have filed its return for its taxable year ending December 31, 1982.

A deemed sale return cannot be filed prior to the filing of a section 338 election. Accordingly, the statute of limitations will not begin to run until the deemed sale return is filed. See section 6501(a) and section 6501(b)(1). The closing agreements required by new paragraph (m) of § 1.338–1T in these situations reflect this rule of law.

Consents To Extend Statute of Limitations

Section 1.338–1T (m) provides for procedures in circumstances when the statement of section 338 election is filed and the statute of limitations for a relevant taxable year of target, affected target, or corporate transferee expires after August 15, 1986, and on or before November 15, 1986. As a condition for making a section 338 election, the target, affected target, or corporate transferee is required to extend under section 6501(c)(4) the period for making an assessment for each such relevant taxable year until May 15, 1987. Unless such requirement is satisfied, the statement of section 338 election is ineffective unless such condition is waived by the District Director.

The extensions required by these regulations are necessary to ensure that taxpayers do not avoid the burdens of a section 338 election while retaining its benefits. The extensions will also have the effect of extending the period to file claim for refund. The extension date of May 15, 1987, was chosen to avoid requiring taxpayers to extend the period within which an assessment can be made for a period of less than 6 months and, for administrative convenience in order to provide a uniform date to which extensions would be made. The consent procedures in § 1.338–1T (m) apply only if the statute of limitations on assessment will not otherwise expire on or before August 15, 1986.

Closing Agreements—No Deemed Sale Returns

If for a relevant taxable year the statute of limitations has already expired or will expire on or before August 15, 1986, new paragraph (m) of § 1.338–1T also provides that an express election filed on or after December 9, 1985, and on or before July 15, 1986, is conditioned upon filing a closing agreement executed by target, affected target or corporate transferee wherein they: (1) Agree to waive the statute of limitations which has expired or is about to expire, (2) agree to file on or before November 3, 1986, amended returns which reflect the consequences of the deemed sale of assets under section 338(a) (1) and (3) agree to extend the statute of limitations for assessment of any additional tax due as a result of the deemed sale of assets until June 15, 1988. The election will be ineffective unless this condition is satisfied or is waived by the District Director.

It should be noted that even if each of the conditions for an effective election pursuant to this regulation are satisfied, certain adverse consequences may result in the event that an amended return reflecting the deemed sale is filed after July 15, 1986, and on or before November 3, 1986. Section 1.338–1T (h) of the existing temporary regulations generally permits waivers of certain additions to tax and time to act only if any required amended return is filed and certain other corrective action is taken on or before the last day for making an election under section 338.

BEST COPY AVAILABLE

Also, section 1.338–1T (f)(7) permits a new target to adopt on its first return a taxable year other than the one target used before making the section 338 election, but only if that first return is filed on or before the last day for making an express election under section 338.

Except in the event a section 338(h)(10) election is made, the statement of section 338 election will also be ineffective if the amended return described in any closing agreement is not filed on or before the time required by the agreement unless the District Director waives this additional requirement. If a selling group participates in a section 338(h)(10) election, the selling group must agree to file an amended consolidated return which reports the deemed sale gain. However, the section 338 election and the section 338(h)(10) election are not ineffective if the amended consolidated return is not filed. This rule protects target and its purchaser from an act of omission which is beyond their control.

Section 6401(a) provides that any amount of a payment of any internal revenue tax which is assessed or collected after the expiration of the period of limitation properly applicable thereto is an overpayment. By entering into a closing agreement which waives and extends the applicable statute of limitations, and tax reported, paid, and collected as a result of the deemed sale of assets is not an overpayment within the meaning of section 6401(a).

In general, the reasons for these closing agreement procedures are similar to the reasons previously explained in this document for the requirements for consents to extend the statute of limitations. The August 15, 1986, cut-off date for the expiration of the statute of limitations for closing agreements in those cases where a deemed sale return is not required was selected in order to allow the Internal Revenue Service a reasonable amount of time to process the required documents and affix the appropriate signatures and for purposes of taxpayer convenience.

Closing Agreements—Deemed Sale Returns or Combined Deemed Sale Returns

A closing agreement is also required if a deemed sale return must be filed as a result of a section 338 election. The closing agreement procedures require that a deemed sale return or a combined deemed sale return must be filed on or before November 3, 1986, and that the statute of limitations with respect to a deemed sale return or a combined deemed sale return will not terminate prior to the expiration of three years from the date a deemed sale return or combined deemed sale return is considered filed.

Effective Date

After December 6, 1985, the public was on notice that the Internal Revenue Service was going to consider the publication of rules dealing with "elections made in circumstances when the statute of limitations has expired or is about to expire for certain taxable years (such as might be the case for target's taxable year that includes the acquisition date)." See IRS News Release IR–85–115, December 9, 1985, was selected as the effective date for the procedures in new paragraph (m) because it was the first business day following the release of News Release IR–85–115.

Elections for Which Perfection Is Required

If a statement of section 338 election filed on or after December 9, 1985, and on or before July 15, 1986, does not meet the requirements in new paragraph (m)(2) of § 1.338–1T, which includes the filing of consents to extend the statute of limitations or certain closing agreements, then the election may be perfected by refiling in accordance with those requirements on or before July 15, 1986.

District Director Discretion

For a statement of section 338 election filed on or before July 15, 1986, the District Director (or his delegate) has discretion to waive any requirement in new paragraph (m)(2) of § 1.338–1T, including the requirement of filing any amended return as prescribed by closing agreement. This discretion is to be exercised in connection with the examination of any Federal income tax return which would be affected by a section 338 election and is to be exercised on the basis of all the relevant facts and circumstances.

Mitigation

In the absence of a section 338(h)(10) election, any tax due in any closed taxable year as the result of a section 338 election made after the close of such year may be collected through the operation of the mitigation provisions (sections 1311–1314). Section 1.338–4T (l)(5), added by this document, points out that old target and new target are the same "taxpayer" for purposes of the mitigation provisions. Although section 338(a)(2) treats target as a "new corporation" for the purpose of having "purchased all the assets" of old target "as of the beginning of the day after the acquisition date", the legislative history makes it clear that new target and old target may be regarded as the same taxpayer for purposes of carrying out the intent of the statute, *e.g.*, nonrecognition treatment for minority shareholders who retain their stock interest in target and the requirement that new target must report as income on its return any additional recapture income arising from an adjustment of the deemed sale price to old target due to an event or events occurring after old target files its final return. See H. Rep. No. 97–760 (Conf. Rep.), 97th Cong., 2d Sess. 537. The treatment of old target and new target as the same taxpayer is appropriate in view of the legislative history.

Postponement of Due Date

The temporary regulations extend the time for taking certain actions under section 338. Thus, in temporary regulations §§ 1.338–1T, 1.338–2T, 1.338–4T, 1.338–5T, and 1.338(h)(10)–1T, all references to "March 15, 1986" with respect to the time for making elections or taking certain other actions under section 338 will be changed to "July 15, 1986." However, references to "March 15, 1986" will not be amended where the applicability of certain rules depends on whether the acquisition date occurs after March 15, 1986.

Regulatory Flexibility Act; Executive Order 12291; and Paperwork Reduction Act of 1980

A general notice of proposed rulemaking is not required by 5 U.S.C. 553 for temporary regulations. Accordingly, these temporary regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. chapter 6). The Commissioner of Internal Revenue has determined that this temporary rule is not a major rule as defined in Executive Order 12291 and that a regulatory impact analysis therefore is not required. The collection of information contained in the regulations refer to requirements that have been submitted to the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1980, and have been approved by OMB (Control Number 1545–070).

Drafting Information

The principal author of these temporary regulations is Thomas J. Kane of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing

the regulations, both on matters of substance and style.

List of Subjects in 26 CFR Part 1

Income taxes, Corporations, Corporate distributions, Corporate adjustments, Reorganizations.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—[AMENDED]

Paragraph 1. The authority for Part 1 continues to read in part:

Authority: 26 U.S.C. 7805. * * * Sections 1.338–1T, 1.338–2T, 1.338–4T, 1.338–5T, and 1.338(h)(10)–1T also issued under 26 U.S.C. 338.

Par. 2. Section 1.338–1T is amended as follows:

1. Paragraph (c) is amended by—

a. Removing from the first sentence the word "March" and by adding in its place the word "July".

b. Adding a new sentence at the end of paragraph (c) to read as set forth below.

2. Paragraph (e) is amended by:

a. Removing, from each place it appears in paragraph (e)(1)(ii) (A) and (B), the word "March" and by adding in its place the word "July".

b. Removing, from paragraph (e)(2)(ii)(A), the word "March" and by adding in its place the word "July".

3. Paragraph (f)(7)(ii) is amended by removing the word "March" and by adding in its place the word "July".

4. Paragraph (h) is amended by:

a. Removing, from each place it appears in paragraph (h) (1) and (2), the word "March" and by adding in its place the word "July".

b. Removing, from each place it appears in *Example (1)* of paragraph (h)(4), the word "March" and by adding in its place the word "July".

c. Removing, from the third sentence of paragraph (h)(4) *Example (2)*, the word "March" and by adding in its place the word"July".

5. Subparagraphs (2) and (4) of paragraph (j) are amended by removing, from each place it appears, the word "March" and by adding in its place the word "July".

6. Paragraph (k) is amended by—

a. Adding a new sentence at the end of paragraph (k)(1) to read as set forth below

b. Removing from each place it appears in subdivisions (iv) and (v) of paragraph (k)(7) the word "March" and by adding in its place the word "July".

7. Adding at the end thereof new paragraph (m) to read as set forth below.

§ 1.338–1T Elections under section 338(g) of the Internal Revenue Code of 1954 (temporary).

* * * * *

(c) *Time and manner of making election.* * * * For special rules applicable to certain statements of section 338 election filed on or after December 9, 1985, and on or before July 15, 1986, see paragraph (m) of this section.

* * * * *

(K) *Special rules for foreign corporations or DISCs*—(1) *Election by certain foreign purchasing corporations.* * * * However, the items required under paragraph (m) of this section to be filed by such a foreign purchasing corporation with the District Director shall be filed with the District Director of the Foreign Operations District (Attention: Chief of Examination), 1325 K Street N.W., Washington, D.C. 20225.

* * * * *

(m) *Statements of section 338 election filed on or after December 9, 1985, and on or before July 15, 1986*—(1) *General rule.* A statement of section 338 election filed on or after July 15, 1986, is not effective unless—

(i) It meets the applicable requirements prescribed in paragraph (m)(2) of this section when it is filed,

(ii) It is perfected by refiling in accordance with paragraph (m)(4)(ii) of this section, or

(iii) The District Director or his delegate waives, under paragraph (m)(13) of this section, the applicable requirements contained in paragraph (m)(2) of this section.

(2) *Applicable requirements.* The requirements of this subparagraph (2) are that—

(i) The statement of section 338 election meets the filing, documentation, and Form 872 requirements of paragraph (m)(4), (5), and (6) of this section for each relevant taxable year (within the meaning of paragraph (m)(3) of this section) for which the statute of limitations on making an assessment is considered under paragraph (m)(10) of this section to expire after August 15, 1986, and on or before November 15, 1990,

(ii) The statement of section 338 election meets the filing, documentation, and closing agreement requirements of paragraph (m)(4), (5), and (7) of this section for each relevant taxable year (within the meaning of paragraph (m)(3) of this section) for which the statute of limitations on making assessment is considered under paragraph (m)(10) of this section to expire on or before August 15, 1986, and

(iii) The statement of section 338 election meets the filing and closing agreement requirements of paragraph (m)(4) and (7)(v) of this section if a deemed sale return is required to be filed and the acquisition date occurred on or before November 15, 1983.

(3) *Relevant taxable year.* For purposes of this paragraph (m), a taxable year is relevant if it is one for which a Federal income tax return was filed prior to filing the statement of section 338 election, but only if it is also—

(i) A taxable year of target (or an affected target) which includes its acquisition date, or

(ii) Any subsequent taxable year of target (or an affected target) or an affected taxable year of an affected corporation (within the meaning of paragraph (m)(12) of this section).

(4) *Filing procedures*—(i) *In general.* The statement of section 338 election and any documents, Forms 872, and closing agreements to which paragraph (m)(2) of this section applies shall all be filed in one envelope with the District Director (Attention: Chief of Examination) for the internal revenue district where original target had its principal place of business or where it principal office or agency was located on the acquisition date.

(ii) *Perfection rule.* A statement of section 338 election filed on or after December 9, 1985, and on or before July 15, 1986, that does not comply with the applicable procedures prescribed in paragraph (m)(2) of this section is perfected by refiling in accordance with those procedures the statement of election on or before July 15, 1986, along with a copy of the previously filed statement of election.

(5) *Documents required under paragraph (m)(2) of this section.* The documents required by this subparagraph (5) for each relevant taxable year are—

(i) A photocopy of the face page of the income tax return (and of any amended return or returns) filed for the taxable year, and

(ii) A photocopy of any extension, consent, or other document previously entered into or filed which extended the statute of limitations on assessment for the year.

(6) *Contents of Form 872*—(i) *In general.* For purposes of paragraph (m)(2)(i) of this section, for each relevant taxable year a Form 872 must be properly completed and executed in duplicate on behalf of each target or any affected corporation and must agree to

extend until May 15, 1987, the period for making an assessment with respect to any tax due as a result of the deemed sale under section 338(a)(1) by the target. A photocopy of Form 872 (including one on white paper) may be used instead of a copy supplied by the Internal Revenue Service.

(ii) *Restrictive language*—(A) *General language.* The following restrictive language shall be inserted as numbered paragraph (4) on the face page of any Form 872 to which this subparagraph (6) applies: "THIS CONSENT AND AGREEMENT IS LIMITED TO ANY FEDERAL TAX DUE FROM TAXPAYER (INCLUDING ACCRUED INTEREST THEREON) AS A RESULT OF THE DEEMED SALE OF ASSETS UNDER SECTION 338(a)(1) OF THE INTERNAL REVENUE CODE BY TAXPAYER" [if taxpayer is not the target, substitute name of target instead of last word].

(B) *Year which includes the acquisition date.* If the relevant taxable year of target includes the acquisition date, the Form 872 for that relevant taxable year shall contain the following language inserted as numbered paragraph (5): "THIS CONSENT AND AGREEMENT COVERS THE ENTIRE PERIOD ENDING ON THE DATE SET FORTH IN PARAGRAPH (1) OF THIS AGREEMENT, AS WELL AS ALL SHORT PERIODS WHICH RESULT AS A CONSEQUENCE OF THE SECTION 338 ELECTION AND WHICH END WITH OR WITHIN THAT ENTIRE PERIOD".

(7) *Closing agreement*—(i) *In general.* For purposes of paragraph (m)(2) (ii) and (iii) of this section, a separate closing agreement under section 7121 shall be submitted on Form 906 and must be properly completed and executed on behalf of each target or any affected corporation. For guidelines on preparation of closing agreements, see Rev. Proc. 68–16, 1968–1 C.B. 770. A photocopy of Form 906 (including one on white paper) may be used instead of a copy supplied by the Internal Revenue Service. In addition, a separate closing agreement under the provisions of paragraph (m)(2)(ii) of this section must be executed in triplicate for each relevant taxable year and contain the applicable language prescribed in paragraph (m)(7) (ii), (iii), and (iv) of this section. For special rules for applying the provisions of paragraph (m)(2)(iii) of this section with respect to a deemed sale return or a combined deemed sale return, see paragraph (m)(7)(v) of this section.

(ii) *Waiver of statute of limitations*—(A) *In general.* Each closing agreement required by paragraph (m)(2)(ii) of this section must contain an express waiver of the statute of limitations on assessment (under section 6501(a)) and credit (under section 6402(a)) with respect to any Federal tax (including accrued interest thereon) required to be reported on any return or claim for refund for the relevant taxable year of the taxpayer, using the following language: "TAXPAYER AND COMMISSIONER AGREE TO WAIVE THE STATUTE OF LIMITATIONS FOR ASSESSMENT AND CREDIT WHICH (HAS EXPIRED or WILL EXPIRE) ON [insert expiration date] FOR ANY FEDERAL TAX DUE OR REFUNDABLE (INCLUDING ACCRUED INTEREST THEREON) AS A RESULT OF THE DEEMED SALE OF ASSETS UNDER SECTION 338(a)(1) OF THE INTERNAL REVENUE CODE BY TAXPAYER" [if taxpayer is not the target, substitute name of target instead of last word].

(B) *Year which includes the acquisition date.* If the relevant taxable year is a taxable year of target which includes the acquisition date, the closing agreement for that relevant taxable year shall contain the following language in addition to the language contained in subdivision (m)(7)(ii)(A) of this section: "TAXPAYER ACKNOWLEDGES THAT THIS CLOSING AGREEMENT COVERS THE ENTIRE PERIOD DESCRIBED IN THE PRECEDING SENTENCE, AS WELL AS ALL SHORT PERIODS WHICH RESULT AS A CONSEQUENCE OF THE SECTION 338 ELECTION AND WHICH END WITH OR WITHIN THAT ENTIRE PERIOD".

(iii) *Amended returns*—(A) *In general.* Each closing agreement must contain an express agreement on behalf of the taxpayer to file an amended Federal income tax return or returns on or before November 3, 1986, for each relevant taxable year, and an acknowledgement that the statement of section 338 election will not be effective in the event of a failure to timely file any such amended return, unless the requirement of filing an amended return is waived by the District Director or his delegate.

(B) *Relevant taxable year which includes acquisition date.* For the relevant taxable year which includes the acquisition date, the following language shall be inserted in the closing agreement: "FOR THE RELEVANT TAXABLE YEAR COVERED BY THIS CLOSING AGREEMENT, TAXPAYER AGREES TO FILE ON OR BEFORE NOVEMBER 3, 1986 (IF NOT ALREADY FILED), THE FOLLOWING FEDERAL INCOME TAX RETURNS[S]:(*1*) AN AMENDED RETURN AS OLD TARGET'S FINAL RETURN, AND (*2*) AN AMENDED RETURN FOR NEW TARGET'S FIRST TAXABLE YEAR ENDING ON [insert date]. TAXPAYER ACKNOWLEDGES THAT A STATEMENT OF ELECTION UNDER SECTION 338 WILL NOT BE EFFECTIVE IF THE FEDERAL INCOME TAX RETURN(S) COVERED BY THIS CLOSING AGREEMENT (IS) (ARE) NOT FILED ON A TIMELY BASIS, UNLESS SUCH REQUIREMENT IS WAIVED IN WRITING BY THE DISTRICT DIRECTOR OR HIS DELEGATE." If the acquisition date occurs on the last day of target's relevant taxable year or if new target does not have a taxable year that terminates within the relevant taxable year, then the language in (*2*) of this subdivision (B) shall be omitted. If new target has more than one taxable year ending within the relevant taxable year covered by a closing agreement governed by this subdivision (B), then appropriate language referring to the amended returns for those years shall be added to the closing agreement, using the format set forth in this subdivision (B).

(C) *Other relevant taxable years.* For a relevant taxable year which does not include the acquisition date, the following language shall be inserted in the closing agreement. "TAXPAYER AGREES TO FILE AN AMENDED FEDERAL INCOME TAX RETURN ON OR BEFORE NOVEMBER 3, 1986, FOR THE RELEVANT TAXABLE YEAR COVERED BY THIS CLOSING AGREEMENT. TAXPAYER ACKNOWLEDGES THAT A STATEMENT OF ELECTION UNDER SECTION 338 WILL NOT BE EFFECTIVE IF ANY FEDERAL INCOME TAX RETURN COVERED BY THIS CLOSING AGREEMENT IS NOT FILED ON OR BEFORE NOVEMBER 3, 1986, UNLESS SUCH REQUIREMENT IS WAIVED IN WRITING BY THE DISTRICT DIRECTOR OR HIS DELEGATE."

(D) *Section 338(h)(10) election.* The second quoted sentence in subdivision (iii) (B) and (C) of this paragraph (m)(7) shall be omitted from any closing agreement for a relevant taxable year of a selling group referred to in paragraph (m)(11)(ii)(A) of this section (relating to section 338(h)(10) election).

(E) *Waiver of certain additions to tax and time to act.* See § 1.338–1T(h) for rules applicable to the waiver of certain additons to tax and time to act.

(iv) *Consent to extend expiration date.* Each closing agreement must contain an express consent to extend until June 15, 1988, the period for further assessment (under section 6501(a)) or credit (under section 6402(a)) of any tax due or refundable (including accrued interest

thereon) for any relevant taxable year resulting from the deemed sale under section 338(a)(1), using the following language: "TAXPAYER AND COMMISSIONER AGREE TO EXTEND UNTIL JUNE 15, 1988, THE PERIOD FOR MAKING ANY FURTHER ASSESSMENT OR CLAIMING ANY CREDIT OF ANY FEDERAL TAX DUE OR REFUNDABLE (INCLUDING ACCURED INTEREST THEREON) AS A RESULT OF THE DEEMED SALE OF ASSETS UNDER SECTION 338(a)(1) BY TAXPAYER" [If taxpayer is not the target, substitute name of target instead of last word].

(v) *Special rule for deemed sale return or combined deemed sale return*—(A) *In general.* For purposes of paragraph (m)(2)(iii) of this section, if a target is required to file a deemed sale return (as defined in paragraph (f)(3)(i) of this section), then a separate closing agreement with respect to that deemed sale return must be filed in triplicate in order to make an effective election under section 338. The closing agreement shall contain the following language: "TAXPAYER AGREES TO FILE ON OR BEFORE NOVEMBER 3, 1986 (IF NOT ALREADY FILED), A DEEMED SALE RETURN REFLECTING THE CONSEQUENCES OF THE DEEMED SALE OF ASSETS BY TAXPAYER [if taxpayer is not the target, substitute the name of target instead of last word] UNDER SECTION 338. TAXPAYER ACKNOWLEDGES THAT A STATEMENT OF ELECTION UNDER SECTION 338 WILL NOT BE EFFECTIVE IF THE DEEMED SALE RETURN IS NOT FILED ON A TIMELY BASIS, UNLESS SUCH REQUIREMENT IS WAIVED IN WRITING BY THE DISTRICT DIRECTOR OR HIS DELEGATE. TAXPAYER FURTHER AGREES THAT THE STATUTE OF LIMITATIONS ON ASSESSMENT FOR ANY FEDERAL TAX DUE AS A RESULT OF THE DEEMED SALE OF ASSETS BY TAXPAYER [if taxpayer is not the target, substitute the name of target instead of last word] UNDER SECTION 338 WILL NOT TERMINATE PRIOR TO THE EXPIRATION OF THREE YEARS FROM THE DATE THE DEEMED SALE RETURN IS ACTUALLY FILED."

(B) *Combined deemed sale return.* All targets which are eligible to file a combined deemed sale return (as defined in section 338(h)(15) and § 1.338–4T(k)(6)) may join together in a combined deemed sale closing agreement, instead of filing a separate closing agreement for each target under paragraph (m)(7)(v)(A) of this section. If a combined deemed sale closing agreement is filed, then a combined deemed sale return must be filed. The combined deemed sale closing agreement shall contain the language prescribed in paragraph (m)(7)(v)(A) of this section, except that the words "COMBINED DEEMED SALE RETURN" shall be substituted for "DEEMED SALE RETURN,' the word "TAXPAYER" shall be expressed in the singular or plural (as the case may be), and each target's name shall be inserted in place of "TAXPAYER", if appropriate. A list containing the name, address, and employer identification number of each target which is joining in the combined deemed sale closing agreement shall be included in the text of the combined deemed sale closing agreement. If the targets included in the combined deemed sale closing agreement constitute a single affiliated group within the meaning of section 1504(a), the combined deemed sale closing agreement shall be signed by an officer of the common parent of that group. Otherwise, the combined deemed sale closing agreement must be signed by an officer of each target included in the combined deemed sale closing agreement.

(8) *Execution of Form 872 or Form 906*—(i) *On behalf of Commissioner.* Any Form 872 or Form 906 properly submitted pursuant to the requirements in this paragraph (m) will be executed on behalf of the Commissioner of Internal Revenue and an executed copy of each Form 872 and each Form 906 will be returned to the originating party.

(ii) *On behalf of target.* If target was included on a consolidated return filed by the purchasing group for a relevant taxable year, the common parent of the purchasing group shall be the proper party to execute any Form 872 or Form 906 required by this paragraph (m) for that year. See § 1.1502–77(a).

(9) *Exceptions.* This paragraph (m) shall not apply—

(i) If the statement of section 338 election has been filed before December 9, 1985, or after July 15, 1986,

(ii) If there is no relevant taxable year of a target, affected target, or affected corporation for which the statute of limitations expires on or before November 15, 1986,

(iii) With respect to the taxable year of a selling group that files a consolidated return for the period that includes the acquisition date, if the binding contract rule in paragraph (l) of this section applies, or

(iv) With respect to the taxable year of a person that includes the acquisition date of a target, if (A) the target is a DISC, a controlled foreign corporation, or a domestic corporation described in section 1248 (e) and (B) the person actually transfers the target stock (as distinguished from being treated under section 338(a)(1) as having sold it).

(10) *Statute of limitations on assessment*—(i) *General rule.* For purposes of applying this paragraph (m), the statute of limitations on assessment is considered to begin to run for a relevant taxable year, and any short period of target which may result as a consequence of a section 338 election that ends with or within that relevant taxable year, on the date target is considered under section 6501(b) to have filed its return for that relevant taxable year.

(ii) *Deemed sale return.* If old target's final return is a deemed sale return (within the meaning of paragraph (f)(3)(i) of this section) or a combined deemed sale return (within the meaning of section 338(h)(15)), then the period for assessment under section 6501 does not begin to run until such deemed sale return or combined deemed sale return is filed.

(11) *Section 338(h)(10)*—(i) *Scope.* This subparagraph (11) provides rules for applying this paragraph (m) as a condition for electing to report the consequences of old target's deemed sale of its assets under section 338(a)(1) on the selling group's consolidated return under section 338(h)(10).

(ii) *Application.* If this subparagraph (11) applies, then—

(A) A relevant taxable year under paragraph (m)(3) of this section is considered to include the period for which a consolidated return of the selling group is filed that includes the acquisition date.

(B) Any document executed or item submitted by the common parent of the selling group on behalf of that entire group with respect to that relevant taxable year is considered to be on behalf of old target (see § 1.1502–77(a)).

(12) *Affected taxable years of affected corporations.* For purposes of this paragraph (m)—

(i) *Affected taxable year.* A taxable year is affected by the section 338 election if Federal tax for that year is increased or decreased as a result of the section 338 election. For example, an affected taxable year may arise if target originally filed a return for a period which ended on or after the acquisition date and the deemed sale of assets results in additional Federal tax due from target for that period, or if consideration for stock included in a qualified stock purchase is contingent and receipt of that consideration subsequent to the acquisition date is

reported on new target's return under § 1.338 (b)–3T(h).

(ii) *Affected corporation.* An affected corporation is a corporation that has a basis in an asset transferred to it by a new target or another affected corporation that is determined in whole or in part by reference to the asset's basis in the hands of the transferor.

(13) *Discretion of the District Director*—(i) *General standard.* In exercising discretion to waive any of the requirements prescribed under this paragraph (m) for any statement of section 338 election or amended returns, the District Director or his delegate shall consider all of the relevant facts and circumstances.

(ii) *Time when discretion is exercised.* The discretion of the District Director or his delegate under this paragraph (m) can be exercised at any time in connection with the examination of any Federal income tax return which would be affected by a section 338 election.

(14) *Applicability of the mitigation provisions.* For application of the mitigation provisions contained in sections 1311–1314, see § 1.338–4T (l)(5).

(15) *Examples.* The provisions of this paragraph (m) may be illustrated by the following examples.

Example (1). (i) T is an unaffiliated corporation filing income tax returns on the basis of a fiscal year ending February 28. At the close of January 20, 1983, P acquires all of T's stock in a qualified stock purchase. P does not file consolidated returns. On May 15, 1983, T timely files an income tax return (without extensions) for its taxable year beginning on March 1, 1982, and ending February 28, 1983. On May 14, 1986, P files a statement of election under section 338 which (if effective) would cause T's taxable year ending on February 28, 1983, to be divided into two periods. The first period for "old T" ends on the close of the acquisition date (January 20, 1983), and the second period for "new T" begins the next day. For T's taxable year ending February 28, 1983, the statute of limitations expires on May 15, 1986. In order for the section 338 election to be effective, the statement of election must be filed in accordance with the requirements of paragraph (m)(2)(ii) of this section. Thus, for example, there must be filed with the election, in the form prescribed in paragraph (m)(7) of this section, a closing agreement for T's taxable year ending on February 28, 1983, for which T's return was filed on May 15, 1983, extending the time within which assessments can be made until June 15, 1986. This closing agreement will cover the two periods into which that taxable year has now been divided. Additionally, the closing agreement must provide that on or before November 3, 1986, T must file old target's final return for the taxable year ending on January 20, 1983, and an amended return for the taxable year ending on February 28, 1983. The section 338 election will be ineffective unless the closing agreement procedures are followed and T files on or before November 3, 1986, the required returns, unless the District Director, in his discretion, waives any failure by P or T to comply with these requirements. However, in order for the waiver provisions contained in paragraph (h) of this section to apply, the amended returns must be filed on or before the last day for making an election under section 338, *i.e.*, July 15, 1986.

(ii) T also timely filed an income tax return (without extensions) on May 15, 1984, for its taxable year beginning on March 1, 1983, and ending on February 29, 1984. Since the statute of limitations on assessment for the income tax return filed on May 15, 1984, expires on May 15, 1987, which is after November 15, 1986, the provisions contained in paragraph (m) of this section are not applicable with respect to that taxable year.

Example (2). Assume the same facts as in *Example (1)* except that P files the statement of election on April 1, 1986, and that filing does not comply with the requirements of paragraph (m)(2)(ii) of this section. On July 6, 1986, under paragraph (m)(1)(ii) of this section, P perfects the election by refiling the election in accordance with the requirements of paragraph (m) (2)(ii) and (4)(ii) of this section. As long as T timely files on or before November 3, 1986, the returns which relate to the periods covered by the closing agreement (*i.e.*, T's taxable years ending on January 20, 1983, and February 28, 1983), the section 338 election will be valid.

Example (3). Assume the same facts as in *Example (2)* except that P does not perfect the election. Under paragraph (m) (1)(iii) and (13) of this section, the election is ineffective unless the District Director waives the requirements of paragraph (m)(2) of this section.

Example (4). Assume the same facts as in *Example (2)* except that T does not timely file the returns covered by the closing agreement. The section 338 election is ineffective under paragraph (m)(13) of this section unless the District Director waives the timely filing requirement for the amended returns.

Example (5). Assume the same facts as in *Example (1)* Assume further that T owns all the stock of T1 and that T1 uses the same taxable year as T. For the election to be effective, P must also file a closing agreement for T1 and T1 must file on or before November 3, 1986, the returns for the periods covered by T1's closing agreement unless those requirements are waived by District Director.

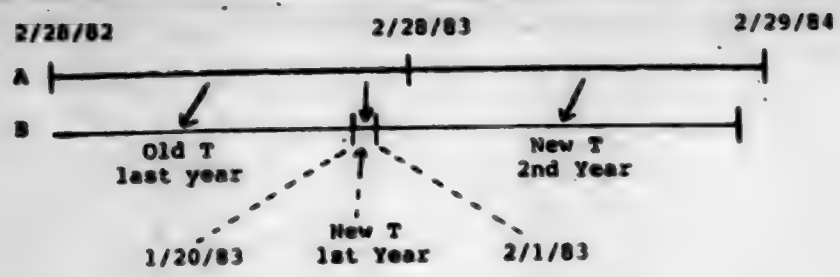
Example (6). Assume the same facts as in *Example (2)* except that T reports its income on the basis of a taxable year ending June 30. Assume further that on September 15, 1983, T timely filed an income tax return (without extensions) for its taxable year ending June 30, 1983, and that the statute of limitations for that year expires on September 15, 1986. In order for the section 338 election to be effective, the statement of election must be filed in accordance with the requirements of paragraph (m)(2)(i) of this section. Thus, for example, there must be filed with the election, in the form prescribed in paragraph (m)(6) of this section, a Form 872 for T's taxable year ending June 30, 1983, for which T's return was filed on September 15, 1983, extending the time within which assessments can be made until May 15, 1987. This Form 872 will cover both periods into which the taxable year has been divided. However, in order for the waiver provisions contained in § 1.338–1T(h) to apply, T must file the amended returns on or before the last day for making an election under section 338, *i.e.*, July 15, 1986. In any event, old target's final return and an amended return for the taxable year ending June 30, 1983, should be filed on or before May 15, 1987.

Example (7). Assume the same facts as in *Example (1)* except that T files its income tax returns on the basis of the calendar year and actually filed its returns for calendar year 1983 on March 3, 1984. No Form 872 or closing agreement is required for T's 1983 calendar year if the statute of limitations for that year expires after November 15, 1986. See paragraph (m)(1) and (9)(ii) of this section. The statute of limitations for new T's first taxable year and old T's period ending on the close of the acquisition date (January 20, 1983) did not start to run until the due date for T's 1983 return (March 15, 1984), and therefore cannot expire prior to March 15, 1987. See section 6501(b)(1) and paragraph (m)(10) of this section.

Example (8). (i) Assume the same facts as in *Example (1)* except that T, on its first tax return as new T filed on or before July 15, 1986, adopts a taxable year ending on January 31. The closing agreement referred to in *Example (1)* for the taxable year ending on February 28, 1983, will also operate to waive and extend the statute of limitations on assessment for new T's first taxable year which begins January 21, 1983, and ends on January 31, 1983. If T filed its first tax return as new T after July 15, 1986, it would not be permitted to adopt a taxable year different from the year T used before making the section 338 election. See paragraph (f)(7)(ii) of this section.

(ii) The tax consequences of new T's operations for the period that begins on February 1, 1983, and ends on February 28, 1983, will now have to be reported on an amended return which should be filed by new T for its second taxable year which begins on February 1, 1983, and ends on January 31, 1984. The statute of limitations on assessment for new T's second taxable year is controlled by the due date of the return T originally filed (without regard to the section 338 election) on May 15, 1984, for its taxable year ending February 29, 1984, which includes the last day of new T's second taxable year (*i.e.*, January 31, 1984). Because the statute of limitations on assessment for the taxable year ending on February 29, 1984, does not expire until May 15, 1987, the provisions of paragraph (m) does not apply to new T's second taxable year.

(iii) The results of this example may be summarized with time lines. Line A represents taxable years of T for which returns were filed prior to the time that a section 338 statement of election was filed. Line B represents taxable years of old T and new T reflecting such election. Arrows show dates on Line A when T's tax returns were filed, which started the statute of limitations running for the taxable periods shown on Line B.



Example (9). Assume the same facts as in *Example (1)* except that T, on its first tax return as new T filed on or before July 15, 1986, adopts a taxable year ending on April 30. The closing agreement referred to in *Example (1)* for the taxable year ending on February 28, 1983, will waive and extend the statute of limitations on assessment only for old T's taxable year ending on January 20, 1983. The tax consequences of new T's operations for new T's taxable year which begins on January 20, 1983, and ends on April 30, 1983, will have to be reported on an amended return filed for that period. The statute of limitations on assessment for new T's first taxable year is controlled by the due date of the return T originally filed (without regard to the section 338 election) on May 15, 1984, for its taxable year ending February 29, 1984, which includes the last day of new T's first taxable year, (*i.e.*, April 30, 1983). Because the statute of limitations on assessment for the taxable year ending on February 29, 1984, does not expire until May 15, 1987, the provisions of paragraph (m) do not apply to new T's first taxable year.

Example (10). All of T's stock is owned by S, which is included in a consolidated return that is filed for the S group on the basis of a fiscal year ending January 31. At the close November 15, 1982, P acquired all of T's stock in a qualified stock purchase. P is the common parent of an affiliated group that files consolidated returns on the basis of a calendar year. On July 1, 1986, P files a statement of election under section 338 for T. As a result of the acquisition, the results of T's operations through the close of business on November 15, 1982, was originally reported on the consolidated return for the S group which was timely filed on April 15, 1983. The results of T's operations from November 16, 1982, through December 31, 1982, were originally reported on the consolidated return for the P group, which was timely filed on March 15, 1983. Because T must file a deemed sale return (within the meaning of paragraph (f)(3)(i) of this section) and the acquisition date occurred on or before November 15, 1983, in order for the section 338 election to be effective, the closing agreement and other procedures required by paragraph (m)(2)(iii) and (7)(v) of this section must be followed and the deemed sale return must be filed on or before November 3, 1983, unless those requirements are waived by the District Director.

Par. 3. Section 1.338–2T is amended by removing, from each place they appear in *Example (1)* and *Example (2)* of paragraph (j), the words "August 23, 1985" and by adding in their place the words "July 15, 1986".

Par. 4. Section 1.338–4T is amended as follows:

1. Paragraph (a)(3) is amended by adding immediately after item (l)(4) a new item (l)(5) to read as follows: "(5) Application of mitigation provisions."

2. Paragraph (a)(4) is amended by adding in the second table immediately after the line "1248 (e) . . . (b)(6)" the following new line: "1311 . . . (l)(5)".

3. Paragraph (l) is amended by adding at the end thereof new subparagraph (5) to read as set forth below.

4. Paragraph (f)(6) (iv) Answer (i)(C)(l) is amended by removing the word "March" and by adding in its place the word "July".

5. Paragraph (j)(2) Answer 5(i) is amended by removing from the third sentence the word "March" and by adding in its place the word "July".

§ 1.338–4T Questions and answers relating to miscellaneous issues under section 338 (temporary).

* * * * *

(l) *Miscellaneous matters affecting new T.* * * *

* * * * *

(5) *Application of mitigation provisions.*

Question: For purposes of applying sections 1311–1314 (relating to the mitigation of the effect of limitations), in the absence of a section 338(h)(10) election, are old T and new T to be treated as being the same taxpayer?

Answer: Yes.

Par. 5. Section 1.338–5T is amended as follows:

1. Paragraph (a)(2) is amended by removing from the outline of topics at both (j)(8) (ii) and (iii) the word "March" and by adding in both places the word "July".

2. Paragraph (c)(2)(v)(C) is amended by removing, from each place it appears, the word "March" and by adding in its place the word "July".

3. Subdivisions (ii) and (iii) of paragraph (j)(8) are each amended by removing from the heading and from the text the word "March" and by adding in both places in each such subdivision the word "July".

Par. 6. Section 1.338(h)(10)–1T(d) is amended by—

1. Removing, from each place it appears in subparagraph (7) (i) and (ii), the word "March" and by adding in its place the word "July".

2. Adding at the end thereof new subparagraph (9) to read as follows:

§ 1.338(h)(10)–1T Elective recognition by selling consolidated group of deemed sale gain or loss on target's assets (temporary).

* * * * *

(d) *Time and manner of making section 338(h)(10) election.* * * *

(9) *Special rules.* See § 1.338–1T(m)(11) for special rules applicable to certain statements of section 338 election filed on or after December 9, 1985, and on or before July 15, 1986.

There is a need for immediate guidance with respect to the provisions contained in this Treasury decision. For this reason, it is found impracticable to issue this Treasury decision with notice and public procedure under subsection (b) of section 553 of Title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

Roscoe L. Egger, Jr.,

Commissioner of Internal Revenue.

Approved: May 6, 1986.

J. Roger Mentz,

Assistant Secretary of the Treasury.

26 CFR Parts 1, 7, and 602

[T.D. 8057]

Income Taxes; Transfers of Property by U.S. Persons to Foreign Corporations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document provides temporary Income Tax Regulations relating to transfers of property by U.S. persons to foreign corporations. These regulations affect U.S. persons that transfer property to foreign corporations pursuant to the corporate organization, reorganization, or liquidation provisions of the Internal Revenue Code. They provide the public with guidance necessary to comply with the Tax Reform Act of 1984. In addition, the text of the temporary regulations set forth in this document serves as the text of the proposed regulations cross-referenced in

the proposed rules section of today's Federal Register.

DATES: These temporary regulations are generally applicable for transfers made after December 31, 1984, and are effective June 16, 1986.

FOR FURTHER INFORMATION CONTACT: Charles W. Culmer, of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224, Attention: CC:LR:T (202–566–4336, not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

This document contains temporary Income Tax Regulations (26 CFR Part 1) under section 367 of the Internal Revenue Code of 1954, as amended by section 131 of the Tax Reform Act of 1984 (98 Stat. 662). The temporary regulations are issued under the authority contained in sections 367 (26 U.S.C. 367) and 7805 (26 U.S.C. 7805) of the Internal Revenue Code of 1954.

Discussion

Statutory Provisions

The Tax Reform Act of 1984 substantially revised the rules that apply under section 367 to transfers of property by U.S. persons to foreign corporations. Section 367(a) now provides generally that a foreign corporation will not be considered to be a corporation, for purposes of applying the corporate organization, reorganization, and liquidation rules to a U.S. person's transfer of property to the foreign corporation. Thus, transfers of property to foreign corporations will generally be treated as taxable exchanges. However, an exception is provided for transfers of property that will be used in the active conduct of a trade or business outside of the United States. Such transfers may be made tax-free. On the other hand, certain types of property are specified that may not be transferred free of tax, even if they are to be used in the active conduct of a trade or business. In addition, a special rule requires the recapture of previously deducted losses of a foreign branch, when the branch is transferred to a foreign corporation. New section 367(d) applies a special rule to certain transfers of intangible property to foreign corporations, requiring the U.S. transferor to recognize a U.S.-source deemed payment for the transferred property annually over the useful life of the property. Finally, new section 367(e) provides that liquidating distributions by domestic corporations under section 336 will be taxable under rules similar to those of section 367(a).

Need for Temporary Regulations

The effective date of the amendments to section 367 is January 1, 1985. The proper application of the section is dependent upon the Service's detailed specification by regulations of the manner in which the general requirements of the statute will be administered. Without this specification, taxpayers will be unable to make transfers to related foreign corporations with certainty as to the U.S. income tax consequences of the transfer. Because of the need for immediate guidance in this regard, for both the public and employees of the Internal Revenue Service, the Service has found it to be impracticable to issue these temporary regulations either with notice and public procedure under section 553(b) of Title 5 of the United States Code.

Description of Temporary Regulations

Section 1.367(a)-1T provides general rules describing the transfers of property that are subject to section 367(a), and explaining the effect of the section upon those transfers. A gain-limitation rule is provided in § 1.367(a)-1T(b)(3), ensuring that the gain recognized under section 367(a) upon a transfer of appreciated property is not greater than the gain that would be recognized on a normal taxable exchange. Detailed rules are provided in § 1.367(a)-1T(c) concerning various transactions that are considered to include a transfer subject to section 367(a). Relevant definitions are provided in § 1.367(a)-1T(d). Section 1.367(a)-1T(e) contains effective date provisions.

Section 1.367(a)-2T provides rules concerning the exception from section 367(a) for transfers of property that will be used in the active conduct of a trade or business outside of the United States. Paragraph (b) of the section separately defines the concepts of "trade or business," "active conduct," and "outside of the United States." Each standard must be met for a transfer to qualify for the exception.

Section 1.367(a)-3T provides rules concerning transfers of stock or securities to a foreign corporation in an exchange described in section 367(a). Paragraph (b) specifies certain transfers of stock that are not subject to section 367(a). Paragraph (c) provides rules concerning transfers of stock of domestic corporations. Such transfers are generally taxable, but several exceptions are provided. Paragraph (d) provides rules concerning transfers of stock of foreign corporations. Again, such transfers are generally taxable, but several exceptions are provided. Paragraphs (e), (f), and (g) provide rules concerning the exceptions that are applicable under paragraphs (c) and (d). Under paragraph (e), a transfer of stock is not subject to section 367(a) if the transfer is for use in the active conduct of a trade or business, as defined in that paragraph. Paragraph (f) provides that a transfer is not subject to section 367(a) if the U.S. transferors of the stock obtain a limited interest in the transferee foreign corporation. Under paragraph (g), a transfer of stock is not subject to section 367(a) if the U.S. transferor agrees to recognize gain upon any subsequent disposition of the stock by the transferee foreign corporation. Finally, paragraph (h) sets forth two anti-abuse rules.

Section 1.367(a)-4T contains a series of special rules concerning the treatment of certain specified transfers of property. Paragraph (b) addresses transfers of depreciated property previously used in the United States, while paragraph (c) concerns property that will be leased by the transferee. Paragraph (d) concerns property to be sold by the transferee. Paragraph (e) specifies the circumstances in which oil and gas working interests will be considered to have been transferred for use in the active conduct of a trade or business. Paragraphs (f) and (g) provide exceptions from section 367(a) for transfers that are required by foreign governments and for transfers to FSCs.

Section 1.367(a)–5T provides rules concerning transfers of property that are subject to taxation by reason of section 367(a) regardless of whether the property will be used in the active conduct of a trade or business. These rules apply to transfers of inventory, installment obligations, foreign currency, intangible property, and leased property.

Section 1.367(a)–6T provides special rules relating to the incorporation of a foreign branch with previously deducted losses. Paragraph (b) provides generally that such losses must be recaptured by recognizing the gain realized on the transfer of the branch's assets. Paragraph (c) specifies the character of, and limitations on, the gain required to be recognized, while paragraphs (d) and (e) provide for adjustments to the amount of losses subject to recapture. Paragraph (f) provides an example. Finally, paragraph (g) defines the term "foreign branch."

Section 1.367(d)–1T provides rules under section 367(d) concerning transfers of intangible property by U.S. persons to foreign corporations. Paragraph (b) specifies the transfers that are subject to section 367(d), while

paragraph (c) provides rules concerning the consequences of such a transfer. In general, the U.S. transferor will be treated as receiving payments contingent on productivity or use of the transferred property, over the useful life of the property (regardless of whether such payments are in fact made by the transferee). Under a special transitional rule contained in § 1.367(a)–1T (d)(3)(iv), certain foreign marketing intangibles developed by a foreign branch and transferred prior to May 16, 1986, will not be subject to the rules of section 367(d). Transfers of such marketing intangibles made on or after that date are subject to the section 367(d) rules. Paragraphs (d), (e), and (f) provide rules for cases in which there is a later direct or indirect disposition of the intangible property transferred. In general, deemed license payments will continue if a transfer is made to a related person, while gain must be recognized immediately if the transfer is to an unrelated person. Paragraph (g) provides several special rules, including a rule allowing appropriate adjustments where deemed payments under section 367(d) are not in fact received by the U.S. transferor of the intangible property, and a rule providing for a limited election to treat certain transfers of intangible property as sales at fair market value (in lieu of applying the general useful life-contingent payment rule). In addition, paragraph (g) provides rules coordinating the application of section 367(d) with other relevant Code sections. Finally, paragraph (h) defines the term "related person" for purposes of section 367(d).

Section 1.6038B–1T provides rules concerning the information that is required to be reported under section 6038B with respect to transfers of property to foreign corporations. Paragraph (b) of the section explains when and how to report under section 6038B. Paragraphs (c) and (d) specify the information that is required to be reported with respect to transfers of property described in section 367 (a) and (d), respectively. Paragraph (e) is reserved to specify the information required to be reported with respect to transfers subject to section 367(e). Finally, paragraph (f) sets forth the consequences of a failure to comply with the requirements of section 6038B.

The temporary regulations do not provide rules concerning new section 367(e). When such regulations are issued, they will apply only on a prospective basis. The temporary regulations do, however, describe the situations in which section 367(a) will apply to corporate liquidations under section 332.

Nonapplicability of Executive Order 12291

The Treasury Department has determined that these temporary regulations are not subject to Executive Order 12291. Accordingly, a Regulatory Impact Analysis is not required.

Regulatory Flexibility Act

A general notice of proposed rulemaking is not required by 5 U.S.C. 553(b) for temporary regulations. Accordingly, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply and no Regulatory Flexibility Analysis is required for this rule.

Paperwork Reduction Act

These regulations were submitted to The Office of Management and Budget for review under the Paperwork Reduction Act and approved under OMB number 1545–0026.

Drafting Information

The principal authors of these regulations are Charles W. Culmer of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, and Robert E. Culbertson, Jr., of the Office of the Associate Chief Counsel (International), Internal Revenue Service. Personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations.

List of Subjects

26 CFR 1.301–1–1.385–6

Income taxes, Corporations, Corporate distributions, Corporate adjustments, Reorganizations.

26 CFR 1.6001–1 Through 1.6109–2

Income taxes, Administrative practice and procedure, Filing requirements.

26 CFR Part 7

Income taxes, Tax Reform Act of 1976.

26 CFR Part 602

Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR Part 1, Part 7, and Part 602 are amended as follows:

Income Tax Regulations

Paragraph 1. The authority for Part 1 is amended by adding the following citation:

Authority: 26 U.S.C. 7805. * * * Sections 1.367(a)–1T through 1.367(a)–7T also issued under 26 U.S.C 367(a). Section 1.367(d)–1T also issued under 26 U.S.C 367(d). Section 1.6038B–1T also issued under 26 U.S.C 6038B.

§ 1.367(a)–1 [Removed]

Par. 2. Section 1.367(a)–1 is removed.

§ 1.367(a)–4T [Redesignated as § 1.367(a)–7T]

Par. 3. Section 1.367(a)–4T is redesignated as § 1.367(a)–7T.

Par. 4. Sections 1.367(a)–1T through 1.367(a)–6T are added immediately after § 1.362–2, to read as follows:

§ 1.367(a)–1T Transfers to foreign corporations subject to section 367(a): In general (temporary).

(a) *Purpose and scope of regulations.* These regulations set forth rules relating to the provisions of section 367(a) concerning certain transfers of property to foreign corportions. This § 1.367(a)–1T provides general rules explaining the effect of section 367(a)(1) and describing the transfers of property that are subject to the rule of that section. Section 1.367(a)–2T provides rules concerning the exception from the rule of section 367(a)(1) for transfers of property to be used in the active conduct of a trade or business outside of the United States. Rules concerning the application of section 367(a)(1) to transfers of stock or securities are provided in § 1.367(a)–3T, while § 1.367(a)–4T provides special rules regarding other specified transfers of property. Section 1.367(a)–5T describes types of property that are subject to the rule of section 367(a)(1) regardless of whether they are transferred for use in a trade or business. Section 1.367(a)–6T provides rules concerning the application of section 367(a) to the transfer of a branch with previously deducted losses. Finally, § 1.367(a)–7T contains transitional rules concerning transfers of intangible property to foreign corporations made after June 6, 1984 and before January 1, 1985. Rules explaining the operation of section 367(d), concerning transfers of intangible property pursuant to an exchange described in section 351 or 361, are provided in § 1.367(d)–1T. Rules concerning the reporting requirements of section 6038B are provided in § 1.6038B–1T.

(b) *General rules*—(1) *Foreign corporation not considered a corporation for purposes of certain transfers.* If a U.S. person transfers property to a foreign corporation in connection with an exchange described in section 332, 351, 354, 355, 356, or 361, then pursuant to section 367(a)(1) the foreign corporation shall not be considered to be a corporation for purposes of determining the extent to

which gain shall be recognized on the transfer. Section 367(a)(1) denies nonrecognition treatment only to transfers of items of property on which gain is realized. Thus, the amount of gain recognized because of section 367(a)(1) is unaffected by the transfer of items of property on which loss is realized (but not recognized). The transfers of property that are subject to section 367(a)(1) are further described in paragraph (c) of this section, and relevant definitions are provided in paragraph (d) of this section.

(2) *Cases in which foreign corporate status is not disregarded.* Section 367(a)(1) shall not apply, and a foreign corporate transferee shall, thus, be considered to be a corporation, in the case of any of the following:

(i) The transfer of stock or securities of a foreign corporation which is a party to the exchange or reorganization (as defined in section 368 (b));

(ii) The transfer of property for use in the active conduct of a trade or business outside of the United States in accordance with the rules of §§ 1.367(a)-2T through 1.367(a)-6T; or

(iii) Certain other transfers of property described in §§ 1.367(a)-2T through 1.367(a)-6T.

For the treatment of a transfer of stock or securities of a foreign corporation which is a party to the exchange or reorganization, see §§ 1.367(a)-3T(b)(1), 7.367(b)-4, and 7.367(b)-7.

(3) *Limitation of gain required to be recognized*—(i) *In general.* If a U.S. person transfers property to a foreign corporation in a transaction on which gain is required to be recognized under section 367(a) and regulations thereunder, then the gain required to be recognized by the U.S. person shall in no event exceed the gain that would have been recognized on a taxable sale of those items of property if sold individually and without offsetting individual losses against individual gains.

(ii) *Losses.* No loss may be recognized by reason of the operation of section 367.

(iii) *Ordinary income and capital gain.* If section 367(a) and regulations thereunder require the recognition of ordinary income and capital gain in excess of the limitation described in paragraph (b)(3)(i) of this section, then the limitation shall be imposed by making proportionate reductions in the amounts or ordinary income and capital gain, regardless of the character of the gain that would have been recognized on a taxable sale of the property.

(4) *Character, source, and adjustments*—(i) *In general.* If a U.S. person is required to recognize gain under section 367 upon a transfer of property to a foreign corporation, then—

(A) The character and source of such gain shall be determined as if the property had been disposed of in a taxable exchange with the transferee foreign corporation (unless otherwise provided by regulation); and

(B) Appropriate adjustments to earnings and profits, basis, and other affected items shall be made according to otherwise applicable rules, taking into account the gain recognized because of section 367(a)(1). Any increase in the basis of the property received by the foreign corporation resulting from the application of section 367(a) and section 362 (a) or (b) shall be allocated over the transferred property with respect to which gain is recognized in proportion to the amount realized by the U.S. person on the transfer of each item of that property. See paragraph (c)(3) of this section for special rules applicable to transfers of partnership interests.

(ii) *Example.* The rules of this paragraph (b)(4) are illustrated by the following example.

Example. Domestic corporation DC transfers inventory with a fair market value of $1 million and adjusted basis of $800,000 to foreign corporation FC in an exchange for stock of FC that is described in section 351 (a). Title passes within the U.S. Pursuant to section 367(a), DC is required to recognize gain of $200,000 upon the transfer. Under the rule of this paragraph (b)(4), such gain shall be treated as ordinary income (sections 1201 and 1221) from sources within the U.S. (section 861) arising from a taxable exchange with FC. Appropriate adjustments to earnings and profits, basis, etc., shall be made as if the transfer were subject to section 351. Thus, for example, DC's basis in the FC stock received, and FC's basis in the transferred inventory, will each be increased by the $200,000 gain recognized by DC, pursuant to sections 358(a)(1) and 362(a), respectively.

(c) *Transfers described in section 367(a)(1)*—(1) *In general.* A transfer described in section 367(a)(1) is any transfer of property by a U.S. person to a foreign corporation pursuant to an exchange described in section 332, 351, 354, 355, 356, or 361. Section 367(a)(1) applies to such a transfer whether it is made directly, indirectly, or constructively. Indirect or constructive transfers that are described in section 367(a)(1) include the transfers described in subparagraphs (2) through (7) of this paragraph (c). See § 1.367(a)-3T(b)(1) for rules relating to the transfer of stock or securities of a foreign corporation that is a party to the exchange or the reorganization.

(2) *Indirect transfers in certain reorganizations*—(i) *Mergers described in section 368(a)(1)(A)*—(A) *In general.* A transfer in connection with a reorganization described in section 368(a)(1)(A) to which either section 368(a)(2) (D) or (E) applies may be an indirect transfer described in section 367(a)(1) if the reorganization involves the merger of two domestic corporations and if stock of a foreign corporation which controls one of such domestic corporations is exchanged in the reorganization. The transfers in connection with such a reorganization that are described in section 367(a)(1) are specified in subdivisions (B) and (C) of this paragraph (c)(2)(i). If a transfer in connection with such a reorganization is described in section 367(a)(1), then the rules of § 1.367(a)-3T shall apply to determine whether the U.S. transferor is required to recognize gain with respect to the transfer.

(B) *Mergers to which section 368(a)(2)(D) applies.* A U.S. shareholder of a domestic corporation shall be considered to make a transfer of stock that is described in section 367(a)(1) if—

(*1*) The domestic corporation transfers substantially all of its properties to another domestic corporation in connection with a reorganization described in section 368(a)(1)(A) to which section 368(a)(2)(D) applies; and

(*2*) The controlling corporation (within the meaning of section 368(a)(2)(D)) is a foreign corporation.

The indirect transfer of stock by the shareholder shall be subject to the provisions of § 1.367(a)-3T.

Example. F, a foreign corporation, owns all the stock of S, a domestic corporation. In a reorganization described in section 368(a)(1)(A) to which section 368(a)(2)(D) applies, S acquires substantially all the properties of W, a domestic corporation, in a merger of W into S. The stock of F is used as consideration. The reorganization is considered to constitute a transfer of stock described in section 367(a)(1) by the shareholders of W that are U.S. persons.

(C) *Mergers described in section 368(a)(1)(A) to which section 368(a)(2)(E) applies.* A shareholder of a domestic corporation that is a U.S. person shall be considered to make a transfer of stock that is described in section 367(a)(1) if—

(*1*) The domestic corporation acquires substantially all of the properties of another domestic corporation in connection with a reorganization described in section 368(a)(1)(A) to which section 368(a)(2)(E) applies; and

(*2*) The controlling corporation (within the meaning of section 368(a)(2)(E)) is a foreign corporation.

The indirect transfer of stock by the shareholder shall be subject to the provisions of § 1.367(a)-3T.

(ii) *Reorganizations described in section 368(a)(1)(B).* If, in connection with a reorganization described in section 368(a)(1)(B), a U.S. person exchanges stock of a domestic corporation for voting stock of a foreign corporation that is in control (as defined in section 368(c)) of the domestic acquiring corporation, then that U.S. person is considered to make a transfer of stock that is subject to section 367(a)(1). The rule of this paragraph (c)(2)(ii) is illustrated by the following example.

Example. F, a foreign corporation, owns all the stock of S, a domestic corporation. In a reorganization described in section 368(a)(1)(B), S acquires all the stock of domestic corporation Y, and the shareholders of Y receive voting stock of F. The reorganization includes an indirect stock transfer described in section 367(a)(1) by those shareholders of Y who are U.S. persons.

(iii) *Reorganization described in section 368(a)(1)(C).* A U.S. shareholder of a domestic corporation shall be considered to make a transfer of stock that is subject to section 367(a)(1) if—

(A) The domestic corporation transfers substantially all of its properties to another domestic corporation in connection with a reorganization described in section 368(a)(1)(C); and

(B) The domestic corporation receives voting stock in a foreign corporation that is in control (as defined in section 368(c)) of the acquiring corporation (and distributes the stock to its shareholders in accordance with section 368(a)(2)(G)).

The rule of this paragraph (c)(2)(iii) is illustrated by the following example.

Example. F, a foreign corporation, owns all of the stock of S, a domestic corporation. In a reorganization described in section 368(a)(1)(C), S acquires substantially all of the properties of Z, a domestic corporation, and Z receives voting stock of F (and distributes the stock to its shareholders). The reorganization is considered to include an indirect transfer of stock described in section 367(a)(1) by the shareholders of Z that are U.S. persons.

(3) *Indirect transfers involving partnerships and interests therein*—(i) *Transfer by partnership treated as transfer by partners*—(A) *In general.* If a partnership (whether foreign or domestic) transfers property to a foreign corporation in an exchange described in section 367(a)(1), then a U.S. person that is a partner in the partnership shall be treated as having transferred a proportionate share of the property in an exchange described in section 367(a)(1). A U.S. person's proportionate share of partnership property shall be determined under the rules and principles of sections 701 through 761 and the regulations thereunder. The rule of this paragraph (c)(3)(i)(A) is illustrated by the following example.

Example. P is a partnership having five equal general partners, two of whom are United States persons. P transfers property to F, a foreign corporation, in connection with an exchange described in section 351. The exchange includes an indirect transfer of property by the partners to F. The transfers of property attributable to those partners who are United States persons, that is, 40 percent of each asset transferred to F, are transfers described in section 367(a)(1). The gain (if any) recognized on the transfer of 40 percent of each asset to F is attributable to the two partners who are United States persons.

(B) *Special adjustments to basis.* If a U.S. person is treated under the rule of this paragraph (c)(3)(i) as having transferred a proportionate share of the property of a partnership in an exchange described in section 367(a), and is therefore required to recognize gain upon the transfer, then—

(*1*) The U.S. person's basis in the partnership shall be increased by the amount of gain recognized by him;

(*2*) Solely for purposes of determining the basis of the partnership in the stock of the transferee foreign corporation, the U.S. person shall be treated as having newly acquired an interest in the partnership (for an amount equal to the gain recognized), permitting the partnership to make an optional adjustment to basis pursuant to sections 743 and 754; and

(*3*) The transferee foreign corporation's basis in the property acquired from the partnership shall be increased by the amount of gain recognized by U.S. persons under this paragraph (c)(3)(i).

(ii) *Transfer of partnership interest treated as transfer of proportionate share of assets*—(A) *In general.* If a U.S. person transfers an interest as a partner in a partnership (whether foreign or domestic) in an exchange described in section 367(a)(1), then that person shall be treated as having transferred a proportionate share of the property of the partnership in an exchange described in section 367(a)(1). Accordingly, the applicability of the exception to section 367(a)(1) provided in § 1.367(a)–2T shall be determined with reference to the property of the partnership rather than the partnership interest itself. A U.S. person's proportionate share of partnership property shall be determined under the rules and principles of sections 701 through 761 and the regulations thereunder.

(B) *Special adjustments to basis.* If a U.S. person is treated under the rule of paragraph (c)(3)(ii)(A) of this section as having transferred a proportionate share of the property of a partnership in an exchange described in section 367(a), and is therefore required to recognize gain upon the transfer, then—

(*1*) The U.S. person's basis in the stock of the transferee foreign corporation shall be increased by the amount of gain so recognized by that person;

(*2*) The transferee foreign corporation's basis in the transferred partnership interest shall be increased by the amount of gain recognized by the U.S. person; and

(*3*) Solely for purposes of determining the partnership's basis in the property held by it, the U.S. person shall be treated as having newly acquired an interest in the partnership (for an amount equal to the gain recognized), permitting the partnership to make an optional adjustment to basis pursuant to sections 743 and 754.

(C) *Limited partnership interest.* The transfer by a U.S. person of an interest in a partnership shall not be subject to the rules of paragraph (c)(3)(ii) (*A*) and (B) if—

(*1*) The interest transferred is a limited partnership interest; and

(*2*) Such interest is regularly traded on an established securities market.

Instead, the transfer of such an interest shall be treated in the same manner as a transfer of stock or securities. Thus, the consequences of such a transfer shall be determined under the rules of § 1.367(a)–3T. For purposes of this section, a limited partnership interest is an interest as a limited partner in a partnership that is organized under the laws of any State of the United States or the District of Columbia. Whether such an interest is regularly traded on an established securities market shall be determined under the provisions of paragraph (c)(3)(ii)(D) of this section.

(D) *Regularly traded on an established securities market*—(*1*) *Established securities market.* For purposes of this paragraph (c)(3)(ii), an established securities market is—

(*i*) A national securities exchange which is registered under section 6 of the Securities Exchange Act of 1934 (15 USC 78f);

(*ii*) A foreign national securities exchange which is officially recognized, sanctioned, or supervised by governmental authority; and

(*iii*) An over-the-counter market. An over-the-counter market is any market reflected by the existence of an inter-dealer quotation system. An inter-dealer quotation system is any system of general circulation to brokers and dealers which regularly disseminates

quotations of stock and securities by identified brokers or dealers, other than by quotation sheets which are prepared and distributed by a broker or dealer in the regular course of business and which contain only quotations of such broker or dealer.

(2) *Regularly traded.* A class of interests that is traded on an established securities market is considered to be regularly traded if it is regularly quoted by brokers or dealers making a market in such interests. A class of interests shall be presumed to be regularly traded if the entity has a total of 500 or more interest-holders.

(4) *Transfers by trusts and estates*—(i) *In general.* For purposes of section 367(a), a transfer of property by an estate or trust shall be treated as a transfer by the entity itself and not as an indirect transfer by its beneficiaries. Thus, a transfer of property by a foreign trust or estate (as defined in section 7701(a)(31)) is not described in section 367(a)(1), regardless of whether the beneficiaries of the trust or estate are U.S. persons. Similarly, a transfer of property by a domestic trust or estate may be described in section 367(a)(1), regardless of whether the beneficiaries of the trust or estate are foreign persons.

(ii) *Grantor trusts.* A transfer of a portion or all of the assets of a foreign or domestic trust to a foreign corporation in an exchange described in section 367(a)(1) is considered a transfer by any U.S. person who is treated as the owner of any such portion or all of the assets of the trust under sections 671 through 679.

(5) *Termination of election under section 1504(d).* Section 367(A) applies to the constructive reorganization and transfer of property from a domestic corporation to a foreign corporation that occurs upon the termination of an election under section 1504(d), which permits the treatment of certain contiguous country corporations as domestic corporations. The rule of this paragraph (c)(5) is illustrated by the following example.

Example. Domestic corporation Y previously made a valid election under section 1504(d) to have its wholly owned Canadian subsidiary, C, treated as a domestic corporation. On July, 1, 1986, C fails to continue to qualify for the election under section 1504 (d). A constructive reorganization described in section 368(a)(1)(D) occurs. The resulting constructive transfer of assests by "domestic" corporation C to Canadian corporation C upon the termination of the election is a transfer of property described in section 367(a)(1).

(6) *Changes in classification of an entity.* If a foreign entity is classified as an entity other than an association taxable as a corporation for United States tax purposes, and subsequently a change is made in the governing documents, articles, or agreements of the entity so that the entity is thereafter classified as an association taxable as a corporation, the change in classification is considered a transfer of property to a foreign corporation in connection with an exchange described in section 351. For purposes of section 367(a)(1), the transfer of property is considered as made by the persons determined under the rules set forth in paragraph (c)(3) of this section with respect to partnerships, and paragraph (c)(4) (i) or (ii), with respect to trusts and estates, and the rules of such paragraphs apply determining whether a transfer described in section 367(a)(1) has been made.

(7) *Contributions to capital.* For rules with respect tothe treatment of a contribution to the capital of a foreign corporation as a transfer described in section 367(a)(1), see section 367(c)(2) and the regulations thereunder.

(d) *Definitions.* The following definitions apply for purposes of this section and § 1.367(d)–1T.

(1) *United States person.* The term "United States person" includes those persons described in section 7701(a)(30). The term includes a citizen or resident of the United States, a domestic partnership, a domestic corporation, and any estate or trust other than a foreign estate or trust. (For definitions of these terms, see section 7701 and regulations thereunder.) For purposes of this section, an individual with respect to whom an election has been made under section 6013 (g) or (h) is considered to be a resident of the United States while such election is in effect. A nonresident alien or a foreign corporation will not be considered a United States person because of its actual or deemed conduct of a trade or business within the United States during a taxable year.

(2) *Foreign corporation.* The term "foreign corporation" has the meaning set forth in section 7701(a) (3) and (5) and § 301.7701–5.

(3) *Transfer.* For purposes of section 367 and regulations thereunder, the term "transfer" means any transaction that constitutes a transfer for purposes of sections 332, 351, 354, 355, 356, or 361, as applicable. A person's entering into a bona fide cost-sharing arrangement under § 1.482–2(d)(4) or acquiring rights to intangible property under such an arrangement shall not be considered a transfer of property described in section 367(a)(1). See § 1.6038B–1T(b)(3) for the date on which the transfer is considered to be made.

(4) *Property.* For purposes of section 367 and regulations thereunder, the term "property" means any item that constitutes property for purposes of sections 332, 351, 354, 355, 356, or 361, as applicable.

(5) *Intangible property*—(i) *In general.* For purposes of section 367 and regulations thereunder, the term "intangible property" means knowledge, rights, documents, and any other intangible item within the meaning of section 936(h)(3)(B) that constitutes property for purposes of sections 332, 351, 354, 355, 356, or 361, as applicable. Such property shall be treated as intangible property for purposes of section 367 (a) and (d) and the regulations thereunder without regard to whether it is used or developed in the United States or in a foreign country and without regard to whether it is used in manufacturing activities or in marketing activities. A working interest in oil and gas properties shall not be considered to be intangible property for purposes of section 367 and the regulations thereunder.

(ii) *Operating intangibles.* An operating intangible is any intangible property of a type not ordinarily licensed or otherwise transferred in transactions between unrelated parties for consideration contingent upon the licensee's or transferee's use of the property. Examples of operating intangibles may include long-term purchase or supply contracts, surveys, studies, and customer lists.

(iii) *Foreign goodwill or going concern value.* Foreign goodwill or going concern value is the residual value of a business operation conducted outside of the United States after all other tangible and intangible assets have been identified and valued. For purposes of section 367 and regulations thereunder the value of the right to use a corporate name in a foreign country shall be treated as foreign goodwill or going concern value.

(iv) *Transitional rule for certain marketing intangibles.* For transfers occurring after December 31, 1984, and before May 16, 1986, for foreign trademarks, tradenames, brandnames, and similar marketing intangibles developed by a foreign branch shall be treated as foreign goodwill or going concern value.

(e) *Effective date of certain section*—(1) *In general.* Except as specifically provided to the contrary elsewhere in these sections, §§ 1.367(a)–1T through 1.367(a)–6T apply to transfers occurring after December 31, 1984.

(2) *Private rulings.* The taxpayer may rely on a private ruling under section 367(a) received by him before June 16, 1986.

(3) *Certain indirect transfers.* Sections 1.367(a)–1T(c)(2) (i) and (iii) and 1.367(a)–1T(c)(3) apply to transfers made after June 18, 1986. For transfers made before that date, see 26 CFR § 1.367(a)–1(b) (revised as of April 1, 1986).

§ 1.367(a)–2T Exception for transfers of property for use in the active conduct of a trade or business (temporary).

(a) *In general.* Section 367(a)(1) shall not apply to property transferred to a foreign corporation if—

(1) Such property is transferred for use by that corporation in the active conduct of a trade or business outside of the United States; and

(2) The U.S. person that transfers the property complies with the reporting requirements of section 6038B and regulations thereunder.

Where these conditions are satisifed, the foreign corporate transferee of the property shall be considered to be a corporation for purposes of determining the extent to which gain or loss is required to be recognized upon the transfer pursuant to section 332, 351, 354 [reserved as to section 355 or so much of section 356 as relates to section 355], 356, or 361. Paragraph (b) of this section provides rules concerning the requirement that property be transferred for use in the active conduct of a trade or business outside of the United States, while paragraph (c) concerns the application of the requirement where the transferee itself re-transfers the property. In addition, § 1.367(a)–3T provides rules concerning the treatment of stock or securities transferred to a foreign corporation in an exchange described in section 367(a)(1), and § 1.367(a)–4T provides special rules concerning the treatment of other specified types of property. Finally, §§ 1.367(a)–5T and 1.367(a)–6T provide rules concerning certain transfers of property that are subject to section 367(a)(1) regardless of whether the property is used in the active conduct of a trade or business.

(b) *Active conduct of a trade or business outside the United States*—(1) *In general.* Property qualifies for the exception provided by this section if it is transferred to a foreign corporation for use in the active conduct of a trade or business outside of the United States. Therefore, to determine whether property is subject to the exception provided by this section, four factual determinations must be made:

(i) What is the trade or business of the transferee;

(ii) Do the activities of the transferee constitute the active conduct of that trade or business;

(iii) Is the trade or business conducted outside of the United States; and

(iv) Is the transferred property used or held for use in the trade or business?

Rules concerning these four determinations are provided in paragraphs (b) (2), (3), (4), and (5) of this section.

(2) *Trade or business.* Whether the activities of a foreign corporation constitute a trade or business must be determined under all the facts and circumstances. In general, a trade or business is a specific unified group of activities that constitute (or could constitute) an independent economic enterprise carried on for profit. For example, the activities of a foreign selling subsidiary could constitute a trade or business if they could be independently carried on for profit, even though the subsidiary acts exclusively on behalf of, and has operations fully integrated with, its parent corporation. To constitute a trade or business, a group of activities must ordinarily include every operation which forms a part of, or a step in, a process by which an enterprise may earn income or profit. In this regard, one or more of such activities may be carried on by independent contractors under the direct control of the foreign corporation. (However, see paragraph (b)(3) of this section.) The group of activities must ordinarily include the collection of income and the payment of expenses. If the activities of a foreign corporation do not constitute a trade or business, then the exception provided by this section does not apply, regardless of the level of activities carried on by the corporation. The following activities are not considered to constitute by themselves a trade or business for purposes of this section:

(i) Any activity giving rise to expenses that would be deductible only under section 212 if the activities were carried on by an individual; or

(ii) The holding for one's own account of investments in stock, securities, land, or other property, including casual sales thereof.

(3) *Active conduct.* Whether a trade or business is actively conducted must be determined under all the facts and circumstances. In general, a corporation actively conducts a trade or business only if the officers and employees of the corporation carry out substantial managerial and operational activities. A corporation may be engaged in the active conduct of a trade or business even though incidental activities of the trade or business are carried out on behalf of the corporation by independent contractors. In determining whether the officers and employees of the corporation carry out substantial managerial and operational activities, however, the activities of independent contractors shall be disregarded. On the other hand, the officers and employees of the corporation are considered to include the officers and employees of related entities who are made available to and supervised on a day-to-day basis by, and whose salaries are paid by (or reimbursed to the lending related entity by), the transferee foreign corporation. Whether a trade or business that produces rents or royalties is actively conducted shall be determined under the principles of § 1.954–2(d)(1) (but without regard to whether the rents or royalties are received from an unrelated person). The rule of this paragraph (b)(3) is illustrated by the following example.

Example. X, a domestic corporation, and Y, a foreign corporation not related to X, transfer property to Z, a newly formed foreign corporation organized for the purpose of combining the research activities of X and Y. Z contracts all of its operational and research activities to Y for an arm's-length fee. Z's activities do not constitute the active conduct of a trade or business.

(4) *Outside of the United States.* Whether a foreign corporation conducts a trade or business outside of the United States must be determined under all the facts and circumstances. Generally, the primary managerial and operational activities of the trade or business must be conducted outside the United States and immediately after the transfer the transferred assets must be located outside the United States. Thus, the exception provided by this section would not apply to the transfer of the assets of a domestic business to a foreign corporation if the domestic business continued to operate in the United States after the transfer. In such a case, the primary operational activities of the business would continue to be conducted in the United States. Moreover, the transferred assets would be located in the United States. However, it is not necessary that every item of property transferred be used outside of the United States. As long as the primary managerial and operational activities of the trade or business are conducted outside of the United States and substantially all of the transferred assets are located outside the United States, incidental items of transferred property located in the United States may be considered to have been transferred for use in the active conduct of a trade or business outside of the United States.

(5) *Use in the trade or business.* Whether property is used or held for use

in a trade or business must be determined under all the facts and circumstances. In general, property is used or held for use in a foreign corporation's trade or business if it is—

(i) Held for the principal purpose of promoting the present conduct of the trade or business;

(ii) Acquired and held in the ordinary course of the trade or business; or

(iii) Otherwise held in a direct relationship to the trade or business. Property is considered held in a direct relationship to a trade or business if it is held to meet the present needs of that trade or business and not its anticipated future needs.

Thus, property will not be considered to be held in a direct relationship to a trade or business if it is held for the purpose of providing for future diversification into a new trade or business, future expansion of trade or business activities, future plant replacement, or future business contingencies.

(c) *Property transferred by transferee corporation*—(1) *General rule.* If a foreign corporation receives property in an exchange described in section 367(a)(1) and as part of the same transaction transfers the property to another person, then the exception provided by this section shall not apply to the initial transfer. For purposes of the preceding sentence, a subsequent transfer within six months of the initial transfer shall be considered to be part of the same transaction, and a subsequent transfer more than six months after the initial transfer may be considered to be part of the same transaction upon the application of step-transaction principles.

(2) *Exception.* Notwithstanding paragraph (c)(1) of this section, the active conduct exception provided by this section shall apply to the initial transfer if—

(i) The initial transfer is followed by one or more subsequent transfers described in section 351 or 721; and

(ii) Each subsequent transferee is either a partnership in which the preceding transferor is a general partner or a corporation in which the preceding transferor owns common stock; and

(iii) The ultimate transferee uses the property in the active conduct of a trade or business outside the United States.

(d) *Transitional rule.* Notwithstanding any other provision of this section, property shall be considered to have been transferred for use in the active conduct of a trade or business outside of the United States, if—

(1) The property was transferred after December 31, 1984, and before June 18, 1986;

(2) The property was, or would have been, considered to be transferred for use by the transferee foreign corporation in the active conduct, in any foreign country, or a trade or business, under the principles of section 3.02(1) of Revenue Procedure 68–23, 1968–1 C.B. 821; and

(3) Based on all of the facts and circumstances, it was, or would have been, determined under section 2.02 of Revenue Procedure 68–23 that tax avoidance was not one of the principal purposes of the transaction.

§ 1.367(a)–3T Treatment of transfers of stock or securities to foreign corporations (temporary).

(a) *In general.* This section provides rules concerning the transfer of stock or securities to a foreign corporation in an exchange described in section 367(a)(1). In general, a transfer of stock or securities by a U.S. person to a foreign corporation in connection with any exchange described in section 332, 351, 354 [reserved as to section 355 and so much of section 356 as relates to section 355], 356, or 361, is subject to section 367(a)(1) (and, therefore, treated as a taxable exchange) unless one of the exceptions set forth in this section applies to the transfer. Paragraph (b) of this section specifies certain transactions that are not subject to section 367(a)(1), while paragraph (c) provides rules concerning the treatment of transfers of stock or securities of domestic corporations pursuant to any exchange described in section 367(a)(1). Paragraph (d) of this section provides rules concerning the transfer of stock of a foreign corporation to another foreign corporation pursuant to section 332 or 351 [reserved as to section 355 and so much of section 356 as relates to section 355]. Finally, paragraphs (e), (f), and (g) provide detailed rules applicable to certain transfers decribed above and paragraph (h) sets forth anti-abuse rules.

(b) *Transfers to which section 367(a)(1) does not apply*—(1) *Transfers in certain reorganizations of stock or securities of foreign corporations.* If, pursuant to an exchange described in section 354, 361, or so much of section 356 as relates to section 354, a U.S. person transfers to a foreign corporation stock or securities of a foreign corporation that is a party to the reorganization, then section 367(a) shall not apply to the transfer, by reason of the operation of section 367(a)(2) and 1.367(a)–1T(b)(2)(i). Thus, section 367(a)(1) shall not apply to a transfer of stock of a foreign corporation by a U.S. person to another foreign corporation pursuant to a reorganization described in section 368(a)(1)(B) because the foreign corporation whose stock is transferred is a party to the reorganization. This result follows even though that foreign corporation may not be a party to other types of reorganizations or exchanges for which the transaction also qualifies. For rules concerning the treatment of certain transfers that are described in section 351 as well as one of the above-cited sections, see §§ 7.367(b)–4 and 7.367(b–7.

(2) *Compulsory transfers.* For rules regarding a transfer of property (including stock or securities) that is compelled by foreign government action, see § 1.367(a)–4T(f).

(c) *Transfer of stock or securities of domestic corporation*—(1) *In general.* The transfer of stock or securities of a domestic corporation to a foreign corporation (in an exchange described in section 367(a)(1)) shall be subject to section 367(a)(1) and shall therefore be treated as a taxable exchange, except in the circumstances set forth in paragraphs (c) (2), (3), (4), (5), and (6) of this section.

(2) *Active conduct of a trade or business.* Section 367(a)(1) shall not apply to a transfer of stock or securities of a domestic corporation if—

(i) The transfer is described in paragraph (e)(2) of this section; and

(ii) The transferor files an agreement to recognize gain upon the transferee's later disposition of the transferred interest in accordance with the provisions of paragraph (g) of this section.

In general, paragraph (e)(2) of this section describes certain transfers of stock or securities for use by the transferee in the active conduct of a trade or business outside of the United States.

(3) *U.S. transferors obtain limited interest in transferee.* Section 367(a)(1) shall not apply to a transfer of stock or securities of a domestic corporation if the transfer is described in paragraph (f) of this section. In general, paragraph (f) of this section describes transfers in which the U.S. transferors of stock or securities obtain only a limited interest in the transferee foreign corporation.

(4) *Transferor files agreement to recognize gain upon later disposition.* Section 367(a)(1) shall not apply to a transfer of stock or securities of a domestic corporation if—

(i) Immediately after the transfer all U.S. transferors own in the aggregate less than fifty percent of both the total voting power and the total value of the stock of the transferee foreign corporation; and

(ii) The subject transferor files an agreement to recognize gain upon the transferee's later disposition of the transferred interest in accordance with the provisions of paragraph (g) of this section.

(5) *Certain transfers in connection with performance of services.* Section 367(a)(1) shall not apply to a domestic corporation's transfer of its own stock or securities in connection with the performance of services, if the transfer is considered to be to a foreign corporation solely by reason of § 1.83-6(d)(1).

(6) *Transfers pursuant to section 355 or so much of section 356 as related to section 355.* [Reserved.]

(d) *Transfer of stock or securities of foreign corporation pursuant to section 332 or 351 [reserved as to section 355 and so much of section 356 as relates to section 355]*—(1) *In general.* If a U.S. person transfers stock or securities of a foreign corporation to another foreign corporation in an exchange described in section 332 or 351 [reserved as to section 355 or so much of section 356 as relates to section 355] then section 367(a)(1) shall apply to the transfer (which is therefore treated as a taxable exchange), except in the circumstances set forth in paragraphs (d) (2), (3), (4), (5), and (6) of this section. Transfers described in section 351 that are also described in section 368(a)(1)(B) shall be subject to the rules set forth in §§ 7.367(b)-4 and 7.367(b)-7 and shall not be subject to the rules of this paragraph (d).

(2) *Active conduct of a trade or business.* Section 367(a)(1) shall not apply to a transfer of stock or securities of a foreign corporation if—

(i) The transfer is described in paragraph (e) (2) or (3) of this section; and

(ii) The transferor files an agreement to recognize gain upon the transferee's later disposition of the transferred interest in accordance with the provisions of paragraph (g) of this section.

In general, paragraph (e) describes transfers of stock or securities for use by the transferee corporation in the active conduct of a trade or business outside of the United States.

(3) *Transfer of stock or securities of foreign corporation to another corporation organized in same country.* Section 367(a)(1) shall not apply to a transfer of stock or securities of a foreign corporation if—

(i) The transferred corporation and the transferee corporation are created or organized under the laws of the same foreign country;

(ii) At least 50 percent of the assets used in the trade or business of the transferred corporation are located in that same foreign country;

(iii) Prior to the transfer, more than 50 percent of the total combined voting power of all classes of stock entitled to vote of the transferred corporation was held by U.S. persons;

(iv) After the transfer, the transferee corporation holds more than 50 percent of the total combined voting power of all classes of stock entitled to vote of the transferred corporation;

(v) After the transfer, the U.S. persons that controlled the transferred corporation before the transfer hold at least 50 percent of the total combined voting power of all classes of stock entitled to vote of the transferee corporation;

(vi) After the transfer, the transferee corporation is a controlled foreign corporation within the meaning of section 957(a); and

(vii) The transferor files an agreement to recognize gain upon the transferee's later disposition of the transferred interest in accordance with the provisions of paragraph (g) of this section.

The provisions of this paragraph (d)(3) shall apply to transfers occurring after June 16, 1986. For other transfers, see section 3.02(1)(a)(iii)(B) of Revenue Procedure 68-23.

(4) *U.S. transferors obtain limited interest in transferee.* Section 367(a)(1) shall not apply to a transfer of stock or securities of a foreign corporation if the transfer is described in paragraph (f) of this section. In general, paragraph (f) of this section describes transfers in which the U.S. transferors of stock or securities obtain only a limited interest in the transferee foreign corporation.

(5) *Transferor files agreement to recognize gain upon later disposition.* Section 367(a)(1) shall not apply to a transfer of stock or securities of a foreign corporation if—

(i) Immediately after the transfer all U.S. transferors own in the aggregate less than fifty percent of both the total voting power and the total value of the stock of the transferee foreign corporation; and

(ii) The subject transferor files an agreement to recognize gain upon the transferee's later disposition of the transferred interest in accordance with the provisions of paragraph (g) of this section.

(6) *Transfer pursuant to section 355 or so much of section 356 as relates to section 355.* [Reserved.]

(e) *Transfer for use in the active conduct of a trade or business outside of the United States*—

(1) *In general.* Section 367(a) shall not apply to a transfer of stock or securities of a corporation if—

(i) The transfer is described in paragraph (e) (2) or (3) of this section; and

(ii) The transferor files an agreement to recognize gain upon the transferee's later disposition of the transferred interest in accordance with the provisions of paragraph (g) of this section.

(2) *Stock constituting operating asset.* A transfer of stock or securities of a foreign or domestic corporation to a foreign corporation shall be considered to be for use in the active conduct of a trade or business outside of the United States if the stock or securities are essentially operating assets in the hands of the transferor because ownership of the stock or securities grants material rights to acquire for use in the transferor's trade or business outside the United States products produced by the transferred corporation outside the United States. See *Kaiser Aluminum Chemical Corp. V. Comm'r*, 76 T.C. 325 (1981).

(3) *Consolidation of integrated business*—(i) *In general.* A transfer of stock or securities of a foreign corporation to a foreign corporation shall be considered to be for use in the active conduct of a trade or business outside of the United States if—

(A) Immediately after the transfer, the transferee foreign corporation holds more than 50 percent of the total voting power and more than 50 percent of the total value of stock of the transferred corporation; and

(B) Both immediately before and immediately after the transfer, the transferred corporation and the transferee foreign corporation constitute an integrated business in accordance with the provisions of paragraph (e)(2)(ii) of this section.

(ii) *Integrated business.* For purposes of this paragraph (e)(2), the transferred and transferee corporations shall be considered to constitute an integrated business only if—

(A) Each corporation is engaged, directly or indirectly, in substantial business operations beyond the mere provision of general managerial, financial, or similar services to the other corporation; and

(B) Either the business operations of one corporation are substantially identical to all or the principal part of the operations of the other, or the operations of the two corporations

constitute in principal part complementary and mutually interdependent steps in the production and sale or lease of a product or products or in the provision of a service. Substantial identity of business operations requires that the two corporations engage in substantially the same production (or service) and marketing processes or activities for generally the same or similar products (or services).

(f) *U.S. transferors obtain limited interest in transferee*—(1) *In general.* A transfer of stock or securities of a foreign or domestic corporation by a U.S. person to a foreign corporation shall not be subject to section 367(a)(1) if immediately after the transfer—

(i) All U.S. transferors own in the aggregate less than twenty percent of both the total voting power and the total value of the stock of the transferee foreign corporation; or

(ii)(A) All U.S. transferors own in the aggregate twenty percent or more of either the total voting power or the total value of the stock of the transferee foreign corporation, but less than fifty percent of that total voting power and that total value; and

(B) The subject U.S. transferor owns less than five percent of both the total voting power and the total value of the stock of the transferee foreign corporation.

(2) *Attribution.* Section 958 shall apply in determining the ownership of stock for purposes of this paragraph (f).

(3) *Rule not applicable to stock of holding companies.* The rule of paragraph (f)(1) of this section shall not apply if the assets of the transferred corporation consist principally of stock or securities held as portfolio investments. Stock of securities of a given entity held by the transferred corporation shall be presumed not to constitute a portfolio investment if the transferred corporation holds ten percent or more by value of the outstanding stock and securities of that entity. This presumption may be rebutted by evidence that the stock was held by the transferred corporation as a passive, portfolio investment.

(g) *Transferor's agreement to recognize gain upon later disposition by transferee*—(1) *In general.* A transfer of stock or securities shall not be subject to section 367(a)(1) if—

(i) The transferor complies with the reporting requirements of section 6038B and any regulations thereunder;

(ii) The transferor files a binding agreement to recognize gain upon the transferee corporation's later disposition of the transferred stock or securities, in accordance with the rules of this section; and

(iii) The transfer is described in paragraph (d)(3) or (e) of this section or, immediately after the transfer, all U.S. transferors own in the aggregate less than 50 percent of both the total voting power and the total value of the stock of the transferee foreign corporation.

(2) *Agreement to recognize gain: in general.* A transferor's agreement to recognize gain must be attached to, and filed by the due date of, the information return required under section 6038B.

In general, the return must be filed with the transferor's tax return for the taxable year that includes the date of the transfer. However, pursuant to § 1.6038B–1T(b)(1), returns with respect to transfers that took place prior to June 16, 1986, are not required to be filed until September 16, 1986. Therefore, an agreement to recognize gain under the rules of this section with respect to any such transfer may be timely filed until that date. The agreement must be signed under penalties of perjury by a trustee, executor, or equivalent fiduciary in the case of a trust or estate, by a responsible officer in the case of a corporation, by a debtor in possession or trustee in a bankruptcy case under Title 11, United States Code, and in the case of an individual, including a partner who is treated as a transferor by virtue of § 1.367–1T(c)(3), by the individual himself. An agreement may also be signed by an agent authorized to do so under a general or specific power of attorney. The agreement must set forth the following materials, preferably in paragraphs labeled to correspond with the subparagraphs set forth below:

(i) A statement that the document submitted constitutes the transferor's agreement to recognize gain, in accordance with the requirements of § 1.367(a)–3T(g);

(ii) A description of the stock or securities transferred, an estimate of fair market value as of the date of the transfer, and a statement of cost or other basis and any adjustments thereto;

(iii) The transferor's agreement to recognize gain, as described in subparagraph (3) of this paragraph (g);

(iv) A waiver of the period of limitations, as described in subparagraph (4) of this paragraph (g); and

(v) An agreement to file with the transferor's tax returns for the 5 years following the year of the transfer a certification and waiver as described in subparagraph (5) of this paragraph (g).

(3) *Terms of agreement*—(i) *Recognition of gain.* The transferor must agree that if, prior to the close of the fifth taxable year following the taxable year of the transfer, the transferee foreign corporation disposes of the transferred stock in any manner (other than in a liquidation of the transferred corporation), then by the 90th day thereafter the transferor will file an amended return for the year of the transfer and recognize thereon the gain realized but not recognized upon the initial transfer. Such gain shall be computed as if there had been a sale of the stock or securities at fair market value at the time of the initial transfer. Net operating losses or credits against tax that were available in the year of the initial transfer and that have expired unused may be applied (respectively) against any gain recognized or tax owed by reason of this provision, but no other adjustments shall be made with respect to any other items of income or deduction in the year of the transfer or other years. If additional tax is required to be paid, then interest must be paid on that amount at the rates determined under section 6621, with respect to the period between the date that was prescribed for filing the transferor's income tax return for the year of the transfer and the date on which the additional tax for that year is paid. For special rules applicable to nonrecognition transfers, see subparagraph (7) of this paragraph (g). For special rules applicable when a U.S. transferor that enters into an agreement under this paragraph (g) ceases to exist, see subparagraph (9) of this paragraph (g).

(ii) *Partial disposition.* If the transferee foreign corporation disposes of only a portion of the stock or securities of the transferred corporation, then the U.S. transferor shall be required to recognize a proportionate amount of the gain realized but not recognized upon the initial transfer. The proportion required to be recognized shall be determined by reference to the fair market value of the stock or securities disposed of an the fair market value of those retained. The rule of this paragraph (g)(3)(ii) is illustrated by the following example.

Example. A is a U.S. citizen who owns 100 percent of the outstanding stock of foreign corporation X. In a transaction described in section 351, A exchanges his stock in X for 25 percent of the outstanding stock of foreign corporation Y. A submits an agreement under the rules of this section to recognize gain upon a later disposition. In the following year, Y disposes of 50 percent of the fair market value of the stock of X. Therefore, A is required to recognize 50 percent of the gain he realized but did not recognize upon the initial transfer of the shares of X.

(iii) *Disposition of assets by transferred corporation.* For purposes of paragraph (g)(3) (i) and (ii) of this section, a disposition not in the ordinary course of business by the transferred corporation of all or a substantial portion of its assets (other than a distribution, including a liquidating distribution, to the transferee foreign corporation) shall be treated as a disposition by the transferee foreign corporation of a proportionate amount of stock of the transferred corporation.

(iv) *Disposition of assets after distribution by transferred corporation.* For purposes of paragraph (g)(3) (i) and (ii) of this section, a disposition not in the ordinary course of business by the transferee foreign corporation of all or a substantial portion of the assets received by it in a distribution, including a liquidating distribution, from the transferred corporation shall be treated as a disposition by the transferee foreign corporation of a proportionate amount of stock of the transferred corporation.

(4) *Waiver of period of limitation.* The transferor must file a waiver of the period of limitation on assessment of tax upon the gain realized on the transfer. The waiver shall be executed on such forms as are prescribed therefor by the Commissioner and shall extend the period for assessment of such tax to a date not earlier than the close of the eighth taxable year following the taxable year of the transfer. Such waiver shall also contain such other terms with respect to assessment as may be considered by the Commissioner to be necessary to ensure the assessment and collection of the correct tax liability for each year for which the waiver is required. The waiver must be signed by a person authorized to sign the agreement pursuant to the provisions of paragraph (g)(2) of this section.

(5) *Annual certification and waiver*—(i) *Certification.* The transferor must agree to file with its income tax return for each of the five taxable years following the taxable year of the transfer a certification that the stock or securities transferred have not been disposed by the transferee in a transaction that is considered to be a disposition for purposes of this paragraph. If either a disposition qualifying under paragraph (g)(1) of this section or a nonrecognition transfer subject to paragraph (g)(7) of this section has occurred, the transferor's certification must provide the information required under the rules of the subject paragraph. The annual certification pursuant to this paragraph (g)(5) must be signed under penalties of perjury by a person authorized to sign the agreement pursuant to the provisions of paragraph (g)(2) of this section. The certification must identify the transfer with respect to which it is given by setting forth the date of the transfer and a description of the stock or securities transferred. If a taxpayer has made more than one transfer subject to the rules of this paragraph (g), the certifications for those transfers may be combined in a single document, but each transfer must be separately identified.

(ii) *Waiver.* The transferor must agree to file with its income tax return for each of the eight taxable years following the taxable year of the transfer a waiver of the period of limitations on assessment as described in paragraph (g)(4) of this section. For the rule extending the period of limitations upon a failure to comply with the reporting requirements of section 6038B and regulations thereunder, see § 1.6038B–1T(f)(1)(iii).

(6) *Warranty of information regarding disposition.* The transferor must warrant that arrangements have been made in connection with the transfer of stock or securities to ensure that the transferor will be informed of any subsequent disposition of stock, securities, or assets that would require the recognition of gain under the agreement.

(7) *Treatment of nonrecognition transfers.* If, during the period the agreement is in force, the transferee foreign corporation disposes of the stock or securities of the transferred corporation in a transaction on which gain or loss would not be required to be recognized under U.S. income tax principles, then the U.S. transferor shall not be required to recognize gain under paragraph (g)(3)(i) of this section, provided that the U.S. transferor complies with the requirements of subdivisions (i), (ii), and (iii) of this paragraph (g)(7).

(i) The U.S. transferor must provide a notice of the transfer with its next annual certification under paragraph (g)(5) of this section, setting forth—

(A) A description of the transfer;

(B) The applicable nonrecognition provision; and

(C) The name, address, and identifying number (if any) of the new transferee of the stock or securities of the transferred corporation.

(ii) The U.S. transferor must provide a new agreement to recognize gain (in accordance with the rules of paragraph (g) (2) and (3)(i) of this section) if, prior to the close of the fifth taxable year following the taxable year of the initial transfer, either—

(A) The initial transferee foreign corporation disposes of the interest which it received in exchange for the stock or securities of the transferred corporation (other than in a disposition which itself qualifies under the rules of this paragraph (g)(7)); or

(B) The person that obtained the stock or securities of the transferred corporation disposes of that stock or those securities (other than in a disposition which itself qualifies under the rules of this paragraph (g)(7)).

If a disposition that triggers the recognition of gain under the rules of this paragraph is only a partial disposition of the property, then the U.S. transferor shall be required to recognize a proportionate amount of the gain realized but not recognized upon the initial transfer. The proportion required to be recognized shall be determined by reference to the fair market value of the stock or securities disposed of and the fair market value of those retained as of the date of the disposition.

(iii) The U.S. transferor must warrant that arrangements have been made, in connection with the nonrecognition transfer, ensuring that the U.S. transferor will be informed of any subsequent disposition with respect to which recognition of gain would be required under the agreement.

(8) *Special rules for indirect transfers*—(i) *Transfers covered.* If a U.S. person that holds an interest in an entity is considered to make an indirect transfer of stock or securities described in section 367(a) under the provisions of § 1.367(a)–1T(c), then the rules of this paragraph (g)(8) shall apply to the transfer.

(ii) *Applicable rules.* For purposes of this paragraph (g), the foreign corporation that issued the stock or securities received by the U.S. transferor shall be considered to be the transferee foreign corporation. Any agreement entered into under this paragraph (g) with respect to such a transfer shall require the recognition of gain by the transferor if—

(A) That transferee foreign corporation disposes of the corporation that it controls (regardless of whether that corporation is the transferred corporation itself or another corporation that obtained the stock, securities, or assets of the transferred corporation); or

(B) The corporation that holds the assets of the transferred corporation disposes of all or a substantial portion of those assets other than in the ordinary course of business.

The rules of paragraph (g)(7) of this section shall apply if gain or loss would

not be required to be recognized under U.S. income tax principles with respect to such a transfer.

(9) *U.S. transferor goes out of existence.* If a U.S. corporation, trust, or estate that has entered into an agreement under this paragraph (g) goes out of existence, and that corporation, trust, or estate is not required to recognize gain under section 367 upon its liquidating transfer of the stock of the transferee foreign corporation, or if an individual transferor that has entered into an agreement under this paragraph (g) dies, then either—

(i) The person winding up the affairs of the transferor must retain assets to meet any possible liability of the transferor under the agreement;

(ii) The person winding up the affairs of the transferor must provide security under subparagraph (10) of this paragraph (g) for any possible liability of the transferor under the agreement; or

(iii) Each person that obtains the stock of the transferee foreign corporation from the transferor must enter into an agreement under this paragraph (g) having the same terms as the agreement entered into by the transferor (but only with respect to that person's proportionate share of the gain realized but not recognized upon the transferor's initial transfer of stock to the transferee foreign corporation).

(10) *Use of security.* The transferor may be required to furnish a bond or other security that satisfies the requirements of § 301.7101–1 if the district director determines that such security is necessary to ensure the payment of any tax upon the gain realized upon the transfer. Such bond or security will generally be required only if the stock or securities transferred are the principal asset of the tranferor and the director has reason to believe that a disposition of the stock or securities may be contemplated. In addition, if a tranferor corporation, trust, or estate ceases to exist, or if an individual transferor dies, then the person winding up the affairs of the transferor (such as a trustee in bankruptcy or an executor) may choose to supply security pursuant to paragraph (g)(9) of this section for the performance of the transferor's obligations under an agreement entered into under this paragraph (g).

(11) *Failure to comply.* If a person that has entered into an agreement under this paragraph (g) fails at any time to comply in any material respect with the requirements of this section or with the terms of any agreement submitted pursuant thereto, then the rule of paragraph (g)(1) of this section shall not apply. Thus, the initial transfer of the stock or securities will become subject to section 367(a)(1) (unless otherwise excepted under the rules of this section) and will be treated as a taxable exchange in the year of the initial transfer. Such a material failure to comply shall extend the period for assessment of tax until three years after the date on which the Internal Revenue Service receives actual notice of the failure to comply.

(12) *Availability of forms.* Any agreement, certification, waiver, or other document required to be filed pursuant to the provisions of this paragraph (g) shall use such forms as may be prescribed therefore by the Commissioner (or a similar statement providing the same information). Until such time as forms are published, all necessary filings may be accomplished by providing the required information to the Service in accordance with the rules of this paragraph.

(13) *Basis adjustments*—(i) If a U.S. transferor is required to recognize gain under this paragraph (g), then in determining for U.S. income tax purposes any gain or loss recognized by the transferee foreign corporation upon its subsequent dispositon of the transferred stock or securities, its basis in such interests shall be increased by the amount of gain required to be recognized (but not by any tax or interest required to be paid on such amount).

(ii) If a U.S. transferor is required to recognize gain under this paragraph (g), then the U.S. transferor's basis in the stock of the transferee foreign corporation shall be increased by the amount of gain required to be recognized (but not by any tax or interest required to be paid on such amount).

(h) *Anti-abuse rules*—(1) *Coordination with Subpart F.* Notwithstanding the provisions of paragraph (d) (2) or (3) of this section, section 367(a)(1) shall apply to a transfer of stock or securities of a foreign corporation if either:

(i) The transferred corporation was a controlled foreign corporation within the meaning of section 957(a), and the transferee corporation is not a controlled foreign corporation; or

(ii) Both the transferred and the transferee corporations are controlled foreign corporations within the meaning of section 957(a) but the transferor was a U.S. shareholder of the transferred corporation within the meaning of section 951(b) and is not a U.S. shareholder of the transferee corporation, within the meaning of section 951(b).

However, section 367(a)(1) shall not apply to such a transfer if the transferor enters into an agreement to recognize gain under paragraph (g) of this section.

(2) *Incorporation of property to avoid section 367(a)(1).* Notwithstanding any other provision of this section, section 367(a)(1) shall apply to a transfer of stock or securities of a domestic corporation if:

(i) The domestic corporation holds property that would be subject to section 367(a)(1) if it were transferred directly to a foreign corporation;

(ii) A U.S. person transferred that property to the domestic corporation in a transaction on which gain or loss was not required to be recognized, and

(iii) One of the principal purposes of the incorporation and transfer was avoidance of the provisions of section 367(a).

A transfer of property shall be presumed to have been made to avoid the provisions of section 367(a) if the transfer to the domestic corporation occurred less than two years before the transfer of the stock of the domestic corporation to the foreign corporation, or if it otherwise appears that the transfer of stock to the foreign corporation was planned or contemplated at the time of the transfer of the property to the domestic corporation. The presumption created by the previous sentence may be rebutted by evidence establishing that avoidance of the provisions of section 367(a) was not one of the principal purposes of the incorporation and subsequent transfer.

§ 1.367 (a)–4T Special rules applicable to specified transfers of property (temporary).

(a) *In general.* This section provides special rules for determining the applicability of section 367(a)(1) to specified transfers of property. Paragraph (b) of this section provides a special rule requiring the recapture of depreciation upon the transfer abroad of property previously used in the United States. Paragraphs (c) through (f) of this section provide rules for determining whether certain types of property are transferred for use in the active conduct of a trade or business outside of the United States. Paragraph (g) excepts certain transfers to FSCs from the operation of section 367(a)(1). The treatment of any transfer of property described in this section shall be determined exclusively under the rules of this section.

(b) *Depreciated property used in the U.S.*—(1) *In general.* If a U.S. person transfers U.S. depreciated property (as defined in paragraph (b)(2) of this section) to a foreign corporation in an exchange described in section 367(a)(1),

then that person shall include in its gross income for the taxable year in which the transfer occurs ordinary income equal to the gain realized that would have been includible in the transferor's gross income as ordinary income under section 617(d)(1), 1245(a), 1250(a), 1252(a), or 1254(a), whichever is applicable, if at the time of the transfer the transferor had sold the property at its fair market value. Recapture of depreciation under this paragraph (b) shall be required regardless of whether any exception to section 367(a)(1) (such as the exception for property transferred for use in the active conduct of a foreign trade or business) would otherwise apply to the transfer. However, any applicable exception shall apply with respect to realized gain that is not included in ordinary income pursuant to this paragraph (b).

(2) *U.S. depreciated property.* U.S. depreciated property subject to the rules of this paragraph (b) is any property that—

(i) Is either mining property (as defined in section 617(f)(2)), section 1245 property (as defined in section 1245(a)(3)), section 1250 property (as defined in section 1250(c)), farm land (as defined in section 1252(a)(2)), or oil, gas, or geothermal property (as defined in section 1254(a)(3)); and

(ii) Has been used in the United States or has qualified as section 38 property by virtue of section 48(a)(2)(B) prior to its transfer.

(3) *Property used within and without the U.S.* If U.S. depreciated property has been used partly within and partly without the United States, then the amount required to be included in ordinary income pursuant to this paragraph (b) shall be reduced to an amount determined in accordance with the following formula:

$$\text{Full recapture amount} \times \frac{\text{U.S. use}}{\text{Total use}}$$

For purposes of the above fraction, the "full recapture amount" is the amount that would otherwise be included in the transferor's income under paragraph (b)(1) of this section. "U.S. use" is the number of months that the property either was used within the United States or qualified as section 38 property by virtue of section 48(a)(2)(B), and was subject to depreciation by the transferor or a related person. "Total use" is the total number of months that the property was used (or available for use), and subject to depreciation, by the transferor or a related person. For purposes of this paragraph (b)(3), property shall not be considered to have been in use outside of the United States during any period in which such property was, for purposes of section 48 or 168, treated as property not used predominantly outside the United States pursuant to the provisions of section 48(a)(2)(B). For purposes of this paragraph (b)(3) the term "related person" shall have the meaning set forth in § 1.367(d)–1T(h).

(4) *Transfer followed by section 338 election.* For purposes of paragraph (b)(1) of this section, property that is transferred by a U.S. corporation to a foreign corporation in a transfer described in the section 367(a)(1) shall be treated as U.S. depreciated property at the time of the transfer if—

(i) The transferee foreign corporation was a member of the U.S. transferor's affiliated group (determined without regard to the exceptions contained in section 1504(b)) at the time of the transfer; and

(ii) Within three years after the transfer, a purchasing corporation files an express election under section 338(g) for any member of the U.S. corporation's affiliated group (determined without regard to the exceptions contained in section 1504(b)) and files a regular exclusion election under § 1.338–5T(c)(2)(v) by virtue of which the transferee foreign corporation is excluded from the status of target affiliate.

(5) *Effective date.* This paragraph (b) applies to transfers occurring on or after June 16, 1986.

(c) *Property to be leased*—(1) *Leasing business of transferee.* Tangible property transferred to a foreign corporation that will be leased to other persons by the foreign corporation shall be considered to be transferred for use in the active conduct of a trade or business outside of the United States only if—

(i) The transferee's leasing of the property constitutes the active conduct of a leasing business;

(ii) The lessee of the property is not expected to, and does not, use the property in the United States; and

(iii) The transferee has need for substantial investment in assets of the type transferred.

The active conduct of a leasing business requires that the employees of the foreign corporation perform substantial marketing, customer service, repair and maintenance, and other substantial operational activities with respect to the transferred property outside of the United States. Tangible property subject to the rules of this paragraph (c) includes real property located outside of the United States. The rules of § 1.367(a)–5T(b) shall apply to transfers of property described in that section regardless of satisfaction of the rules of this paragraph (c).

(2) *De minimis leasing by transferee.* Tangible property transferred to a foreign corporation that will be leased to other persons by the foreign corporation and that does not satisfy the conditions of paragraph (b)(1) of this section shall, nevertheless, be considered to be transferred for use in the active conduct of a trade or business if either—

(i) The property transferred will be used by the transferee foreign corporation in the active conduct of a trade or business but will be leased during occasional brief periods when the property would otherwise be idle, such as an airplane leased during periods of excess capacity; or

(ii) The property transferred is real property located outside the United States and—

(A) The property will be used primarily in the active conduct of a trade or business of the transferee foreign corporation; and

(B) Not more than ten percent of the square footage of the property will be leased to others.

(d) *Property to be sold.* Property shall not be considered to be transferred for use in the active conduct of a trade or business and a transfer of stock or securities shall not be excepted from section 367(a)(1) under the rules of § 1.367(a)–3T if, at the time of the transfer, it is reasonable to believe that, in the reasonably foreseeable future, the transferee will sell or otherwise dispose of any material portion of the transferred stock, securities, or other property other than in the ordinary course of business.

(e) *Oil and gas working interests*—(1) *In general.* A working interest in oil and gas properties shall be considered to be transferred for use in the active conduct of a trade or business if—

(i) The transfer satisfies the conditions of paragraph (e)(2) of this section;

(ii) At the time of the transfer, the transferee has no intention to farmout or otherwise transfer any part of the transferred working interest; and

(iii) During the first three years after the transfer there are no farmouts or other transfers of any part of the transferred working interest as a result of which the transferee retains less than a 50 percent share of the transferred working interest.

(2) *Active use of working interest.* Working interests in oil and gas properties shall be considered to be transferred for use in the active conduct of a trade or business if—

(i) The transferor is regularly and substantially engaged in exploration for and extraction of minerals, either directly or through working interests in joint ventures, other than by reason of the property that is transferred;

(ii) The terms of the working interest transferred were actively negotiated among the joint venturers;

(iii) The working interest transferred constitutes at least a five percent working interest;

(iv) Prior to and at the time of the transfer, through its own employees or officers, the transferor was regularly and actively engaged in—

(A) Operating the working interest, or

(B) Analyzing technical data relating to the activities of the venture;

(v) Prior to and at the time of the transfer, through its own employees or officers, the transferor was regularly and actively involved in decisionmaking with respect to the operations of the venture, including decisions relating to exploration, development, production, and marketing; and

(vi) After the transfer, the transferee foreign corporation will for the foreseeable future satisfy the requirements of subdivisions (iv) and (v) of this paragraph (d)(2).

(3) *Start-up operations.* Working interests in oil and gas properties that do not satisfy the requirements of paragraph (e)(2) of this section shall, nevertheless, be considered to be transferred for use in the active conduct of a trade or business if—

(i) The working interest was acquired by the transferor immediately prior to the transfer and for the specific purpose of transferring it to the transferee foreign corporation;

(ii) The requirements of paragraph (e)(2) (ii) and (iii) of this section are satisfied; and

(iii) The transferee foreign corporation will for the foreseeable future satisfy the requirements of paragraph (e)(2) (iv) and (v) of this section.

(4) *Other applicable rules.* Oil and gas interests not described in this paragraph (e) may nonetheless qualify for the exception to section 367(a)(1) contained in § 1.367(a)–2T, relating to transfers of property for use in the active conduct of a trade or business outside of the United States. However, a mere royalty interest in oil and gas properties will not be treated as transferred for use in the active conduct of a trade or business outside the United States. Moreover, a royalty or similar interest that constitutes intangible property will be subject to the rules of § 1.367(d)–1T, relating to transfers of intangible property.

(f) *Compulsory transfers.* Property shall be presumed to be transferred for use in the active conduct of a trade or business outside of the United States, if—

(1) The property was previously in use in the country in which the transferee foreign corporation is organized; and

(2) The transfer is either:

(i) Legally required by the foreign government as a necessary condition of doing business in that country; or

(ii) Compelled by a genuine threat of immediate expropriation by the foreign government.

(g) *Relationship to other sections.* The rules of §§ 1.367(a)–5T, 1.367(a)–6T, and 1.367(d)–1T apply to transfers of property whether or not the property is transferred for use in the active conduct of a trade or business outside the United States. See § 1.367(d)–1T(g)(2)(ii) for a special election with respect to compulsory transfers of intangible property.

(h) *Transfers of certain property to FSCs*—(1) *In general.* The provisions of section 367 (a) and (d) and the regulations thereunder shall not apply to a transfer of property by a U.S. person to a foreign corporation that constitutes a FSC, as defined in section 922(a), if—

(i) The transferee FSC uses the property to generate exempt foreign trade income, as defined in section 923(a);

(ii) The property is not excluded property, as defined in section 927(a)(2); and

(iii) The property consists of a corporate name or tangible property that is appropriate for use in the operation of a FSC office.

(2) *Exception.* The general rule in paragraph (g)(1) of this section shall not apply if, within three years after the original transfer, the original transferee FSC (or a subsequent transferee FSC) disposes of the property other than in the ordinary course of business or through a transfer to another FSC. Thus, the U.S. transferor may recognize gain in the taxable year in which the original transfer occurred through the application of section 367 and the regulations thereunder.

§ 1.367(a)–5T Property subject to section 367(a)(1) regardless of use in trade or business (temporary).

(a) *In general.* Section 367(a)(1) shall apply to a transfer of property described in this section regardless of whether the property is transferred for use in the active conduct of a trade or business. Certain exceptions to the operation of this rule are provided in this section, and a special gain limitation rule is provided in paragraph (e). A transfer of property described in this section is subject to section 367(a)(1) even if the transfer is a compulsory transfer described in § 1.367(a)–4T(f).

(b) *Inventory, etc.* Regardless of use in an active trade or business, section 367(a)(1) shall apply to the transfer of—

(1) Stock in trade of the taxpayer or other property of a kind which would properly be included in the inventory of the taxpayer if on hand at the close of the taxable year, or property held by the taxpayer primarily for sale to customers in the ordinary course of its trade or business; and

(2) A copyright, a literary, musical, or artistic composition, a letter or memorandum, or similar property, held by—

(i) A taxpayer whose personal efforts created such property;

(ii) In the case of a letter, memorandum, or similar property, a taxpayer from whom such property was prepared or produced; or

(iii) A taxpayer in whose hands the basis of such property is determined, for purposes of determining gain from a sale or exchange, in whole or part by reference to the basis of such property in the hands of a taxpayer described in subdivision (i) or (ii) of this paragraph (b)(2).

For purposes of this section, the term "inventory" includes raw materials and supplies, partially completed goods, and finished products.

(c) *Installment obligations, etc.* Regardless of use in an active trade or business, section 367(a)(1) shall apply to the transfer of installment obligations, accounts receivable, or similar property, but only to the extent that the principal amount of any such obligation has not previously been included by the taxpayer in its taxable income.

(d) *Foreign currency, etc.*—(1) *In general.* Regardless of use in an active trade or business, section 367(a)(1) shall apply to the transfer of foreign currency or other property denominated in foreign currency, including installment obligations, futures contracts, forward contracts, accounts receivable, or any other obligation entitling its payee to receive payment in a currency other than U.S. dollars.

(2) *Exception for certain obligations.* If transferred property denominated in a foreign currency—

(i) Is denominated in the currency of the country in which the transferee foreign corporation is organized; and

(ii) Was acquired in the ordinary course of the business of the transferor that will be carried on by the transferee foreign corporation,

BEST COPY AVAILABLE

then section 367(a)(1) shall apply to the transfer only to the extent that gain is required to be recognized with respect to previously realized income reflected in installment obligations subject to paragraph (c) of this section. The rule of this paragraph (d)(2) shall not apply to transfers of foreign currency.

(3) *Limitation of gain required to be recognized.* If section 367(a)(1) applies to a transfer of property described in this paragraph, then the gain required to be recognized shall be limited to—

(i) The gain realized upon the transfer of property described in this paragraph (d), minus

(ii) Any loss realized as part of the same transaction upon the transfer of property described in this paragraph (d). This limitation applies in lieu of the rule in § 1.367(a)–1T(b)(1). No loss shall be recognized with respect to property described in this paragraph (d).

(e) *Intangible property.* Regardless of use in an active trade or business, a transfer of intangible property pursuant to section 332 shall be subject to section 367(a)(1), unless it constitutes foreign goodwill or going concern value, as defined in § 1.367(a)–1T(d)(5)(iii). For rules concerning transfers of intangible property pursuant to section 351 or 361, see section 367(d) and § 1.367(d)–1T.

(f) *Leased tangible property.* Regardless of use in an active trade or business, section 367(a)(1) shall apply to a transfer of tangible property with respect to which the transferor is a lessor at the time of the transfer, unless—

(1) With respect to property that will not be leased by the transferee to third persons, the transferee was the lessee of the property at the time of the transfer; or

(2) With respect to property that will be leased by the transferee to third persons, the transferee satisfies the conditions set forth in § 1.367(a)–4T(c)(1) or (2).

§ 1.367(a)–6T Transfer of foreign branch with previously deducted losses (temporary).

(a) *In general.* This section provides special rules relating to the transfer of the assets of a foreign branch with previously deducted losses. Paragraph (b) of this section provides generally that such losses must be recaptured by the recognition of the gain realized on the transfer. Paragraph (c) of this section sets forth rules concerning the character of, and limitations on, the gain required to be recognized. Paragraph (d) of this section defines the term "previously deducted losses." Paragraph (e) of this section describes certain reductions that are made to the previously deducted losses before they are taken into income under this section. Finally, paragraph (g) of this section defines the term "foreign branch."

(b) *Recognition of gain required*—(1) *In general.* If a U.S. person transfers any assets of a foreign branch to a foreign corporation in an exchange described in section 367(a)(1), then the transferor shall recognize gain equal to—

(i) The sum of the previously deducted branch ordinary losses as defined and reduced in paragraphs (d) and (e) of this section; and

(ii) The sum of the previously deducted branch capital losses as defined and reduced in paragraphs (d) and (e) of this section.

(2) *No active conduct exception.* The rules of this paragraph (b) shall apply regardless of whether the assets of the foreign branch are transferred for use in the active conduct of a trade or business outside the United States.

(c) *Special rules concerning gain recognized*—(1) *Character and source of gain.* The gain described in paragraph (b)(1)(i) of this section shall be treated as ordinary income of the transferor, and the gain described in paragraph (b)(1)(ii) of this section shall be treated as long-term capital gain of the transferor. Gain that is recognized pursuant to the rules of this section shall be treated as income from sources outside the United States. Such recognized gain shall be treated as foreign oil and gas extraction income (as defined in section 907) in the same proportion that previously deducted foreign oil and gas extraction losses bore to the total amount of previously deducted losses.

(2) *Gain limitation.* For a rule limiting the amount of gain required to be recognized under section 367(a) upon any transfer of property to a foreign corporation, including the transfer of assets of a foreign branch with previously deducted losses, see § 1.367(a)–1T(b)(3).

(3) *Foreign goodwill and going concern value.* For purposes of this section, the assets of a foreign branch shall include foreign goodwill and going concern value related to the business of the foreign branch, as defined in § 1.367(a)–1T(d)(5)(iii). Thus, gain realized upon the transfer of the foreign goodwill or going concern value of a foreign branch to a foreign corporation will be taken into account in computing the limitation on loss recapture under paragraph (c)(2) of this section.

(4) *Transfers of certain intangible property.* Gain realized on the transfer of intangible property (computed with reference to the fair market value of the intangible property as of the date of the transfer) that is an asset of a foreign branch shall be taken into account in computing the limitation on loss recapture under paragraph (c)(2) of this section. For rules relating to the crediting of gain recognized under this section against income deemed to arise by operation of section 367(d), see § 1.367(d)–1T(g)(3).

(d) *Previously deducted losses*—(1) *In general.* This paragraph (d) provides rules for determining, for purposes of paragraph (b)(1) of this section, the previously deducted losses of a foreign branch any of whose assets are transferred to a foreign corporation in an exchange described in section 367(a)(1). Initially, the two previously deducted losses of a foreign branch for a taxable year are the total ordinary loss ("previously deducted branch ordinary loss") and the total capital loss ("previously deducted branch capital loss") that were realized by the foreign branch in that taxable year (a "branch loss year") prior to the transfer and that were or will be reflected on a U.S. income tax return of the transferor. The previously deducted branch ordinary loss for each branch loss year is reduced by expired net ordinary losses under paragraph (d)(2) of this section, while the previously deducted capital loss for each loss year is reduced by expired net capital losses under paragraph (d)(3) of this section. For each branch loss year, the remaining previously deducted branch ordinary loss and the remaining previously deducted branch capital loss are then reduced, proceeding from the first branch loss year to the last branch loss year, to reflect expired foreign tax credits under paragraph (d)(4) of this section. The reductions are made in the order of the taxable years in which the foreign tax credits arose. Finally, similar reductions are made to reflect expired investment credits under paragraph (d)(5) of this section.

(2) *Reduction by expired net ordinary loss*—(i) *In general.* The previously deducted branch ordinary loss for each branch loss year shall be reduced under this paragraph (d)(2) by the amount of any expired net ordinary loss with respect to that branch loss year. Expired net ordinary losses arising in years other than the branch loss year shall reduce the previously deducted branch ordinary loss for the branch loss year only to the extent that the previously deducted branch ordinary loss exceeds the net operating loss, if any, incurred by the transferor in the branch loss year. The previously deducted branch ordinary losses shall be reduced proceeding from the first branch loss year to the last branch loss year. For each branch loss

year, expired net operating losses shall be applied to reduce the previously deducted branch ordinary loss for that year in the order in which the expired net ordinary losses arose.

(ii) *Existence of expired net ordinary loss.* An expired net ordinary loss exists with respect to a branch loss year to the extent that—

(A) The transferor incurred a net operating loss (within the meaning of section 172(c));

(B) That net operating loss arose in the branch loss year or was available for carryover or carryback to the branch loss year under section 172(b)(1);

(C) That net operating loss has neither given rise to a net operating loss deduction (within the meaning of section 172(a)) for any taxable year prior to the year of the transfer, nor given rise to a reduction of any previously deducted branch ordinary loss (pursuant to paragraph (d)(2) of this section) of any foreign branch of the transferor upon a previous transfer to a foreign corporation; and

(D) The period during which the transferor may claim a net operating loss deduction with respect to that net operating loss has expired.

(3) *Reduction by expired net capital loss*—(i) *In general.* The previously deducted branch capital loss for each branch loss year shall be reduced under this paragraph (d)(3) by the amount of any expired net capital loss with respect to that branch loss year. Expired net capital losses arising in years other than the branch loss year shall reduce the previously deducted branch capital loss for the branch loss year only to the extent that the previously deducted branch capital loss exceeds the net capital loss, if any, incurred by the transferor in the branch loss year. The previously deducted branch capital losses shall be reduced proceeding from the first branch loss year to the last branch loss year. For each branch loss year, expired net capital losses shall be applied to reduce the previously deducted branch capital loss for that year in the order in which the expired net capital losses arose.

(ii) *Existence of expired net capital loss.* An expired net capital loss exists with respect to a branch loss year to the extent that—

(A) The transferor incurred a net capital loss (within the meaning of section 1222(10));

(B) That net capital loss arose in the branch loss year or was available for carryover or carryback to the branch loss year under section 1212;

(C) That net capital loss has neither been allowed for any taxable year prior to the year of the transfer, nor given rise to a reduction of any previously deducted branch capital loss (pursuant to paragraph (c)(3) of this section) of any foreign branch of the transferor upon any previous transfer to a foreign corporation; and

(D) The period during which the transferor may claim a capital loss deduction with respect to that net capital loss has expired.

(4) *Reduction for expired foreign tax credit*—(i) *In general.* The previously deducted branch ordinary loss and the previously deducted branch capital loss for each branch loss year remaining after the reductions described in paragraph (d) (2) and (3) of this section shall be further reduced under this paragraph (d)(4) proportionately by the amount of any expired foreign tax credit loss equivalent with respect to that branch loss year. The previously deducted branch losses shall be reduced proceeding from the first branch loss year to the last branch loss year. For each branch loss year, expired foreign tax credit loss equivalents shall be applied to reduce the previously deducted branch loss for that year in the order in which the expired foreign tax credits arose.

(ii) *Existence of foreign tax credit loss equivalent.* A foreign tax credit loss equivalent exists with respect to a branch loss year if—

(A) The transferor paid, accrued, or is deemed under section 902 or 960 to have paid creditable foreign taxes in a taxable year;

(B) The creditable foreign taxes were paid, accrued, or deemed paid in the branch loss year or were available for carryover or carryback to the branch loss year under section 904(c);

(C) No foreign tax credit with respect to the foreign taxes paid, accrued, or deemed paid has been taken because of the operation of section 904(a) or similar limitations provided by the Code or an applicable treaty, and such taxes have not given rise to a reduction (pursuant to this paragraph (d)(5)) of any previously deducted branch loss of the foreign branch for a prior taxable year or of any previously deducted branch losses of any foreign branch of the transferor upon a prior transfer to a foreign corporation; and

(D) The period during which the transferor may claim a foreign tax credit for the foreign taxes paid, accrued, or deemed paid has expired.

(iii) *Amount of foreign tax credit loss equivalent.* The amount of the foreign tax credit loss equivalent for the branch loss year with respect to the creditable foreign taxes described in paragraph (d)(4)(ii) of this section is the amount of those creditable foreign taxes divided by the highest rate of tax to which the transferor was subject in the loss year.

(5) *Reduction for expired investment credits*—(i) *In general.* The previously deducted branch ordinary loss and the previously deducted branch capital loss for each branch loss year shall be further reduced under this paragraph (d)(5) proportionately by the amount of any expired investment credit loss equivalent with respect to that branch year. The previously deducted branch losses shall be reduced proceeding from the first branch loss year to the last branch loss year. For each branch loss year, expired investment credit loss equivalents shall be applied to reduce the previously deducted branch loss for that year in the order in which the expired investment credits were earned.

(ii) *Existence of investment credit loss equivalent.* An investment credit loss equivalent exists with respect to a branch loss year if—

(A) The transferor earned an investment credit (within the meaning of section 46(a)) in a taxable year;

(B) The investment credit was earned in the branch loss year or was available for carryover or carryback to the branch loss year under section 39;

(C) The investment credit earned by the transferor in the credit year has been denied by section 38(a) or by similar provisions of the Code and has not given rise to a reduction (pursuant to this paragraph (d)(5)) of any previously deducted branch loss of the foreign branch for a preceding taxable year or of the previously deducted losses of any foreign branch of the transferor upon any previous transfer to a foreign corporation; and

(D) The period during which the transferor may claim the investment credit has expired.

(iii) *Amount of investment tax credit loss equivalent.* The amount of the investment credit loss equivalent for the branch loss year with respect to the investment credit described in paragraph (d)(5)(ii) of this section is 85 percent of the amount of that investment credit divided by the highest rate of tax to which the transferor was subject in the loss year.

(e) *Amounts that reduce previously deducted losses subject to recapture*—(1) *In general.* This paragraph (e) describes five amounts that reduce the sum of the previously deducted branch ordinary losses and the sum of the previously deducted branch capital losses before they are taken into income under paragraph (b) of this section. Amounts representing ordinary income shall be applied to reduce first the sum of the previously deducted branch

ordinary losses to the extent thereof, and then the sum of the previously deducted branch capital losses to the extent thereof. Similarly, amounts representing capital gains shall be applied to reduce first the sum of the previously deducted branch capital losses and then the sum of the previously deducted branch ordinary losses.

(2) *Taxable income.* The previously deducted losses shall be reduced by any taxable income of the foreign branch recognized through the close of the taxable year of the transfer, whether before or after any taxable year in which losses were incurred.

(3) *Amounts currently recaptured under section 904(f)(3).* The previously deducted losses shall be reduced by the amount recognized under section 904(f)(3) on account of the transfer.

(4) *Gain recognized under section 367(a).* The previously deducted branch losses shall be reduced by any gain recognized pursuant to section 367(a)(1) (other than by reason of the provisions of this section) upon the transfer of the assets of the foreign branch to the foreign corporation.

(5) *Amounts previously recaptured under section 904(f)(3).*—(i) *In general.* The previously deducted branch losses shall be reduced by the portion of any amount recognized under section 904(f)(3) upon a previous transfer of property that was attributable to the losses of the foreign branch, provided that the amount did not reduce any gain otherwise required to be recognized under section 367(a)(3)(C) and this section (or Revenue Ruling 78-201, 1978-1 C.B. 91).

(ii) *Portion attributable to the losses of the foreign branch.*—(A) *Branch property.* The full amount recognized under section 904(f)(3) upon a previous transfer of property of the branch shall be treated as attributable to the losses of the foreign branch.

(B) *Non-branch property.* The portion of the amount previously recognized under section 904(f)(3) upon a transfer of non-branch property that was attributable to the losses of the foreign branch shall be the sum, over the taxable years in which the transferor sustained an overall foreign loss some portion of which was recaptured on the disposition, of the recaptured portions of those overall foreign losses after multiplication by the following fraction:

$$\frac{\text{Losses of the foreign branch for the year}}{\text{All foreign losses for the year}}$$

For purposes of this fraction, the term "losses of the foreign branch for the year" means the losses of the foreign branch that were taken into account under section 904(f)(2) in determining the amount of the transferor's overall foreign loss for the year, and the term "all foreign losses for the year" means all of the losses of the transferor that were taken into account under section 904(f)(2).

(6) *Amounts previously recognized under the rules of this section.* The previously deducted losses shall be reduced by the amounts previously recognized under the rules of this section upon a previous transfer of assets of the foreign branch.

(f) *Example.* The rules of paragraphs (b) through (e) of this section are illustrated by the following example.

Example. (i) *Facts.* X, a U.S. corporation, is a calendar year taxpayer. On January 1, 1981, X established a branch in foreign country A to manufacture and sell X's products in country A. On July 1, 1986, X organized corporation Y, a country A subsidiary, and transferred to Y all of the assets of its country A branch, including goodwill and going concern value. During the period from January 1, 1981, through July 1, 1986, X's country A branch earned income and incurred losses in the following amounts:

COUNTRY A BRANCH

Year	Ordinary income (loss)	Capital gain (loss)
1981	(200)	0
1982	(300)	(100)
1983	(400)	0
1984	(200)	0
1985	(100)	0
1986	50	0

At the time of the transfer of X's country A branch assets to Y, those assets had a fair market value of $2,500 and an adjusted basis of $1,000. For each of the assets, fair market value exceeded adjusted basis. X had no net capital loss or unused investment credit during any taxable year relevant to the transfer. In 1984, X incurred a net operating loss of $400, $200 of which was carried back to prior years. An additional $50 of the 1984 net operating loss was carried over to 1985. The remaining $150 of the 1984 net operating loss was not used in any year prior to the transfer. In 1979, X paid creditable foreign taxes of $330 that could not be claimed as a credit in that year or any earlier year because of section 904. Of those foreign taxes, $100 were carried over and claimed as a credit in 1983, but the remaining $230 were not used in any year prior to the transfer. X was not required to recognize any gain under section 904(f)(3) on account of the 1986 transfer or any prior transfer. X was not required to recognize gain upon the transfer under section 367(a) (other than by reason of the provisions of this section).

(ii) *Previously deducted losses.* The previously deducted losses of X's country A branch are $575 of ordinary losses and $25 of capital losses, computed as follows: Initially, the branch has previously deducted ordinary losses of $1,000 ($200+$300+$400+$100), and previously deducted capital losses of $100. (See paragraph (d)(1) of this section.)

(iii) *Expired losses and credits.* Under the facts of this example, there are no reductions for expired net ordinary losses or expired net capital losses under paragraph (d) (2) or (3) of this section. However, the previously deducted losses are reduced proceeding from the first branch loss year to the last branch loss year to reflect the expired foreign tax credit from 1979. The amount of the foreign tax credit loss equivalent with respect to 1981 is $500 ($230/.46). It reduces the previously deducted losses for 1981 proportionately. Thus, the previously deducted ordinary loss for 1981 is reduced from $200 to $0. (See paragraph (d)(4) of this section.) The amount of the foreign tax credit loss equivalent with respect to 1982 is $300 ($500−$200, *i.e.*, $138/.46). (See paragraph (d)(4)(ii)(C) of this section.) It reduces the previously deducted losses for 1982 proportionately. Thus, the previously deducted ordinary loss for 1982 is reduced from $300 to $75, and the previously deducted capital loss for 1982 is reduced from $100 to $25.

(iv) *Further reductions.* The previously deducted ordinary losses of $575 and the previously deducted capital losses of $25 are reduced by the taxable income earned by the branch prior to the date of the transfer ($250). (See paragraph (e)(2) of this section.) Since that income was ordinary income, it is applied first to reduce the previously deducted ordinary losses of $575 to $325. (See paragraph (e)(1) of this section.)

(v) *Recapture.* Since the gain realized by X upon its transfer of the branch assets to Y exceeds the sum of the previously deducted branch losses as defined and reduced above ($325+$25), the limitation in paragraph (c)(2) of this section does not apply. Thus, X is required to recognize $325 of ordinary income and $25 of long-term capital gain upon the transfer. (See paragraph (b) and (c)(1) of this section.)

(g) *Definition of foreign branch.*—(1) *In general.* For purposes of this section, the term "foreign branch" means an integral business operation carried on by a U.S. person outside the United States. Whether the activities of a U.S. person outside the United States constitute a foreign branch operation must be determined under all the facts and circumstances. Evidence of the existence of a foreign branch includes, but is not limited to, the existence of a

separate set of books and records, and the existence of an office or other fixed place of business used by employees or officers of the U.S. person in carrying out business activities outside the United States. Activities outside the United States shall be deemed to constitute a foreign branch for purposes of this section if the activities constitute a permanent establishment under the terms of a treaty between the United States and the country in which the activities are carried out. Any U.S. person may be treated as having a foreign branch for purposes of this section, whether that person is a corporation, partnership, trust, estate, or individual.

(2) *More than one branch.* If a U.S. person carries on more than one branch operation outside the United States, then the rules of this section must be separately applied with respect to each foreign branch that is transferred to a foreign corporation. Thus, the previously deducted losses of one branch may not be offset, for purposes of determining the gain required to be recognized under the rules of this section, by the income of another branch that is also transferred to a foreign corporation. Similarly, the losses of one branch shall not be recaptured upon a transfer of the assets of a separate branch. Whether the foreign activities of a U.S. person are carried out through more than one branch must be determined under all of the facts and circumstances. In general, a separate branch exists if a particular group of activities is sufficiently integrated to constitute a single business that could be operated as an independent enterprise. For purposes of determining the combination of activities that constitute a branch operation as defined in this paragraph (g), the nominal relationship among those activities shall not be controlling. Factors suggesting that nominally separate business operations constitute a single foreign branch include a substantial identity of products, customers, operational facilities, operational processes, accounting and record-keeping functions, management, employees, distribution channels, or sales and purchasing forces. For examples of the application of the principles of this paragraph (g)(2), see Revenue Ruling 81–82, 1981–1 C.B. 127.

(3) *Consolidated group.* For purposes of this section, the activities of each of two domestic corporations outside the United States will be considered to constitute a single foreign branch if—

(i) The two corporations are members of the same consolidated group of corporations; and

(ii) The activities of the two corporations in the aggregate would constitute a single foreign branch if conducted by a single corporation.

Notwithstanding the preceding rule of this paragraph (g)(3), gains of a foreign branch of a domestic corporation arising in a year in which that corporation did not file a consolidated return with a second domestic corporation shall not be applied to reduce the previously deducted losses of a foreign branch of the second corporation (but may be applied to reduce such losses of the foreign branch of the first corporation) upon the transfer of the two branches to a foreign corporation, even though the two domestic corporations file a consolidated return for the year in which the transfer occurs and the two branches are considered at that time to constitute a single foreign branch. For an example of the application of the principles of this paragraph (g)(3), see Revenue Ruling 81–89, 1981–1 C.B. 129.

(4) *Property not transferred.* A U.S. transferor's failure to transfer any property of a foreign branch shall be irrelevant to the determination of the previously deducted losses of the branch subject to recapture under the rules of this section. Thus, if the activities with respect to untransferred property constituted a part of the branch operation under the rules of this paragraph (g), then the losses generated by those activities shall be subject to recapture, notwithstanding the failure to transfer the property. For an example of the application of the principles of this paragraph (g)(4), see Revenue Ruling 80–247, 1980–2 C.B. 127, relating to property abandoned by the U.S. transferor.

(h) *Anti-abuse rule.* If—

(1) A U.S. person transfers property of a foreign branch to a domestic corporation for a principal purpose of avoiding the effect of this section; and

(2) The domestic corporation thereafter transfers the property of the foreign branch to a foreign corporation,

then, solely for purposes of this section, that U.S. person shall be treated as having transferred the property of the branch directly to the foreign corporation. A U.S. person shall be presumed to have transferred property of a foreign branch for a principal purpose of avoiding the effect of this section if the property is transferred to the domestic corporation less than two years prior to the domestic corporation's transfer of the property to a foreign corporation. This presumption may be rebutted by clear evidence that the subsequent transfer of the property was not contemplated at the time of the initial transfer to the domestic corporation and that avoidance of the effect of this section was not a principal purpose for the transaction. A transfer may have more than one principal purpose.

(i) *Basis adjustments.* Basis adjustments reflecting gain recognized pursuant to this section shall be made as described in § 1.367(a)–1T(b)(4)(ii).

Par. 5. Section 1.367(d)–1T is added immediately after § 1.367(c)–2, to read as follows:

§ 1.367(d)–1T Transfers of intangible property to foreign corporations (temporary).

(a) *Purpose and scope.* This section provides rules under section 367(d) concerning transfers of intangible property by U.S. persons to foreign corporations pursuant to section 351 or 361. Paragraph (b) of this section specifies the transfers that are subject to section 367(d) and the rules of this section, while paragraph (c) provides rules concerning the consequences of such a transfer. In general, the U.S. transferor will be treated as receiving annual payments contingent on productivity or use of the transferred property, over the useful life of the property (regardless of whether such payments are in fact made by the transferee). Paragraphs (d), (e), and (f) of this section provide rules for cases in which there is a later direct or indirect disposition of the intangible property transferred. In general, deemed annual license payments will continue if a transfer is made to a related person, while gain must be recognized immediately if the transfer is to an unrelated person. Paragraph (g) of this section provides several special rules, including a rule allowing appropriate adjustments where deemed payments under section 367(d) are not in fact received by the U.S. transferor of the intangible property, and a rule providing for a limited election to treat certain transfers of intangible property as sales at fair market value (in lieu of applying the general useful life-contingent payment rule). In addition, paragraph (g) of this section provides rules coordinating the application of section 367(d) with other relevant Code sections. Paragraph (h) of this section defines the term "related person" for purposes of this section. Finally, paragraph (i) of this section provides the effective date of this section. For rules concerning transfers of intangible property pursuant to section 332, see § 1.367(a)–5T(e).

(b) *Intangible property subject to section 367(d).* Section 367(d) and the rules of this section shall apply to the

transfer of any intangible property, as defined in § 1.367(a)–1T(d)(5)(i). However, section 367(d) and the rules of this section shall not apply to the transfer of foreign goodwill or going concern value, as defined in §1.367(a)–1T(d)(5)(iii), or to the transfer of intangible property described in §1.367(a)–5T(b)(2). However, the transfer of those items to a foreign corporation is subject to the rules set forth in § 1.367(a)–6T, and the transfer of intangible property described in § 1.367(a)–5T(b)(2) is subject to the rules set forth in § 1.367(a)–5T. For a special rule relating to the transfer of operating intangibles, as defined in § 1.367(a)–1T(d)(5)(ii), see paragraph (g)(3) of this section. Transfers of intangible property to foreign corporations pursuant to section 351 or 361 are subject to the rules of this section regardless of whether the property is to be used in the United States, in connection with goods to be sold or consumed in the United States, or in connection with a trade or business outside the United States.

(c) *Deemed payments upon transfer of intangible property to foreign corporation*—(1) *In general.* If a U.S. person transfers intangible property that is subject to section 367(d) and the rules of this section to a foreign corporation in an exchange described in section 351 or 361, then such person shall be treated as having transferred that property in exchange for annual payments contingent on the productivity or use of the property. Such person shall, over the useful life of the property, annually include in gross income an amount that represents an appropriate arms-length charge for the use of the property. The appropriate charge shall be determined in accordance with the provisions of section 482 and regulations thereunder. See § 1.482–2(d). The amount of the deemed payment thus calculated shall be reduced by any royalty or other periodic payment made or accrued by the transferee to an unrelated person during that taxable year for the right to use the intangible property. Amounts so included in the transferor's income shall be treated as ordinary income from sources within the United States. For purposes of computing estimated tax payments, deemed payments under this paragraph (c) shall be treated as received by the transferor on the last day of its taxable year.

(2) *Required adjustments.* The following adjustments shall be made with respect to a U.S. person's recognition of a deemed payment for the use of intangible property under this paragraph (c):

(i) For purposes of chapter 1 of the Code, the earnings and profits of the transferee foreign corporation shall be reduced by the amount of such deemed payment; and

(ii) For purposes of Subpart F of Part III of subchapter N of the Code, the transferee foreign corporation may treat such deemed payment as an expense (whether or not that amount is actually paid), properly allocated and apportioned to gross income subject to Subpart F, in accordance with the provisions of §§ 1.954–1(c) and 1.861–8.

No other special adjustments to earning the profits, basis, or gross income shall be permitted by reason of the recognition of a deemed payment under this paragraph (c). However, see paragraph (g)(1) of this section for rules permitting the establishment of an account receivable with respect to deemed payments not actually received by the U.S. person.

(3) *Useful life.* For purposes of this section, the useful life of intangible property is the entire period during which the property has value. However, in no event shall the useful life of an item of intangible property be considered to exceed twenty years. If intangible property derives its value from secrecy or from protections afforded by law, the useful life of such property shall terminate when the property is no longer secret or no longer legally protected.

(4) *Blocked income.* No deemed payment included in a taxpayer's income under paragraph (c)(1) of this section shall be treated as deferrable income for purposes of applying rules relating to blocked foreign income. See Revenue Ruling 74–351, 1974–2 C.B. 144.

(d) *Subsequent transfer of stock of transferee foreign corporation to unrelated person*—(1) *Treatment as sale of intangible property.* If a U.S. person transfers intangible property that is subject to section 367(d) and the rules of this section to a foreign corporation in an exchange described in section 351 or 361, and within the useful life of the intangible property that U.S. transferor subsequently disposes of the stock of the transferee foreign corporation to a person that is not a related person (within the meaning of paragraph (h) of this section), then the U.S. transferor shall be treated as having simultaneously sold the intangible property to the person acquiring the stock of the transferee foreign corporation. The U.S. transferor shall be required to recognize gain (but not loss) from sources within the United States in an amount equal to the difference between the fair market value of the transferred intangible property on the date of the subsequent disposition and the U.S. transferor's former adjusted basis in that property (determined as of the original transfer). If the U.S. transferor's disposition of the stock of the transferee foreign corporation is subject to U.S. tax other than by reason of this paragraph (d), then the amount of gain otherwise required to be recognized with respect to the stock of the transferee foreign corporation shall be reduced by the amount of gain recognized with respect to the intangible property pursuant to this paragraph (d).

(2) *Required adjustments.* If a U.S. person disposes of the stock of a transferee foreign corporation, and under paragraph (d)(1) of this section is treated as having simultaneously sold intangible property, then, for purposes of computing basis and earnings and profits, the person acquiring the stock of the transferee foreign corporation shall be deemed to have purchased that property at fair market value and to have immediately thereafter contributed it to the transferee foreign corporation in a transaction not covered by section 367(d). Therefore, for purposes of chapter 1 of the Code—

(i) The transferee foreign corporation's basis in the intangible property will be equal to its fair market value (as calculated for purposes of determining the gain required to be recognized by the U.S. transferor);

(ii) The acquiring person's basis in the stock of the transferee foreign corporation shall be determined as if no portion of the consideration given by the acquiring person for the stock is attributable to the intangible property; and

(iii) The earnings and profits of the transferee foreign corporation will not be affected by the transfer of its stock or the deemed transfer to it of the intangible property.

(e) *Subsequent transfer of stock of transferee foreign corporation to related person*—(1) *Transfer to related U.S. person treated as disposition of intangible property.* If a U.S. person transfers intangible property that is subject to section 367(d) and the rules of this section to a foreign corporation in an exchange described in section 351 or 361 and, within the useful life of the transferred intangible property, that U.S. transferor subsequently transfers the stock of the transferee foreign corporation to U.S. persons that are related to the transferor within the meaning of paragraph (h) of this section, then the following rules shall apply:

(i) Each such related U.S. person shall be treated as having received (with the

stock of the transferee foreign corporation) a right to receive a proportionate share of the contingent annual payments that would otherwise be deemed to be received by the U.S. transferor under paragraph (c) of this section.

(ii) Each such related U.S. person shall, over the useful life of the property, annually include in gross income a proportionate share of the amount that would have been included in the income of the U.S. transferor pursuant to paragraph (c) of this section. Such amounts shall be treated as ordinary income from sources within the United States.

(iii) The amount of income required to be recognized by the U.S. transferor pursuant to the rule of paragraph (d)(1) of this section shall be reduced to the amount determined in accordance with the following formula:

(d)(1) amount × (100% − (e) percentage)

For purposes of the above formula, the "(d)(1) amount" is the income that would otherwise be required to be recognized by the transferor corporation pursuant to paragraph (d)(1) of this section, and the "(e) percentage" is the percentage of the transferor corporation's total deemed rights to receive contingent annual payments under paragraph (c) of this section that is deemed to be transferred to related U.S. persons under the rules of this paragraph (e).

(iv) The rules of paragraphs (d) and (e) of this section shall be reapplied in the case of any later transfer of the stock of the transferee foreign corporation by a related U.S. person that received such stock in a transfer that was subject to the rules of this paragraph (e). For purposes of reapplying the rules of paragraphs (d) and (e), each such related U.S. person shall be treated as a U.S. transferor of intangible property to the transferee foreign corporation (to the extent of the interest attributed to such person pursuant to subdivision (i) of this paragraph (e)(1)).

(2) *Required adjustments.* If a U.S. person transfers stock of a transferee foreign corporation to a U.S. related person in a transaction that is subject to the rules of paragraph (e)(1) of this section, the following adjustments shall be made:

(i) For purposes of chapter 1 of the Code, the earnings and profits of the transferee foreign corporation shall be reduced by the amount of any payment deemed to be received by a related U.S. person under paragraph (e)(1)(ii) of this section;

(ii) For purposes of Subpart F of Part III of subchapter N of the Code, the transferee foreign corporation may allocate and apportion such deemed payments (whether or not such payments are actually made to gross income subject to Subpart F to the extent appropriate under the provisions of §§ 1.954–1(c) and 1.861–8;

(iii) For purposes of reapplying the rules of paragraph (d) and (e) of this section, if the related U.S. person is deemed to have received a right to contingent annual payments for the use of intangible property, then the U.S. related person shall be deemed to have held a proportionate share of the property with a basis equal to a proportionate share of the U.S. transferor's adjusted basis plus the gain, if any, recognized by the U.S. transferor on the earlier transfer of the stock to the U.S. related person, and then to have transferred that proportionate share of the property to the foreign corporation in a transfer subject to section 367(d); and

(iv) If the U.S. transferor is itself required to recognize gain upon the transfer by reason of the operation of paragraphs (d)(1) and (e)(1)(iii) of this section (because stock of the transferee foreign corporation is also transferred to unrelated persons), then those unrelated persons shall be deemed to have purchased a proportionate share of the transferred intangible property at fair market value and immediately contributed that property to the transferee foreign corporation, consistent with the general rule of paragraph (d)(2) of this section concerning transfers of stock to unrelated persons. Therefore, for purposes of chapter 1 of the Code—

(A) Each unrelated person's basis in the stock of the transferee foreign corporation shall be increased to the extent of the gain recognized by the U.S. transferor upon the deemed purchase of intangible property by that person; and

(B) The transferee foreign corporation will receive an increase in its basis in the transferred intangible property equal to the fair market value of that portion of the intangible property deemed to be contributed to the transferee foreign corporation by unrelated persons (as calculated for purposes of determining the gain required to be recognized by the U.S. transferor).

(3) *Transfer to related foreign person not treated as disposition of intangible property.* If a U.S. person transfers intangible property that is subject to section 367(d) and the rules of this section to a foreign corporation in an exchange described in section 351 or 361, and within the useful life of the transferred intangible property, that U.S. transferor subsequently transfers any of the stock of the transferee foreign corporation to one or more foreign persons that are related to the transferor within the meaning of paragraph (h) of this section, then the U.S. transferor shall continue to include in its income the deemed payments described in paragraph (c) of this section in the same manner as if the subsequent transfer of stock had not occurred. The rule of this paragraph (e)(3) shall not apply with respect to the subsequent transfer by the U.S. person of any of the remaining stock to any related U.S. person or unrelated person.

(4) *Proportionate share.* For purposes of this paragraph (e), any "proportionate share" shall be determined by reference to the fair market value (at the time of the original transfer) of the stock of the transferee foreign corporation that was transferred by the U.S. transferor and the fair market value of all of the stock of the transferee foreign corporation originally received by the U.S. transferor.

(f) *Subsequent disposition of transferred intangible property by transferee foreign corporation*—(1) *In general.* If a U.S. person transfers intangible property that is subject to section 367(d) and the rules of this section to a foreign corporation in an exchange described in section 351 or 361, and within the useful life of the intangible property that transferee foreign corporation subsequently disposes of the intangible property to an unrelated person, then—

(i) The U.S. transferor of the intangible property (or any person treated as such pursuant to paragraph (e)(1) of this section) shall be required to recognize gain from U.S. sources (but not loss) in an amount equal to the difference between the fair market value of the transferred intangible property on the date of the subsequent disposition and the U.S. transferor's former adjusted basis in that property (determined as of the orginial transfer); and

(ii) The U.S. transferor shall be required to recognize a deemed payment under paragraph (c) of this section for that part of its taxable year that the intangible property was held by the transferee foreign corporation and thereafter shall not be required to recognize any further deemed payments under paragraph (c) or (e)(1) of this section with respect to the transferred intangible property disposed of by the transferee foreign corporation.

(2) *Required adjustments.* If a U.S. transferor is required to recognize gain

under paragraph (f)(1) of this section, then—

(i) For purposes of chapter 1 of the Code, the earnings and profits of the transferee foreign corporation shall be reduced by the amount of gain required to be recognized; and

(ii) The U.S. transferor's recognition of gain will permit the establishment of an account receivable from the transferee foreign corporation, in accordance with paragraph (g)(1) of this section.

(3) *Subsequent transfer of intangible property to related person.* The requirement that a U.S. person recognize gain under paragraph (c) or (e) of this section shall not be affected by the transferee foreign corporation's subsequent disposition of the transferred intangible property to a related person. For purposes of any required adjustments, and of any accounts receivable created under paragraph (g)(1) of this section, the related person that receives the intangible property shall be treated as the transferee foreign corporation.

(g) *Special rules*—(1) *Establishment of accounts receivable*—(i) *In general.* If a U.S. person is required to recognize income under the provisions of paragraph (c), (e), or (f) of this section, and the amount deemed to be received is not actually paid by the transferee foreign corporation, then the U.S. person may establish an account receivable from the transferee foreign corporation equal to the amount deemed paid that was not actually paid. A separate account receivable must be established for each taxable year in which payments deemed to be received are not actually made. Payments received from the transferee foreign corporation must be designated as payments upon a particular account and must be deducted from that account. Accounts receivable under this paragraph (g)(1) may be established and paid without further U.S. income tax consequences to the U.S. transferor or the transferee foreign corporation. No interest shall be paid or accrued on an account receivable created under this paragraph (g)(1), nor shall any bad debt deduction be allowed under section 166 with respect to any failure to receive payment on an account.

(ii) *Unpaid receivable treated as contribution to capital.* If any portion of an account receivable established under this paragraph (g)(1) remains unpaid as of the last day of the third taxable year following the taxable year to which the account relates, then—

(A) Such portion shall be deemed to have been paid on that date; and

(B) The U.S. person shall be deemed to have contributed an equivalent amount to the capital of the foreign corporation, and the U.S. person's basis in the stock of the foreign corporation shall, therefore, be increased by that amount.

(2) *Election to treat transfer as sale.* A U.S. person that transfers intangible property to a foreign corporation in a transaction subject to section 367(d) may elect to recognize income in accordance with the rules of this paragraph (g)(2), if—

(i) The intangible property transferred constitutes an operating intangible, as defined in § 1.367(a)–1T(d)(5)(ii); or

(ii) The transfer of the intangible property is either legally required by the government of the country in which the transferee corporation is organized as a condition of doing business in that country, or compelled by a genuine threat of immediate expropriation by the foreign government; or

(iii)(A) The U.S. person transferred the intangible property to the foreign corporation within three months of the organization of that corporation and as part of the original plan of capitalization of that corporation;

(B) Immediately after the transfer, the U.S. person owns at least 40 percent but not more than 60 percent of the total voting power and total value of the stock of the transferee foreign corporation;

(C) Immediately after the transfer, at least 40 percent of the total voting power and total value of the stock of the transferee foreign corporation is owned by foreign persons unrelated to the U.S. person;

(D) Intangible property constitutes at least 50 percent of the fair market value of the property transferred to the foreign corporation by the U.S. transferor; and

(E) The transferred intangible property will be used in the active conduct of a trade or business outside of the United States within the meaning of § 1.367(a)–2T and will not be used in connection with the manufacture or sale of products in or for use or consumption in the United States.

A person that makes the election under this paragraph (g)(2) shall not be subject to the provisions of paragraphs (c) through (f) of this section. Such person shall instead recognize in the year of the transfer ordinary income from sources within the United States in an amount equal to the difference between the fair market value of the intangible property transferred and its adjusted basis. A U.S. person shall make an election under this paragraph (g)(2) by notifying the Internal Revenue Service of the election in accordance with the requirements of section 6038B and regulations thereunder, and subsequently including the appropriate amounts in gross income in a timely filed tax return for the year of the transfer.

(3) *Intangible property transferred from branch with previously deducted losses.* If income is required to be recognized under section 904(f)(3) and the regulations thereunder or under § 1.367(a)–6T upon the transfer of intangible property of a foreign branch that had previously deducted losses, then the income recognized under those sections with respect to that property shall be credited against amounts that would otherwise be required to be recognized with respect to that same property under paragraphs (c) through (f) of this section in either the current or future taxable years. The amount recognized under section 904(f)(3) or § 1.367(a)–6T with respect to the transferred intangible property shall be determined in accordance with the following formula:

$$\text{loss recapture income} \times \frac{\text{gain from intangibles}}{\text{gain from all branch assets}}$$

For purposes of the above formula, the "loss recapture income" is the total amount required to be recognized by the U.S. transferor pursuant to section 904(f)(3) or § 1.367(a)–6T. The "gain from intangibles" is the total amount of gain realized by the U.S. transferor pursuant to section 904(f)(3) and § 1.367(a)–6T upon the transfer of items of intangible property that are subject to section 367(d). ("Gain from intangibles" does not include gain realized upon the transfer of property described in § 1.367(a)–5T(b)(2), foreign goodwill or going concern value, or intangible property with respect to which the taxpayer has made the election provided for in § 1.367(d)–1T(g)(2).) The "gain from all branch assets" is the total amount of gain realized by the transferor upon the transfer of items of property of the branch in which gain is realized. The fraction shall not exceed 1.

(4) *Coordination with section 482*—(i) *In general.* Section 367(d) and the rules of this section shall not apply in the case of an actual sale or license of intangible property by a U.S. person to a foreign

corporation. If an adjustment under section 482 is required with respect to an actual sale or license of intangible property, then section 367(d) and the rules of this section shall not apply with respect to the required adjustment. If a U.S. person transfers intangible property to a related foreign corporation without consideration, or in exchange for stock or securities of the transferee in a transaction described in sections 351 or 361, no sale or license subject to adjustment under section 482 will be deemed to have occurred. Instead, the U.S. person shall be treated as having made a transfer of the intangible property that is subject to section 367(d).

(ii) *Sham licenses and sales.* For purposes of paragraph (g)(4)(i) of this section, a purported sale or license of intangible property may be disregarded, and treated as a transfer subject to section 367(d) and the rules of this section, if—

(A) The purported sale or license is made to a foreign corporation in which the transferor holds (or is acquiring) an interest; and

(B) The terms of the purported sale or license differ so greatly from the economic substance of the transaction or the terms that would obtain between unrelated persons that the purported sale or license is a sham.

The terms of a purported sale or license, for purposes of applying the rule of this paragraph (g)(4)(ii), shall be determined by reference not only to the nominal terms of the agreement but also to the actual practice of the parties under that agreement. A sale or license of intangible property shall not be disregarded under this paragraph (g)(4)(ii) solely because other property of an integrated business is simultaneously transferred to the foreign corporation by the U.S. transferor in a transaction described in section 367(a)(1) or any statutory or regulatory exception to section 367(a)(1).

(5) *Determination of fair market value.* For purposes of determining the gain required to be recognized immediately under paragraph (d), (f), or (g)(2) of this section, the fair market value of transferred property shall be the single payment arm's-length price that would be paid for the property by an unrelated purchaser determined in accordance with the principles of section 482 and regulations thereunder. The allocation of a portion of the purchase price to intangible property agreed to by the parties to the transaction shall not necessarily be controlling for this purpose.

(6) *Anti-abuse rule.* If a U.S. person—

(i) Transfers intangible property to a domestic corporation with a principal purpose of avoiding the effect of section 367(d) and the rules of this section; and

(ii) Thereafter transfers the stock of that domestic corporation to a related foreign corporation,

then solely for purposes of section 367(d) that U.S. person shall be treated as having transferred the intangible property directly to the foreign corporation. A U.S. person shall be presumed to have transferred intangible property for a principal purpose of avoiding the effect of section 367(d) if the property is transferred to the domestic corporation less than two years prior to the transfer of the stock of that domestic corporation to a foreign corporation. The presumption created by the previous sentence may be rebutted by clear evidence that the subsequent transfer of the stock of the domestic transferee corporation was not contemplated at the time the intangible property was transferred to that corporation and that avoidance of section 367(d) and the rules of this section was not a principal purpose of the transaction. A transfer may have more than one principal purpose.

(h) *Related person.* For purposes of this section, persons are considered to be related if—

(1) They are partners or partnerships described in section 707(b)(1) of the Code; or

(2) They are related within the meaning of section 267 (b), (c), and (f) of the Code, except that—

(i) "10 percent or more" shall be substituted for "more than 50 percent" each place it appears; and

(ii) Section 1563 shall apply (for purposes of section 267(d)), without regard to section 1563(b)(2).

(i) *Effective date.* Except as specifically provided to the contrary elsewhere in this section, this section applies to transfers occurring after December 31, 1984.

Par. 6. Section 1.6038B–1T is added immediately after § 1.6038A–1, to read as follows:

§ 1.6038B–1T Reporting of transactions described in section 367 (temporary).

(a) *Purpose and scope.* This section sets forth information reporting requirements under section 6038B, concerning certain transfers of property to foreign persons. Paragraph (b) of this section provides general rules explaining when and how to carry out the reporting required under section 6038B. Paragraphs (c) and (d) of this section specify the information that is required to be reported with respect to transfers of property that are described in section 367 (a) and (d), respectively. Finally, paragraph (f) of this section sets forth the consequences of a failure to comply with the requirements of section 6038B and this section. Except as specifically provided to the contrary elsewhere in this section, this section applies to transfers occurring after December 31, 1984.

(b) *Time and manner of reporting—(1) In general.* Any U.S. person that is required to report pursuant to section 6038B and the rules of this section must attach the required information to Form 926 (Return by Transferor of Property to a Foreign Corporation, Foreign Estate or Trust, or Foreign Partnership). Form 926 and the required attachments must be filed at the Internal Revenue Service Center where the U.S. person is required to file its Federal income tax return. Notwithstanding any statement to the contrary on Form 926, the form and attachments must be filed with the transferor's tax return for the taxable year that includes the date of the transfer (as defined in paragraph (b)(3) of this section). However, in the case of a transfer that occurred prior to June 16, 1986, Form 926 and the required attachments must be filed by September 16, 1986, if that date is later than the date the filing would otherwise be required under the preceding sentence. Section 7502 and regulations thereunder shall apply in determining whether the form and attachments are timely filed. Any attachment to Form 926 required under the rules of this section is filed subject to the transferor's declaration under penalties of perjury on Form 926 that the information submitted is true, correct and complete to the best of the transferor's knowledge and belief.

(2) *Person required to file—(i) In general.* Form 926 and the attachments required under the rules of this section must be filed by each U.S. person that makes a transfer described in section 367 (a) or (d). No notice shall be required under this section with respect to a distribution described in section 367(e). No notice shall be required under this section with respect to a transfer of stock of securities described in § 1.367(a)–3T(f)(1) or with respect to a transfer described in section 367(a)(2). If two or more persons transfer jointly-owned property to a foreign corporation in a transfer with respect to which a notice is required under this section, then each person must report with respect to the particular interest he transferred, specifying the nature and extent of the interest. However, a husband and wife (and their minor children) may jointly file a single information return. If two or more U.S.

persons owning stock or securities in a corporation transfer such stock or securities to a foreign corporation in the same transaction, then the corporation whose stock or securities are transferred may, at its choice, file the notice required by this section on behalf of its shareholders. In that case, a single Form 926, signed by the responsible officer of the corporation, shall be filed, containing the required information with respect to each shareholder, other than shareholders described in § 1.367(a)–3T(f)(1).

(ii) *Indirect transfers.* If a U.S. person that holds an interest in an entity is considered to make an indirect transfer (when the entity transfers property to a foreign corporation) under the provisions of—

(A) Section 367(a)–1T(c)(2)(i)(B) (concerning mergers to which section 368(a)(2)(D) applies);

(B) Section 367(a)–1T(c)(2)(i)(C) (concerning mergers to which section 368(a)(2)(E) applies);

(C) Section 367(a)–1T(c)(2)(ii) (concerning reorganizations described in section 368(a)(1)(B));

(D) Section 367(a)–1T(c)(2)(iii) (concerning reorganizations described in section 368(a)(1)(C));

(E) Section 367(a)–1T(c)(3)(i) (concerning transfers of property by a partnership); or

(F) Section 367(a)–1T(c)(4) (concerning transfers of property by a trust or estate),

then the requirements of this section shall apply with respect to each such person. However, the requirements of this section may be satisfied by the entity, on behalf of its interest-holders, by the filing of a single information return containing the required information with respect to each interest-holder (other than persons described in § 1.367(a)–3T(f)(1)) that is considered to make a transfer described in section 367(a). If the entity chooses to satisfy the requirements of this section on behalf of its interest-holders, Form 926 must be signed by a responsible officer in the case of a corporation, by a general partner in the case of a partnership, and by a trustee, executor, or equivalent fiduciary in the case of a trust or estate.

(3) *Date of transfer*—(i) *In general.* For purposes of this section, the date of a transfer described in section 367 is the first date on which title to, possession of, or rights to the use of stock, securities, or other property passes pursuant to the plan for purposes of subtitle A of the Internal Revenue Code. A transfer will not be considered to begin with a decision of a board of directors or similar action unless the transaction otherwise takes effect for purposes of subtitle A of the Internal Revenue Code on that date.

(ii) *Termination of section 1504(d) election.* A transfer deemed to occur as a result of the termination of an election under section 1504(d) will be considered to occur on the date the contiguous country corporation first fails to continue to qualify for the election under section 1504(d). The rule of this paragraph (b)(3)(ii) is illustrated by the following example.

Example. Domestic corporation W previously made a valid election under section 1504(d) to have its Mexican subsidiary S treated as a domestic corporation. On August 1, 1986, W disposes of its right, title, and interest in 10 percent of the stock of S by selling such stock to an unrelated United States person who is not a director of S. S first fails to continue to qualify for the election under section 1504(d) on August 1, 1986, since on such date it ceases to be directly or indirectly wholly owned or controlled by W. The constructive transfer of assets from "domestic" corporation S to Mexican corporation S is considered to occur on that date.

(iii) *Change in classification.* A transfer deemed to occur as a result of a change in classification of an entity caused by a change in the governing documents, articles, or agreements of the entity (as described in § 1.367(a)–1T(c)(6)) will be considered to occur on the date that such changes take effect for purposes of subtitle A of the Internal Revenue Code.

(iv) *U.S. resident under section 6013 (g) or (h).* A transfer made by an alien individual who is considered to be a U.S. resident by reason of a timely election under section 6013 (g) or (h) will be considered to occur, for purposes of this section (but not for purposes of section 367), on the later of—

(A) The date on which the election under section 6013 (g) or (h) is made; or

(B) The date on which the transfer would otherwise be considered to occur under the rules of this paragraph (b)(3).

The rule of this paragraph (b)(3)(iv) is illustrated by the following example.

Example. D is a nonresident alien individual who is married to a United States citizen. On March 1, 1986, D transfers property to a foreign corporation in an exchange described in section 351. On April 15, 1987, D and the spouse timely file with their tax return for the taxable year ended December 31, 1986, an election under section 6013(g) for D to be treated as a United States resident. The election is effective on January 1, 1986. For purposes of section 6038 B, the transfer described in section 367(a) made by D in connection with the section 351 exchange is considered to occur on April 15, 1987, the date on which the timely election was made under section 6013(g).

(c) *Information required with respect to transfers described in section 367 (a)(1).* A U.S. person that transfers property to a foreign corporation in an exchange described in section 367(a)(1) (other than a transfer described in section 367(a)(2)) must provide the following information in paragraphs labelled to correspond with the number or letter set forth below. If a particular item is not applicable to the subject transfer, list its heading and state that it is not applicable.

(1) *Transferor.* Provide the name, U.S. taxpayer identification number, and address of the U.S. person making the transfer.

(2) *Transfer.* Provide the following information concerning the transfer:

(i) Name, U.S. taxpayer identification number (if any), address, and country of incorporation of transferee foreign corporation;

(ii) A general description of the transfer, and any wider transaction of which it forms a part, including a chronology of the transfers involved and an identification of the other parties to the transaction to the extent known.

(3) *Consideration received.* Provide a description of the consideration received by the U.S. person making the transfer, including its estimated fair market value and, in the case of stock or securities, the class or type, amount, and characteristics of the interest received.

(4) *Property transferred.* Provide a description of the property transferred. The description must be divided into the following categories, and must include the estimated fair market value and adjusted basis of the property, as well as any additional information specified below.

(i) *Active business property.* Describe any transferred property (other than stock or securities) to be used in the active conduct of a trade or business outisde of the United States. Provide here a general description of the business conducted (or to be conducted) by the transferee, including the location of the business, the number of its employees, the nature of the business, and copies of the most recently prepared balance sheet and profit and loss statement. Property listed within this category may be identified by general type. For example, upon the transfer of the assets of a manufacturing operation, a reasonable description of the property to be used in the business might include the categories of office equipment and supplies, computers and related equipment, motor vehicles, and several major categories of manufacturing

equipment. However, any property that is includible both in this subdivision (i) and in subdivision (iii) of this paragraph (c)(4) (property subject to depreciation recapture under § 1.367(a)–4T (b)) must be identified in the manner required in subdivision (iii). If property is considered to be transferred for use in the active conduct of a trade or business under a special rule in § 1.367(a)–4T, specify the applicable rule and provide information supporting the application of the rule. If property is subject to section 367(a)(1) regardless of its use in a trade or business under the rules of §§ 1.367(a)–4T or 1.367(a)–5T, list the property only in response to subdivision (vii) of this paragraph (c)(4).

(ii) *Stock or securities.* Describe any transferred stock or securities, including the class or type, amount, and characteristics of the transferred stock or securities, as well as the name, address, place of incorporation, and general description of the corporation issuing the stock. In addition, provide the following information if applicable:

(A) *Active trade or business stock.* If the stock or securities are considered to be transferred for use in the active conduct of a trade or business outside of the United States under the rules of § 1.367(a)–3T(d)(2), provide information supporting the application of the rule.

(B) *Application of special rules.* If any provision of § 1.367(a)–3T applies to except the transfer of stock or securities from the rule of section 367(a)(1), provide information supporting the claimed application of such provision (including information supporting the nonapplicability of either anti-abuse rule under § 1.367(a)–3T(h)). If the transferor is entering into an agreement to recognize gain upon a later disposition of the transferred stock by the transferee foreign corporation under § 1.367(a)–3T(g), attach the agreement and waiver as required by the rules of that paragraph.

(iii) *Depreciated property.* Describe any property that is subject to depreciation recapture under the rules of § 1.367(a)–4T(b). Property within this category must be separately identified to the same extent as was required for purposes of the previously claimed depreciation deduction. Specify with respect to each such asset the relevant recapture provision, the number of months in which such property was in use within the United States, the total number of months the property was in use, the fair market value of the property, a schedule of the depreciation deduction taken with respect to the property, and a calculation of the amount of depreciation required to be recaptured.

(iv) *Property to be leased.* Describe any property to be leased to other persons by the transferee foreign corporation (unless such property is considered to be transferred for use in the active conduct of a trade or business and was thus listed under subdivision (i) of this paragraph (c)(4)). If the rules of § 1.367(a)–4T(c)(2) apply to except the transfer from the rule of section 367(a)(1), provide information supporting the claimed application of such provision.

(v) *Property to be sold.* Describe any transferred property that is to be sold or otherwise disposed of by the transferee foreign corporation, as described in § 1.367(a)–4T(d).

(vi) *Transfers to FSCs.* Describe any property that is subject to the special rule of § 1.367(a)–4T(g) for transfers to FSCs. Provide information supporting the claimed application of that rule.

(vii) *Tainted property.* Describe any property that is subject to § 1.367(a)–5T (concerning property that is subject to the rule of section 367(a)(1) regardless of whether it is transferred for use in the active conduct of a trade or business outside of the United States). Such description must be divided into the relevant categories, as follows:

(A) *Inventory, etc.* Property described in § 1.367(a)–5T(b);

(B) *Installment obligations, etc.* Property described in § 1.367(a)–5T(c);

(C) *Foreign currency, etc.* Property described in § 1.367(a)–5T(d);

(D) *Intangible property.* Property described in § 1.367(a)–5T(e); and

(E) *Leased property.* Property described in § 1.367(a)–4T(f).

If any exception provided in § 1.367(a)–5T applies to the transferred property (making section 367(a)(1) not applicable to the transfer), provide information supporting the claimed application of such exception.

(viii) *Foreign loss branch.* Provide the information specified in paragraph (c)(5) of this section.

(ix) *Other intangibles.* Describe an intangible property sold or licensed by the transferor to the transferee foreign corporation, and set forth the general terms of each sale or license.

(5) *Transfer of foreign branch with previously deducted losses.* If the property transferred is property of a foreign branch with previously deducted losses subject to the rules of § 1.367(a)–6T, provide the following information:

(i) *Branch operation.* Describe the foreign branch the property of which is transferred, in accordance with the definition of § 1.367(a)–6T(g).

(ii) *Branch property.* Describe the property of the foreign branch, including its adjusted basis and fair market value. For this purpose property must be identified with reasonable particularity, but may be identified by category rather than listing every asset separately. Substantially similar property may be listed together for this purpose, and property of minor value may be grouped into functional categories. For example, a reasonable description of the property of a business office might include the following categories: word processing or data processing equipment, other office equipment and furniture, and office supplies.

(iii) *Previously deducted losses.* Set forth a detailed calculation of the sum of the losses incurred by the foreign branch before the transfer, and a detailed calculation of any reduction of such losses, in accordance with § 1.367(a)–6T (d) and (e).

(iv) *Character of gain.* Set forth a statement of the character of the gain required to be recognized, in accordance with § 1.367(a)–6T(c)(1).

(d) *Transfers subject to section 367(d)*—(1) *Initial transfer.* A U.S. person that transfers inntangible property to a foreign corporation in an exchange described in section 351 or 361 must provide the following information in paragraphs labelled to correspond with the number or letter set forth below. If a particular item is not applicable to the subject transfer, list its heading and state that it is not applicable. The information required by subdivisions (i) through (iii) need only be provided if such information was not otherwise provided under paragraph (c) of this section. (Note that the U.S. transferor may subsequently be required to file another return under paragraph (d)(2) of this section.)

(i) *Transferor.* Provide the name, U.S. taxpayer identification number, and address of the U.S. person making the transfer.

(ii) *Transfer.* Provide information concerning the transfer, including:

(A) Name, U.S. taxpayer identification number (if any), address, and country of incorporation of the transferee foreign corporation; (B) A general description of the transfer, and any wider transaction of which it forms a part, including a chronology of the transfers involved and an identification of the other parties to the transaction to the extent known.

(iii) *Consideration received.* Provide a description of the consideration received by the U.S. person making the transfer, including its estimated fair market value and, in the case of stock or securities, the class or type, amount, and characteristics of the interest received.

(iv) *Intangible property transferred.* Provide a description of the intangible property transferred, including its adjusted basis. Generally, each intangible asset must be separately identified. Operating intangibles and foreign goodwill or going concern value, as defined in § 1.367(a)–1T(d)(5) (ii) and (iii), should be so identified and classified.

(v) *Annual payment.* Provide and explain the calculation of the annual deemed payment for the use of the intangible property required to be recognized by the transferor under the rules of section 367(d).

(vi) *Election to treat as sale.* List any intangible with respect to which an election is being made under § 1.367(d)–1T(g)(2) to treat the transfer as a sale. Include the fair market value of the intangible on the date of the transfer and a calculation of the gain required to be recognized in the year of the transfer by reason of the election.

(vii) *Coordination with loss rules.* List any intangible property subject to section 367(d) the transfer of which also gives rise to the recognition of gain under section 904(f)(3) or § 1.367(a)–6T. Provide a calculation of the gain required to be recognized with respect to such property, in accordance with the provisions of § 1.367(d)–1T(g)(4).

(viii) *Other intangibles.* Describe any intangible property sold or licensed by the transferor to the transferee foreign corporation, and set forth the general terms of each sale or license.

(2) *Subsequent transfers.* If a U.S. person transfers intangible property to a foreign corporation in an exchange described in section 351 or 361, and at any time thereafter (within the useful life of the intangible property) either that U.S. person disposes of the stock of the transferee foreign corporation or the transferee foreign corporation disposes of the transferred intangible, then the U.S. person must provide the following information in paragraphs labelled to correspond with the number or letter set forth below. The information required by subdivisions (i) and (ii) need only be provided if such information was not otherwise provided in the same return, pursuant to paragraph (c) or (d)(1) of this section. For purposes of determining the date on which a return under this subparagraph (2) is required to be filed, the date of transfer is the date of the subsequent transfer of stock or intangible property.

(i) *Transferor.* Provide the name, U.S. taxpayer identification number, and address of the U.S. person making the transfer.

(ii) *Initial transfer.* Provide the following information concerning the initial transfer:

(A) The date of the transfer;

(B) The name, U.S. taxpayer identification number (if any), address, and country of incorporation of the transferee foreign corporation; and

(C) A general description of the transfer and any wider transaction of which it formed a part.

(iii) *Subsequent transfer.* Provide the following information concerning the subsequent transfer:

(A) A general description of the subsequent transfer and any wider transaction of which it forms a part;

(B) A calculation of any gain required to be recognized by the U.S. person under the rules of § 1.367(d)–1T (d) through (f); and

(C) The name, address, and identifying number of each person that under the rules of § 1.367(d)–1T (e) or (f) will be considered to receive contingent annual payments for the use of the intangible property.

(e) *Transfers subject to section 367(e).* [Reserved]

(f) *Failure to comply with reporting requirements*—(1) *Consequences of failure.* If a U.S. person is required to file a notice under § 1.6038B–1T(b) and fails to comply with the applicable reporting requirements of section 6038B and this section, then with respect to the particular property as to which there was a failure to comply—

(i) That property shall not be considered to have been transferred for use in the active conduct of a trade or business outside of the United States, for purposes of section 367(a) and regulations thereunder;

(ii) The U.S. person shall pay a penalty equal to 25 percent of the amount of gain realized on the exchange of that property (without regard to whether gain is recognized on the transfer); and

(iii) The period of limitations on assessment of tax upon the transfer of that property shall not begin to run until the date on which the transferor does comply with the applicable reporting requirements.

Thus, the time for assessment of tax is extended indefinitely if the transferor's failure to comply is continued indefinitely.

(2) *Failure to comply.* A failure to comply with the requirements of section 6038B is—

(i) The failure to report at the proper time and in the proper manner any material information required to be reported under the rules of this section; or

(ii) The provision of false or inaccurate information in purported compliance with the requirements of this section.

Thus, a transferor that timely files Form 926 with the attachments required under the rules of this section shall, nevertheless, have failed to comply if, for example, the transferor reports therein that property will be used in the active conduct of a trade or business outside of the United States, but in fact such property continues to be used in a trade or business within the United States.

(3) *Reasonable cause exception.* The provisions of paragraph (f)(1) of this section shall not apply if the transferor shows that a failure to comply was due to reasonable cause and not willful neglect. The transferor may do so by providing a written statement to the district director having jurisdiction of the taxpayer's return for the year of the transfer, setting forth the reasons for the failure to comply. Whether a failure to comply was due to reasonable cause shall be determined by the district director under all the facts and circumstances.

Par. 7. The authority for Part 7 is amended by adding the following citation:

Authority: 26 U.S.C. 7805. * * * Section 7.367(b)–1 and 7.367(b)–4 also issued under 26 U.S.C. 367(b).

Par. 8. Section 7.367(b)–1 is amended by removing the last sentence of paragraph (a) and adding in lieu thereof the following two new sentences.

§ 7.367(b)–1 Other transfers.

(a) *Scope.* * * * An exchange to which section 367(b) applies is an exchange described in section 367(b) and in section 332, 351, 354, 355, 356, or 361 with respect to which the status of a foreign corporation as a corporation is relevant for determining the extent to which gain shall be recognized and in connection with which there is no transfer described in section 367(a). An election by a domestic corporation under section 1504(d) to treat a corporation organized under the laws of a contiguous foreign country as a domestic corporation shall be considered to be a transfer of property made pursuant to an exchange to which section 367(b) applies.

Par. 9. Section 7.367(b)–4 is amended by revising paragraph (b)(2)(i) to read as follows:

§ 7.367(b)–4 Certain exchanges described in more than one Code provision.

* * * * *

(b) *Treatment of certain exchanges described in both section 354 and in either section 351 or 361.*

* * * * *

(2) *Exceptions.* * * *

(i) *Specified treatment.* If an exchange of stock in a foreign corporation by a U.S. person is an exchange to which the rules under section 367(a) apply, then the gain required to be included in gross income under paragraph (b)(1)(i)(B) or paragraph (b)(1)(ii) of this section shall not be required to be immediately recognized under this paragraph (b), and instead the transaction shall be treated in accordance with the regulations under section 367(a). See § 1.367(a)–3T.

Par. 10. The authority citation for Part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

§ 602.101 [Amended]

Par. 11. Section 602.101(c) is amended by inserting in the appropriate place in the table "§ 1.367(a)–1T. . .1545–0026" "§ 1.367(a)–2T. . .1545–0026" "§ 1.367(a)–3T. . .1545–0026" "§ 1.367(a)–6T. . .1545–0026" "§ 1.367(a)–1T. . .1545–0026" "§ 1.6038B–1T. . . 1545–0026"

Roscoe L. Egger, Jr.,
Commissioner of Internal Revenue.

Approved: April 29, 1986.

J. Roger Mentz,
Assistant Secretary of the Treasury.

Department of the Army

32 CFR Part 513

[Army Reg. 600–15]

Indebtedness of Military Personnel; Claim Processing Policies; Correction

AGENCY: Department of the Army Community and Family Support, Defense.

ACTION: Final rule.

SUMMARY: This rule gives the Army's policies and procedures governing private indebtedness of Army members. It also provides for processing claims. It forbid debt collectors from contacting commanders without prior consent of the debtor or without a court order.

EFFECTIVE DATE: May 16, 1986.

ADDRESS: Commander, U.S. Army Community and Family Support Center (DACF–IS–PA), Room 468, Hoffman I, Eisenhower Avenue, Alexandria, VA 22331–0522.

FOR FURTHER INFORMATION CONTACT: LTC Milton J. Brolcaw, (202) 325–8851.

SUPPLEMENTARY INFORMATION: On Monday, March 3, 1986 the Department of the Army published a final rule (51 FR 7268) FR Doc. 86–4290, concerning Indebtedness of Military Personnel; Claim Processing Policies. The rule contained some administrative errors which require the Army to remove § 513.1(j) in its entirety until corrections can be made.

This regulation will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601 et al. Further, this regulation does not meet the economic requirements of Executive Order 2291. And, this regulation does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 100

[CGD 05–86–11]

Special Local Regulations: Norfolk Harborfest 1986, Elizabeth River, Norfolk, Virginia

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: Special local regulations are being adopted for the City of Norfolk Harborfest. This event will be held on the Elizabeth River, between the Norfolk and Portsmouth downtown areas. These special local regulations are needed to control vessel traffic within the immediate vicinity of the Harborfest activities due to the confined nature of the waterway and the expected congestion at the time of the events. The effect will be to restrict general navigation in the area for the safety of spectators and participants in the event.

EFFECTIVE DATES: These regulations effective as follows.

a. 6 June 1986, 10:00 am until 10:00 pm
b. 7 June 1986, 8:30 am until 10:30 pm
c. 8 June 1986, 9:30 am until 6:00 pm

FOR FURTHER INFORMATION CONTACT: B.J. Stephenson, Chief, Boating Affairs Branch, Boating Safety Division, Fifth Coast Guard District, 431 Crawford Street, Portsmouth, Virginia 23705 (804–398–6204).

SUPPLEMENTARY INFORMATION: In accordance with 5 U.S.C. 553, a notice of proposed rule making has not been published for these regulations, and good cause exists for making them effective in less than 30 days from the date of publication. There was not sufficient time remaining to publish proposed rules in advance of the event or to provide for a delayed effective date.

Drafting Information: The drafters of this notice are Mr. Billy J. Stephenson, project officer, Chief, Boating Affairs Branch, Fifth Coast Guard District, and LT. Wade Mitchell, project attorney, Fifth Coast Guard District Legal Office.

Discussion of Regulations: The three-day City of Norfolk Harborfest, sponsored by Norfolk Festevents, Inc., will consist of numerous water events, including: parade of vessels, water ski exhibitions, boat races, military vessel and helicopter demonstrations, and fireworks. Commercial vessels will be permitted to transit the regulated area between events, and thus commercial traffic should not be severely disrupted at any given time.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water).

Regulations: In consideration of the foregoing, Part 100 of Title 33, Code of Federal Regulations, is amended as follows:

1. The authority citation for Part 100 continues to read as follows:

Authority 33: U.S.C. 1233; 49 CFR 1.46 and 33 CFR 100.35.

2. A temporary section 100.35–0511 is added to read as follows:

100.35–0511. Elizabeth River, Norfolk, Virginia.

(a) *Regulated Area:* The waters of the Elizabeth River and its branches from shore to shore, except marinas, piers, and shipyards, bounded to the northwest by a line drawn over the Midtown Tunnel, located in the Port Norfolk Reach section of the Elizabeth River between Pinners Point at latitude 36°51'26.0" North, longitude 76°18'59.0"

West and the northeast shore of the Elizabeth River at latitude 36°51'39.5" North, longitude 76°18'36.5" West, to the south by a line drawn over the Downtown Tunnel, located in the Lower Reach section of the Elizabeth River, between the western shore of the Southern Branch of the Elizabeth River in Portsmouth, Virginia at latitude 36°49'57.0" North, longitude 76°17'40.0" West, and the eastern shore at latitude 36°49'56.5" North, longitude 76°17'34.5" West, and to the southeast by the Berkley Bridge which crosses the Eastern Branch of the Elizabeth River between Berkley at latitude 36°50'21.5" North, longitude 76°17'14.5" West and Norfolk at latitude 36°50'35.0" North, longitude 76°17'10.0" West.

(b) *Special Local Regulations:*

(1) Except for participants in the Norfolk Harborfest, or persons or vessels authorized by the Coast Guard Patrol Commander, no person or vessel underway or at anchor may enter or remain in the regulated area. The operator of any vessel in the immediate vicinity of this area shall:

(i) Stop his vessel immediately upon being directed to do so by any Coast Guard officer or petty officer on board a vessel displaying a Coast Guard ensign, and

(ii) Proceed as directed by any Coast Guard officer or petty officer.

(2) Any spectator vessel may anchor outside of the regulated area specified in paragraph (a) of these regulations but may not block a navigable channel.

(3) The Coast Guard Patrol Officer is a commissioned officer of the Coast Guard who has been designated by the Commander, Fifth Coast Guard District. The Patrol Commander will be stationed at the reviewing platform at Town Point.

(4) The Coast Guard Patrol Officer may stop the event to allow the transit of backed up marine traffic through the regulated area.

Dated: May 7, 1986.

James C. Irwin,

Rear Admiral, U.S. Coast Guard Commander, Fifth Coast Guard District.

33 CFR Part 153

[CGD 84-067]

Oil and Hazardous Substance Discharge Reporting Requirements

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: This Final Rule amends the procedures for reporting discharges of oil and hazardous substances as required by section 311 of the Federal Water Pollution Control Act, as amended (FWPCA), revises or deletes outdated language, and clarifies the criteria for direct payment from the Pollution Fund. These revisions are necessary to reflect amendments to the FWPCA and the National Oil and Hazardous Substances Pollution Contingency Plan (National Contingency Plan), and to remain consistent with related Environmental Protection Agency regulations. The intended effect of this rule is to assure consistency of this Part with the statutory provisions of the FWPCA, the regulatory requirements of the National Contingency Plan, and the statutory reporting requirements under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980.

EFFECTIVE DATE: June 16, 1986.

FOR FURTHER INFORMATION CONTACT: LT G.A. Wiltshire; 202-426-9568.

SUPPLEMENTARY INFORMATION: The proposed rulemaking was published on September 20, 1985 (50 FR 38139) and invited comments for 60 days ending November 19, 1985. Comments were received from seven sources including individuals, industry groups, businesses, and federal agencies. No public hearings were requested and none were held. A dicussion of the comments received and the actions taken are discussed below.

Drafting Information

The principal persons involved in the drafting of this final rule are Lieutenant G.A. Wiltshire, Project Officer, Office of Marine Environment and Systems, and Lieutenant S. Sylvester, Project Attorney, Office of the Chief Counsel.

Background

The regulations in Part 153 of Title 33 of the Code of Federal Regulations concerning notice of discharges of oil or hazardous substances, oil discharge removal, and administration of the Pollution Fund established by section 311(k) of the Federal Water Pollution Control Act, as amended (FWPCA) (33 U.S.C. 1321) were published in 1976. Since that time, both the FWPCA and the National Oil and Hazardous Substances Pollution Contingency Plan (National Contingency Plan) (40 CFR Part 300) have been amended. As a result, some of the definitions, procedures, and references in the regulations were outdated. In addition, the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) (42 U.S.C. 9601 et seq.) established requirements to report hazardous substance releases that overlapped the FWPCA reporting requirements. A Notice of Proposed Rulemaking was published on September 20, 1985 in the **Federal Register** (50 FR 38139) where various revisions were proposed to Part 153 to delete outdated materials, to update language to correspond to the FWPCA and National Contingency Plan revisions that have occurred or been proposed since the regulations were last updated, to clarify the criteria for direct payment from the Pollution Fund, and to revise the FWPCA discharge reporting procedures to correspond with the CERCLA reporting requirements.

Discussion of Changes From Proposed Rule

Eight revisions were made to the proposed rule based on comments received during the public comment period. Each of these changes are discussed in more detail below.

1. The definition of "coastal waters" in § 153.103 has been modified to add a reference to the Exclusive Economic Zone and to indicate where the specified ports and harbors on inland rivers are identified.

2. The definition of "Chief, Office of Marine Environment and Systems" in § 153.103 has been modified to reflect changes in Coast Guard program responsibilities.

3. The definition of "navigable waters" in § 153.103 has been modified to make reference to the definition in paragraph 2.05-25(b) of this Chapter.

4. The list of definitions in § 153.103 have been reorganized into alphabetical order for ease of use.

5. The procedures for notice of discharge in § 153.203 have been modified as they relate to notifications to the nearest Coast Guard unit. The proposed rule authorized reporting to either the Coast Guard or EPA predesignated federal On-Scene Coordinator (OSC), or the nearest Coast Guard unit, if direct reporting to the National Response Center (NRC) was not practicable. Based on comments received, this has been revised in the final rule to allow reports to the nearest Coast Guard unit only when it is not possible to notify the NRC or OSC directly. Reporting parties would be required to subsequently notify the NRC of the discharge as soon as possible.

6. The list of addresses and telephone numbers for Coast Guard district and EPA regional offices in Table 1 of Subpart B has been modified to reflect address or telephone number changes in EPA Regions I, III, IV, V, VII; VIII, and IX and the First, Second, and Twelfth Coast Guard Districts.

7. The list of states and corresponding Coast Guard Districts in Table 2 of Subpart B has been revised to delete the reference to coastal contingency plans and to better define the inland areas of the Coast Guard Districts.

8. The procedures for requesting reimbursement for response actions under FWPCA sections 311(c) and 311(d) and the Intervention on the High Seas Act, previously separated into §§ 153.417 and 153.419, have been consolidated into §153.417.

Discussion of Comments Received

Of the seven comments received, none objected to the revisions in the proposed rule, however, some comments recommended additional changes to the sections. The following is a discussion of the comments received.

1. Three comments were received concerning the definitions in 153.103. One comment requested that, for ease of use, the list of definitions be reorganized into alphabetical order. The Coast Guard agrees with this comment and has reorganized this section into alphabetical order for the Final Rule.

One comment requested that the definition of "coastal waters" in § 153.103(o) be revised to make specific reference to the 200-mile Exclusive Economic Zone. This comment was based on the portion of the definition covering discharges ". . . which may affect natural resources belonging to, appertaining to, or under the exclusive management authority of the United States. . ." On March 10, 1983, the President proclaimed that an ocean area extending up to 200 miles offshore would be covered within this zone, where the United States would exercise its soverign rights over natural resources and certain other economic activities. Since this area should fall within the definition of "coastal waters," the definition has been modified.

The final comment requested that the definition of "such quantities as may be harmful" in § 153.103(n) be modified to establish a standard for reporting based on the volume of oil discharged and the location of the discharge. The Coast Guard does not agree with this comment. The reporting regulations in this section merely establish a mechanism for receiving reports of "such quantities as may be harmful" as established by the Administrator of the Environmental Protection Agency (EPA) in accordance with section 311(b)(4) of the FWPCA. Existing EPA regulations in 40 CFR Part 110 establish this quantity for the navigable waters of the United States and the contiguous zone as a discharge which violates applicable water quality standards in navigable waters of the United States, causes a film or sheen or discoloration of the surface of the water or adjoining shorelines, or causes a sludge or emulsion to be deposited beneath the surface of the water or upon adjoining shorelines. A recent EPA Notice of Proposed Rulemaking concerning 40 CFR Part 110 (50 FR 9776 of March 11, 1985) proposed the extension of this "sheen test" to offshore waters outside the contiguous zone and solicited comments concerning the use of a volumetric test as an alternative. Until the EPA regulations are revised otherwise, the "sheen test" continues to be the quantity that requires reporting within the navigable waters and the contiguous zone.

In addition to the above changes, the definition of "Chief, Office of Marine Environment and Systems" in § 153.103(u) of the existing rule (§ 153.103(d) in Final Rule) has been modified to reflect revisions in Coast Guard program responsibilities, the definition of "coastal waters" in § 153.103(n) of the existing rule (§ 153.103(e) in Final Rule) has been modified to indicate that the specified ports and harbors on inland rivers where the Coast Guard acts as OSC are identified in the applicable Regional Contingency Plans, and the definition of "navigable waters" in § 153.103(w) of the existing rule (§ 153.103(k) in Final Rule) has been modified to reference the definition of this term in paragraph 2.05–25(b) of this Chapter.

2. Four comments were received concerning the reporting requirements in § 153.203. Three comments supported the reporting procedures proposed, but suggested additional revisions to reduced the spill investigation burden on the Coast Guard and industry, and one comment recommended that the provision for reporting a discharge to the nearest Coast Guard unit be deleted. A detailed discussion of these comments follows.

Two comments recommended that provisions be added to this section requiring the reporting of specific information about a discharge (size, possible shoreline impact, corrective action taken) and the recording of specific information concerning the discharge in the "Oil Record Book" that must be maintained by certain vessels as required by 33 CFR Part 151. The comments noted that these revisions would reduce the unnecessary costs incurred by government and industry in reporting and responding to many small and harmless spills. The comments further offered possible criteria that the Coast Guard could use for evaluating the need for investigating a reported discharge. The comments stated that, once the required notification was made and evaluated by the Coast Guard, a vessel involved in a discharge could resume operations and cleanup operations could proceed without undue administrative delays. While the Coast Guard appreciates the concern expressed by these comments, we believe that no revisions to the reporting regulations are necessary to address these concerns. Regarding the requirement of reporting parties to provide specific information when the report is received by the NRC or OSC, reporting parties are already asked to provide various information, such as the size of the discharge, source, cause, cleanup activities underway, and other discharge-related information. The Coast Guard believes that there is no need to "require" specific information to be provided, since it is already collected voluntarily. Regarding the use of Oil Record Books for recording information on oil discharges, the existing regulation concerning use of Oil Record Books in 33 CFR 151.25(g) already requires that information on any emergency, accidental, or other exceptional discharge of oil or oily mixture be entered in the Oil Record Book. The Coast Guard believes that this would cover the situation addressed by the comments. Regarding the investigation policy, the Coast Guard feels that this comment is beyond the scope of this rulemaking. Coast Guard policies for investigating reported discharges exist independent of the specific reporting regulations. The present policy is that the Coast Guard will investigate all reported discharges, resources permitting. Regarding the delays in vessel oil transfers resulting from oil discharges, the oil transfer regulations in 33 CFR 156.125 already address procedures for continuing oil transfers after a discharge occurs. These regulations require that an oil transfer operation be stopped after an oil discharge occurs and not resumed until the discharged oil is cleaned up, is contained and being cleaned up, or the resumption is authorized by the Coast Guard Captain of the Port (COTP), who is usually the predesignated Federal On-Scene Coordinator (OSC) for the area. Thus, it would be inappropriate to allow for resumption of oil transfers based solely on the reporting of a discharge, whatever the size, until the criteria in § 156.125 are met. However, this does not preclude the reporting party from receiving permission from the COTP to resume an oil transfer if the initial report is made directly to the OSC, and permission is received to resume the

transfer before Coast Guard personnel can investigate the discharge.

One comment recommended that the Coast Guard delete the provision that allows reporting of discharges to the nearest Coast Guard unit. The comment expressed concern that reports would be made to Coast Guard units where personnel are not familiar with the reporting requirements and may not obtain sufficient information concerning the discharge, may not process the report properly, or may inadvertently present a hazard to Coast Guard personnel not trained to respond to such reports. The comment also expressed concern that reporting to the nearest unit would delay the relaying of the information to the federal OSC. While the Coast Guard appreciates these concerns, we do not agree that this provision should be completely deleted, however, revisions have been made that should address these concerns. Specifically, the reporting requirement has been revised to allow reporting to the nearest Coast Guard unit only when it is not possible to report directly to the NRC or the predesignated OSC for the geographic area where the discharge occurs. In such cases, immediate reports can be made directly to the nearest Coast Guard unit, however, the person in charge of the vessel or facility involved in the discharge must subsequently notify the NRC as soon as possible. This revision retains the provision for reporting to the nearest Coast Guard unit, limiting its use, however, to those situations where it is not possible to report to either the NRC or the OSC.

One of the purposes of revising the FWPCA reporting requirements is to ensure consistency with the reporting requirements under CERCLA. All hazardous substance discharges which are subject to the FWPCA section 311(b)(5) reporting requirements are also subject to the reporting requirements in CERCLA section 103(a). This overlap exists because the list of hazardous substances defined in CERCLA section 101(14) includes substances designated pursuant to FWPCA section 311(b)(2), and the definition of a hazardous substance release in CERCLA section 101(22) includes discharges to navigable waters and other areas covered by the FWPCA. It is highly desirable, both from the perspectives of efficiency and in minimizing regulatory burden, to allow a single report to meet the requirements of both statutes. CERCLA section 103(a) requires reports of all hazardous substances releases to be made to the NRC. With this in view, EPA's final rule for reporting CERCLA hazardous substance releases in 40 CFR 302.6 states that such reports must be made to the NRC. However, in revising §§ 300.51 and 300.63 of the National Contingency Plan on November 20, 1985 (50 FR 47912), EPA authorized reports to the appropriate Coast Guard or EPA predesignated OSC where direct reporting to the NRC is not practicable, requiring that these reports be promptly relayed by the OSC to the NRC. This was to assure that even when hazardous substances discharges/releases are reported to the OSC, the statutorily required notice to the NRC will also be provided. In the case where it is not possible to notify the NRC or predesignated OSC immediately, EPA authorized reports to the nearest Coast Guard unit, but the reporting party must subsequently report to the NRC as soon as possible to meet the CERCLA reporting requirement. EPA intends to amend the rule implementing the CERCLA notification provisions to parallel the reporting procedure that is adopted in this rule and in the National Contingency Plan. Consequently, in cases where both CERCLA and the FWPCA apply, one report will meet the reporting requirements of both statutes.

Requiring persons that report to the nearest Coast Guard unit to subsequently notify the NRC should not impose any significant burdens on the reporting public. The Coast Guard believes that reports to the nearest Coast Guard unit would be limited to discharges involving vessels at sea or offshore platforms with no telephone access. These persons would normally report by radio to a Coast Guard station that maintains a radio watch. To ensure that the reporting requirement is met and, in the case of a hazardous substance discharge, to meet the CERCLA reporting requirement, persons who report under this provision must subsequently notify the NRC as soon as possible.

It is important to note that reports to locations other than the NRC are authorized only when direct reporting to the NRC is not practicable. Because the NRC maintains toll-free telephone numbers accessible from anywhere in the country, reporting to the predesignated OSC or the nearest Coast Guard unit should be very limited.

The final comment referred to reporting requirements of the Minerals Management Service (MMS), U.S. Department of the Interior, for certain oil discharges on the Outer Continental Shelf, and requested that providing notice to the NRC meet the MSS reporting requirements. The comment also indicated that they were recommending this same change to MMS. The Coast Guard believes that this comment is beyond the scope of this rulemaking. The MMS reporting requirements are based on their authorities under the Outer Continental Shelf Lands Act and exist independent of any FWPCA reporting requirements. Thus it is inappropriate to address any MMS reporting requirement in this rulemaking.

3. One comment noted that the address and phone number listed in Table 1 for EPA Region VII was incorrect, and that there were typographical errors in Table 2. The final rule corrects this information, as well as the address for Regions III and VIII and the First, Second, and Twelfth Coast Guard Districts, and updates the telephone numbers for all offices. In addition, Table 2 has been updated to delete the footnote concerning coastal regional contingency plans and to better define the inland areas of the Coast Guard districts. This corresponds with revisions to the National Contingency Plan that combined the coastal and inland regional contingency plans into one plan covering an entire standard Federal Region.

4. One comment suggested that separate certification procedures for FWPCA sections 311(c) and 311(d) and Intervention on the High Seas Act response actions contained in §§ 153.417 and 153.419 were unnecessary and should be combined. The Coast Guard agrees with this comment. The Final Rule consolidates the certification information previously included separately in §§ 153.417 and 153.419 into § 153.417 and deletes § 153.419.

5. One comment, although not requesting any revisions, inquired about the procedures for States to be reimbursed for their Phase III oil removal actions or hazardous substance removal actions. While §§ 153.407 and 153.417 of this Part describe the methods for obtaining reimbursement, additional requirements must be met before States can be reimbursed. These requirements, located in the National Contingency Plan (40 CFR 300.58(f)(4)), include a determination by the Federal OSC that the responsible party is unknown or not conducting a proper removal. The OSC must also determine that State action is required to minimize or mitigate a significant threat to public health or welfare which the Federal Government cannot minimize or mitigate, or that a removal or partial removal can be carried out by the State at a cost which is less than or not significantly greater than the costs which would be incurred by the Federal Government. The Coast

Guard has developed a standard agreement for use by States desiring reimbursement from the Pollution Fund which details the various requirements and procedures to be followed. Interested States should contact the appropriate Coast Guard District Office listed in Table 1 to obtain further information concerning these agreements. It should be noted that, because of the availability of the CERCLA Trust Fund for hazardous substance removal activities, use of these agreements is presently limited to Phase III oil removal activities only.

Reporting and Recordkeeping Requirements

The requirement for reporting oil and hazardous substance discharges is an existing requirement. The final revisions affect only the procedures for making the required notifications. These revisions do not create any increase in the reporting or recordkeeping requirements. The existing information collection requirements have previously been submitted to the Office of Management and Budget (OMB) for review under the Paperwork Reduction Act (44 U.S.C. 3501 et seq.) and have been approved by OMB. The section number and corresponding OMB approval number is 33 CFR 153.203, OMB No. 2115-0137.

E.O. 12291 and DOT Regulatory Policies and Procedures

These final regulations are considered to be non-major under Executive Order 12291 and non-significant under the DOT regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact of this final rule has been found to be so minimal that further evaluation is unnecessary. The final rule will not establish any new reporting requirements, and only reflects statutory or regulatory changes that have occurred since the regulations were last revised or clarify existing policies or procedures.

Regulatory Flexibility Act

Since the impact of this final rule is expected to be minimal, the agency certifies that it will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 153

Hazardous substances, Oil pollution.

For the reasons set out in the preamble, Part 153 of Subchapter O, Chapter I of Title 33 of the Code of Federal Regulations is amended to read as set forth below:

PART 153—[AMENDED]

1. The authority citation for Part 153 is revised to read as follows and all authority citations within the Part are removed:

Authority: 14 U.S.C. 633; 33 U.S.C. 1321(j)(1)(A) and (m); 42 U.S.C. 9615; secs. 2, 5, and 7, E.O. 11735 (38 FR 21243) as amended by E.O. 12418 (48 FR 20891); E.O. 12316 (46 FR 42237); 49 CFR 1.45(b) and 1.46 (l), (m), and (n).

2. Section 153.101 is revised to read as follows:

§ 153.101 Purpose.

The purpose of this part is to prescribe regulations concerning notification to the Coast Guard of the discharge of oil or hazardous substances as required by the Federal Water Pollution Control Act, as amended (FWPCA); the procedures for the removal of a discharge of oil; and the costs that may be imposed or reimbursed for the removal of a discharge of oil or hazardous substances under the FWPCA.

3. Section 153.103 is revised to read as follows:

§ 153.103 Definitions.

As used in this part:

(a) "Act" means the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 et seq.).

(b) "CERCLA" means the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9601 et seq.).

(c) "Chemical agents" means those elements, compounds, or mixtures that coagulate, disperse, dissolve, emulsify, foam, neutralize, precipitate, reduce, solubilize, oxidize, concentrate, congeal, entrap, fix, make the pollutant mass more rigid or viscous, or otherwise facilitate the mitigation of deleterious effects or removal of the pollutant from the water. The term "chemical agents" as used in this part includes dispersants, surface collecting agents, biological additives, burning agents, and sinking agents as defined in Subpart H of the National Contingency Plan.

(d) "Chief, Office of Marine Environment and Systems" means the Coast Guard Officer designated by the Commandant to assist and advise the Commandant on matters related to marine environmental response, port and environmental safety, and waterways management.

(e) "Coastal waters" means all U.S. waters subject to the tide, U.S. waters of the Great Lakes, specified ports and harbors on the inland rivers, waters of the contiguous zone, or other waters of the high seas subject to discharges in connection with activities under the Outer Continental Shelf Lands Act (43 U.S.C. 1331 et seq.) or the Deepwater Port Act of 1974 (33 U.S.C. 1501 et seq.), or which may affect natural resources belonging to, appertaining to, or under the exclusive management authority of the United States (including resources under the Magnuson Fishery Conservation and Management Act (16 U.S.C. 1801 et seq.)). These waters include those contained within the Exclusive Economic Zone declared by Presidential Proclamation 5030 on March 10, 1983 (43 FR 10605).

Note: Coastal waters are those waters where the Coast Guard has the responsibility for providing On-Scene Coordinators under the National Contingency Plan. Specific dividing lines between coastal and inland waters, and the identification of specified ports and harbors on inland rivers, are contained in Regional Contingency Plans prepared pursuant to the National Contingency Plan.

(f) "Contiguous zone" means the entire zone established by the United States under Article 24 of the Convention on the Territorial Sea and the Contiguous Zone, as published in the June 1, 1972 issue of the Federal Register (37 FR 11906).

(g) "Discharge" includes, but is not limited to, any spilling, leaking, pumping, pouring, emitting, emptying, or dumping, but excludes (A) discharges in compliance with a permit under Section 402 of the Act, (B) discharges resulting from circumstances identified and reviewed and made part of the public record with respect to a permit issued or modified under Section 402 of the Act, and subject to a condition in such permit, and (C) continuous or anticipated intermittent discharges from a point source, identified in a permit or permit application under section 402 of the Act, which are caused by events occurring within the scope of relevant operating or treatment systems.

(h) "Hazardous substance" means any substance designated by the Administrator of the Environmental Protection Agency pursuant to section 311(b)(2) of the Act.

(i) "Inland waters" means all other waters of the U.S. not included in the definition of coastal waters.

Note: Inland waters are those waters where the Environmental Protection Agency has the responsibility for providing On-Scene Coordinators under the National Contingency Plan. Specific dividing lines between coastal and inland waters are contained in Regional Contingency Plans prepared pursuant to the National Contingency Plan.

(j) "Mechanical removal" means the use of pumps, skimmers, booms, earthmoving equipment, and other

mechanical devices to contain the discharge of oil and to recover the discharge from the water or adjoining shorelines.

(k) "Navigable waters" means the waters of the United States as defined in paragraph 2.05–25(b) of this Chapter.

(l) "Offshore facility" means any facility of any kind located in, on, or under, any of the navigable waters of the United States, and any facility of any kind which is subject to the jurisdiction of the United States and is located in, on, or under any other waters, other than a vessel or a public vessel.

(m) "Oil" means oil of any kind or in any form, including but not limited to petroleum, fuel oil, sludge, oil refuse, and oil mixed with wastes other than dredged spoil.

(n) "On-Scene Coordinator" or "OSC" is the Federal official predesignated by the Environmental Protection Agency (EPA) or Coast Guard to coordinate and direct Federal removal efforts at the scene of an oil or hazardous substance discharge as prescribed in the National Oil and Hazardous Substances Pollution Contingency Plan (National Contingency Plan) as published in 40 CFR Part 300.

(o) "Onshore facility" means any facility (including, but not limited to, motor vehicles and rolling stock) of any kind located in, on, or under, any land within the United States other than submerged land.

(p) "Person" includes an individual, firm, corporation, association, and a partnership.

(q) "Pollution Fund" and "Fund" means the revolving fund established in the Treasury under the authority in section 311(k) of the Act to carry out the provisions of section 311 (c), (d), (i), and (l) of the Act.

(r) "Public vessel" means a vessel owned or bare-boat chartered and operated by the United States, or by a State or political subdivision thereof, or by a foreign nation, except when such vessel is engaged in commerce.

(s) "Remove" or "Removal" refers to removal of oil or hazardous substances from the waters and shorelines or the taking of such other actions as may be necessary to minimize or mitigate damage to the public health or welfare, including, but not limited to, fish, shellfish, wildlife, and public and private property, shorelines, and beaches.

(t) "Sorbent" means materials essentially inert and insoluble used to remove oil from water through a variety of sorption mechanisms. Examples include straw, expanded perlite, polyurethane foam, reclaimed paper fibres, and peat moss.

(u) "Such quantities as may be harmful" means those quantities of oil and any hazardous substances determined in accordance with the provisions of section 311(b)(4) of the Act.

Note: Regulations that relate to such quantities as may be harmful of oil are published in 40 CFR Part 110. Regulations that relate to such quantities as may be harmful (reportable quantities) of hazardous substances are published in 40 CFR Part 117 and also listed in 40 CFR Part 302.

(v) "United States" means the States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands.

(w) "Vessel" means every description of watercraft or other artificial contrivance used, or capable of being used, as a means of transportation on water other than a public vessel.

4. In § 153.105, paragraph (d)(4) is revised to read as follows:

§ 153.105 Delegations.

* * * * *

(d) * * *

(4) Which may affect natural resources belonging to, appertaining to, or under the exclusive management authority of the United States, including resources under Magnuson Fishery Conservation and Management Act (16 U.S.C. 1801 et seq.).

* * * * *

5. Section 153.203 is revised to read as follows:

§ 153.203 Procedure for the notice of discharge.

Any person in charge of a vessel or of an onshore or offshore facility shall, as soon as they have knowledge of any discharge of oil or a hazardous substance from such vessel or facility in violation of section 311(b)(3) of the Act, immediately notify the National Response Center (NRC), U.S. Coast Guard, 2100 Second Street, SW., Washington, DC 20593, toll free telephone number 800–424–8802 (in Washington, D.C. metropolitan area, 426–2675). If direct reporting to the NRC is not practicable, reports may be made to the Coast Guard or EPA predesignated OSC for the geographic area where the discharge occurs. All such reports shall be promptly relayed to the NRC. If it is not possible to notify the NRC or the predesignated OSC immediately, reports may be made immediately to the nearest Coast Guard unit, provided that the person in charge of the vessel or onshore or offshore facility notifies the NRC as soon as possible.

Note: Geographical jurisdiction of Coast Guard and EPA OSC's are specified in the applicable Regional Contingency Plan. Regional Contingency Plans are available at Coast Guard District Offices and EPA Regional Offices as indicated in Table 2. Addresses and telephone numbers for these offices are listed in Table 1.

6. In § 153.305, paragraph (d) is revised to read as follows:

§ 153.305 Methods and procedures for the removal of discharged oil.

* * * * *

(d) Use chemical agents only in accordance with the provisions of Subpart H of the National Contingency Plan and with the prior approval of the Federal OSC; and

* * * * *

7. Table 1 of Subpart B is revised to read as follows:

TABLE 1.—ADDRESSES AND TELEPHONE NUMBERS OF COAST GUARD DISTRICT OFFICES AND EPA REGIONAL OFFICES

	Address	Telephone

9. in § 153.407, the introductory text of paragraph (a) and paragraph (b) are revised to read as follows:

§ 153.407 Payments or reimbursements from the pollution fund.

(a) The following costs incurred during performance of a Phase III activity as defined in Subpart E of the National Contingency Plan, or a removal action as defined in Subpart F of the National Contingency Plan, are reimbursable to Federal and State agencies when authorized by the appropriate OSC under the authority of section 311(c) of the Act, and are reimbursable to Federal agencies when authorized by the appropriate Coast Guard or EPA official in the case of the summary removal or destruction of a vessel, other "intervention" (as defined in § 153.105(e) of this Part), or any other action under the authority of section 311(d) of the Act or the Intervention on the High Seas Act (33 U.S.C. 1471 et seq.):

* * * * *

(b) The District Commander may authorize the direct payment of the costs found to be reasonable under paragraph (a)(3) of this section. Direct payment may only be made to Federal or State agencies, or to Federal contractors or suppliers. Direct payments to State or local agency contractors or suppliers will not be authorized.

* * * * *

10. In § 153.415, the section heading and introductory paragraph are revised to read as follows:

§ 153.415 Cost summary reports.

As soon as practicable after completion of an action authorized under section 311 (c) or (d) of the Act or the Intervention on the High Seas Act, the OSC submits a cost summary report to the cognizant District Commander that includes:

* * * * *

11. Section 153.417 is revised to read as follows:

§ 153.417 Reimbursement for actions under section 311(c) or 311(d) of the Act of the Intervention on the High Seas Act.

(a) Each Federal or State agency requesting reimbursement for an action authorized under section 311(c) or 311(d) of the Act or under the Intervention on the High Seas Act must, within 60 days after completion of the action, submit to the cognizant District Commander, through the OSC for review and certification required in paragraph (b) of this section, lists accompanied by supporting accounting data, itemizing actual costs incurred.

(b) Requests for reimbursement submitted by Federal and State agencies are reviewed by the OSC to ensure that the costs for which reimbursement is being sought were authorized as Phase III removal actions for oil discharges, or removal actions as defined in Subpart F for hazardous substance discharges, and must have one of the following certifications by the OSC, as appropriate:

(1) I certify that the actions for which reimbursement is being requested in the attached statements were authorized by me as [(Phase III oil removal actions) or (hazardous substance removal actions)], and reasonable costs related thereto are proper for payment from the Pollution Fund.

_____

(OSC signature)

_____

(Incident title)

_____

(Pollution incident project number)

(2) I certify that, except as noted below, the actions for which reimbursement is being requested in the attached statements were authorized by me as [(Phase III oil removal actions) or (hazardous substance removal actions)], and reasonable costs related thereto are proper for payment from the Pollution Fund. The following actions were not authorized by me and are not subject to reimbursement from the Pollution Fund:

_____

(OSC Signature)

_____

(Incident title)

_____

(Pollution incident project number)

§ 153.419 [Removed]

12. Section 153.419 is removed.

Dated: May 12, 1986.

Peter J. Rots,

Rear Admiral, U.S. Coast Guard Chief, Office of Marine Environment and Systems.

[FR Doc. 86-11010 Filed 5-15-86; 8:45 am]

BILLING CODE 4910-14-M

---

33 CFR Part 165

Safety Zone Regulations; Upper Chesapeake Bay

AGENCY: Coast Guard, DOT.

ACTION: Emergency rule.

SUMMARY: The Coast Guard is establishing a safety zone in the Upper Chesapeake Bay (COTP Baltimore, MD Regulation 86-04). This will be a moving zone centered around the S/S QUEEN ELIZABETH II during her transit to and from Baltimore, Maryland. The zone is needed to protect watercraft from a safety hazard associated with the passage of the S/S QUEEN ELIZABETH II into the Upper Chesapeake Bay. Entry into this zone is prohibited unless authorized by the Captain of the Port Baltimore, Maryland.

EFFECTIVE DATES: This regulation becomes effective 09 May 1986 at 10:00 AM. It terminates on 17 May 1986 at 3:30 PM unless sooner terminated by the Captain of the Port Baltimore, Maryland.

FOR FURTHER INFORMATION CONTACT: Commander D. M. Strasser, Chief Port Operations Department, USCG Marine Safety Office, Custom House, 40 South Gay Street, Baltimore, Maryland 21202-4022, (301) 962-5105.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was not published for this regulation and it is being made effective in less than 30 days from the date of this publication. Publishing a NPRM and delaying the effective date of this safety zone would be contrary to the public interest since action is needed to safeguard watercraft and their occupants on the scheduled dates.

Drafting Information

The drafters of this regulation are CWO-2 D. L. HUTCHINSON, project officer for the Captain of the Port Baltimore, MD and LCDR F. E. COUPER, Project Attorney, Fifth Coast Guard District Legal Office (Baltimore Branch).

Discussion of Regulation

The event requiring this regulation will occur on 17 May 1986 and again on 17 May 1986. This safety zone is necessary to protect the boating public from the hazards associated with the passage of the S/S QUEEN ELIZABETH II through the Upper Chesapeake Bay and in and out of the Port of Baltimore, Maryland. This action will help prevent damage to watercraft and their occupants.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

Regulation

In consideration of the foregoing, Part 165 of Title 33, Code of Federal Regulations, is amended as follows:

PART 165—[AMENDED]

1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1225 and 1231; 50 U.S.C. 191; 49 CFR 1.49 and 33 CFR 1.05-1(g), 6.04-1, 6.04-6 and 160.5.

2. A new section 165.T0504 is added to read as follows:

§ 165.T0504 Safety Zone: Upper Chesapeake Bay, Baltimore, Maryland.

(a) *Location.* The following area is a safety zone: A 200 yard radius moving zone around the S/S QUEEN ELIZABETH II, while in transit of the Upper Chesapeake Bay, North of a line between Thomas Point to the mouth of Price Creek to Dundalk Marine Terminal Baltimore, Maryland and the return trip South through the Upper Chesapeake Bay from Dundalk Marine Terminal to a line from Thomas Point to the mouth of Price Creek.

(b) *Regulations.* (1) In accordance with the general regulation in § 165.23 of this part, entry into this zone is prohibited unless authorized by the Captain of the Port Baltimore, MD.

Dated: April 30, 1986.

R.C. Pickup,

Captain, U.S. Coast Guard, Captain of the Port Baltimore, Maryland.

[FR Doc. 86-11012 Filed 5-15-86; 8:45 am]

BILLING CODE 4910-14-M

---

33 CFR Part 165

Security Zone Regulations; Upper Chesapeake Bay

AGENCY: Coast Guard, DOT.

ACTION: Emergency rule.

SUMMARY: The Coast Guard is establishing a security zone in the Baltimore Harbor, Dundalk Marine Terminal, Baltimore, Maryland. The zone is needed to protect the S/S QUEEN ELIZABETH II and her passengers from a security threat associated with the port call of the S/S QUEEN ELIZABETH II at Baltimore, Maryland. Entry into this zone is prohibited unless authorized by the Captain of the Port Baltimore, Maryland.

EFFECTIVE DATES: This regulation becomes effective on 09 May 1986 at 2:00 PM. It terminates on 17 May 1986 at 11:30 AM unless sooner terminated by the Captain of the Port Baltimore, Maryland.

FOR FURTHER INFORMATION CONTACT: Commander D. M. STRASSER, Chief Port Operations Department, USCG Marine Safety Office, Custom House, 40 South Gay Street, Baltimore, Maryland 21202-4022, (301) 962-5105.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was not published for this regulation and it is being made effective in less than 30 days from the date of this publication. Publishing a NPRM and delaying the effective date of this security zone would be contrary to the public interest since action is needed to safeguard the S/S QUEEN ELIZABETH II and her passengers on the scheduled dates.

Drafting Information

The drafters of this regulation are CWO-2 D. L. HUTCHINSON, project officer for the Captain of the Port Baltimore, MD and LCDR F. E. COUPER, Project Attorney, Fifth Coast Guard District Legal Office (Baltimore Branch).

Discussion of Regulation

The event requiring this regulation will occur on 09 May 1986 and again on 17 May 1986. This security zone is necessary to protect the S/S QUEEN ELIZABETH II and her passengers while moored at Dundalk Marine Terminal, Baltimore, Maryland. This action will minimize the hazards to the S/S QUEEN ELIZABETH II and her passengers from possible damage from any person or persons.

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

Regulation

In consideration of the foregoing, Part 165 of Title 33, Code of Federal Regulations, is amended as follows:

PART 165—[AMENDED]

1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1225 and 1231; 50 U.S.C. 191; 49 CFR 1.49 and 33 CFR 1.05-1(g), 6.04-1, 6.04-6 and 160.5.

2. A new § 165.T0505 is added to read as follows:

§ 165.T0505 Security Zone: Baltimore, Maryland.

(a) *Location.* The following area is a security zone: A 500 yard perimeter upon the waters surrounding the vessel S/S QUEEN ELIZABTEH II while moored at Dundalk Marine Terminal, Berth 5.

(b) *Regulations.* (1) In accordance with the general regulation in § 165.23 of this part, entry into this zone is prohibited unless authorized by the Captain of the Port Baltimore, MD.

Dated: April 30, 1986.

R. C. Pickup,

Captain, U.S. Coast Guard, Captain of the Port Baltimore, Maryland.

POSTAL SERVICE

39 CFR Part 10

International Surface Air Lift Service to Panama and Certain Far Eastern Countries

AGENCY: Postal Service.

ACTION: Final action on International Surface Air Lift Service to Panama and Certain Far Eastern countries.

SUMMARY: Pursuant to agreements with the postal administrations of Panama and certain Far Eastern countries, the Postal Service intends to begin International Surface Air Lift Service to those countries at postage rates indicated in the tables below. Service is scheduled to begin on June 15, 1986.

EFFECTIVE DATE: June 15, 1986.

FOR FURTHER INFORMATION CONTACT: Leon W. Perlmn, [202] 268-2673.

SUPPLEMENTARY INFORMATION: By a notice published in the **Federal Register** on April 10, 1986 [51 FR 12343], the Postal Service announced that it was proposing to begin International Surface Air Lift Service to Panama and certain Far Eastern countries. Comments were invited on published rate tables, which are proposed amendments to the International Mail Manual (incorporated by reference in the Code of Federal Regulations, 39 CFR 10.1), and which are to become effective on the date service begins. No comments were received. Accordingly, the Postal Service states that it intends to begin International Surface Air Lift Service to Panama and certain Far Eastern countries on June 15, 1986 at the rates indicated in the table below.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 1 and 21

[Gen. Docket No. 80-112; FCC 86-225]

Common Carrier Services; Instructional Television Fixed Service, the Multipoint Distribution Service and the Private Operational Fixed Microwave Service; Amendment

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action changes the cut-off date for the submission of settlement agreements, pertaining to MMDS, from two (2) business days prior to the date of the lottery to ten (10) business days prior to the lottery. The increase in time is required to ensure that all of the administrative details involved in including new settlement entities in the lottery system can be accomplished. This action will ensure that all new settlement entities that submit their settlement agreement at least ten (10)

BEST COPY AVAILABLE

days prior to a designated lottery will be included in that lottery.

EFFECTIVE DATE: May 16, 1986.

FOR FURTHER INFORMATION CONTACT: Donald L. McClure, Common Carrier Bureau, (202) 634–1774.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Order Gen. Docket No. 80–112, Adopted: April 30, 1986; and Released: May 8, 1986.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Summary of Order

This Order changes the cut-off date for the submission of settlement agreements, pertaining to MMDS, from two (2) business days to the date of the lottery to ten (10) business days prior to the lottery.

Ordering Clauses

Accordingly, it is ordered, That under the authority contained in Section 4(i) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), para. 31 in *Second Report and Order*, Gen. Docket No. 80–112 (February 13, 1985, 50 FR 5983) is amended as hereinbefore described.

William J. Tricarico,

Secretary.

47 CFR Part 18

[GEN Docket 20716; FCC 86–205]

Radiation Limits Below 30 MHz for RF Lighting Devices

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: By this Memorandum Opinion and Order, the Commission affirms its decision in the Third Report and Order in this proceeding with regard to the technical standards for radio frequency (RF) lighting devices. This action is being taken in response to a petition for partial reconsideration filed by the National Association of Broadcasters. The Commission also amends §§ 18.213, 18.305 and 18.309 of its Rules to provide additional information to the public.

EFFECTIVE DATE: June 9, 1986.

FOR FURTHER INFORMATION CONTACT: Liliane Volcy, Office of Engineering and Technology, tel: (202) 653–7316.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Memorandum Opinion and Order, GEN Docket 20716, adopted April 16, 1986, and released May 8, 1986.

The full text of Commission decisions is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street NW, Suite 140, Washington, DC 20037.

Summary of Memorandum Opinion and Order

1. The Commission denies the petition for partial reconsideration filed by the National Association of Broadcasters ("NAB") with regard to the technical standards adopted for RF lighting devices in the Third Report and Order in this proceeding, 50 FR 36061 (1985). Although the Commission finds inadequate justification for adopting the particular radiation limit requested by NAB (25 μV/m at 10 meters below 30 MHz), it agrees with NAB that, in view of the expected proliferation and long life-expectancy of RF lighting devices, the lack of a radiation limit below 30 MHz may increase the interference potential of such products to authorized radio services. Therefore, in an associated Notice of Proposed Rule Making in GEN Docket 83–806, the Commission proposes to impose radiation limits at frequencies below 30 MHz on the operation of RF lighting devices. These limits are based on current standards applied to other equipment regulated by the Commission and operating in the same frequency range and on the fact that there has been little or no reported interference from such devices. The subject Memorandum Opinion and Order also amends §§ 18.213, 18.305 and 18.309 of the Rules to provide additional information to the public.

Ordering Clauses

2. Accordingly, it is ordered, That the Petition for Partial Reconsideration filed by the National Association of Broadcasters is denied. It is also ordered, That Part 18 of the Rules is amended as shown below, effective June 9, 1986.

List of Subjects in 47 CFR Part 18

Business and industry, Household appliances.

William J. Tricarico,

Secretary.

Part 18 of Title 47 of the Code of Federal Regulations is amended as follows:

PART 18—INDUSTRIAL, SCIENTIFIC, AND MEDICAL EQUIPMENT

1. The authority citation for Part 18 continues to read as follows:

Authority: Secs. 4, 303, 307, 48 Stat. 1066, 1082, 1083, as amended; Sec. 303, 82 Stat. 290; 47 U.S.C. 154, 302, 303, 307.

2. The introductory paragraph of § 18.213 is revised to read as follows:

§ 18.213 Information to the user.

Information on the following matters shall be provided to the user in the instruction manual or on the packaging if an instruction manual is not provided for any type of ISM equipment:

* * * * *

3. Section 18.305 is amended by revising paragraph (b) and notes 1 and 2 to the section to read as follows:

§ 18.305 Field strength limits.

* * * * *

(b) The field strength levels of emissions which lie outside the bands specified in § 18.301, unless otherwise indicated, shall not exceed the following:

Equipment	Operating frequency	RF Power generated by equipment (watts)	Field strength limit (uV/m)	Distance (meters)
Any type unless otherwise specified (miscellaneous).	Any ISM frequency	Below 500	25	300
		500 or more	25 $\sqrt{\text{power}/500}$	[1]300
	Any non-ISM frequency	Below 500	15	300
		500 or more	15 $\sqrt{\text{power}/500}$	[1]300
Industrial heaters and RF stabilized arc welders.	On or below 5,725 MHz	Any	10	1,600
	Above 5,725 MHz	Any	(*)	(*)
Medical diathermy	Any ISM frequency	Any	25	300
	Any non-ISM frequency	Any	15	300
Ultrasonic	Below 490 kHz	Below 500	2,400/F(kHz)	300
		500 or more	2,400/F(kHz) $\sqrt{\text{power}/500}$	[1]300
	490 to 1,600 kHz	Any	24,000/F(kHz)	30
	Above 1,600 kHz	Any	15	30
Induction cooking ranges	Below 90 kHz	Any	1,500	[2]50

BEST COPY AVAILABLE

Equipment	Operating frequency	RF Power generated by equipment (watts)	Field strength limit (uV/m)	Distance (meters)
	On or above 92 MHz	Any	500	[4]30

[1] Field strength may not exceed 10 μV/m at 1600 meters. Consumer equipment operating below 1000 MHz is not permitted the increase in field strength otherwise permitted here for power over 500 watts.
[2] Reduced to the greatest extent possible.
[3] Field strength may not exceed 10 μV/m at 1600 meters. Consumer equipment is not permitted the increase in field strength otherwise permitted here for over 500 watts.
[4] Induction cooking ranges manufactured prior to February 1, 1980, shall be subject to the field strength limits for miscellaneous ISM equipment.

* * * * *

Notes

1. The tighter limit shall apply at the boundary between two frequency ranges.

2. Testing for compliance with these limits may be made at closer distances, provided a sufficient number of measurements are taken to plot the radiation pattern, to determine the major lobes of radiation, and to determine the expected field strength level at 30, 300, or 1600 meters. Alternatively, if measurements are made at only one closer fixed distance, then the permissible field strength limits shall be adjusted using 1/d as an attenuation factor.

3. In § 18.309, paragraph (a) is revised to read as follows:

§ 18.309 Frequency range of measurements.

(a) For field strength measurements:

Frequency band in which device operates (MHz)	Range of frequency measurements	
	Lowest frequency	Highest frequency
Below 1.705	Lowest frequency generated in the device, but not lower than 9 kHz.	30 MHz.
1.705 to 30	Lowest frequency generated in the device, but not lower than 9 kHz.	400 MHz.
30 to 500	Lowest frequency generated in the device or 25 MHz, whichever is lower.	Tenth harmonic or 1,000 MHz, whichever is higher.
500 to 1,000	Lowest frequency generated in the device or 100 MHz, whichever is lower.	Tenth harmonic.
Above 1,000	do	Tenth harmonic or highest detectable emission.

* * * * *

BILLING CODE 6712-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Determination of Endangered Status for Scaevola Coriacea (Dwarf Naupaka)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The U.S. Fish and Wildlife Service determines *Scaevola coriacea* (dwarf naupaka) to be an endangered species, under the authority contained in the Endangered Species Act of 1973, as amended (Act). Populations, once prevalent throughout the major Hawaiian islands, are now limited to four small areas of State and private land in Maui County, Hawaii. The only signficant population, near Waiehu Point, is threatened by residential development. Approximately two-thirds of the plant's remaining habitat will be impacted by this development. Protective measures for the remaining plants are needed. This determination that *Scaevola coriacea* is an endangered species implements the protection provided by the Act.

EFFECTIVE DATE: The effective date of this rule is June 16, 1986.

ADDRESSES: The complete file for this rule is available for inspection, by appointment, during normal business hours at the U.S. Fish and Wildlife Service, Lloyd 500 Building, 500 N.E. Multnomah Street, Suite 1692, Portland, Oregon 97232.

FOR FURTHER INFORMATION CONTACT: Mr. Wayne S. White, Chief, Division of Endangered Species, at the above address (503/231-6131 or FTS 429-6131).

SUPPLEMENTARY INFORMATION:

Background

Scaevola coriacea is a sparsely branched, prostrate shrub found in close proximity to the ocean. It was first collected by David Nelson in 1779, and later described by Thomas Nuttall (1843), based on specimens collected on "Atooi" (Kauai) in 1835. Its leaves are thick and succulent, light green, and about 2.5 centimeters (1 inch) in length. Cream-colored flowers, 1.9 centimeters (0.75 inch) long, may open at any time during the year. The flower is typical of the genus *Scaevola*, with a corolla split down the upper side so that it resembles half of a radially symmetrical flower that has been divided longitudinally. This is sometimes referred to as a "half-flower." The fruit is purplish black and approximately 1.3 centimeters (0.5 inch) in length, and contains 2 seed cells (Carr 1981). Single plants may cover up to 10 square meters (108 square feet) of surface area.

Sites occupied by *Scaevola coriacea* are mostly on low, consolidated sand dunes near the ocean. The habitat is relatively dry and hot. The sites receive high insolation and most of the vegetation is at or near ground level. Associated species include *Scaevola taccada* (a common, shrubby member of the same genus), *Bidens mauiensis, Nama sandwicensis, Boerhavia diffusa,* and *Lipochaeta integrifolia* (Herbst 1972).

Historically, populations of *Scaevola coriacea* were present on all the major Hawaiian islands, with Maui supporting the most extensive populations. Presently, only four small populations remain in Maui County, Hawaii: at Waiehu Point, West Maui; at Kaupo, East Maui; on the islet of Moke'ehia, off West Maui; and on the islet of Mokuho'oniki, east of Molokai. The islets are part of the Hawaiian State Seabird Sanctuary and are under the jurisdiction of the State Department of Land and Natural Resources. The Waiehu Point population is split between land in State and private ownership. The State-owned land is under the jurisdiction of the County of Maui. The Kaupo population is entirely on private land. Loss of current and suitable habitat to development represents the major threat to the species. Protection of the remaining habitat from degradation, through a cooperative State, Federal, and county effort, is needed to ensure the species' continued existence.

Section 12 of the Endangered Species Act of 1973 (Act) directed the Secretary of the Smithsonian Institution to prepare a report on those plants considered to be endangered, threatened, or extinct. This report (House Document No. 94-51) was presented to Congress on January 9, 1975. On July 1, 1975, the Service published a notice of review in the **Federal Register** (40 FR 27823) accepting this report as a petition within the context of section 4(c)(2) of the Act (petition acceptance is now governed by section 4(b)(3) of the Act, as amended).

On June 16, 1976, the Service published a proposed rule in the Federal Register (41 FR 24523) to determine approximately 1,700 vascular plant taxa to be endangered species pursuant to section 4 of the Act. *Scaevola coriacea* was included in the Smithsonian report, the notice of review of July 1, 1975, and the proposal of June 16, 1976.

The Endangered Species Act, as amended in 1978, required that all proposals over 2 years old be withdrawn, except that a 1-year grace period was given to proposals already over 2 years old. On December 10, 1979, the Service published a notice of withdrawal of the portion of the June 16, 1976, proposal that had not been made final, along with four other proposals that had expired (44 FR 70796). In the Federal Register of December 15, 1980 (45 FR 82480), the Service published a revised notice of review. *Scaevola coriacea* was included in this notice as a category-1 species, indicating that existing data warranted proposal to list as endangered or threatened.

The Endangered Species Act Amendments of 1982 required that all petitions pending as of October 13, 1982, be treated as having been newly submitted on that date. *Scaevola coriacea* was subject to this provision, so that a finding was required within one year as to whether its listing was warranted. On October 13, 1983, and again on October 12, 1984, the petition finding was made that listing *Scaevola coriacea* was warranted but precluded by other pending listing actions, in accordance with section 4(b)(3)(B)(iii) of the Act. A proposal was published on July 16, 1985 (50 FR 28878), based on information available in 1975 and information gathered after that time and summarized in a detailed status report prepared under contract by a University of Hawaii botanist (Carr 1982). The Service now determines *Scaevola coriacea* to be an endangered species with the publication of this final rule.

Summary of Comments and Recommendations

In the July 16, 1985, proposed rule (50 FR 28878) and associated notifications, all interested parties were requested to submit factual reports or information that might contribute to the development of a final rule. Appropriate State agencies, county governments, Federal agencies, scientific organizations, and other interested parties were contacted and requested to comment. A newspaper notice that invited general public comment was published in the *Maui News* on August 16, 1985, and in the *Honolulu Star Bulletin* and the *Honolulu Advertiser* on August 21, 1985. Seven letters of comment were received and are discussed below. A public hearing was requested and held in Kahului, Maui, Hawaii on November 5, 1985. The comment period was reopened following the public hearing, closing again December 9, 1985 (50 FR 42190). Three persons testified; their testimony also is included in the following summary.

Comments were received from a U.S. Congressman, the Governor of the State of Hawaii, the Western Regional Office of the National Audubon Society, a Professor of Botany at the University of Hawaii, a landowner on whose property a part of one population of the *Scaevola* grows, and two other individuals. Testimony at the public hearing was presented by the Administrator of the Division of Forestry and Wildlife of the State Department of Land and Natural Resources, a member representing the Friends of Maui Botanical Gardens, and a private individual. All comments submitted and all testimony given at the public hearing have been considered in formulating this final rule.

Six of the seven letters of comment and all testimony at the public hearing supported listing *Scaevola coriacea* as an endangered species. In his letter of comment, the president of the company that owns several of the sand dunes at Waiehu disagreed with the Service's census of the species. He visited two of the dunes and counted over 1,000 plants on one dune in 1984 and found more than 300 on the other in 1985. The proposed rule stated that the entire known population at Waiehu consisted of approximately 300 individuals. Admittedly it is very difficult to count or to estimate population sizes because of the prostrate, creeping habit of the species. However, many botanists and interested naturalists have visited these dunes and made estimates of the population size; at least four individuals have done so between 1981 and 1985. Their estimates are fairly close and all approximate 300 plants. The company's president recommends that public lands be used to create a protected habitat for the species. Additional information was submitted in this and several of the other letters and has been incorporated into the final rule.

The University professor indicated reservations concerning the Service's failure to propose designation of critical habitat. The Service continues to believe that such designation would not be prudent in this case because of the associated risks of vandalism and collecting.

Summary of Factors Affecting the Species

After a thorough review and consideration of all information available, the Service has determined that *Scaevola coriacea* should be classified as an endangered species. Procedures found at section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations (50 CFR Part 424) promulgated to implement the listing provisions of the Act were followed. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to *Scaevola coriacea* Nutt. (dwarf naupaka) are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* Historically, *Scaevola coriacea* was present on all the major Hawaiian islands, with Maui supporting the largest populations. Presently, the species exists in only four small areas of Maui County, Hawaii: Waiehu Point, West Maui; Kaupo, East Maui; the islets of Moke'ehia off West Maui, and Mokuho'oniki, east of Molokai. The entire known population consists of approximately 350 individuals, 300 of which are found at Waiehu Point (Carr 1981). The Waiehu population may now be smaller as a result of recent urban development in that area.

The Waiehu Point population occurs on four sand dunes, both on State land, as part of Waiehu Golf Course, and on private land, owned by a realty company. The latter is presently being developed into residential lots. This action will cause loss of nearly two-thirds of the species' remaining habitat. Habitat degradation of the remaining fraction of public land by the activity of golfers off the fairway is a potential, but probably minimal, threat to the plant.

Scaevola coriacea can not compete with aggressive weedy species. Koa haole (*Leucaena leucocephala*) and other plants appear to be encroaching on some of the Waiehu habitat.

B. *Overutilization for commercial, recreational, scientific, or educational purposes. Scaevola coriacea* is subject to potential collecting and vandalism due to the accessibility of its habitat and current unprotected status. The flowering plant is attractive, is easily propagated, and has been noted as being ". . . a worthwhile plant for homes by the beach" (Degener and Greenwell 1950).

C. *Disease or Predation.* No such threats to *Scaevola coriacea* are known to occur at this time.

D. *The inadequacy of existing regulatory mechanisms.* A special permit is required to land on Mokuho' oniki islet, a State bird sanctuary. No other protection is now provided to *Scaevola coriacea.*

E. *Other natural or manmade factors affecting its continued existence.* Further reductions of the breeding population may have adverse effects on the reproductive capacity and survival ability of this species (Carr 1981).

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to make this rule final. Based on this evaluation, the preferred action is to list *Scaevola coriacea* as endangered. The low number of individuals in the wild and the current loss of two-thirds of its remaining habitat warrant this decision. Critical habitat is not being designated at this time because of the reasons discussed below.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that to the maximum extent prudent and determinable, the Secretary designate critical habitat at the time a species is determined to be endangered or threatened. The Service finds that designation of critical habitat is not prudent for this species at this time. As discussed under Factor "B" in the "Summary of Factors Affecting the Species," *Scaevola coriacea* is potentially subject to collecting, an activity difficult to control and not regulated by the Endangered Species Act with respect to plants, except for a prohibition against removal and reduction to possession of endangered plants from lands under Federal jurisdiction. The plant currently occurs on State and private land outside Federal jurisdiction. Because publication of critical habitat descriptions would make this species more vulnerable to collecting and vandalism, without providing it with appreciable protection because of the lack of Federal involvement in the areas in which it occurs, there would be no net benefit to this species from such a designation.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individual. Section 6 of the Act details conditions for cooperative action between the Service and State agencies. Such actions include the establishment of conservation programs, acquisition of land, scientific research, and cooperative funding. The State of Hawaii has entered into a cooperative agreement with the Service. Since much of the remaining habitat of *Scaevola coriacea* occurs on State land, some of which is under county jurisdiction, cooperation among Federal, State, and county officials will be necessary to ensure the continued survival of the species. The protection required of Federal agencies and the prohibitions against collecting are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402 and are now under revision (see proposal at 48 FR 29990; June 29, 1983). Section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of a listed species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service. No Federal activities are known or expected to affect *Scaevola coriacea.*

The Act and its implementing regulations found at 50 CFR 17.61, 17.62, and 17.63 set forth a series of general trade prohibitions and exceptions that apply to all endangered plants. All trade prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.61, apply. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to import or export an endangered species of plant, transport it in interstate or foreign commerce in the course of a commercial activity, sell it or offer it for sale in interstate or foreign commerce, or remove it and reduce it to possession from areas under Federal jurisdiction. Certain exceptions can apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.62 and 17.63 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered species under certain circumstances. Cultivated specimens of *Scaevola coriacea* can be found at several sites in Hawaii, including the Maui Zoo and Botanical Garden and the courtyard of the Plant Science Building at the University of Hawaii. However, it is anticipated that few trade permits will ever be sought or issued since the species is not otherwise common in cultivation or in the wild. Requests for copies of the regulations on plants and inquiries regarding them may be addressed to the Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, D.C. 20240 (703/235–1903).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

BILLING CODE 4310–55–M

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Endangered Status for Chrysopsis Floridana (Florida Golden Aster)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Service determines a plant in the family Asteraceae (asters), *Chrysopsis floridana* (Florida golden aster), to be an endangered species pursuant to the Endangered Species Act of 1973 (Act), as amended. Critical habitat is not being designated. This plant is endemic to small areas of ancient dunes in Hillsborough, Manatee, and Pinellas Counties, Florida. All known colonies of the plant are on private property. *Chrysopsis floridana* is endangered by residential and commercial development of its habitat, and also by mowing, intense grazing, and heavy use of off-road vehicles. This action will implement Federal protection and recovery provisions afforded by the Act for this plant.

DATES: The effective date of this rule is June 16, 1986.

ADDRESSES: The complete file for this rule is available for inspection, by appointment, during normal business hours at the Service's Endangered Species Station Office, 2747 Art Museum Drive, Jacksonville, Florida 32207.

FOR FURTHER INFORMATION CONTACT: David J. Wesley, Endangered Species Field Supervisor, at the above address (904/791–2580 or FTS 946–2580).

SUPPLEMENTARY INFORMATION:

Background

Chrysopsis floridana was described by John K. Small in 1903 from specimens collected by S. M. Tracy at Bradenton, Manatee County, Florida, in 1901. Small subsequently collected the species at Long Key, Pinellas County, in 1921 (where it has since been extirpated), and in southern Hillsborough County in 1924. The species was not collected again until 1953. Since 1961, a number of collections have been made in southern Hillsborough County near Riverview and Ruskin. Specimens were collected west or Bradenton, Manatee County, in 1964, and in 1982 (Andre Clewell, pers. comm.) (this population was incorrectly described in the proposal as being east of Bradenton and extirpated). A population was discovered near Seminole, Pinellas County, in 1983 (R. Wunderlin and A. Burdett, pers. comm.). *Chrysopsis floridana* was included in a list of the plants of a State park in Highlands County, Florida but this report is not supported by a specimen and is almost certainly incorrect. All the known populations are on private land.

Several alternative taxonomic treatments have been proposed for *Chrysopsis floridana* and associated species. Fernald (1937) made *Chrysopsis floridana* a variety of *C. mariana*. Shinners (1951) merged the entire genus *Chrysopsis* into *Heterotheca;* Harms, in several publications, supported Shinners' view, and formally published the name *Heterotheca mariana* subspecies *floridana*. Long (1970), preferring to recognize this plant as a species, published the name *Heterotheca floridana*. In the 1970's Semple began an extensive program of taxonomic research on golden asters that resulted in the reinstatement of *Chrysopsis* as a genus. A floristic treatment of the aster family in the southeastern United States by Cronquist (1980) included *Chrysopsis floridana* in *C. scabrella*, while noting that "work in progress by John C. Semple may necessitate the revival of some names here reduced to synonomy." Semple's (1981) revision of the genus *Chrysopsis* recognized *C. floridana* as a full species.

Chrysopsis floridana is a perennial herb of the aster family. Young plants form rosettes with leaves that are covered with dense, white, short-wooly hairs. Upright stems that grow from the rosettes are 0.3–0.4 meters (1–1.5 feet) tall or taller, with closely-spaced, obovate-elliptic, hairy leaves. The leaves are nearly as large at the top of the stem as at the bottom. The flower heads are arranged in a more or less flat-topped cluster. Each head is slightly over 2.5 centimeters (1 inch) in diameter. Both the central disc and the rays are yellow. The plants grow in open, sunny areas in sand pine-evergreen oak scrub vegetation, on well-drained fine white sand. In the past, the plant also grew on beach dunes. The plant has been extirpated from much of its former range by urban development. The two largest remaining sites are in residential subdivisions where streets and utilities already exist, and where many houses have been built. Other threats are intense cattle grazing, railroad maintenance, and heavy off-road vehicle use (Wunderlin *et al.*, 1981).

Chrysopsis floridana was recognized as an endangered species by the Florida Committee on Rare and Endangered Plants and Animals in its 1979 publication on plants (Ward, 1979). In response to this project, the Service contracted for a status survey on this species by botanists from the University of South Florida. A preliminary status report was submitted in 1980 and a final report in 1981 (Wunderlin *et al.*, 1981).

Chrysopsis floridana was included as a category-1 species in a revised list of plants under review for threatened or endangered classification published in the December 15, 1980, Federal Register (45 FR 82480). Category 1 comprises taxa for which the Service presently has sufficient biological information to support their being proposed to be listed as endangered or threatened species.

The Endangered Species Act Amendments of 1982 required that all petitions pending as of October 13, 1982,

be treated as having been newly submitted on that date. The species listed in the December 15, 1980, notice of review were considered to be petitioned, and the deadline for a finding on those species, including *Chrysopsis floridana* was October 13, 1983. On October 13, 1983, and again on October 13, 1984, the petition finding was made that listing *Chrysopsis floridana* was warranted but precluded by other pending listing actions, in accordance with section 4(b)(3)(B)(iii) of the Act. Such a finding requires a recycling of the petition, pursuant to section 4(b)(3)(C)(i) of the Act. On August 5, 1985, the Service published a proposed rule in the **Federal Register** (50 FR 31629), to list *Chrysopsis floridana* as an endangered species, constituting the next required one year finding.

Summary of Comments and Recommendations

In the August 5, 1985, proposed rule (50 FR 31629) and associated notifications, all interested parties were requested to submit factual reports or information that might contribute to the development of a final rule. Appropriate State agencies, scientific organizations, and other interested parties were contacted and requested to comment. A newspaper notice was published in the *Tampa Tribune* on August 23, 1985, which invited general public comment. Eight written comments were received and are discussed below.

One State agency, The Florida Natural Areas Inventory; the Pinellas County Board of County Commissioners; two garden clubs; and two garden circles supported listing. A Florida botanist did not oppose the proposal to list *Chrysopsis floridana*, but questioned the prudence of listing this weedy looking plant, an action that might provoke residential developers. He said that he would rather see other species listed first, and also suggested that recovery action could be conducted without listing. The Service responds that the Act requires listing of species to be based on the best biological and commercial data available. The Service is proceeding to list *Chrysopsis floridana*, because an excellent new taxonomic revision of the genus was available, together with up to date information on its status, and its listing priority number (see listing priority guidelines, 48 FR 43098) is higher than other candidate plants which are awaiting listing. Recovery actions are organized by the Service after a species is listed as endangered or threatened.

Summary of Factors Affecting the Species

After a thorough review and consideration of all information available, the Service has determined that *Chrysopsis floridana* should be classified as an endangered species. Procedures found at section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations (50 CFR Part 424) promulgated to implement the listing provisions of the Act were followed. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to *Chrysopsis floridana* Small (Florida golden aster) [synonyms: *Chrysopsis mariana* (L.) Ell. var. *floridana* (Small) Fern., *Heterotheca mariana* subsp. *floridana* (Small) Harms, and *Heterotheca floridana* (Small) Long] are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* The historical range of the Florida golden aster is uncertain because new specimens were ever collected. The plant has been extirpated from most of the sites where it was collected prior to the 1970's, including Long Key (St. Petersburg Beach) and Bradenton Beach. A population reported from Manatee County in 1982 was in a "remnant sand pine scrub patch in an area that was rapidly becoming residential west of Bradenton" (Clewell, pers. comm., 1985). The Seminole area, in Pinellas County, is urban, with little or no possible habitat left for the golden aster. The five existing populations in southern Hillsborough County are all on well-drained sand soil with sand pine-evergreen oak scrub vegetation. The two largest populations are in residential subdivisions. The Florida golden aster is restricted to vacant lots, where it occupies areas of bare sand at the edges of remnants of scrub vegetation. Other populations are in scrub vegetation grazed by cattle, on an abandoned railroad embankment, and in a recently burned sand pine scrub area. At least 16 tracts of scrub vegetation near the existing populations lack *Chrysopsis floridana* (Wunderlin *et al.*, 1981). *Chrysopsis floridana* requires bare sand. Consequently, the plant benefits from limited disturbance (which can include fire, limited land clearing, grazing, and off-road vehicles), but may be destroyed by more intense, frequent, or extensive disturbance. Such disturbance, including dumping and intense off-road vehicle use, threatens the Florida golden aster. The plant does not tolerate mowing. The main threat to this plant is the loss of its habitat to residential construction as the urbanization of southern Hillsborough County progresses. The recent completion of Interstate Highway 75 from Tampa to Bradenton ensures rapid growth (Wunderlin *et al.*, 1981).

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* All populations of *Chrysopsis floridana* occur in areas that are easily accessible and near population centers. *Chrysopsis floridana* has been suggested for cultivation for planting on barrier island dunes. If such a demand develops, care will have to be taken to ensure that material is obtained from only cultivated sources (not from wild populations).

C. *Disease or predation.* Two populations found in pastures are subject to grazing by cattle. Light grazing may be beneficial or non-harmful to this species; however, heavy grazing with associated soil compaction and erosion would further threaten *Chrysopsis floridana*.

D. *The inadequacy of existing regulatory mechanisms. Chrysopsis floridana* is listed as endangered under the Preservation of Native Flora of Florida Act (Section 581.185–187, Florida Statutes), which regulates taking, transport, and the sale of plants, but does not provide habitat protection. The Hillsborough County Land Alteration and Landscaping Ordinance (Ordinance 85–29) provides limited protection to the plant's sand pine scrub habitat, but not to the plant itself. Federal listing augments these protections, and provides for development of a recovery plan for the species.

E. *Other natural or manmade factors affecting its continued existence.* Restriction to specialized habitats and small geographically limited ranges tend to intensify any adverse effects upon the populations or habitat of any rare plant. This is certainly true for *Chrysopsis floridana* and is further intensified by the loss of habitat that has already taken place.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to make this rule final. Based on this evaluation, the preferred action is to list *Chrysopsis floridana* as endangered. The very limited habitat and range of this plant render it highly vulnerable to residential and commercial real estate development. All the populations are on private land. Several sites where they formerly occurred have been lost and

the species is in danger of extinction. Critical habitat is not being designated for the reasons discussed in the next section.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that to the maximum extent prudent and determinable, the Secretary designate any habitat of a species, which is considered to be critical habitat, at the time the species is determined to be endangered or threatened. The Service finds that designation of critical habitat is not prudent for *Chrysopsis floridana* at this time. Such designation would not be beneficial to *Chrysopsis floridana* since identification of critical habitat with maps and precise localities, several of them in residential neighborhoods, would increase the degree of threat from taking or vandalism. All populations of this plant occur in easily accessible sites in heavily populated areas. Appropriate landowners, county and State agencies, and Federal agencies (should any become involved in the future) will be notified of the locations of this plant and the Service will work towards protection of the sites during the recovery process. No additional notification benefits would accrue from designating critical habitat.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. Such actions are initiated by the Service following listing. The protection required of Federal agencies and the prohibitions against taking are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402 and are now under revision (see proposal at 48 FR 29990; June 29, 1983). Section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of a listed species or destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service. Since all presently known sites for *Chrysopsis floridana* are on private land where no Federal involvement is currently known, there will be no effect on Federal agencies from the above requirements unless the project requires a Federal permit or approval.

The Act and its implementing regulations found at 50 CFR 17.61, 17.62, and 17.63 set forth a series of general trade prohibitions and exceptions that apply to all endangered plants. All trade prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.61, apply. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to import or export, transport in interstate or foreign commerce in the course of a commercial activity, sell or offer for sale this species in interstate or foreign commerce, or to remove and reduce to possession the species from areas under Federal jurisdiction. Certain exceptions can apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.62 and 17.63 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered species under certain circumstances. It is anticipated that few trade permits will be sought or issued since this species is not common in cultivation or in the wild. *Chrysopsis floridana* might be cultivated in the future for planting on barrier island dunes. *Chrysopsis floridana* is not known at present on Federal lands, so requests for collection permits are not anticipated. Requests for copies of the regulations on plants and inquiries regarding them may be addressed to the Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, DC 20240 (703/235–1903).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the Federal Register on October 25, 1983 (48 FR 49244).

BILLING CODE 4310-55-M

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Determination of Endangered Status for Eight Foreign Mammals, Leadbeater's Possum, etc.

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Service determines endangered status for eight foreign mammals: Leadbeater's possum, buffy tufted-ear marmoset, southern bearded saki, large-earned hutia, little earth hutia, dwarf hutia, Cabrera's hutia, and Baluchistan bear. All occupy very restricted ranges and are jeopardized by human habitat disruption and/or direct killing. This rule implements the protection of the Endangered Species Act of 1973, as amended, for these eight mammals.

EFFECTIVE DATE: The effective date of this rule is June 16, 1986.

ADDRESS: The complete file for this rule is available for public inspection, by appointment, during normal business hours at the Service's Office of Endangered Species, Suite 500, Broyhill Building, 1000 N. Glebe Road, Arlington, Virginia.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Spinks, Jr., Chief, Office of Endangered Species, U.S. Fish and Wildlife Service, Washington, DC 20240 (703/235-2771 or FTS 235-2771).

SUPPLEMENTARY INFORMATION:

Background

Whenever practical, and if there is no substantial evidence to the contrary, the Service classifies foreign mammals as endangered, pursuant to the Endangered Species Act of 1973, as amended, if such mammals are so classified in the *Red Data Books* of the International Union for Conservation of Nature and Natural Resources (IUCN). These books result from research by the IUCN Conservation Monitoring Centre in the United Kingdom, which draws upon authorities from around the world for the latest and best data on the bioconservation status of mammals. The Service and IUCN classifications are now almost in general accord, but in the most recent editions of the *Red Data Books* covering mammals (Thornback 1978, Thornback and Jenkins 1982), the following eight taxa, which were not hitherto on the U.S. List of Endangered and Threatened Wildlife, are categorized as endangered by the IUCN:

Leadbeater's possum (*Gymnobelideus leadbeateri* McCoy, 1867), a marsupial, about 150 millimeters (mm) (6 inches (in.)) in head and body length, with a tail about 200 mm (8 in.) long and flattened laterally, arboreal and nocturnal, and found in the wet forests of southeastern Australia (Nowak and Paradiso 1983);

Buffy tufted-ear marmoset (*Callithrix jacchus aurita* (E. Geoffroy, 1812), considered a full species, *C. aurita,* by IUCN), a small primate, less than 300 mm (12 in.) in head and body length and 400 mm (15 in.) in tail length, characterized by white ear tufts and black head markings, arboreal, and found in forests along the southeastern coast of Brazil (Nowak and Paradiso 1983);

Southern bearded saki (*Chiropotes satanas satanas* (Hoffmannsegg, 1807)), a primate, 360 to 520 mm (14 to 20 in.) in head and body length, with a bushy tail of about the same length, dark in color, and found in the tropical forests of Amazonian Brazil (Nowak and Paradiso 1983, Thornback and Jenkins 1982);

Large-eared hutia (*Capromys auritus* Varona, 1970), a large rodent, about 300 mm (12 in.) in head and body length, with a tail about 180 mm (7 in.) long, having harsh brown fur, arboreal, and found only in a mangrove swamp on Cayo Fragoso, an island off north-central Cuba (Hall 1981, Thornback and Jenkins 1982);

Little earth hutia (*Capromys sanfelipensis* Varona, 1970), a rodent similar to the large-eared hutia, but having a mostly reddish tail, and found in an area of low and dense vegetation on Cayo Juan Garcia off southwestern Cuba (Hall 1971, Thornback and Jenkins 1982);

Dwarf hutia (*Capromys nana* G.M. Allen, 1917), a somewhat smaller rodent that the above, about 200 mm (8 in.) in head and body length and 175 mm (7 in.) in tail length, generally reddish agouti in color, and found only in the Zapata Swamp, about 100 kilometers (62 miles) southeast of Havana, Cuba (Hall 1981, Thornback and Jenkins 1982);

Cabrera's hutia (*Capromys angelcabrerai* Varona, 1979), a rodent similar to the dwarf hutia, but having a relatively shorter tail, and found only on the Cayos de Ana Maria off south-central Cuba (Varona 1979); and

Baluchistan bear (*Ursus thibetanus gedrosianus* Blanford, 1877, considered by some authorities to belong to a separate genus, *Selenarctos*), a small subspecies of the Asiatic black bear, generally reddish brown in color, usually with a pale breast mark, and now found in the mountains of southern Pakistan and possibly southeastern Iran (Macey 1982).

Available data indicate that each of the above mammals qualifies for classification as endangered, pursuant to the Endangered Species Act. Several appear to be on the verge of extinction. As explained below, the main problems are thought to be habitat destruction and direct killing by people. In the **Federal Register** of October 25, 1985 (50 FR 43420-43423), the Service proposed to determine endangered status for each of these mammals. The proposal requested comments and information that might contribute to development of a final rule. Notifications also were sent to the governments of the nations in which the mammals occur. Only two responses were received, both supportive.

Summary of Factors Affecting the Species

After a through review and consideration of all information available, the Service has determined that the eight mammals named above should be classified as endangered. Procedures found at section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations (50 CFR Part 424) promulgated to implement the listing provisions of the Act were followed. A species may be determined to be endangered or threatened due to one or more of the five factors described in section 4(a)(1). These factors, and their application to the eight mammals named above, are as follows

(information from Thornback 1978, and Thornback and Jenkins 1982, unless otherwise noted):

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* Most of the named mammals have naturally restricted ranges and are dependent on specific kinds of habitat. In some cases, their ranges have been substantially reduced because of human habitat disruption.

Leadbeater's possum is known only from a small area of southeastern Victoria, the southeasternmost state of mainland Australia. It was believed extinct after 1909, but was rediscovered in 1961. It apparently requires mature montane forest, with mountain ash trees over 150 years old and containing hollows that are used for construction of nests. Many such trees were killed by fires in the 1930's and are no longer usable by the possum. Most of the known remaining range of the species is in areas scheduled for logging.

The buffy tufted-ear marmoset has an extremely small range in a region along the southeastern coast of Brazil comprising southeastern Sao Paulo, western Rio de Janeiro, and adjacent parts of Minas Gerais. It is entirely dependent on forest habitat, nearly all of which has already been cleared for agricultural, lumbering, and industrial purposes.

The southern bearded saki occurs to the south of the Amazon River in east-central Brazil. It depends on tropical rain forest and seems to be partial to undisturbed habitat. Its range has a large human population and is being rapidly developed. This mammal thus has disappeared from many areas.

The large-eared hutia was not discovered until 1970 and is known only from one area of mangrove swamp on Cayo Fragoso, an island off north-central Cuba. The population is thought to be very small and vulnerable.

The little earth hutia was also discovered in 1970 and has been recorded only from Juan Garcia Cay, a very small island off southwestern Cuba. It may also occur on the nearby and larger Cayo Real. It is thought to be uncommon and was not located at all during an expedition to Juan Garcia Cay in 1980.

The dwarf hutia is currently confined to the Zapata Swamp southeast of Havana. Fossil remains, however, indicate that it once occurred over a much larger part of Cuba. Agricultural development is a potential threat to its small remaining habitat.

Cabrera's hutia was discovered only in 1974 and has not been located since 1975. It is apparently confined to mangrove swamps on a few small islands in the Cayos de Ana Maria of south-central Cuba. Current numbers are unknown but are thought to be very low.

The Baluchistan bear originally occurred almost throughout the mountainous parts of what is now the nation of Pakistan. It currently appears confined to a relatively small area in the south-central part of the nation, but may also occur in adjacent parts of southeastern Iran. It is evidently rare, with perhaps fewer than 200 individuals surviving. Most of its original forest habitat has been eliminated. According to Roberts (1977), forest clearing opens areas to human utilization and thus leads to increased killing of the bear.

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* At present, overutilization is not reported to be a problem for Leadbeater's possum or the buffy tufted-ear marmoset. However, any commercial use of the marmoset would be disastrous, considering its low population levels, and primates historically have been heavily exploited for commercial and scientific purposes. The tail of the southern bearded saki is used as a duster, and was being commonly sold in the city of Belem, Brazil, in 1978.

The main threat to the large-eared, little earth, and Cabrera's hutias is reportedly taking for use as food by fishermen and other persons who visit the small islands where the animals live. The hutias are sometimes driven into the water, where they are slow and clumsy, and thus easily captured. The dwarf hutia is also probably taken by fishermen who visit its swamp habitat.

The Baluchistan bear has declined drastically since the 1930's because of killing by people. It is regarded as vermin and is regularly killed by local farmers, who claim that it damages millet and sorghum crops, and attacks domestic sheep and goats.

C. *Disease or predation.* The buffy tufted-ear marmoset may have disappeared from two national parks in Brazil because of epidemics. Otherwise, disease and nonhuman predation have not been reported as problems for the eight species covered by this rule.

D. *The inadequacy of existing regulatory mechanisms.* Leadbeater's possum is protected against taking by the laws of Victoria, but only some parts of its habitat are being managed with consideration of its welfare. The buffy tufted-ear marmoset and southern bearded saki are not fully protected by law in Brazil. The habitat of both primates is not protected, except in a few relatively small parks and preserves. According to information available to the Service, all hutias are legally protected in Cuba from hunting activities, but enforcement is difficult. The Baluchistan bear is not known to be protected by law.

E. *Other natural or manmade factors affecting its continued existence.* All eight mammals covered by this rule occur in such small numbers that inbreeding and loss of genetic viability could be a problem.

The decision to determine endangered status for the eight mammals named above was based on an assessment of the best available scientific information, and of past, present, and probable future threats to the species. A decision to take no action would constitute failure to properly classify these mammals pursuant to the Endangered Species Act and would exclude these species from benefits provided by the Act. A decision to determine only threatened status would not adequately reflect the evident rarity and multiplicity of problems of the various species. Critical habitat is not being designated, as it is not applicable to foreign species.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened pursuant to the Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages conservation measures by Federal, international, and private agencies, groups, and individuals.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened, and with respect to critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR 402, and are now under revision (see proposal in the **Federal Register** of June 29, 1983, 48 FR 29990). Section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of a listed species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into consultation with the Service. However, an opinion of August 31, 1981, from the Office of the Solicitor, U.S. Department of the Interior, indicates that the jeopardy prohibition of section 7(a)(2) does not apply to

activities occurring within foreign countries.

Section 8(a) of the Act authorizes the provision of limited financial assistance for the development and management of programs that the Secretary of the Interior determines to be necessary or useful for the conservation of endangered species in foreign countries. Sections 8(b) and 8(c) of the Act authorize the Secretary to encourage conservation programs for foreign endangered species, and to provide assistance for such programs, in the form of personnel and the training of personnel.

The Act and implementing regulations found at 50 CFR 17.21 set forth a series of general prohibitions and exceptions that apply to all endangered wildlife. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to take, import or export, ship in interstate commerce in the course of commercial activity, or sell or offer for sale in interstate or foreign commerce any endangered wildlife. It is also illegal to possess, sell, deliver, transport, or ship any such wildlife that has been taken in violation of the Act. Certain exceptions apply to agents of the Service and State conservation agencies.

Permits may be issued to carry out otherwise prohibited activities involving endangered wildlife under certain circumstances. Regulations governing permits are codified at 50 CFR 17.22 and 17.23. Such permits are available for scientific purposes, to enhance propagation or survival, or for incidental take in connection with otherwise lawful activities. In some instances, permits may be issued during a specified period of time to relieve undue economic hardship that would be suffered if such relief were not available.

The buffy tufted-ear marmoset and the Baluchistan bear are on Appendix I of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), meaning that their importation into the U.S. requires both an export permit from the country of origin and an import permit from the U.S. Management Authority for CITES. The southern bearded saki is on Appendix II of CITES, meaning that importation into the U.S. requires an export permit from the country of origin. International trade in these three species, and the other five that are covered by this rule, is expected to be minimal. The Service will review all of these species to determine whether any of them should be placed on the Annex of the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere, which is implemented through section 8A(e) of the Act, and whether they should be considered for other appropriate international agreements.

National Environmental Policy Act

The Service has determined that an Environmental Assessment, as defined under authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** of October 25, 1983 (48 FR 49244).

BILLING CODE 4310-55-M

50 CFR Part 18

Marine Mammals

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Service amends Part 18 to incorporate amendments to the Marine Mammal Protection Act of 1972 and update organizational nomenclature. The revisions affect those sections of Part 18 where the regulations paraphrase the wording in the Act. Also changed are the references to terms, such as "Bureau" and "Area Director," which are no longer used in the Service's organization. These amendments eliminate inconsistencies with the law and avoid reader confusion.

DATE: These changes are effective June 16, 1986.

ADDRESS: Questions may be forwarded to Chief, Division of Wildlife Management, Room 514 Matomic, U.S. Fish and Wildlife Service, Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: LeRoy Sowl, Chief, Division of Wildlife Management, address above, telephone (202)-632-2202.

SUPPLEMENTARY INFORMATION: The Marine Mammal Protection Act (MMPA or Act) was enacted in 1972, and the Fish and Wildlife Service has implemented the Act, as amended, by regulations contained in 50 CFR Parts 18, 82 and 403. The MMPA was enacted for the purpose of ensuring that marine mammals are maintained at healthy population levels. In passing the Act, Congress responded to the growing concern regarding the decline of certain marine mammal species and recognized the important role that marine mammals play in the ecosystem as well as their economic, aesthetic and recreational value. Under the MMPA the Department of the Interior is charged with responsibility for polar bears, walruses, sea and marine otters, manatees and dugongs. On October 9, 1981, Congress amended the MMPA with the passage of Pub. L. 97-58.

On July 29, 1983, the Service published a notice in the **Federal Register** (48 FR 34486) that described the various changes made by Pub. L. 97-58. On December 23, 1985, the Service published a proposed rule (50 FR 52348) that proposed revisions to 50 CFR Part 18. While regulatory measures addressing marking and tagging of marine mammal parts and incidental take by commercial fishermen will be addressed in separate rulemaking documents, this action contains changes necessary to remove inconsistencies with the legislative amendments, and corrects several outdated organizational terms. The changes being adopted are described below:

1. Section 18.11 is amended to include a citation to 50 CFR Part 403, the joint regulations issued by the Service and the National Marine Fisheries Service concerning transfer of marine mammal management authority to States. Such reference paraphrases the wording of 16 U.S.C. 1372(a), which was amended by Pub. L. 97-58 to include reference to the transfer of management authority provisions.

2. Section 18.13 paraphrases 16 U.S.C. 1372(a), which was changed by the 1981 MMPA amendments (see section 3 of Pub. L. 97-58) by replacing paragraph (a)(3) with new paragraphs (a) (3) and (4), and redesignating former paragraph (a)(4) as (a)(5). Section 18.13 (b) and (c) of Title 50, CFR are revised to make them consistent with the present wording of the law.

3. Section 18.14(c) is updated by replacing the term "Bureau" with "Service." The "Bureau" term referred to the Service's former name, Bureau of Sport Fisheries and Wildlife.

4. Section 18.22 paraphrases 16 U.S.C. 1379(h), which was revised by Pub. L. 97-58, section 4, by adding Federal employees to the officials that may "take" marine mammals in the course of official duties. Section 18.22 is amended to reflect this statutory change. Section 18.22(b) is also amended by replacing the term "Bureau" with "Service," for the same reason as described in item 3, above.

5. Section 18.23 is amended by changing the section title, introductory sentence, and paragraph (a)(1). The revision removes the inconsistencies with 16 U.S.C. 1371(b), which is paraphrased by § 18.23(a). These changes are the product of Pub. L. 97-58, section 2. The two references in the section to the Alaska Area Director are changed to reflect the position's current title of regional director.

6. Section 18.26 is amended by replacing the term "Bureau of Sport Fisheries and Wildlife" with "Service" for the reasons set forth under 3, above.

The Service received one letter of comment concerning the proposed rules from the Marine Mammal Commission. The Commission supported the proposed changes with modifications which are discussed below.

1. In § 18.13, the Commission recommends removal of the phrase "subject to the jurisdiction of the United States" from paragraph (b) and (c). The comparable provisions of the Act do not contain such wording, and, therefore, the Commission believes that such deletion will conform § 18.13 to the wording in the Act and eliminate any potential confusion.

2. In § 18.23, the Commission recommends revising the wording in paragraph (a) to specifically include the provision contained in section 101(b) of

the Act that addresses applicability of State regulations to Alaskan Natives pursuant to the provisions of section 109 of the Act. The Commission also commented that the Service should retain the language "Indian, Aleut, or Eskimo" instead of "Alaskan Native." Although both terms have the same meaning (see 50 CFR 18.3), the Commission believes that the more descriptive term would conform the wording of this section with the language contained in the Act and would, therefore, "eliminate the potential for confusion."

The Service agrees with the comments proffered by the Commission and has made appropriate changes in the final rule to implement these comments.

As noted above, these amendments to Part 18 remove inconsistencies with the MMPA in these areas where the law has been amended. These changes are necessary to conform existing regulations to the law. The Department of the Interior has determined that this document is not a major rule under E.O. 12291 and certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) Similarly, the Service determines that, since the regulatory amendments reflect the statutory language, an environmental assessment, as defined under authority of the National Environmental Policy Act of 1969, need not be prepared for this action. There are no impacts on the public other than to remove any confusion created by the lack of consistent wording contained in the regulations and the law. Additionally, there are no information collection requirements contained in this document that require Office of Management and Budget clearance under 44 U.S.C. 3501. The primary authors of this document are Rupert R. Bonner and James E. Pinkerton of the Fish and Wildlife Service.

List of Subjects in 50 CFR Part 18

Administrative practice and procedure, Alaska, Imports, Marine mammals, Transportation.

PART 18—[AMENDED]

Accordingly, 50 CFR Part 18 is amended as described below:

1. The authority citation for Part 18 continues to read as follows:

Authority: Marine Mammal Protection Act of 1972, as amended (Pub. L. 92–522, 86 Stat. 1027; Pub. L. 97–58, 95 Stat. 979 (16 U.S.C. 1361–1407).

2. Section 18.11 is amended by revising the introductory text to read as follows:

§ 18.11 Prohibited taking.

Except as otherwise provided in Subpart C, D, or H of this Part 18, or Part 403, it is unlawful for:

* * * * *

3. Section 18.13 is amended by redesignating paragraph (c) as (d), revising paragraph (b) and adding a new paragraph (c) to read as follows:

§ 18.13 Prohibited uses, possession, transportation, and sales.

* * * * *

(b) Any person to possess any marine mammal, or product therefrom, taken in violation of the Act or these regulations;

(c) Any person to transport, purchase, sell, or offer to purchase or sell any marine mammal or marine mammal product; or

* * * * *

§ 18.14 [Amended]

4. Section 18.14(c) is amended by replacing the term "Bureau" with "Service."

5. Section 18.22 is amended by revising the section title, and amending paragraph (a), by inserting "Federal," before the term "State."

§ 18.22 Taking by Federal, State or local government officials.

6. The flush paragraph appearing after paragraph (b)(6) of § 18.22 is amended by replacing the term "Bureau of Sport Fisheries and Wildlife" with the term "U.S. Fish and Wildlife Service."

7. Section 18.23 is amended by revising the section title, introductory paragraph (a), and paragraph (a)(1) to read as follows:

§ 18.23 Native exemptions.

(a) *Taking.* Except as otherwise provided in Part 403 of this Title, any Indian, Aleut, or Eskimo who resides in Alaska and who dwells on the coast of the North Pacific Ocean or the Arctic Ocean may take any marine mammal without a permit, subject to the restrictions contained in this section, if such taking is:

(1) For subsistence purposes, or

* * * * *

8. Section 18.23 is further amended in introductory paragraph (b) and paragraph (b)(2) by replacing the term "Alaska Area" with "Regional" both times it appears in this section.

§ 18.26 [Amended]

9. Section 18.26(b) is amended by replacing the term "Bureau of Sport Fisheries and Wildlife" with the term "U.S. Fish and Wildlife Service."

Dated: April 8, 1986.

Susan Recce,

Acting Assistant Secretary for Fish and Wildlife and Parks.

BILLING CODE 4310–55–M

Proposed Rules

Federal Register
Vol. 51, No. 95
Friday, May 16, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1097

[Docket No. AO-219-A43]

Milk in the Memphis, Tennessee Marketing Area; Emergency Decision on Proposed Amendments To Marketing Agreement and To Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This decision adopts, on an emergency basis, amendments to the plant location adjustment provisions of the Memphis, Tennessee order. The changes are based on evidence presented at a public hearing on March 4–7, 1986, in Irving, Texas. The hearing proceeding included proposed amendments to Texas and six other southwestern orders. However, this decision deals only with the Memphis order. Action on proposed amendments to the other six orders will follow.

The changes adopted herein essentially were proposed by two cooperative associations and the operator of a fluid milk plant that is regulated under the order. The changes are needed to align prices among Federal order markets after May 1, 1986, when the Class I differentials mandated by the Food Security Act of 1985 became effective. Because of the limited time available to complete the rulemaking procedures, a recommended decision for the Memphis market and the opportunity to file exceptions thereto have been omitted. The amended order must be approved by the market's dairy farmers to become effective. A referendum will be conducted to determine whether producers favor issuance of the amended order.

FOR FURTHER INFORMATION CONTACT: John F. Borovies, Marketing Specialist, Dairy Division, Agricultural Marketing Service, United States Department of Agriculture, Washington, DC 20250, (202) 447–2089.

SUPPLEMENTARY INFORMATION: This administrative action is governed by the provisions of sections 556 and 557 of Title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Order 12291.

The Regulatory Flexibility Act (5 U.S.C. 601–12) requires the agency to examine the impact of a proposed rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities. The action reflects changes in economic conditions that have occurred in the marketplace as a result of the changes to Class I differentials mandated by the Food Security Act of 1985 and increases in the cost of hauling milk that were recognized in those changes. The amended order recognizes these current economic and marketing conditions that affect producers and handlers and its implementation will not cause any additional significant impact on such producers and handlers.

Prior document in this proceeding:

Notice of Hearing: Issued February 14, 1986; published February 21, 1986 (51 FR 6250).

Preliminary Statement

A public hearing was held upon proposed amendments to the marketing agreement and the order regulating the handling of milk in the Memphis, Tennessee marketing area. The hearing was held, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice (7 CFR Part 900), at Irving, Texas, on March 4–7, 1986. Notice of such hearing was issued on February 14, 1986 and published February 21, 1986 (51 FR 6250).

Proposals to amend the location adjustment provisions of Texas and six other Federal orders were involved in the hearing proceeding (Docket No. AO–231–A54 *et al.*). This emergency final decision deals only with proposed amendments to the Memphis, Tennessee milk order (Docket No. AO–219–A43). Action with respect to proposed amendments for the other six orders will follow.

Interested parties were given until March 25, 1986, to file post-hearing briefs on the proposed amendments to the Memphis order as published in the hearing notice and on whether these proposals should be considered on an expedited basis.

The material issues on the record of the hearing relate to:

1. Plant location adjustments for handlers under the Memphis, Tennessee order.
2. Need for emergency action.

Findings and Conclusions

The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. *Plant location adjustments for handlers under the Memphis, Tennessee order.* The location adjustment provisions of the Memphis order should be amended so that the value of producer milk at various plants will be aligned on an intra-market and inter-market basis to reflect the Class I differentials mandated by the Food Security Act of 1985 that became effective on May 1, 1986.

The 1985 Act increases Class I price differentials under 35 of the 44 milk orders. The amount of increase differs among markets, but the Act establishes progressively greater amounts from northern markets to southern markets. Increases range from 18 cents to $1.00 per hundredweight for those orders that regulate plants that distribute Class I milk in the Memphis marketing area. Plants located in six surrounding order marketing areas compete with Memphis handlers for sales of fluid milk products in the Memphis marketing area. The Class I differential increases under these seven orders are as follows: Greater Kansas City, 18 cents; Southern Illinois, 39 cents; Nashville, 67 cents; Paducah, 69 cents; Central Arkansas, 83 cents; Memphis, 83 cents; and New Orleans-Mississippi, $1.00.

Generally, a fluid milk distributing plant is regulated under the Federal order where the plant has the greater proportion of its fluid milk distribution and the milk is priced at the location of the plant where the milk is received from producers. For example, a distributing plant located in the Nashville marketing area is fully regulated under the Memphis order since a greater proportion of its fluid

milk distribution is made in the Memphis marketing area than in any other Federal order marketing area. Because of this circumstance, the plant procures its milk supply in competition with other plants regulated under the Nashville order and sells much of its Class I milk in competition with Nashville handlers. Potentially, other plants located in other marketing areas could become regulated under the Memphis order. In recognition of the competitive milk procurement and sales situation for plants located in or near other Federal order areas, the Memphis order has provided for location adjustments to the applicable Class I and uniform prices that recognize the Federal order pricing structure in surrounding markets. Since the inter-market Class I price structure has been changed by the Class I differentials mandated by the Food Security Act of 1985, the plant location adjustments under the Memphis order should be modified to realign prices under the Memphis order with prices that will apply in neighboring markets.

The changes adopted herein are essentially those proposed jointly by two dairy farmer cooperatives (Associated Milk Producers, Inc. and Mid-America Dairymen, Inc.). The operator of a fluid milk plant that is located in Nashville, Tennessee and regulated under the Memphis order supported the cooperative's proposed location pricing arrangement and specifically testified in favor of the proposed pricing change at Nashville under the Memphis order.

This proposed rule, if adopted, would revise the plant location adjustment provisions of the Memphis order to recognize the location value of milk in a three-state area of Tennessee, Mississippi and Arkansas that surrounds the Memphis market. The amended order would provide a minus 25-cent adjustment for plants in Tennessee that are more than 50 miles from Memphis, a plus 13-cent adjustment for plants in a nine-county area of northern Mississippi, and zone pricing adjustments for plants in Arkansas. The zones in Arkansas would provide no adjustment in central Arkansas, a minus 22-cent adjustment in northern Arkansas, and a plus 31-cent adjustment in southern Arkansas. Also, the rate for determining location adjustments at distant plants would be increased from 1.5 cents to 2.1 cents per 10 miles to provide closer alignment of Class I prices at plants located in other markets. There was only limited opposition to the proposed changes. Such opposition primarily was related to the proposed changes for another market involved in this proceeding.

There are currently five fluid milk plants that are fully regulated under the Memphis order. Three of the five plants (Dean, Loftin and Turner) are located within 50 miles of Memphis where historically a location adjustment has not been applicable under the order. No adjustment for location would apply at such plants under the order as amended. Thus, the competitive Class I price relationships among these three handlers would be unchanged. The Class I differential of $2.77 mandated for the Memphis market by the Food Security Act of 1985 applies at these three plants.

Another of the five fluid milk plants regulated under the Memphis order the plant of Malone & Hyde, is located in downtown Nashville. As proposed by the plant operator and proponent cooperatives, a minus 25-cent location adjustment would apply for milk received at plants in Tennessee that are located more than 50 miles from Memphis. Such adjustment will maintain the existing pricing policy for such plants because the location adjustment equals the difference between the Nashville order Class I differential and the Memphis order Class I differential. A minus 25-cent adjustment under the Memphis order for plants in Tennessee located more than 50 miles from Memphis results in an adjusted Class I differential of $2.52 at Nashville. That is the same Class I differential mandated for the Nashville order by the Food Security Act of 1985.

The other fluid milk plant (Avents Dairy) that is fully regulated under the Memphis order is located at Oxford, Mississippi, in Lafayette County. The hearing notice proposal of the cooperatives provided that a plus 18-cent location adjustment (or an adjusted Class I differential of $2.95) apply under the Memphis order at plants located in a nine-county area across northern Mississippi. Proponents modified their proposal at the hearing and proposed that one of the nine counties (Lafayette County where the Oxford, Mississippi plant is located) be removed from the plus 18-cent zone and that a plus 13-cent location adjustment apply at plants in that county only. Proponents' spokesman testified that this modification is needed to coordinate Class I pricing in northern Mississippi under the New Orleans-Mississippi and Memphis orders and specifically to equate the Class I differential adjusted for location under the Memphis order effective at the plant of Avents Dairy in Oxford, Mississippi in Lafayette County with the $2.90 Class I differential proposed for northern Mississippi under the New Orleans-Mississippi order.

As modified, however, under the Memphis order a plant located at Tupelo, Mississippi that distributes milk throughout northern Mississippi would have a five-cent higher Class I price than a plant located at Oxford, Mississippi. To further accomplish proponents' stated intentions of aligning Class I prices in northern Mississippi under the two orders, the plus 13-cent location adjustment zone of the Memphis order should include all nine counties originally proposed for inclusion in the plus 18-cent zone. By providing this, the same $2.90 Class I differential would apply at all plants located in the nine-county area across northern Mississippi which includes both Tupelo and Oxford, Mississippi. Such a coordinated location pricing arrangement for northern Mississippi will provide equity among handlers competing in that area.

Also, a uniform price zone for the nine-county area that constitutes an east-west band across northern Mississippi will establish price alignment under the orders on the same east-west basis as was provided by the Food Security Act of 1985 through the mandated Class I differentials for Federal order markets. For instance, the same $2.77 Class I differential was provided for the Tennessee Valley, Central Arkansas, Fort Smith and Southwest Plains orders. By providing that the same Class I prices apply at Memphis and Chattanooga, which are both located on the southern border of Tennessee, it has been established that prices are to be aligned on an east-west axis in this area of the country.

The plants at Oxford and Tupelo are located essentially the same distance from the southern boundary of Tennessee. Accordingly, it is consistent with the mandated differentials to adopt an equal price zone on an east-west axis across northern Mississippi. The 13-cent plus adjustment proposed for this zone under the Memphis order is essentially the same amount as the 12-cent plus adjustment now applicable at the Oxford plant based on its distance from Memphis under the order's current location adjustment provisions.

Additionally, the Oxford plant is located about 40 miles south of the fully regulated plant at Red Banks, Mississippi, which is within 50 miles of Memphis and no location adjustment applies. The 13-cent higher price proposed for the Oxford plant represents a rate of about 3 cents per 10 miles distance between the two plants.

Such a rate approaches the full cost that may be associated with distance in moving milk. Thus, it would be inappropriate to provide the higher 18-cent plus location adjustment at Oxford as originally proposed, because the Oxford plant would be at a disadvantage in competing with the plant at Red Banks for Class I sales in northern Mississippi.

The location adjustment provisions of the Memphis order have provided that no location adjustment apply in a large number of counties in central Arkansas, since the Class I differentials under the central Arkansas and Memphis orders are identical. Differentials for Class I milk under both orders are now $2.77. Accordingly, the no location adjustment policy now applicable under the Memphis order for territory in central Arkansas should be continued and the 40-county area in central Arkansas where the cooperatives proposed that no location adjustment be applied should be adopted.

Proponents proposed a plus 31-cent location adjustment zone under the Memphis order for territory in southern Arkansas. This territory is situated about 200 miles southwest of Memphis and is located adjacent to and north of the Greater Louisiana marketing area where a $3.28 Class I differential was mandated. The 51-cent higher differential at Shreveport, which is in the base pricing zone of that market, represents an increasing value of milk in that direction from Memphis at the rate of 1.5 cents per 10 miles. Thus, the proposed 31-cent plus location adjustment zone in the intervening territory between the two markets in southern Arkansas adequately reflects the 1.5 cents per 10 miles rate that the mandated differentials for such orders represent. By so doing, it will provide proper alignment of prices in that area between the Memphis order and other nearby orders.

The only other specific pricing zone proposed for the Memphis order is the territory in northern Arkansas that is north of the no location adjustment zone in central Arkansas. A fluid milk plant located in northern Arkansas at Paragould and regulated under the Central Arkansas order has some fluid milk distribution in the Memphis marketing area. The current location adjustment provisions of the Memphis order would provide for a minus location adjustment of 16.5 cents at Paragould, since the plant is about 100 miles from Memphis.

Proponents proposed that a minus 22-cent location adjustment apply in the northern Arkansas zone. This is essentially the same adjustment that would apply at Paragould if the plant's adjustment were computed on the basis of the 2.1 cents per 10-miles rate that is proposed for plant locations in all territory not otherwise specifically zoned under the order.

The higher 2.1 cents per 10-miles rate for plants outside any zone was proposed to more nearly reflect under the order the current cost associated with distance in transporting milk. Also, it serves the purpose of providing inter-market price alignment in situations where plants in distant areas may become regulated udner the order. The record indicates that the current cost of hauling milk is more than twice the 1.5 cents per 10-miles rate now used to compute location adjustments under the order. However, the use of such a rate would result in adjusting prices more than is necessary to provide alignment of prices on an inter-market basis under the price structure mandated through the Class I differentials that became effective on May 1, 1986.

No location adjustments are needed to align prices in this region on an east-west axis, since the mandated Class I differentials are idential along a line extending from Oklahoma City to Chattanooga. On a strictly north-south axis, the mandated differentials reflect up to 3 cents per 10-miles distance. For example, the $3.85 Class I differential at New Orleans exceeds the Memphis Class I differential by a rate of about 3 cents per 10-miles. To the north, the Class I price at a plant in Fulton, Kentucky, which is regulated under the Paducah order and distributes fluid milk products in the Memphis marketing area, is below the Memphis Class I price by 3 cents per 10-miles distance also. Similarly, for plants regulated under the Southern Illinois order that have sales in the Memphis market, the difference in Class I prices reflects a rate of about 2.7 cents per 10-miles distance.

For markets located off of a straight north-south axis from Memphis the differences in Class I differentials would reflect a somewhat lesser rate than those centered directly on the north-south axis. For example, to the northwest in the direction of the Greater Kansas City order, which regulates a handler who has Class I sales in the Memphis market, the Class I differentials between the Memphis and Kansas City markets reflects a rate of 1.9 cents per 10 miles.

In view of the variation in rates between markets, no single location adjustment rate will provide exact price alignment in areas that are not specifically zoned. The proposed rate of 2.1 cents per 10-miles falls within the range of rates that would provide reasonable inter-market price alignment at distant locations.

The only opposition to the proposed changes in the location adjustment provisions for the Memphis market was presented by the operator of a distributing plant at Paragould, Arkansas. The handler's primary concern was that the proposed order amendments would adversely impact the Paragould plant's competitive position in the marketplace. The handler contents that the location adjustment at Paragould under both the Memphis, Tennessee and Central Arkansas orders be minus 34 cents rather than minus 22 cents.

The Paragould plant is fully regulated under the Central Arkansas order and has only a limited association with the Memphis market. For example, only three percent of the plant's fluid milk sales are distributed on routes in the Memphis marketing area. About 50 percent of the plant's sales are distributed on routes in the Paragould area in competition with handlers regulated under the Memphis order who will be subject to higher Class I prices. The handler's opposition would appear to be more relevant to the proposed changes in the location pricing provisions of the Central Arkansas order, which regulates the handler, than to the Memphis order provisions. Accordingly, the handler's position with respect to the location value of milk at Paragould will be dealt with later in a decision involving the Central Arkansas market.

2. *Need for emergency action.* The representative for Malone & Hyde testified that if the mandated Class I differentials become effective before the location adjustment provisions of the Memphis order are amended, the Class I price at its Nashville plant under the Memphis order will be 16 cents higher than plants similarly located but regulated under the Nashville order. The handler estimated that if this happened, milk for the Nashville plant would cost $15,000 per month more than at the Class I price for plants of other handlers who are similarly located but regulated under the Nashville order. Because of the adverse impacts on the handler's Nashville plant in such case, the handler asked that the decision for the Memphis order be dealt with separately on an expedited basis so that the amended order effective on May 1, 1986, would reflect the Memphis order's higher mandated Class I differential and the proposed changes in the location adjustment provisions.

Disorderly marketing conditions could result if the location adjustment

provisions of the Memphis order are not amended as expeditiously as possible. Expedited action for the Memphis market was widely favored by interested parties and no opposition to such action was expressed. Omission of a recommended decision and the opportunity to file exceptions thereto is necessary to amend the order's location adjustment provisions as soon as possible. For the above reasons, a recommended decision is omitted on the basis that the due and timely execution of the Secretary's functions imperatively and unavoidably requires such omission.

Rulings on Proposed Findings and Conclusions

Briefs and proposed findings and conclusions were filed by certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

General Findings

The findings and determinations hereinafter set forth supplement those that were made when the Memphis, Tennessee order was first issued and when it was amended. The previous findings and determinations are hereby ratified and confirmed, except where they may conflict with those set forth herein.

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the tentative marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Marketing Agreement and Order

Annexed hereto and made a part hereof are two documents, a Marketing Agreement regulating the handling of milk, and an Order amending the order regulating the handling of milk in the Memphis, Tennessee marketing area, which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered, That this entire decision, except the attached marketing agreement, be published in the **Federal Register.** The regulatory provisions of the marketing agreement are identical with those contained in the order as hereby proposed to be amended by the attached order which was published with this decision.

Referendum Order to Determine Producer Approval; Determination of Representative Period; and Designation of Referendum Agent

It is hereby directed that a referendum be conducted and completed on or before the 20th day from the date this decision is issued, in accordance with the procedure for the conduct of referenda (7 CFR 900.300 *et seq.*), to determine whether the issuance of the attached order as amended and as hereby proposed to be amended, regulating the handling of milk in the Memphis, Tennessee, marketing area is approved or favored by producers, as defined under the terms of the order (as amended and as hereby proposed to be amended), who during such representative period were engaged in the production of milk for sale within the aforesaid marketing area.

The representative period for the conduct of such referendum is hereby determined to be November 1985.

The agent of the Secretary to conduct such referendum is hereby designated to be Richard E. Arnold.

List of Subjects in 7 CFR Part 1097

Milk marketing orders, Milk, Dairy products.

Signed at Washington, DC, on May 8, 1986.

Karen K. Darling,

Deputy Assistant Secretary, Marketing and Inspection Services.

Order [1] amending the order, regulating the handling of milk in the Memphis, Tennessee, marketing area.

Findings and determinations

The findings and determinations hereinafter set forth supplement those that were made when the order was first issued and when it was amended. The previous findings and determinations are hereby ratified and confirmed, except where they may conflict with those set forth herein.

(a) *Findings.* A public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in Memphis, Tennessee, marketing area. The hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure (7 CFR Part 900).

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area; and the minimum prices specified in the order as hereby amended are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered that on and after the effective date hereof, the handling of milk in the Memphis, Tennessee, marketing area shall be in conformity to and in compliance with the terms and conditions of the order, as amended, and as hereby amended, as follows:

PART 1097—MILK IN THE MEMPHIS, TENNESSEE, MARKETING AREA

1. The authority citation for 7 CFR Part 1097 continues to read as follows:

Authority: (Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674).

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

2. Section 1097.52 is revised to read as follows:

§ 1097.52 Plant location adjustments for handlers.

(a) For milk received at a fluid milk plant from producers or a handler described in § 1097.9(c) and which is classified as Class I milk without movement to another fluid milk plant, the price specified in § 1097.50(a) shall be adjusted by the amount or at the rate specified in paragraphs (a) (1) through (4) of this section for the location of such plant.

(1) For a plant located in the State of Tennessee and more than 50 miles from the City Hall in Memphis, Tennessee, the adjustment shall be minus 25 cents.

(2) For a plant located in the State of Mississippi, the adjustment shall be as follows:

(i) In the Mississippi counties of Itawamba, Lafayette, Lee, Panola, Pontotoc, Prentiss, Tate, Tunica or Union, the adjustment shall be plus 13 cents; and

(ii) In any Mississippi county not specified in paragraph (a)(2)(i) of this section and more than 50 miles from the City Hall in Memphis, Tennessee, the adjustment shall be plus 2.1 cents for each 10 miles or fraction thereof (rounded to the nearest cent) that such plant is located from the City Hall in Memphis, Tennessee.

(3) For a plant located in the State of Arkansas, the adjustment shall be as follows:

(i) In the Arkansas counties of Arkansas, Clark, Cleburne, Cleveland, Conway, Crawford, Crittenden, Cross, Dallas, Desha, Faulkner, Franklin, Garland, Grant, Hot Spring, Howard, Jefferson, Johnson, Lee, Lincoln, Logan, Lonoke, Monroe, Montgomery, Perry, Phillips, Pike, Polk, Pope, Prairie, Pulaski, Saline, Scott, St. Francis, Sebastian, Sevier, Van Buren, White, Woodruff or Yell, no adjustment shall apply;

(ii) In any Arkansas county lying north of any county specified in paragraph (a)(3)(i) of this section, the adjustment shall be minus 22 cents;

(iii) In any Arkansas county lying south of any county specified in paragraph (a)(3)(i) of this section, the adjustment shall be plus 31 cents.

(4) For a plant located outside the areas described in paragraphs (a) (1), (2) and (3) of this section, the adjustment shall be minus 2.1 cents for each 10 miles or fraction thereof (rounded to the nearest cent) that such plant is located from the City Hall in Memphis, Tennessee.

(b) For fluid milk products transferred in bulk between fluid milk plants and classified as Class I milk, such location adjustments shall be assigned to the Class I disposition at the transferee-plant in excess of the sum of receipts at such plant from producers and from handlers described in § 1097.9(c) times 1.05, and the pounds assigned in Class I to receipts from other order plants and unregulated supply plants, such assignment to be made in sequence beginning with the transferor plant with the highest Class I price.

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Part 379

[Docket No. 60228-6028]

General License GTDA; Technical Data Available To All Destinations

AGENCY: Export Administration, International Trade Administration, Commerce.

ACTION: Notice of proposed rulemaking.

SUMMARY: Export Administration has reviewed the Export Administration Regulations pertaining to scientific communications, especially those exportable under General License *GTDA:* Technical Data Available to All Destinations. This proposed rule seeks to provide clarified guidelines for the use of General License *GTDA*, and preserves the free flow of ideas and people that is fundamental to effective research. This rule covers the areas of publications, conferences, educational instruction, correspondence and informal scientific exchanges, federal contract controls, and commercial consulting.

The current *GTDA* regulations have three categories of eligibility: (1) Data generally available to the public; (2) scientific or educational data; and (3) information contained in patent applications. Several issues have arisen over the years in applying these categories. "Data Generally Available" included publications available at "nominal cost". The "nominal cost" test often indicated general availability, but it could also often be unduly restrictive. Moreover, determining what dollar amount constituted "nominal" cost was difficult. The transfer of data in a scientific conference was permitted under GTDA if the conference was "open". However, determining an "open" conference was difficult. Finally, the regulations for "Scientific or Educational Data" did not provide express guidance as to the type of research that qualified for this exception.

The proposed regulations redefine these three categories. Under the new regulation to qualify for *GTDA*, technical data must fit into one of four categories. (1) Public availability; (2) Fundamental Research; (3) Educational Information; or, (4) Patents. While the proposed regulations establish parameters for each of these categories, their major thrust is aimed at defining "public availability" and "fundamental research."

The proposed regulations make it clear that data need not be available to every person on the street to qualify for GTDA, but rather availability to a community of persons, such as those in a scientific or engineering discipline, is sufficient. In defining "fundamental research," the proposed regulations examine the degree of "control" on the dissemination of the data and the "entity" performing the research. If the research is conducted at a university and is neither contractually controlled nor classified, it will be deemed fundamental research. In contrast,

research that is conducted by a business entity will be considered proprietary and therefore not GTDA, unless the information can be freely disclosed.

The proposed changes to section § 379.3 are based on the recommendations of an interagency Working Group on Export Controls and Scientific Communication. Copies of the Working Group's report, dated April 5, 1985, are available through the information contact listed below.

At about the same time as the Working Group completed its deliberations and report, Export Administration independently published new regulations on control of software (50 FR 16468 April 26, 1985). Generally, under these regulations an individual validated license or, in some cases, a written assurance is required for export to any destination of software covered in the Commodity Control List, in Supplement No. 3 to Part 379, or in § 379.4(c) or (d) Except for the embargoed countries, General License GTDR is available for export to all destinations of any other software.

A question has arisen about the extent to which General License GTDA should be available for exports of software. While the proposed regulations treat software as being eligible for General License GTDA, because of the uniqueness of software, concern has arisen over this treatment. Public comment is specifically requested on this treatment of software and on the definition of "public availability".

DATE: Comments must be received by the Department July 15, 1986.

ADDRESS: Written comments (six copies) should be sent to: Betty Ferrell, Regulations Branch, Export Administration, U.S. Department of Commerce, P.O. Box 273, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: John Black or Patti Muldonian, Export Administration (Telephone: (202) 377–2440).

SUPPLEMENTARY INFORMATION:

Rulemaking Requirements and Invitation to Comment

1. Because this rule concerns a foreign and military affairs function of the United States, it is not a rule or regulation within the meaning of section 1(a) of Executive Order 12291 and, it is not subject to the requirements of that Order. Accordingly, no preliminary or final Regulatory Impact Analysis has to be or will be prepared.

2. Section 13(a) of the Export Administration Act of 1979, as amended (50 U.S.C. App. 2412(a)), exempts this rule from all requirements of section 553 of the Administrative Procedure Act (APA) (5 U.S.C. 553), including those requiring publication of a notice of proposed rulemaking, an opportunity for public comment, and a delay in effective date. This rule is also exempt from these APA requirements because it involves a foreign and military affairs function of the United States. Further, no other law requires that notice of proposed rulemaking and an opportunity for public comment be given for this rule. However, because of the importance of the issues raised by these regulations, this rule is issued in proposed form and comments will be considered in developing final regulations. Accordingly, the Department encourages interested persons who wish to comment to do so at the earliest possible time to permit the fullest consideration of their views.

3. Because a notice of proposed rulemaking and opportunity for public comment are not required to be given for this rule by section 533 of the Administrative Procedure Act (5 U.S.C. 553) or by any other law, under sections 603(a) and 604(a) no initial or final Regulatory Flexibility Analysis has to be or will be prepared.

4. This rule mentions a collection of information requirement subject to the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et. seq.*). This collection has been approved by the Office of Management and Budget under control number 0625–0140.

The period for submission of comments will close 60 days after publication. The Department will consider all comments received before the close of the comment period in developing final regulations. Comments received after the end of the comment period will be considered if possible, but their consideration cannot be assured.

The Department will not accept public comments accompanied by a request that part or all of the material be treated confidentially because of its business proprietary nature or for any other reason. The Department will return such comments and materials to the person submitting the comments and will not consider them in the development of final regulations.

All public comments on these regulations will be a matter of public record and will be available for public inspection and copying. In the interest of accuracy and completeness, the Department requires comments in written form. Oral comments must be followed by written memoranda, which will also be a matter of public record and will be available for public review and copying. Communications from agencies of the United States Government or foreign governments will not be made available for public inspection.

The public record concerning these regulations will be maintained in the International Trade Administration Freedom of Information Records Inspection Facility, Room 4104, U.S. Department of Commerce, 14th Street and Pennsylvania Avenue NW., Washington DC 20230. Records in this facility, including written public comments and memoranda summarizing the substance of oral communications, may be inspected and copied in accordance with regulations published in Part 4 of Title 15 of the Code of Federal Regulations.

Information about the inspection and copying of records at the facility may be obtained from Patrica L. Mann, International Trade Administration Freedom of Information Officer, at the above address or by calling (202) 377–3031.

List of Subjects in 15 CFR Part 379

Exports, Science and Technology.

PART 379—[AMENDED]

Accordingly, the Export Administration Regulations (15 CFR Part 379) are proposed to be amended as follows:

1. The authority citation for 15 CFR Part 379 continues to read as follows:

Authority: Pub. L. 96–72, 93 Stat. 503, 50 U.S.C. app. 2401, *et. seq.*, as amended by Pub. L. 97–145 of December 29, 1981 and by Pub. L. 99–64 of July 12, 1985; and E.O. 12525 of July 12, 1985 (50 FR 28757, July 16, 1985); Pub. L. 95–223, 50 U.S.C. 1701 *et seq.*; E.O. 12532 of September 9, 1985 (50 FR 36861, September 10, 1985).

2. Section 379.1(b)(1) is amended by adding a note before the semicolon at the end of paragraph (ii), to read as follows:

§ 379.1 Definitions.

* * * * *

(b) *Export of technical data.*

(1) * * *

(ii) * * * (**Note.**—Such "knowledge or intent" is presumed when the release is to a natural person who is not a citizen of the United States unless that person has been lawfully admitted for permanent residence in the United States under the Immigration and Naturalization Act (8 U.S.C. 1101) or the person releasing the data can otherwise establish that the data will not be shipped or transmitted from the U.S.); or * * *

* * * * *

3. Section 379.1(b)(2) is amended as follows: The word "and" following the semicolon in paragraph (ii) is removed, the period at the end of paragraph (iii) is replaced by a semicolon and the word "and" is added, and a new paragraph (iv) is added to read as follows:

§ 379.1 Definitions.

* * * * *

(b) * * *

(2) * * *

(iv) Training, including training of foreign persons in the design, engineering, development, production, processing, manufacture, use, operation, overhaul, repaid, maintenance, modification or reconstruction of commodities.

* * * * *

4. Section 379.3 is revised to read as follows:

§ 379.3 General license GTDA; technical data available to all destinations.

(a) *Establishment of general license.* A General License GTDA is hereby established authorizing:

(1) Unrestricted export to any destination of technical data that are already publicly available or will be made publicly available by such export, as described in paragraph (b) of this section;

(2) Unrestricted export to any destination of information arising during or resulting from fundamental research, as described in paragraph (c) of this section;

(3) Release of educational information, as described in paragraph (d) of this section; and

(4) Export of information in connection with certain patent applications, as described in paragraph (e) of this section

However, see paragraph (f) with regard to Government-sponsored research covered by contractual national-security controls and paragraph (g) with regard to consulting.

(b) *Publicly available* Technical data are made public and so become "publicly available" when they are put into public domain in any form, including:

(1) Publication in periodicals, books, or other print or electronic media available for general distribution to any member of the public, either free or at a price reflecting an intention that the information be widely available to the public or to a community of persons, such as those in a scientific or engineering discipline, interested in the subject matter.

(2) Ready availability at libraries open to the public or at university libraries; or

(3) Release at an open conference, meeting, seminar, trade show, or other open gathering.

(i) A conference or other gathering is "open" if all technically qualified members of the public are eligible to attend and attendees are permitted to take notes or otherwise make a personal record (not necessarily a recording) of the proceedings and presentations.

(ii) All technically qualified members of the public may be considered eligible to attend a conference or other gathering notwithstanding:

(A) A registration fee reasonably related to costs and reflecting an intention that all interested and technically qualified persons be able to attend, or

(B) A limitation on actual attendance, as long as attendees either are the first who have applied or are selected on the basis of relevant scientific or technical competence, experience, or responsibility.

This General License GTDA authorizes submission of papers to domestic or foreign editors or reviewers of journals, or to organizers of open conferences or other open gatherings, with the understanding that the papers will be made publicly available if favorably received.

(c) *Information resulting from fundamental research*—(1) *Fundamental research.* Fundamental research means basic and applied research in science and engineering, the results of which ordinarily are published and shared broadly within the scientific community, as distinguished from proprietary research and from industrial development, design, production, and product utilization, the results of which ordinarily are restricted for proprietary or national security reasons. Paragraphs (c) (2) through (4) of this section provide explicit rules that will be used to identify research qualifying as fundamental research.

(2) *University-based research.* (i) Research conducted by scientists, engineers, or students at a university normally will be considered fundamental research. ("University" means any accredited institution of higher education located in the United States.)

(ii) Arrangements providing for a prepublication review by a sponsor of university research solely to ensure that the publication would neither compromise patent rights nor inadvertently divulge the sponsor's trade secrets do not in themselves change the rule described in (i).

(iii) However, that normal rule will not hold for a research project or activity if the university or its researchers accept (at the request, for example, of an industrial sponsor) other restrictions on publication of scientific and technical information resulting from the project or activity. Scientific and technical information resulting from the research will nonetheless become subject to General License GTDA once all such restrictions have expired or have been removed.

(iv) Paragraph (a)(2) includes disclosure of information to any scientists, engineers, or students at a U.S. university in the course of industry-university research collaboration under specific arrangements between a firm and the university, as long as the arrangements do not include restrictions of the type referred to in paragraph (c)(2)(iii) immediately above.

(v) Note that paragraph (f) will apply if a university or its researchers accept specific national security controls on a research project or activity sponsored by the U.S. Government.

(3) *Research based at Federal agencies or FFRDCs.* Research conducted by scientists or engineers working for a Federal agency or a Federally Funded Research and Development Center (FFRDC) may be designated as "fundamental research" within any appropriate system controlling release of information by such scientists and engineers devised by the agency or the FFRDC.

(4) *Corporate research.* Research conducted by scientists or engineers working for a business entity will be considered "fundamental research" at such time and to the extent that the researchers are free to make scientific and technical information resulting from the research publicly available without restriction or delay based on proprietary or national security considerations. Prepublication review by the company solely to ensure that the publication would compromise no patent rights will not be considered a proprietary restriction for this purpose.

(5) *Research based elsewhere.* Research conducted by scientists or engineers who are not working for any of the institutions described in paragraphs (c) (2) through (4) will be treated the same as corporate research, as described in paragraph (c)(4).

(d) *Educational information.* The release of "educational information" referred to in paragraph (a)(3) is release by instruction in catalog courses and associated teaching laboratories of academic institutions. Dissertation research is treated in paragraph (c)(2).

(e) *Patent applications.* The information referred to in paragraph (a)(4) above is:

(1) Information contained in a patent application prepared wholly from foreign-origin technical data where the application is being sent to the foreign inventor to be executed and returned to

the United States for subsequent filing in the U.S. Patent and Trademark Office; or

(2) Information contained in a patent application, or an amendment, modification, supplement, or division of an application, and authorized for filing in a foreign country in accordance with the regulations of the Patent and Trademark Office, 37 CFR Part 5. See §370.10(j).

(f) *Government-sponsored research covered by contract controls.* (1) If research is funded by the U.S. Government, and specific national security controls are agreed on in the funding instrument to protect information resulting from the research, paragraph (a)(2) will not apply to any export of such information in contravention of such controls. A General License GTDA as described in paragraph (a) is nonetheless available for any export of information resulting from the research that is consistent with the specific controls.

(2) Examples of "specific national security controls" include requirements for prepublication review by the Government, with right to withhold permission for publication; restrictions on prepublication dissemination of information to noncitizens or other categories of persons; or restrictions on participation of noncitizens or other categories of persons in the research. A general reference to one or more export control laws or regulations or a general reminder that the Government retains the right to classify is not a "specific national security control".

(g) *Consulting.* Consulting generally is an especially effective mechanism of technology transfer. Although General License GTDA authorizes release via a consulting arrangement of technical data described in paragraph (a) (1) through (3), it does not authorize release of other technical information or application abroad of other personal knowledge or technical experience acquired in the United States. See also paragraph (h) below.

(h) *Advice concerning uncontrolled information.* Persons may be concerned that an export of uncontrolled information, could adversely affect U.S. national security interests. Exporters who wish advice before exporting such information can contact the appropriate Government scientific or technical personnel by calling Export Administration at (Telephone (202) 377–4811).

5. Section 379.4 is amended by adding paragraph (f)(4) to read as follows:

§ 379.4 General license GTDR technical data under restriction.

* * * * *

(f) * * *

(4) Written assurance requirement for foreign natural persons employed in the United States. Technical data otherwise exportable only under an individual validated license may be released to employees who are foreign persons under this General License GTDR by an employer who is a citizen or national of the United States, a firm organized under the laws of the United States, or a university, subject to the following conditions:

(i) The foreign person is a bonafide and full-time regular employee, or appropriate action has been initiated under the Immigration and Naturalization Act that is intended to result in the foreign person becoming a full time regular employee;

(ii) The employee resides throughout the period of employment in the United States;

(iii) The employee is not a national of a country listed in Country Groups Q, S, W, Y, Z, Afghanistan or the People's Republic of China;

(iv) The technical data are not restricted by either § 379.4(c) or (e); and

(v) The employer has been assured by the employee in writing that the technical data will not be transferred to other foreign persons, except as permitted by these regulations, without the written consent of Export Administration.

* * * * *

Dated: May 13, 1986.

Walter J. Olson,

Deputy Assistant Secretary for Export Administration.

BILLING CODE 3510-DT-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[LR–6–86]

Income Taxes: Proposed Rule by Cross Reference to Temporary Regulations Under Section 338, Stock Acquisitions, Statements of Elections and Due Dates

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: In the Rules and Regulations portion of this issue of the **Federal Register**, the Internal Revenue Service is amending temporary regulations relating to section 338(g) of the Internal Revenue Code of 1954 ("Code") as added by the Tax Equity and Fiscal Responsibility Act of 1982 ("TEFRA"). The amendments provide additional guidance to taxpayers concerning the filing of certain statements of election under section 338 on or after December 9, 1985, and on or before July 15, 1986. An amendment to temporary regulation § 1.338–4T also clarifies the application of the mitigation of limitations provisions. The temporary regulations also extend the time for taking certain actions under section 338. The text of the new and revised sections also serves as the comment document for this notice of proposed rulemaking.

DATES:

Proposed Effective date

The regulations are proposed to apply generally to stock acquisitions made after August 31, 1982. Certain provisions would only apply with respect to elections under section 338 filed on or after December 9, 1985, and on or before July 15, 1986.

Dates for Comments and Requests for a Public Hearing

Written comments and requests for a public hearing must be delivered or mailed by July 15, 1986

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T [LR–6–86], Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Thomas J. Kane of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224 (Attention: CC:LR:T) or telephone 202–566–3458 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

Temporary regulations published in the Rules and Regulations portion of this issue of the **Federal Register** amend temporary regulations §§ 1.338–1T, 1.338–2T, 1.338–4T, 1.338–5T, and 1.338 (h) (10)–1T in Part 1 of Title 26 of the Code of the Federal Regulations ("CFR"). The final regulations that are proposed to be based on the amended temporary regulations would be added to Part 1 of Title 26 of the CFR. Those final regulations would provide guidance on filing certain statements of

BEST COPY AVAILABLE

election under section 338 (g) of the Internal Revenue Code. Section 338 (g) was added by section 224 of TEFRA (Pub. L. No. 97–248; 96 Stat. 485) and was amended by section 712 (k) of the Tax Reform Act of 1984 (Pub. L. No. 98–369; 98 Stat. 948). For the text of the amendments to the temporary regulations, see T.D. 8068, published in the Rules and Regulations portion of this issue of the **Federal Register**. The preamble to the temporary regulations explains the additions to the regulations.

Regulatory Flexibility Act and Executive Order 12291

Although this document is a notice of proposed rulemaking that solicits public comment, the Internal Revenue Service has concluded that the regulations proposed herein are interpretative and that the notice and public procedure requirements of 5 U.S.C. 553 do not apply.

Accordingly, these proposed regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. chapter 6). The Commissioner of Internal Revenue has determined that this proposed rule is not a major rule as defined in Executive Order 12291 and that a Regulatory Impact Analysis therefore is not required.

Comments and Request For a Public Hearing

Before these proposed regulations are adopted, consideration will be given to any written comments that are submitted (preferably eight copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a possible hearing is held, notice of the time and place will be published in the **Federal Register**.

Drafting Information

The principal author of these proposed regulations is Thomas J. Kane of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

Roscoe L. Egger, Jr.,

Commissioner of Internal Revenue.

[FR Doc. 86–10997 Filed 5–15–86; 8:45 am]

BILLING CODE 4830–01–M

26 CFR Part 1

[LR–3–86]

Transfers of Property by U.S. Persons to Foreign Corporations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking cross-reference to temporary regulations.

SUMMARY: In the Rules and Regulations portion of this issue of the **Federal Register**, the Internal Revenue Service is issuing temporary regulations that add new §§ 1.367(a)–1T through 1.367(a)–6T, relating to transfers of property by U.S. persons to foreign corporations, new § 1.367(d)–1T, relating to transfers of intangible property by U.S. persons to foreign corporations, and new § 1.6038B–1T, relating to reporting of transactions described in section 367. The text of the new sections also serves as the comment document for this notice of proposed rulemaking.

DATES: Written comments and requests for a public hearing must be delivered or mailed before July 15, 1986.

The regulations are proposed generally to apply to transfers made after December 31, 1984.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T [LR–3–86], Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Charles W. Culmer of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC 20224, (Attention: CC:LR:T) (202–566–4336, not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

The temporary regulations published in the Rules and Regulations portion of this issue of the **Federal Register** add new §§ 1.367(a)–1T, 1.367(a)–2T, 1.367l(a)–3T, 1.367(a)–4T, 1.367(a)–5T, 1.367(a)–6T, 1.367(d)–1T, and 1.6038B–1T to 26 CFR Part 1. The final regulations that are proposed to be based on these temporary regulations would amend 26 CFR Part 1 by adding these new temporary regulation sections as final regulation sections under sections 367 and 6038B of the Internal Revenue Code of 1954. For the text of the temporary regulations, see FR Doc. 86–10831 [T.D. 8087] published in the Rules and Regulations portion of this issue of the **Federal Register**.

Regulatory Flexibility Act and Executive Order 12291

The Commissioner of Internal Revenue has determined that this proposed rule is not a major rule as defined in Executive Order 12291 and that a Regulatory Impact Analysis is therefore not required. The Secretary of the Treasury has certified that this rule will not have a significant impact on a substantial number of small entities. Few small entities would be affected by these regulations. A regulatory flexibility analysis, therefore, is not required under the Regulatory Flexibility Act (5 U.S.C. chapter 6).

Comments and Requests for A Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably eight copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the **Federal Register**. The collection of information requirements contained herein have been submitted to the Office of Management and Budget (OMB) for review under section 3504 (h) of the Paperwork Reduction Act. Comments on the requirements should be sent to the Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for Internal Revenue Service, New Executive Office Building, Washington, DC 20503. The Internal Revenue Service requests persons submitting comments to OMB to also send copies of the comments to the Service.

Drafting Information

The principal author of this regulation is Charles W. Culmer of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations on matters of substance and style.

List of Subject

26 CFR 1.301–1 through 1.385–6

Income taxes, Corporations, Corporate distributions, Corporate adjustments, Reorganizations.

26 CFR 1.6001–1 through 1.6109–2

Income taxes, Administration and procedure, Filing requirements.

Proposals of Regulations

The temporary regulations, FR Doc. 86–10831 [T.D. 8087] published in the Rules and Regulations portion of this issue of the **Federal Register**, are hereby also proposed as final regulations under section 367 and 6038B of the Internal Revenue Code of 1954.

Roscoe L. Egger, Jr.,

Commissioner of Internal Revenue.

[FR Doc. 86–10832 Filed 5–15–86; 8:45 am]

BILLING CODE 4830-01-M

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1915

[Docket No. S001]

Hazard Communication in Shipyard Employment

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Notice of proposed rulemaking.

SUMMARY: As of May 25, 1986, OSHA's Hazard Communication Standard (HCS) (§ 1910.1200) will be applicable to all employment in SIC Classifications 20 through 39, which include shipbuilding and ship repairing employment. As of that date, shipbuilding and ship repairing will no longer be covered by § 1915.97(a)–(d). However, since shipbreaking is included in SIC Code 44 and is not currently covered under the scope of § 1910.1200, the shipbeaking segment of the industry will continue to be covered by § 1915.97 (a), (b), and (d). OSHA is proposing to amend § 1915.97 to reflect the change in coverge for shipbuilding and ship repairing employment. OSHA is also proposing that its current requirement in § 1915.97(c) for OSHA approval of forms used for Material Safety Data Sheets (MSDS) in all shipyard employment, (shipbuilding, ship repairing, and shipbreaking), be revised. OSHA believes that such approval is not necessary to assure that the appropriate information is contained in an MSDS, and that the particular form used by an employer is not critical to the MSDS requirement in § 1915.97. OSHA is also proposing that the discussed revision of § 1915.97(c) would become effective as of the issuance of the final rule.

DATES: Comments on the proposal must be postmarked by July 15, 1986. Requests for a hearing must also be postmarked by July 15, 1986.

ADDRESS: Comments, objections, and hearing requests should be sent to: Docket Officer, Docket No. S001, Occupational Safety and Health Administration, Room N3670, U.S. Department of Labor, Washington, DC 20210.

FOR FURTHER INFORMATION CONTACT: Mr. James Foster, Office of Information and Consumer Affairs, Occupational Safety and Health Administration, U.S. Department of Labor, Room N3637, Washington, DC 20210, (202) 523–8151.

SUPPLEMENTARY INFORMATION:

I. Background

Paragraphs (a) through (d) of § 1915.97, entitled "Health and Sanitation," require employers engaged in ship repairing, shipbuilding or shipbreaking to obtain information regarding hazardous materials used in their workplaces and to make this information available to their employees.

On November 25, 1983 (48 FR 53280), OSHA promulgated Section 1910.1200, entitled "Hazard Communication," which applies to manufacturers and importers of hazardous materials in SIC Codes 20 through 39 effective May 25, 1986. Employers engaged in ship repairing and shipbuilding are covered by this regulation since they are included within SIC Code 37. Employers engaged in shipbreaking are not presently covered by this regulation, as they are included within SIC Code 44, and thus not within the current coverage of the Hazard Communication Standard.

Section 1910.1200 requires employers to obtain and transmit to their employees information about hazardous materials in the workplace, and to instruct these employees regarding measures that are or may be necessary for employee protection. Since § 1910.1200 will apply to ship repairing and shipbuilding effective May 25, 1986, it is proposed to recognize this coverge for those industry sectors within Part 1915, in place of § 1915.97 (a), (b), and (d) while continuing coverage of § 1915.97 (a), (b), and (d) for employers in the shipbreaking industry.

In addition, it is the Agency's intention to revise the current requirement contained in § 1915.97(c), that pertinent data relating to hazardous materials be recorded on an OSHA Form 20 or on an "essentially similar form which has been approved by" the Agency. Material Safety Data Sheets for shipbreaking would be considered to be in compliance with § 1915.97 if all of the information requested in § 1915.97(b) is included on a form or format that is accessible for the emplyees. OSHA had determined that pre-approval of the form to be used is not necessary for employee safety. The procedures under § 1915.97 would thus become similar to those prescribed by paragraph (g) of § 1910.1200 which does not specify the use of a specific form to impart this pertinent data.

As noted above, paragraph (c) of § 1915.97 currently requires that the Material Safety Data Sheet for shipyards be on an "OSHA Form 20" or essentially similar form approved by the Agency. In developing the HCS, OSHA determined that it was not necessary for the purpoes of the standard that the MSDS be on any particular form. The information required on the OSHA Form 20 is very similar to what is required under 29 CFR 1910.1200. This was recognized in the preamble of 29 CFR 1910.1200, which stated: "Anyone wishing to use the Form 20 may continue to do so, so long as they ensure that all of the information required by this standard is provided." (48 FR 53310)

What is important, for the purposes of § 1910.1200, is that the necessary information about the hazardous material in question be available on the Material Safety Data Sheet, regardless of the form that is used. OSHA believes that the same reasoning holds true for both shipyard employment and general industry.

It has been noted that there are some differences between what is required by § 1910.1200 and what is required on the OSHA Form 20. In brief, the primary differnce is that the HCS requires that the hazardous chemical's primary route of entry into the body be identified; and if the hazardous chemical is in any of the publications cited in the standard, (NRP's "Annual Report of Carcinogens" or IARC's "Monographs"), this must be noted. The current OSHA Form 20 does not contain any sections which are designated for the inclusion of this information.

Employers who are using Form 20's are responsibile for reviewing these forms to determine whether they contain all the necessary information under the HCS. OSHA believes that most Form 20's in use are fully or substantially in compliance with the HCS. In the course of this rulemaking, the Agency solicits information from interested persons as to the information which is currently available on MSDS's in shipyards, and how that information compares to the requirements of the HCS.

In *United Steelworkers* vs. *Auchter*. No. 83–3554. (3d cir., May 24, 1985), the U.S. Court of Appeals for the Third

Circuit upheld the application of OSHA's Hazard Communication Standard, 29 CFR 1910.1200, to industry sectors in SIC Codes 20 through 39. In addition, the court directed the Secretary "to reconsider its application to employees in other sectors, and to order its application in those sectors unless he can state reasons why such application would not be feasible." Slip op. at p.38. OSHA is presently engaged in performing the additional review and analysis as directed by the court on this and other issues and intends to publish notices in the Federal Register in the near future to deal directly with the court decision. In this regard, on November 27, 1985 (50 FR 48794), OSHA published an advance notice of proposed rulemaking, requesting comments and information on expanding the scope of industries covered by § 1910.1200. In contrast it should be noted that the present proposal was not developed as part of the Agency's response to the court mandate. It was initiated as a means of alleviating the potential for conflict and confusion in the application of the Hazard Communication Standard to shipyard employment.

Pursuant to 5 U.S.C. 553, OSHA is proposing that these amendments become effective immediately upon publication of the Final Rule, since they reduce the regulatory burden on employers by deleting the requirement for an OSHA approved form for MSDS's, while imposing no new requirements on employers.

OSHA recognizes that shipbreaking employers may wish to comply with § 1910.1200 in lieu of the requirements of § 1915.97. In order to deal with this possibility, OSHA intends to consider violations of § 1915.97 to be "deminimus," provided that the employer is in compliance with § 1910.1200.

II. Benefits

The OSHA Form 20 Material Safety Data Sheet currently required in shipyards by § 1915.97 has traditionally been prepared by chemical manufacturers, importers, and distributors. However, the obligation under § 1915.97 is placed on shipyard employers to provide information regarding hazardous materials to their employees. Section § 1915.97 does not require chemical manufacturers, importers, and distributors to provide MSDS's to the shipyard employer. Under § 1910.1200, they were required to furnish Material Safety Data Sheets to a large group of employers (i.e., SIC Codes 20 through 39), including ship repairing and shipbuilding, effective November 25, 1985. The burden placed on shipyard employers in the ship repairing and shipbuilding industries to provide MSDS information to their employees will remain essentially the same under the new § 1910.1200 as it is under the current § 1915.97.

Under § 1910.1200, there will no longer be a need for shipyard employers to adhere to a rigid format in developing Material Safety Data Sheets. Those employers who develop their own Material Safety Data Sheets, as well as those who receive the forms from manufacturers, distributors, and importers, will save the time and expense associated with obtaining approval of these forms from OSHA.

III. Regulatory Impact Assessment

The proposed revocation of § 1915.97(c), and adoption of § 1910.1200 is not a "Major" action as defined by Executive Order No. 12291 (46 FR 13193, February 19, 1981) as it will not have an annual effect on the economy of $100 million or more, cause major increase in costs or prices, or have any other significant adverse effects. This change would not constitute a "major rule" primarily because no additional requirements will be imposed on industry and it would relieve current regulatory burdens by deleting the requirement for shipyard employers to use a specific OSHA approved form for their Material Safety Data Sheets.

For the same reason, OSHA certifies that pursuant to the provisions of the Regulatory Flexibility Act (Pub. L. 96-354, 5 U.S.C. 601) the proposed action will not have a significant economic impact on a substantial number of small entities.

IV. Environmental Assessment

This proposed rule has been reviewed in accordance with the requirements of the National Environmental Policy Act (NEPA) of 1969 (42 U.S.C. 4321, et seq.), the Guidelines of the Council on Environmental Quality (CEQ) (40 CFR Part 1500), and DOL's NEPA Procedures (29 CFR Part 11). As a result of this review, OSHA has determined that the proposed rule will have no significant environmental impact.

Because this action does not change the substance of the OSHA standard and is intended to simplify current procedures, there is no impact on air, water or soil quality, plant or animal life, the use of land or other aspects of the environment.

V. Public Participation

Interested persons are requested to submit written data, views and arguments concerning this proposal. These comments must be postmarked by July 15, 1986, and submitted in quadruplicate to the Docket Officer, Docket No. S-001, Room N-3670, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210.

Written submissions must clearly identify the specific provisions of the proposal which are addressed, and specific recommendations are encouraged on each issue raised by the proposal.

All data received within the specified comment period will be made a part of the record. Data, views and arguments that are submitted will be available for public inspection and copying at the above Docket Office address.

Additionally, under section 6(b)(3) of the OSHA Act and 29 CFR 1911.11 interested persons may file objections to the proposal and request an informal hearing. The objections and hearing requests should be submitted in quadruplicate to the Docket Office at the above address and must comply with the following conditions:

1. The objection must include the name and address of the objector;
2. The objections must be postmarked by July 15, 1986;
3. The objections must specify with particularity the provisions of the proposed rule to which objection is taken and must state the grounds therefor;
4. Each objection must be separately stated and numbered; and
5. The objections must be accompanied by a detailed summary of the evidence proposed to be adduced at the requested hearing.

IV. State Plan Standards

Those of the 25 states with their own OSHA-approved occupational safety and health plans whose plans cover the issues of maritime safety and health must revise their existing standard within six months of the publication date of the final standard or show OSHA why there is no need for action, e.g., because an existing State standard covering this area is already "at least as effective" as the revised Federal standard. Currently five States (California, Minnesota, Oregon, Vermont and Washington) with their own State plans cover private sector on-shore maritime activities. Federal OSHA enforces maritime standards offshore in all States and provides onshore coverage of maritime activities in Federal OSHA States and in the following State plan States: Alaska, Arizona, Connecticut [1], Hawaii, Indiana,

[1] Plan covers only State and local government employees.

Iowa, Kentucky, Maryland, Michigan, Nevada, New Mexico, New York,[1] North Carolina, Puerto Rico, South Carolina, Tennessee, Utah, Virginia, Virgin Islands and Wyoming. (All States with State plans must also extend coverage to States and local government employees engaged in maritime activities.)

List of Subjects in 29 CFR Part 1915

Maritime, Shipyard, Marine chemist, Occupational Safety and Health, Safety.

VII. Authority.

This document was prepared under the direction of Patrick R. Tyson, Acting Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210.

Accordingly, under sections 4 (b)(2), 6(b), and 8(c) of the Occupational Safety and Health Act of 1970 (84 Stat. 1592, 1593, 1599, 29 U.S.C. 653, 655, 657) and section 41 of the Longshoremen's and Harborworkers' Compensation Act (44 Stat. 1444 as amended; 33 U.S.C. 941, 5 U.S.C. 553), Secretary of Labor's Order No. 9-83 (48 FR 35736) and 29 CFR Part 1911, 29 CFR Part 1915 is proposed to be amended, as set forth below.

Signed at Washington, DC, this 7th day of May, 1986.

David C. Zeigler,

Acting Assistant Secretary of Labor.

PART 1915—OCCUPATIONAL SAFETY AND HEALTH STANDARDS FOR SHIPYARD EMPLOYMENT

It is proposed to amend 29 CFR Part 1915 as follows:

1. The authority citation for Part 1915 would be revised to read as follows:

Authority. Secs. 4, 6, and 8 of the Occupational Safety and Health Act of 1970, 29 U.S.C. 653, 655, 657; Sec. 41, Longshoremen's and Harborworkers' Compensation Act, 33 U.S.C. 941; Secretary of Labor's Order Nos. 12–71 (36 FR 8754), 8–76 (41 FR 25059), or 9–83 (48 FR 35736), as applicable.

Section 1915.97 Introductory text and paragraphs (c) and (j) also issued under 5 U.S.C. 553 and 29 CFR Part 1911.

2. Section 1915.97 would be amended by revising the introductory text, and paragraph (c); and by adding a new paragraph (j), as follows:

§ 1915.97 Health and sanitation.

The provisions of this section shall apply to ship repairing, shipbuilding and shipbreaking, except where indicated otherwise. Effective May 25, 1986, paragraphs (a), (b), (c), and (d) of this section shall no longer apply to shipbuilding and ship repairing but shall apply only to shipbreaking.

* * * * *

(c) The pertinent information required by paragraph (b) of this section shall be kept in any form that is readily accessible to employees that may be exposed to the hazardous chemicals or materials.

* * * * *

(j) Effective May 26, 1986, 29 CFR 1910.1200 entitled "Hazard Communication" shall apply to shipbuilding and ship repairing.

[FR Doc. 86-10862 Filed 5-15-86; 8:45 am]

BILLING CODE 4510-26-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD3 85-76]

Drawbridge Operation Regulations; Passaic River, NJ

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: At the request of Bergen County, the Coast Guard is considering a change to the regulations governing the Union Avenue drawbridge across the Passaic River, mile 13.2, Rutherford, NJ by requiring at least eight hours advance notice be given for openings from 4 p.m. to midnight daily in addition to the existing eight hours notice from midnight to 8 a.m. Consideration is also being given to permitting advance notice all day on Christmas and New Years. This proposal is being made because of a steady decrease in requests for openings of the draw during the requested time period. This action should relieve the bridge owner of the burden of having two persons constantly available to open the draw and should still provide for the reasonable needs of navigation.

DATE: Comments must be received on or before June 30, 1986.

ADDRESSES: Comments should be mailed to Commander (oan-br), Third Coast Guard District, Bldg. 135A, Governors Island, NY 10004. The comments and other materials referenced in this notice will be available for inspecton and copying at this address. Normal office hours are between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: William C. Heming, Bridge Administrator, Third Coast Guard District (212) 668–7994.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rulemaking by submitting written views, comments, data, or arguments. Persons submitting comments should include their name and address, identify the bridge, and give reasons for concurrence with or for any recommended change in the proposal. Persons desiring acknowledgment that their comments have been received should enclose a stamped, self-addressed postcard or envelope.

The Commander, Third Coast Guard District will evaluate all communications received and will determine a final course of action on this proposal. The proposed regulations may be changed in light of comments received.

Drafting Information

The drafters of this notice are Jose M. Arca Jr. project officer, and Mary Ann Arisman, project attorney.

Discussion of Proposed Rugulations

The Douglas O. Mead (Union Avenue) bridge over the Passaic River at mile 13.2 facilitates the movement of land traffic between Rutherford and Passaic. The Passaci River upstream of Union Avenue bridge has one active oil facility. The bridge provides a vertical clearance of 13 feet above Mean High Water and 18 feet above Mean Low Water. The bridge presently requires two men to safely operate the bridge. Current regulations provide that the drawbridge, shall open on signal, except that, from midnight to 8 a.m., the draw shall open on signal if at least eight hours notice is given. The proposed regulation would expand the eight hours notice period to commence at 4 p.m. daily and end at 8 a.m. and would place the bridge on advance notice all day on Christmas and New Year day.

The County intends to maintain one man on duty as a watchman and to receive notifications between 4 p.m. and 8 a.m. except Christmas and New Years day. Between 4 p.m. and 12 midnight the bridge was opened only 40 times in 1984, 42 times in 1983, 6 times in 1982 and 13 times in 1981 and 28 times in 1980.

Bergen County by resolution passed on 21 Octoer 1981, has renamed the Union Avenue bridge to Douglas O. Mead bridge as part of a program to

honor Bergen County war veterans who gave their life for their country. The bridge was officially dedicated the Douglas O. Mead bridge on 2 November 1981.

Economic Assessment and Certification

These proposed regulations are considered to be non-major under Executive Order 12291 on Federal Regulation, and nonsignificant under the Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979).

The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. The proposed change in the regulation would not prevent mariners from transiting the bridge when needed. However, between 4 p.m. and 8 a.m. eight hours advance notice would normally be required. Since the economic impact of this proposal is expected to be minimal, the Coast Guard certifies that if adopted, it will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 117

Bridges.

Proposed Regulations

In consideration of the foregoing, the Coast Guard proposes to amend Part 117 of Title 33, Code of Federal Regulations as follows:

PART 117—DRAWBRIDGE OPERATIONS REGULATIONS

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05–1(g).

2. Section 117.739 (1) is proposed to be revised as follows:

§ 117.739 Passaic River

* * * * *

(l) The draw of the Douglas O. Mead (Union Avenue) Bridge at Rutherford, mile 13.2, shall open on signal, except that: (1) From 4 p.m. to 8 a.m., the draw shall open if at least eight hours notice is given.

(2) On Christmas and New Years day, the draw shall open if notice is given prior to 4 p.m. the day prior.

Dated: May 1, 1986.

P.A. Yost,

Vice Admiral, U.S. Coast Guard Commander, Third Coast Guard District.

BILLING CODE 4910-14-M

DEPARTMENT OF AGRICULTURE

Forest Service

36 CFR Part 223

Sale and Disposal of Timber; Timber Export and Substitution

AGENCY: Forest Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposal revises the reporting requirements at 36 CFR 223.48 on the export of timber from National Forest System lands and the use of such timber to substitute for private timber exported by the purchaser. The proposed rule would change the report to an annual report of the timber exported, sold for export, exchanged or otherwise disposed of during the previous calendar year. The intended effect of the rule is to reduce the paperwork burden on purchasers of National Forest timber sales while maintaining appropriate controls on log exports.

DATE: Comments must be received by June 30, 1986.

ADDRESSES: Send written comments to R. Max Peterson, Chief (2400), Forest Service, USDA, P.O. Box 2417, Washington, D.C. 20013.

The public may inspect comments received on this proposed rule in the office of the Director, Timber Management Staff, Room 3207, South Building, 14th and Independence SW, Washington, D.C., between the hours of 8:30 a.m. and 4:30 p.m.

FOR FURTHER INFORMATION CONTACT: Stephen J. Paulson, Timber Management Staff, (202) 475–3755.

SUPPLEMENTARY INFORMATION:

Background

In response to concerns about possible increases in third party substitution of National Forest timber for private timber which is exported, the Senate Subcommittee on interior and Related Agencies Appropriations directed the Forest Service to report every 6 months on trends in log exports and substitution. In order to provide this information, the Forest Service requires purchasers of National Forest timber to report every 6 months on the disposition of harvested timber. (36 CFR 223.48)

On July 25, 1985, the Chairman of the Senate Committee on Appropriations and the Chairman of the Subcommittee on Interior and Related Agencies requested the United States General Accounting Office to review the potential impacts of tightening Forest Service log export restrictions in the West. On January 28, 1985, GAO reported its findings and concluded that there was no significant amount of third party substitution occurring in the western United States and that tightened controls were unnecessary.

Concerned about burdening purchasers with the 6-month reporting requirements, the Forest Service subsequently requested that the Subcommittee change the reporting frequency to an annual report. In light of the GAO finding and Forest Service analysis of past years' reports, the Subcommittee agreed to the Forest Service request.

This rulemaking action would not change the requirement that purchasers domestically process National Forest System timber or change the requirement for certification of domestic processing from other firms or individuals that receive unprocessed National Forest System timber. Under the proposed rule, purchasers would be required to submit an annual certified report, for the previous calendar year, on the disposition of unprocessed timber from National Forests which is sold, exchanged, or otherwise disposed of to another party and report the sale of any timber from private lands owned or controlled by the purchaser which is exported or sold for export.

Regulatory Impact

This proposed rule has been reviewed under USDA procedures and Executive Order 12291. It has been determined that this regulation is not a major rule. The regulation will have little or no effect on the economy or on individuals since the regulation is essentially procedural. The changes will result in savings to the Forest Service and purchasers of National Forest timber sales, mostly by reducing the cost to prepare, submit, and review Export and Substitution reports.

Based on both past experience and environmental assessment, this proposed rule will have no significant effect on the human environment, individually or cumulatively. Therefore, it has been categorically excluded from documentation in an environmental analysis or an environmental impact statement. (40 CFR 1508.4)

Controlling Paperwork Burdens on the Public

Under this proposed rule, individuals and firms who purchase National Forest timber sales would be required to submit reports annually rather than every 6 months. Therefore, the proposed rule would reduce the information collection requirements as defined in Office of Management and Budget (OMB) regulations at 5 CFR 1320.7. The

present annual report has OMB approval for use through March 31, 1987.

List of Subjects in 36 CFR Part 223

Exports, Government contracts, National forests, timber.

Therefore, for the reasons set forth above, Part 223 of Chapter II, Title 36, of the Code of Federal Regulations is proposed to be amended as follows:

1. The authority citation for Part 223 would continue to read:

Authority: Sec. 14, Pub. L. 94–588, 90 Stat. 2958, 16 U.S.C. 472a.

2. Revise paragraphs (a) and (b) of § 223.48 to read as follows:

§ 223.48 Reports on export or substitution of unprocessed timber.

* * * * *

(a) Submit annually, until all unprocessed timber is accounted for, a certified report on the disposition of any unprocessed timber harvested from the sale, including a description of unprocessed timber which is sold, exchanged, or otherwise disposed of to another person and a description of the relationship with the other person;

(b) Submit annually, until all unprocessed timber from the sale is accounted for, a certified report, on the sale of any unprocessed timber from private lands in the tributary area which is exported or sold for export; and

* * * * *

§§ 223.48 and 223.164 [Amended]

3. Remove the editorial note on Office of Management and Budget approval of report #0596–0021 that occurs at the end of § 223.164, and add an editorial note at the end of § 223.48 to read as follows:

Note.—The information collection requirements in the section have been approved by the Office of Management and Budget pursuant to the Paperwork Reduction Act and 5 CFR 1320. They have been assigned #0596–0021 and are approved for use through March 31, 1987.

Dated: April 23, 1986.

Peter C. Myers,

Assistant Secretary

[FR Doc. 86–11050 Filed 5–15–86; 8:45 am]

BILLING CODE 3410–11–M

VETERANS ADMINISTRATION

38 CFR Part 21

Vocational Rehabilitation and Education; Changes in the Levels of Review for Authorization of Expenditures for Training and Rehabilitation Services

AGENCY: Veterans Administration.

ACTION: Proposed regulatory amendment.

SUMMARY: It is proposed to amend § 21.430 to update the amounts that determine which VA staff may approve training and rehabilitation services. This amendment is based upon cost increases since present levels were established and administrative experience with these provisions.

DATE: Comments must be received on or before June 17, 1986. It is proposed to make this amendment effective the date of final publication in the **Federal Register.**

ADDRESSES: Interested persons are invited to submit written comments, suggestions, or objections regarding these changes to the Administrator of Veterans Affairs, 810 Vermont Avenue, NW., Washington, D.C. 20420. All written comments received will be available for public inspection only in room 132, Veterans Service Unit, at the above address only between the hours of 8 a.m. and 4:30 p.m. Monday through Friday (except holidays) until June 27, 1986.

FOR FURTHER INFORMATION CONTACT: Dr. Karen Boise, (202) 389–2886.

SUPPLEMENTARY INFORMATION: Under the provisions of § 21.430 specific limitations are established in the VA staff's authority to approve expenditures for training and rehabilitation services under chapter 31 during each calendar year of the veteran's rehabilitation program. These approval levels limit the authority of VA staff to approve expenditures, not the amount which may be authorized in the individual case. Increases in the cost of training and rehabilitation services since December 1981, when existing guidelines were promulgated, have resulted in an increase in the number of cases which must be reviewed by the VR&C (Vocational Rehabilitation and Counseling) Officer and by the Director of the field facility. The proposed amendment in authority for case managers and VR&C Officers is necessary to restore a proper balance in the proportion of cases reviewed at higher levels. The amendment will reduce unnecessary multiple reviews and allow staff to focus on those cases in which such review is desirable.

The proposal will not have a $100 million annual effect on the economy, will not cause a major increase in costs or prices, and will not have any other significant adverse effects on the economy.

The Administrator certifies that this proposed amendment will not, if promulgated, have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (FRA), U.S.C. 601–612. Pursuant to 5 U.S.C. 605(b), this proposed amendment is therefore exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604. The reason for this certification is that the proposed amendment concerns the VA staff levels at which expenditures for training and rehabilitation services must be approved. Thus, no regulatory burdens are imposed on small entities by these regulations

The Catalog of Federal Domestic Assistance Number is 64.116.

BILLING CODE 8320–01–M

38 CFR Part 21

Vocational Rehabilitation; Disposition of Cases in Which Potentially Eligible Veterans Do Not Initiate or Pursue a Claim

AGENCY: Veterans Administration.

ACTION: Proposed regulatory amendment.

SUMMARY: In the present rules the VA has established procedures governing the administrative actions to be taken when service-disabled veterans fail to pursue a claim for vocational rehabilitation services or to continue to pursue a vocational rehabilitation program for which services have been authorized. The procedures include followup by VA staff when a veteran does not initiate or continue the rehabilitation process. The proposed amendments would improve the administration of provisions for followup action by VA staff.

DATES: Comments must be received on or before June 17, 1986. It is proposed to make these amendments effective the date of final publication in the Federal Register.

ADDRESSES: Interested persons are invited to submit written comments, suggestions, or objections regarding these changes to the Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue NW., Washington, DC 20420. All written comments received will be available for public inspection only in the Veterans Service Unit, room 132 of the above address between the hours of 8 a.m. and 4:30 p.m. Monday through Friday (except holidays) until June 27, 1986.

FOR FURTHER INFORMATION CONTACT: Dr. Karen Boies, (202) 389–2686.

SUPPLEMENTARY INFORMATION: Sections 21.180 through 21.198 establish a case status system. The case status system enables the VA to monitor the veteran's progress through the rehabilitation process and provides information needed for program management.

An ambiguity in the rules for the disposition of cases in applicant status (§ 21.182) has caused unnecessary expenditure of staff time to dispose of cases in which a veteran does not initiate or pursue a claim. Those cases in which the veteran has either filed a formal or informal claim for chapter 31 benefits or has been advised that he or she may be eligible for such benefit, and has been encouraged to apply are assigned to applicant status. Under present provisions, the case status system provides for disposition of cases in the applicant status, when appropriate, through placement in interrupted status and, later, discontinued status. Assignment of a case to either interrupted or discontinued status requires followup procedures to assure that efforts are made to resolve problems which caused transfer to these statuses before terminating further attempts to secure the veteran's participation in the chapter 31 program.

However, the followup provisions in interrupted and discontinued status are not needed when a veteran is assigned to either such status from the applicant status because the applicant status procedures already provide for such followup before the case is reassigned to one of the other statuses.

We propose to amend current regulations to provide for direct assignment of cases from applicant to discontinued status if the veteran does not apply for chapter 31 benefits or fails to pursue a chapter 31 claim. The followup procedures required for other cases assigned to discontinued status would not apply to cases transferred from applicant status and the extra step of assignment to interrupted status would be eliminated.

In all other respects a case assigned to discontinued status will be handled in the same manner as other cases assigned to that status. These amendments will reduce the administrative burden resulting from current policies.

These proposed amendments do not meet the criteria for major rules as contained in Executive Order 12291, Federal Regulation. The proposal will not have a $100 million annual effect on the economy, will not cause a major increase in costs or prices, and will not have other significant adverse effects on the economy.

The Administrator certifies that these proposed amendments will not, if promulgated, have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. Pursuant to 5 U.S.C. 605(b), these proposed amendments are therefore exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604. The reason for this certification is that the proposed amendments concern the rights and responsibilities of individual VA beneficiaries under chapter 31. Thus, no regulatory burdens are imposed on small entities by these amendments.

The Catalog of Federal Domestic Assistance Number is 64.116.

Approved: April 24, 1986.

Thomas K. Turnage,
Administrator.

PART 21—VOCATIONAL REHABILITATION AND EDUCATION

38 CFR Part 21, is amended to read as follows:

1. In § 21.62, paragraph (b)(4) is revised to read as follows:

§ 21.62 Duties of the Vocational Rehabilitation Panel.

* * * * *

(b) *Consultation required.* * * *

(4) *Discontinuance.* The panel shall review any case in which discontinuance is being considered for a veteran with a service-connected disability rated 50 percent or more disabling, except cases reassigned to "discontinued" status following termination of "applicant" status. (38 U.S.C. 1504(a))

* * * * *

2. In § 21.182, paragraph (d) is added to read as follows:

§ 21.182 "Applicant" status.

* * * * *

(d) *Transfer of teminated cases to "discontinued" status.* Each instance in which a veteran's case is terminated for reasons described in paragraph (c) (4) or (5) of this section shall be placed in "discontinued" status. (38 U.S.C. 1502)

3. In § 21.197, paragraph (c)(1) and (c)(4) are revised to read as follows:

§ 21.197 "Interrupted" status.

* * * * *

(c) *Reasons for assignment to "interrupted" status.* A veteran's case may be interrupted and assigned to "interrupted" status for reasons including but not limited to the following:

(1) *Veteran does not initiate or continue rehabilitation process.* If a veteran does not begin or continue the rehabilitation process, the veteran's case will be be interrupted and assigned to "interrupted" status, including:

(i) A case in "evaluation and planning" status;

(ii) A case in "extended evaluation" status;

(iii) A case in "rehabilitation to the point of employability" status;

(iv) A case in "independent living program" status; or

(v) A case in "employment services" status.

* * * * *

(4) *Prior to assignment to "discontinued" status.* A veteran's case shall be assigned to "interrupted" status prior to discontinuance and assignment to "discontinued" status in all cases except as provided in § 21.182(d) and upon the veteran's death. The purpose of assignment to "interrupted" status is to assure that all appropriate actions have been taken to help the veteran continue in his or her program before discontinuing benefits and services.

* * * * *

(38 U.S.C. 1511)

4. In § 21.198, the introductory text of paragraph (d) is revised to read as follows:

§ 21.198 "Discontinued" status.

* * * * *

(d) *Followup of cases placed in "discontinued" status.* The VA shall establish appropriate procedures to followup on cases which have been placed in "discontinued" status, except in those cases reassigned from "applicant" status. The purpose of such followup is to determine if:

BILLING CODE 8320-01-M

POSTAL SERVICE

39 CFR Part 265

Amendments to Freedom of Information Act Regulations

AGENCY: Postal Service.

ACTION: Proposed rule.

SUMMARY: The purpose of this document is to publish advance notice of proposed changes to Postal Service regulations governing the waiver of fees. The proposed regulations increase the amount for which a general waiver of fees may be granted and extend the authority of the custodian to grant waivers of fees, or the requirement for their advance payment, in any amount.

DATE: Comments must be received on or before June 15, 1986.

ADDRESS: Written comments should be addressed to the Records Officer, Room 8121, U.S. Postal Service, 475 L'Enfant Plaza, SW., Washington, DC 20260-5010. Copies of all written comments will be available for inspection and photocopying between 9:00 a.m. and 4:00 p.m., Monday through Friday, in Room 8121 at the above address.

FOR FURTHER INFORMATION CONTACT: Betty E. Sheriff, Records Office, (202) 245-5158.

SUPPLEMENTARY INFORMATION: Section 265.8(e)(5) authorizes a general waiver of fees for a request or series of related requests amounting to less than $3.00. It is proposed that this amount be increased to comport with § 265.8(b)(1) which, in effect, grants a waiver of search fees in an amount greater than $3.00. (This section provides that the established fee of $4.25 per quarter hour for clerical search time not be charged if the search involves no more than one quarter hour.) Further, the administrative costs to process a check precludes charging for a request involving a fee in an amount of less than $10.00. For these reasons, it is proposed that the general fee waiver provision at § 265.8(e)(5) be amended to apply to requests amounting to $10.00 or less.

The authority of a custodian to waive a fee, or the requirement of its advance payment, is limited to apply to fees of less than $25.00. Fees in excess of that amount may only be waived by the General Counsel or other Officer of the Postal Service. The Postal Service has approximately 30,000 facilities nationwide at which requests for information may be received, but only about 30 officers, most of whom are centrally located. In this circumstance, the current requirement that a custodian obtain authorization from an officer to waive fees in excess of $25.00 has been found to be impractical and costly, and to cause undue delays in the processing of requests. Proposed § 265.8(e)(6) eliminates the $25.00 limitation and gives custodians the authority to waive a fee in any amount and to waive the requirement for advance payment of fees.

Accodingly, §§ 265.8(e)(5) and 265.8(e)(6) of 39 CFR 265 are modified as follows:

List of Subjects in 39 CFR Part 265

Release of Information; Postal Service.

PART 265—RELEASE OF INFORMATION

1. The authority citation for Part 265 continues to read as follows:

Authority: 39 U.S.C. 401; 5 U.S.C. 552.

2. In § 265.8, paragraphs (e)(5) and (e)(6) are revised to read as follows:

§ 265.8 Schedule of fees.

* * * * *

(e) *Payment and waiver of fees—*

* * * * *

(5) *Fees not charged for certain services.* Fees must not be charged if they would amount, in the aggregate, for a request or a series of related requests, to $10.00 or less. This general waiver does not apply to the fee for providing change of address information.

(6) *Waiver of fees by custodian.* The custodian may waive a fee, in whole or in part, or the requirement for advance payment of such a fee, when he determines that furnishing the records is primarily for the benefit of the general public.

BILLING CODE 7710-12-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

[BERC-258-P]

42 CFR Parts 405, 409, and 442

Medicare and Medicaid Programs; Benefit Period Determinations, Drug Regimen Reviews and Other Technical Changes

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Proposed rule.

SUMMARY: Under the Hospital Insurance Program (Medicare-Part A), payment for covered inpatient hospital and skilled nursing facility (SNF) services is available for a limited number of days during each benefit period or "spell of illness." Current Medicare regulations reflect the statutory provision under section 1861(a) of the Social Security Act (Act) that a beneficiary's benefit period begins on the day he or she is furnished hospital or SNF services and ends when he or she has not been an inpatient of a hospital or SNF (as defined under sections 1861 (e)(1) and (j)(1) of the Act, respectively) for 60 consecutive days.

We propose to amend our regulations to: (1) Specify that a beneficiary is an "inpatient" of a SNF and is therefore prolonging a spell of illness in a SNF only if the care received by the beneficiary meets skilled level of care conditions and (2) establish certain presumptions for determining when skilled level of care conditions have been met during a SNF stay. We are also proposing a miscellaneous provision that would permit either a registered nurse or a pharmacist to perform drug regimen reviews in SNF's or intermediate care facilities (ICF's). In addition, we would amend § 405.702 of

the regulations to remove certain cross-references that are now outdated and unnecessary.

DATE: To be considered, comments must be mailed or delivered to the appropriate address, as provided below, and must be received by 5:00 p.m. on June 16, 1986.

ADDRESS: Mail comments in writing to the following address:

Health Care Financing Administration, U.S. Department of Health and Human Services, Attention: BERC–258–P, P.O. Box 26676, Baltimore, Maryland 21207.

If you prefer, you may deliver your comments to one of the following addresses:

Room 309–G, Hubert H. Humphrey Building, 200 Independence Ave., SW, Washington, D.C.; or

Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland.

In commenting, please refer to file code BERC–258–P. Comments will be available for public inspection as they are received, beginning approximately three weeks after publication, in Room 309–G of the Department's offices at 200 Independence Avenue, SW, Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m., phone (202) 245–7890.

Thomas Hoyer (Benefit Period Deteminations and Drug Regimen Reviews), (301) 594–9445.
Luisa Iglesias (Other Technical Changes), (202) 245–0383.

SUPPLEMENTARY INFORMATION:

I. Statutory Background

Under the Hospital Insurance Program (Medicare-Part A), payment for covered inpatient hospital and SNF services is available for a limited number of days during each "spell of illness" or benefit period. (Payment is subject to applicable deductible and coinsurance amounts as set forth in section 1813(a) of the Social Security Act (Act).) Once a beneficiary has exhausted that allotted number of days (up to 150 days for inpatient hospital care if the 60 lifetime reserve days are used and 100 days for SNF care), no further Part A program payment is available for those services until the beneficiary ends that benefit period and begins a new one (section 1812(a) of the Act).

Under section 1861(a)(1) of the Act, a beneficiary's "spell of illness" begins on the day he or she is furnished inpatient hospital or SNF services and, under section 1861(a)(2) of the Act, ends when he or she has not been an inpatient of a hospital or SNF for 60 consecutive days. The law does not limit the number of benefit periods an individual may have, provided each prior period has ended.

The material following section 1861(j)(15) of the Act specified that for purposes of determining when a benefit period ends under section 1861(a)(2), a SNF is defined by section 1861(j)(1) of the Act. This latter provision defines a SNF as a facility which—

is primarily engaged in providing to inpatients

(A) skilled nursing care and related services for patients who require medical medical or nursing care; or

(B) rehabilitation services for the rehabiliation of injured, disabled, or sick persons.

Also, the material following section 1861(e)(9) of the Act specifies that for purposes of section 1861(a)(2), a hospital is any institution which meets the requirements of section 1861(e)(1) of the Act. Basically, that latter provision defines a hospital as an institution primarily engaged in providing to inpatients diagnostic and thereapeutic services, or rehabiliation services.

Therefore, under the law, the application of the terms "SNF" and "hospital" for purposes of ending a benefit period is not limited to facilities which participate, but have chosen not to participate. Any facility meeting the broad definition of hospital of SNF is considered a hospital or SNF, as appropriate, in relation to a benefit period.

II. Program Experience

The term "hospital" as used in section 1861(e) of the Act and State licensure laws has a generally accepted meaning that has seldom been questioned. However, unlike the term "hospital," the various categories of nursing and rehabiliation facilities do not have commonly accepted meanings. Accordingly, in 1967, we developed criteria to be used to assess whether a facility meets the defintion of a SNF under section 1861(j)(1) of the Act and, therefore, would be of a type in which a continued stay would prolong a beneficiary's benefit period. These criteria were published in section 3412 of the Medicare "State Operations Manual" and in the **Federal Register** as a Notice of HCFA Ruling (HCFA 83–2) December 3, 1982 (47 FR 54551). In response to a recent court decision (*Kron* v. *Heckler*, Civil Action Number 80–1332 (E.D. Louisiana, October 17, 1983)), the criteria were amended to exclude, for benefit period determinations, facilities licensed or certified solely as ICF's from status as SNF's under section 1861(j)(1) of the Act. The amended criteria, for benefit period determinations, were published in HCFA Ruling 83–3 (March 22, 1984, 49 FR 10710).

The Medicare program has continually maintained that it is the type of facility in which a beneficiary resides rather than the care he or she receives that determines whether or not a benefit period has ended. This meant that if a beneficiary was *in* a hospital meeting the section 1861(e)(1) definition or *in* a SNF meeting the section 1861(j)(1) definition, the beneficiary was considered an "inpatient" of those facilities for purposes of benefit period determinations, regardless of the level of care actually received by the beneficiary.

We believe that this is the interpretation intended by Congress. In 1967, Congress had already become aware that some beneficiaries who resided in long-term care facilities were exhausting their entitlement to hospital days due to the continuation of their benefit periods. Rather than challenge the Department's interpretation of the statute, Congress altered the statute to provide an additional 60 "lifetime reserve days" under the Part A benefit to alleviate the problems faced by such individuals. (S. Rep. No. 744, 90th Cong., 1st Sess. 70 (1967).)

Some federal district courts have supported the Department's view. See *Stoner* v. *Califano, 458 F. Supp. 781 (E.D. Mich. 1978) and Brown* v. *Richardson*, 367 F. Supp. 377 (W.D. Pa. 1973). However, four federal circuit courts have concluded that the type of care provided to the beneficiary in a SNF should affect the ending of benefit periods. See *Mayburg* v. *Heckler*, 740 F.2d 100 (1st Cir. 1984), *Levi* v. *Heckler*, 736 F.2d 848 (2nd Cir. 1984), *Friedberg* v. *Schweiker*, 721 F.2d 445 (3rd Cir. 1983), and *Kaufman* v. *Harris*, 731 F.2d 370 (6th Cir. 1984).

In general, the latter decisions have concluded that, contrary to current Medicare policy, a beneficiary can be an "inpatient" of a SNF for purposes of benefit period determinations only if the beneficiary is receiving a skilled level of care. In view of these court decisions, we are proposing in this regulation to provide that a beneficiary's care in a SNF must meet the Medicare skilled level of care requirements in order for the beneficiary to be considered an "inpatient" of a SNF. This would make our treatment of all beneficiaries consistent with the manner in which benefit period determinations are now being made, pursuant to court order, in the 1st, 2nd, 3rd and 6th federal judicial circuits.

The result of the change being proposed is that in order for a stay in a facility to prolong a benefit period, the beneficiary must be *both* in a facility which is a SNF, as defined in section 1861(j)(1) of the Act, and receiving a skilled level of care. If, for at least 60 consecutive days, either one of those elements is not met, a benefit period will terminate during the beneficiary's stay.

III. Provisions of the Regulation

A. Skilled Level of Care Requirement

These proposed regulations would not affect the current definitions of "hospital" as used in section 1861(e)(1) and "SNF" as used in section 1861(j)(1). HCFA Rulings 83–2 and 83–3 would remain in effect.

However, we are proposing to amend §409.60 of the regulations to specify that for purposes of ending a benefit period, a beneficiary is an "inpatient" of a SNF only if the beneficiary's care in the SNF meets the skilled level of care requirements contained in §409.31(b)(1) and (3) of current regulations. These requirements are part of those used to determine whether or not Medicare payment may be made for care in a SNF. Section 409.31(b)(1) provides that the beneficiary must require skilled services on a daily basis and §409.31(b)(3) provides that the daily skilled services must be ones that, as a practical matter, can only be provided in a SNF on an inpatient basis. This means that a beneficiary is an "inpatient" of a SNF only if the beneficiary receives skilled nursing or rehabilitation services (already defined in regulations at §409.31(a), and further delineated in §§409.32 and 409.33) that he or she requires on a daily basis (§409.34) and that, as a practical matter, can only be provided on an inpatient basis (§409.35). Therefore, if a beneficiary in a SNF receives daily skilled services but does not actually need them on a daily basis, or if a beneficiary receives skilled services which would normally not be performed on an inpatient basis, the beneficiary is not at a skilled level of care and the portion of the SNF stay that is not at the skilled level of care would not prolong a benefit period. In summary, to prolong a benefit period in a SNF, the beneficiary must need and receive daily skilled services that, as a practical matter, can only be provided on an inpatient basis.

We adopted this approach because it assists a beneficiary in terminating a benefit period more easily and because a number of federal courts have suggested that as soon as a patient's level of care below the skilled level of care for which Medicare SNF payment could be made, the patient is no longer receiving skilled services for purposes of maintaining inpatient status for benefit period determinations. (See, for example, Levine v. Secretary, 529 F.Supp. 333 (W.D. N.Y. 1981); Hasek v. Mathews, CCH Medicare and Medicaid Guide 1977 Transfer Binder 28,345 (N.D. Cal. 1977); and Levi v. Heckler, 575 F.Supp. 1381 (S.D. N.Y. 1983).)

We would not apply the level of care requirement contained in 42 CFR 409.31(b)(2) for purposes of determining "inpatient" status during prior SNF stays for benefit period determinations. That provision provides that, in order for Medicare payment to be made for SNF care, the services must have been furnished to treat a condition for which the patient also received inpatient hospital services or a condition which arose which the patient was receiving such treatment. This aspect of the Medicare skilled level of care definition is related to the circumstances under which the level of care triggers a benefit payment rather than the nature of the care itself. Therefore, we are not including this provision in benefit period determinations.

B. Presumptions in Applying the Level of Care Requirements

1. General

We are proposing to establish seven presumptions to aid in administering the proposal that a beneficiary can be considered an "inpatient" of a SNF only if he or she is receiving a skilled level of care. Those seven presumptions are intended to cover every situation concerning a beneficiary's prior stay in a SNF, so that in all cases, the presumptions can serve to characterize (at least initially) the level of care status of a prior SNF stay. We expect them to minimize the administrative burden associated with making these new level of care determinations as they apply to benefit period determinations and to benefit beneficiaries by expeditingthese determinations.

Four of the presumptions are based on prior claims determinations that, if correct, would leave no doubt as to whether skilled care was provided. Three of the presumptions are based on prior claims determinations that may be subject to differing interpretations.

2. Presumptions Entirely Based Upon the Accuracy of Prior Claims Determinations

The four presumptions set forth in the proposed § 409.60(c)(1) are based on prior claims payment determinations that, if correct, leave no doubt as to whether skilled care was or was not provided. As set forth in the proposed § 409.60(c)(3), the benefit period determinations resulting from those presumptions can only be changed if the beneficiary successfully appeals the prior claims determination upon which the presumption is based. Those four presumptions are that for purposes of determining whether a beneficiary has ended a benefit period—

(1) A beneficiary's care in a SNF met the skilled level of care requirements if Medicare or Medicaid made SNF benefit payments for that care (but not under Medicare limitation of liability rules at § 405.330(a), under Medicare grace day rules at § 405.330(b), or under any State Medicaid rules providing for SNF payment for administratively necessary days (ANDs) not meeting the skilled level of care requirements);

(2) A beneficiary's care in a SNF met the skilled level of care requirements if a SNF claim was paid under section 1879(e) of the Social Security Act;

(3) A beneficiary's care in a SNF did not meet the skilled level of care requirements if Medicare payment was made for the SNF care under the limitation of liability rules at § 405.330(a) or the grace day rules at §405.330(b); and

(4) A beneficiary's care in a SNF did not meet the skilled level of care requirements if a Medicaid SNF claim was denied on the grounds that the care was not at the SNF level of care (even if paid under any State Medicaid rules which provide for payment for ANDs not meeting the skilled level of care requirements).

Each of these presumptions is triggered by virture of there having been a prior Medicare or Medicaid payment decision which required a level of care finding. Concerning presumption (1), consistent with both Medicare and Medicaid payment rules, if either program made SNF payment (but not under Medicare limitation of liability, Medicare grace day, or State Medicaid and rules), the skilled level of care requirements for a prior SNF stay had to have been met. That is, for Medicare payment to be made, the condition set forth in § 409.31(b) (1), (2) and (3) must have been met and, therefore, for benefit period purposes the skilled level of care requirements in § 409.31 (b)(1) and (b)(3) had to have been met. Also, for Medicaid, the requirement in § 409.31 (b)(1) and (b) (3) had to have been met because the Medicaid definition of skilled level of care set forth in § 440.40(a)(1)(i) is the same as that set forth at § 409.31(b) (1) and (3). Presumption 2 is established because section 1879(e) limitation of liability

payments, under current Medicare instructions (see Intermediary Manual sections 3431.3 and 3431.4) are made only when skilled level services were needed and provided, but were provided in a noncertified bed. Presumption 3 is established because Medicare limitation of liability and grace day payments made for skilled nursing facility care under § 405.330 can be made only when skilled level services were not needed or not provided. Finally, presumption 4 is established because a Medicaid SNF claim is denied on level of care grounds (including those paid under various State provisions not related to level of care) only if the skilled level of care standards applicable in these regulations (§§ 409.31(b) (1) and (3)) are not met. (Under certain State Medicaid provisions, Medicaid payment may be made for inpatient care which would not otherwise be payable under Medicaid solely on the basis of a patient's need for the level of care specified. This can include payment for care in a SNF which does not meet the skilled level of care requirements; for example, care while awaiting ICF placement). Therefore, binding presumptions are appropriate in these cases unless the earlier determination is reopened and revised. (Note that presumption (2) regarding care in noncertified SNF beds is petinent only if the noncertified bed in which the patient was placed is in a part of the facility *not* certified or licensed solely as an ICF. If the beneficiary is placed in a noncertified bed in such an ICF distinct part, then, based on *Kron*, the ICF distinct part is excluded from status as a SNF under section 1861(j)(1) of the Act. Therefore, although the beneficiary received a skilled level of care as the presumption establishes, the benefit period would not be prolonged because to prolong a benefit period the beneficiary must be *both* in an 1861(j)(1) facility and receiving a skilled level of care.

Because these presumptions would be triggered by Medicare or Medicaid payment findings, beneficiaries may exercise their right to appeal a benefit period determination made as a result of them by timely appealing the claim determinations upon which the presumptions are based.

3. Other Presumptions

In the proposed 42 CFR 409.60(c)(2), we would establish three presumptions that can be challenged by the beneficiary because the prior claims determination may be subject to another interpretation with respect to the current benefit period determination. For purposes of determining whether a beneficiary has ended a benefit period, we would presume that—

(5) A beneficiary's care in a SNF meets the skilled level of care requirements if a Medicare or Medicaid claim for the SNF care was denied on other than level of care grounds (for example, denied because the three day prior hospital stay requirement was not met);

(6) A beneficiary's care in a SNF did not meet the skilled level of care requirements if a Medicare SNF claim was denied on level of care grounds and payment was not made under limitation of liability or grace day rules at § 405.330; and

(7) A beneficiary's care in a SNF did not meet the skilled level of care requirements if no Medicare or Medicaid SNF claim was submitted for the SNF stay.

In each of these three presumptions, we have established the presumption to reflect the circumstances that we believe to be the most likely to have occurred in the case. Under each presumption, however, another outcome is possible and, for that reason, beneficiaries would be allowed to present documentation (for example, medical records and statements of physicians and nurses regarding the services needed and received) to challenge the presumption.

As set forth in proposed § 409.60(c)(4), when these presumptions are applicable, Medicare beneficiaries would (in the context of the initial Medicare determination of the current claim) be advised of their opportunity to rebut the presumptions regarding any prior SNF stays. This notification would be included in the form HCFA–1954 or 1955 (when there has been an initial determination of total or partial payment denial by Medicare for the current claim) or in a separate special notice from the fiscal intermediary (to be sent prior to the HCFA Form 1533, when there has been an initial determination to make full Medicare payment for the current claim). These appeals opportunities will exist in the context of appealing determinations, made under Title 42, Part 405, Subpart G, for the current claim (that is, the claim for which looking back at the status of the prior SNF stay can affect the beneficiary's benefit period status). In connection with the appeals opportunities set forth in proposed § 409.60(c)(4), we would amend § 405.704(b)(10) to make clear that initial determinations also include determinations made under the presumptions established under proposed § 409.60(c)(2).

Showings can be made by beneficiaries at the initial determination level or at the reconsideration, Administrative Law Judge (ALJ) or Appeals Council levels. Even in cases in which a Medicaid payment determination has triggered one of these three presumptions, it is the Medicare intermediary (or the ALJ or Appeals Council, as appropriate) that evaluates any showing made by the beneficiary, and that evaluation again occurs in the context of making determinations (under Title 42, Part 405, Subpart G) for the current claim.

With regard to certain of the three presumptions contained in proposed § 409.60(c)(2), certain observations should be made. Presumption 6 (that is, proposed § 409.60(c)(2)(ii)) can be reversed because the Medicare skilled level of care definition for coverage purposes differs from the skilled level of care definition used here for benefit period determinations. Specifically, the requirement in § 409.31(b)(2) (regarding the requirement for prior hospital care related to the SNF care) is included for meeting Medicare SNF coverage requirements for payment purposes, but has not been included in these regulations as a standard for benefit period determinations. Therefore, Medicare *payment* could have been denied for a prior SNF stay on level of care grounds (that is, no payment was made under the limitation of liability rules at § 405.330) because of noncompliance with § 409.31(b)(2), even though the skilled level of care requirements established under these regulations for benefit period determinations were in fact met by the prior SNF stay. Consequently, when there has been a Medicare SNF payment denial on level of care grounds the beneficiary must be given the opportunity to demonstrate that he or she still needed and received a skilled level of care as defined by §§ 409.31(b) (1) and (3) for purposes of benefit period determinations.

This issue does not arise when a Medicaid SNF claim has been denied on level of care grounds. That is because the Medicaid skilled level of care standard for SNF coverage is the same as our proposed skilled level of care standard for benefit period determinations. Therefore, when a Medicaid SNF claim is denied on level of care grounds, it can be absolutely presumed (if the prior claim payment determination was correct) that services at the skilled level of care were not provided. (See presumption 4.)

With regard to presumption 7, it may seem equally reasonable to presume

that a SNF inpatient received skilled care. However, *Mayburg* and other court decisions (upon which our proposed changes to regulations are based) support the opposite view; that is, that we may not presume that a beneficiary in a SNF received skilled care simply because he or she resided in a SNF. Making this presumption would end a benefit period for affected beneficiaries. In some cases, this would adversely affect beneficiaries who incurred another deductible as a result. However, in other cases, beneficiaries would be protected from exhausting their benefits. We believe that presumption 7, as we propose to establish it, would primarily affect private-pay long-term SNF patients, and that, for the most part, they are not receiving skilled care.

4. Treatment of "No Payment Bills"

Hospitals and SNFs that participate in Medicare must submit Part A bills for their Medicare inpatients for days of care for which no Medicare payment may be made. These bills are referred to as "no payment" bills submitted by the SNF where a prior stay has occurred will have the same effect as Medicare SNF claims which request payment. That is because such "no payment" bills result in Medicare program payment determinations (that is, denials) that trigger the applicable presumptions. This will also be the case in any State Medicaid program that utilizes "no payment" bills that lead to Medicaid program payment determinations (denials). When the intermediary finds that a SNF has erroneously failed to submit a Medicare claim (albeit a no-pay claim), the intermediary will request compliance with Medicare rules which require such claim submission. Once the no-pay bill is submitted and the Medicare denial is made regarding the prior SNF stay, the applicable presumption would be triggered, based on the nature of the denial. Presumption 7 (that is, § 409.60(c)(2)(iii)) would not apply.

5. Prior Stay Determinations—One Finding Only

Proposed 42 CFR 409.60(d) provides that the Medicare program will recognize only one level of care status finding (made under the Medicare or Medicaid programs) for any given day of care in a SNF. We do not want any given day of care in an SNF to have more than one status for purposes of Medicare payment. We believe that a day should not, for example, be considered as covered for one purpose and paid for under Medicare and then later considered as non-covered for purposes of establishing a new benefit period. Therefore, this regulation requires that the status of any day of care in an SNF about which a program determination has already been made will also be the status of that day for purposes of a determination under this regulation. A beneficiary who desires to challenge the validity of an earlier determination in connection with an assertion about whether a new benefit period should or should not begin must first appeal that decision (subject to the applicable rules for reopening prior claims). This policy applies only to days of care to which a prior claims determination specifically applies, not to days before or after the period for which the determination was made.

This rule means that if, in the case of the three rebuttable presumptions, a determination regarding a prior SNF stay has already been made in the context of adjudicating another claim, an intermediary or ALJ would be bound by that earlier characterization of the prior SNF stay in adjudicating a current claim; that is, unless the beneficiary can demonstrate that the earlier characterization was erroneous. The result is that beneficiaries may wish to appeal earlier decisions regarding the type of care they received in a prior stay but, if HCFA reviews the determination and agrees, a payment adjustment in the prior claim would be made, if necessary, to reflect the revision made to that earlier determination.

6. Validation of Patient Records

We recognize that the use of presumptions does create an incentive for patients to represent the care they received in an SNF as unskilled or skilled, depending on whether beginning a new benefit period would benefit them. As we have noted elsewhere in this preamble, we intend these presumptions to be used for ease in administration but also plan to encourage intermediaries to review medical records when there is a basis for questioning the level of care alleged by the SNF or beneficiary.

IV. Effective Date

These regulations would become effective 30 days after the publication of a final rule. We are proposing that these regulations would be applied only to those claims for which determinations have not yet become final (under Part 405, Subpart G) on or after the effective date of the final rule.

When adjudicating a claim to which these regulations would apply, we would determine whether there has been any prior SNF stay in the beneficiary's current benefit period that would end the benefit period under these regulations. We would examine any prior SNF stay in the beneficiary's current benefit period, regardless of whether or not the prior stay occurred immediately before the stay in the current claim. In all cases where these regulations would result in a prior SNF stay ending a benefit period, the new benefit period would begin with the stay for which the current claim, that is, the claim that has not yet become final, was filed.

V. Regulatory Impact Statement

A. Introduction

Executive Order 12291 (E.O. 12291) requires us to prepare and publish a regulatory impact analysis for any major rule. A major rule includes any proposed regulation that woud have an annual effect on the economy of $100 million or more; cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. In addition, consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601–612) we also prepare and publish an initial regulatory flexibility analysis for any proposed regulation that would have a significant impact on a substantial number of small entities. A small entity is a small business, a nonprofit enterprise, or a government jurisdiction (such as a county or township) with a population of less than 50,000.

The proposals on drug regimen reviews discussed in section VI., below, and the proposed technical changes discussed in section VII., would not have a significant effect on Medicare or Medicaid program expenditures or on State or provider operations. However, our proposals on benefit period determinations would have some significant effects. Although we do not believe that those effects would be of such a magnitude as to require either a regulatory impact analysis or a regulatory flexibility analysis, it is clear from our program experience, as well as past judicial proceedings, that the consequences of following this proposal will be received with great interest and concern. Therefore, we have provided the following discussion of the expected impact of these proposals, in order to clarify our reasons for not preparing analyses under either E.O. 12291 or the RFA.

B. Benefit Period Determinations

As noted above in this preamble, we are proposing that for benefit period determinations a beneficiary's care in a SNF must meet certain skilled level of care requirements in order for the beneficiary to be considered an "inpatient" of the SNF.

We anticipate that implementation of this proposal on a nation-wide basis could generate certain costs and savings to the Medicare and Medicaid programs, improvements in the administration of State long-term care programs, and advantages and disadvantages to some beneficiaries.

Budget Impact

We estimate a final net annual budget impact of $10 million in Medicare costs. This impact reflects increased Medicare net costs offset by Medicaid savings, as follows:

[In million of dollars]

Medicare cost	Medicare savings	Net Medicare cost	Medicaid savings	Final net cost
$50	−$35	$15	−$5	$10

The Medicare costs represent an expected increase in benefit payments while the Medicare savings reflect income received from new deductibles generated by those beneficiaries beginning new spells of illness under these regulations. Medicaid savings would result from Medicare payment for services currently paid for by Medicaid for certain dually eligible beneficiaries. Thus, the net budget impact represents an increase in Medicare program expenditures to implement this change in our benefit period policies to accommodate the dictates of several federal court decisions.

Beneficiary Impact

In practice, the proposed regulation would affect different beneficiaries differently, depending on the specific circumstances of each beneficiary's situation. The proposed rule would make it easier for a beneficiary to end a benefit period and thereby begin a new one. For a beneficiary who has used enough inpatient hospital or SNF care to now be using copayment days, lifetime reserve days or be in "days exhausted" status, it would be beneficial to end one period and begin a new one. As a result of this proposed rule, these beneficiaries could start a new benefit period if they reside in a nursing home. This would generate more payment liability for the Medicare program and reduce the beneficiary's liability because the beneficiary would not continue to pay a copayment or full charges amount.

On the other hand, the proposed rule would not be advantageous for a beneficiary who has not made extensive use of the inpatient hospital benefit. Such a beneficiary would have paid his or her required deductible when beginning the benefit period. As long as the beneficiary is in Medicare full payment days (that is, before copay days are triggered) it is to his or her advantage to have the current benefit period prolonged until the full-pay days are exhausted. Thus, the beneficiary would avoid paying another deductible for the full-pay Medicare days (that is, for covered care) to which the person is already entitled in becoming a hospital inpatient again. As a result of this proposed new rule, beneficiaries in this latter category who "reside" in a SNF (that is, do not receive skilled care) would be required to pay new deductibles if they become hospitalized. Under existing rules (in those areas of the country not under a Mayburg-type court order), those SNF stays would prolong a benefit period, and no deductible would be owed at the beginning of a new hospitalization.

Other Program Effects

We anticipate at least one other, less significant, outcome from the proposed change to our current benefit period policy. By providing States with incentives to implement the long-term care provisions of their Medicaid programs more efficiently, we believe that more proper level of care determinations for recipients would be made.

Under the proposed rule, Medicare will presume (in the case of beneficiaries entitled both to Medicare and Medicaid) that skilled care was needed and received if a State makes a Medicaid SNF payment for the care. As a result of that presumption, if Medicaid SNF payments are made for a beneficiary in a SNF, but who is not at the skilled level of care, the beneficiary is unable to end his Medicare benefit period. Thus, beneficiaries who are either in copay or exhausted status under the Medicare SNF or hospital inpatient benefit would receive either reduced or no Medicare payment for any impatient SNF or hospital services needed subsequent to the non-skilled stay for which the State made Medicaid SNF payment, and Medicaid liability would continue.

The result is that for those beneficiaries who are also Medicaid-eligible, the State would become the liable payor for the cost of the services not paid for by Medicare. We believe that this proposed rule would create a fiscal incentive to States to assure that the distinction between SNF and ICF care is properly made. This improvement, over time, should lead to more accurate SNF and ICF payment rates and more appropriate use of nursing home beds.

Summary

We conclude that the proposed change to our current policy regarding benefit period determinations would produce certain outcomes. These impacts would result from our conforming policies to the dictates of several circuit court decisions compelling us to make these changes in a significant number of States. These rules would make nationwide the provisions now applicable in those States covered by the court orders. We estimate a net increase in Medicare costs resulting from increased benefit payments. We also recognize that some beneficiaries would be advantaged and others disadvantaged by this proposal.

In summary, we have determined, and the Secretary certifies, that this proposed rule would not result in a significant economic impact on a substantial number of small entities. In addition, the estimated impact would not meet the $100 million threshold or the other criteria for identifying major rules under Executive Order 12291. Because this proposed rule would not result in an annual economic impact that meets the threshold criteria of Executive Order 12291 or of the RFA, we have not prepared either a regulatory impact analysis or a regulatory flexibility analysis.

C. Paperwork Reduction Act of 1980

The proposed changes regarding benefit period determinations and the drug regimen review provision in section VI., following, would not impose any additional information collection requirements. Consequently, they need not be reviewed by the Executive Office of Management and Budget (EOMB) under the authority of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.).

Section 405.1127(a) of this rule contains an information collection requirement that has been approved by the Office of Management and Budget under control number 0938–0364.

VI. Drug Regimen Reviews

The Medicare SNF regulations (§ 405.1127(a)) and the Medicaid SNF regulations (§ 442.202(c)), by reference to Part 405, Subpart K, require that a pharmacist perform a monthly drug

regimen review on each patient in the SNF. However, under Medicaid regulations located at 42 CFR 442.336(a), in ICFs, these monthly reviews must be performed by a registered nurse. This presents a problem for some facilities dually certified as both a SNF and an ICF that might find it administratively more efficient to designate either a pharmacist or a registered nurse to conduct reviews for all its patients regardless of the level of care.

In recognition of this situation and in order to provide flexibility for SNFs and ICFs, we are proposing to modify §§ 405.1127(a) and 442.336(a) of the regulations to permit either a pharmacist or a registered nurse to conduct these reviews at the option of the facility. This proposal would alleviate the problem this presents to those facilities dually certified as both a SNF or an ICF.

VII. Technical Changes

We are proposing to make technical changes to 42 CFR 405.702 (as a result of other amendments to regulations) to remove two cross-references in that section.

On September 1, 1983, we published in the **Federal Register** a final rule with comment period that revised § 405.401(c) of the regulations (48 FR 39609). The old paragraph (c) dealt with intermediaries in general, but the current paragraph (c) as amended by the rule now deals with outpatient maintenance dialysis and related services. Therefore, in the first sentence of § 405.702, we would remove, as outdated and unnecessary, the parenthetical reference "(see § 405.401(c))". Also, as a result of regulations published on April 4, 1980 (45 FR 22935), certain sections of regulations formerly appearing in Title 42 under Part 405 were redesignated as Part 489. For the same reasons as above, we would amend the second sentence of § 405.702 to remove the parenthetical "(see § 405.605)".

VIII. Response to Comments

Because of the large number of comments we receive on proposed regulations, we cannot acknowledge or respond to them individually. However, in preparing the final rule, we will consider all comments received timely and respond to the major issues in the preamble to that rule.

List of Subjects

42 CFR Part 405

Administrative practice and procedure, Health facilities, Health professions, Kidney diseases, Laboratories, Medicare, Nursing homes, Reporting and recordkeeping requirements, Rural areas, X-rays.

42 CFR Part 409

Health facilities, Medicare.

42 CFR Part 442

Grant programs-health, Health facilities, Health professions, Health records, Medicaid, Nursing homes, Nutrition, Reporting and recordkeeping requirements, Safety.

42 CFR Chapter IV would be amended as set forth below:

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

A. 42 CFR Part 405 would be amended as set forth below:

1. The authority citation for Part 405, Subpart G is revised to read as follows:

Authority: Secs. 1102, 1154, 1155, 1869(b), 1871, 1872 and 1879 of the Social Security Act (42 U.S.C. 1302, 1320c, 1395ff(b), 1395hh, 1395ii and 1395pp).

§ 405.702 [Amended]

2. In § 405.702, in the first and second sentences, the parenthetical references "(see § 405.401(c))" and "(see § 405.605)", respectively, are removed as outdated and unnecessary.

3. In § 405.704, the introductory language to paragraph (b) is reprinted and (b)(10) is revised to read as follows:

§ 405.704 Actions which are initial determinations

* * * * *

(b) Requests for payment by or on behalf of individuals. An initial determination with respect to an individual includes any determination made on the basis of a request for payment by or on behalf of the individual under Part A of Medicare, including a determination with respect to:

(10) The beginning and ending of a spell of illness, including a determination made under the presumptions established under § 409.60(c)(2) of this chapter, as specified in § 409.60(c)(4) of this chapter.

* * * * *

4. The authority citation for Part 405, Subpart K is revised to read as follows:

Authority: Secs. 1102, 1814, 1832, 1833, 1861, 1863, 1865, 1866, 1871, of the Social Security Act; 42 U.S.C. 1302, 1395f, 1395k, 1395l, 1395x, 1395z, 1395bb, 1395cc, 1395hh.

5. Section 405. 1127(a) is revised to read as follows:

§ 405.1127 Condition of participation—pharmaceutical services.

* * * * *

(a) Standard: Supervision of services. The pharmaceutical services are under the general supervision of a qualified pharmacist who is responsible to the administrative staff for developing, coordinating, and supervising all pharmaceutical services. The pharmacist (if not a full-time employee) devotes a sufficient number of hours, based upon the needs of the facility during regularly scheduled visits to carry out these responsibilities. The pharmacist or a registered nurse reviews the drug regimen of each patient at least monthly, and reports any irregularities to the medical director and administrator. The pharmacists submits a written report at least quarterly to the pharmaceutical services committee on the status of the facility's pharmaceutical service and staff performance.

PART 409—MEDICIARE BENEFITS, LIMITATIONS, AND EXCLUSIONS

B. 42 CFR Part 409 would be amended as set forth below:

1. The authority citation for Part 409 is revised to read as follows:

Authority: Secs. 1102, 1812, 1813, 1814, 1861, 1866, 1871, 1881, and 1882 of the Social Security Act (42 U.S.C. 1302, 1395d, 1395e, 1395f, 1395x, 1395cc, 1395hh, 1395rr, and 1395tt)

2. Section 409.60 is revised to read as follows:

Scope of Benefits

§ 409.60 Benefit periods.

(a) *When benefit periods begin.* The initial benefit period begins on the day the beneficiary receives inpatient hospital or SNF services for the first time after becoming entitled to hospital insurance. Thereafter, a new benefit period begins whenever the beneficary receives inpatient hospital or SNF services after he or she has ended a benefit period as described in paragraph (b) of this section.

(b) *When benefit periods end.* (1) A benefit period ends when a beneficiary has, for at least 60 consecutive calendar days, not been an inpatient in any hospital that meets the requirements of section 1861(e)(1) of the Act or in any SNF that meets the requirements of section 1861(j)(1) of the Act.

(2) For purposes of ending a benefit period, a beneficiary was an inpatient of a SNF if his or her care in the SNF met the skilled level of care requirements specified in § 409.31(b) (1) and (3).

(c) *Presumptions.* (1) For purposes of determining whether a beneficiary was

an inpatient of a SNF under paragraph (b)(2) of this section—

(i) A beneficiary's care met the skilled level of care requirements if inpatient SNF claims were paid for those services under Medicare or Medicaid, unless such payments were made under § 405.330 or Medicaid administratively necessary days provisions which result in payment for care not meeting the skilled level of care requirements;

(ii) a beneficiary's care met the skilled level of care requirements if a SNF claim was paid under section 1879(e) of the Social Security Act;

(iii) A beneficiary's care did not meet the skilled level of care requirements if a SNF claim was paid for the services under § 405.330;

(iv) A beneficiary's care did not meet the skilled level of care requirements if a Medicaid SNF claim was denied on the grounds that the services were not at the skilled level of care (even if paid under applicable Medicaid administratively necessary days provisions which result in payment for care not meeting the skilled level of care requirements);

(2) For purposes of determining whether a beneficiary was an inpatient of a SNF under paragraph (b)(2) of this section a beneficiary's care in a SNF is presumed—

(i) To have met the skilled level of care requirements if a Medicaid or Medicare claim was denied on grounds other than that the services were not at the skilled level of care;

(ii) Not to have met the skilled level of care requirements if a Medicare SNF claim was denied on the grounds that the services were not at the skilled level of care and payment was not made under § 405.330; or

(iii) Not to have met the skilled level of care requirements if no Medicare or Medicaid claim was submitted by the SNF.

(3) When the intermediary makes a benefit period determination based upon paragraph (c)(1) of this section, the beneficiary may seek to reverse the benefit period determination by timely appealing the prior Medicare SNF claim determination under 42 CFR Part 405, Subpart G, or the prior Medicaid SNF claim under 42 CFR Part 431, Subpart E.

(4) When the intermediary makes a benefit period determination under paragraph (c)(2) of this section, the beneficiary will be notified of the basis for the determination, and of his or her right to present evidence to rebut the determination that the skilled level of care requirements specified in § 409.31 (b)(1) and (b)(3) were or were not met on reconsideration and appeal under 42 CFR, Part 405, Subpart G.

(d) *Limitation on benefit period determinations.* When the intermediary considers the same prior SNF stay of a particular beneficiary in making benefit period determinations for more than one inpatient Medicare claim—

(1) Medicare will recognize only the initial level of care characterization for that prior SNF stay (or if appealed under 42 CFR Part 405 Subpart G, the level of care determined under appeal); or

(2) If part of a prior SNF stay has one level of care characterization and another part has another level of care characterization, Medicare will recognize only the initial level of care characterization for a particular part of a prior SNF stay (or if appealed under 42 CFR Part 405 Subpart G, the level of care determined under appeal).

(e) *Relation of benefit period to benefit limitations.* The limitations specified in §§ 409.61 and 409.64, and the deductible and coinsurance requirements set forth in Subpart G of this part apply for each benefit period. The limitations of § 409.63 apply only to the initial benefit period.

PART 442—STANDARDS FOR PAYMENTS FOR SKILLED NURSING AND INTERMEDIATE CARE FACILITY SERVICES

c. 42 CFR Part 442 would be amended as set forth below:

1. The authority citation for Part 442 continues to read as follows:

Authority: Sec. 1102 of the Social Security Act (42 U.S.C. 1302), unless otherwise noted.

2. Section 442.336(a) is amended by adding a reference to a pharmacist. As revised, paragraph (a) reads as follows:

§ 442.336 Review of medications.

(a) A pharmacist or a registered nurse must review medications monthly for each resident and notify the physician if changes are appropriate.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 18

[GEN Docket 83-806; FCC 86-208]

FCC Regulations Concerning RF Lighting Devices

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The FCC proposes to amend Part 18 of its Rules to impose radiated limits on emissions below 30 MHz caused by the operation of radio frequency (RF) lighting devices. The intended effect is to minimize the interference potential of RF lighting devices to authorized radio services, such as AM broadcasting, amateur, etc.

DATES: Comments must be submitted on or before June 30, 1986, and reply comments on or before July 15, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Liliane Volcy, Office of Engineering and Technology, tel: 653-7316.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, GEN Docket 83-806, adopted April 18, 1986, and released May 8, 1986.

The full text of Commission decisions is available for inspection and copying during normal business hours in the FCC Dockets Banch (Room 230), 1919 M Street, NW, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street NW, Suite 140, Washington, DC 20037.

Summary of Notice of Proposed Rule Making

1. Radio frequency (RF) lighting devices are capable of interfering with AM broadcasting, safety, amateur, and other radio services due to the fact they produce RF emissions in the MF and HF regions of the spectrum. In order to mitigate potential interference problems, we are currently imposing conduction limits on emissions in the 0.45-30 MHz range, and radiation limits on emissions in the 30-1000 MHz range. We now propose that radiation limits below 30 MHz be imposed to assure further continued non-interference with authorized radio services on a long term basis. The FCC laboratory will verify compliance with these proposed levels using the testing procedures outlined in

FCC/OST MP–5, "Methods of Measurements of Radio Noise Emissions from Industrial, Scientific, and Medical Equipment" (1985). Compliance with the new radiation limits below 30 MHz, would be required for all RF lighting devices marketed one year after the effective date of the final rules.

2. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 601 et seq., the proposed rule should not, if promulgated, have a significant economic impact on a substantial number of small entities because most RF lighting devices can be designed to meet the limits recommended herein.

3. This is a non-restricted notice and comment rule making proceeding. See § 1.1231 of the Commission's rules, 47 CFR 1.1231, for rules governing permissible ex parte contacts.

4. Pursuant to applicable procedures set forth in §§ 1.415 and 1.419 of the Commission's Rule, 47 CFR 1.415 and 1.419, interested parties may file comments on or before June 30, 1986, and reply comments on or before July 15, 1986. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding.

List of Subjects in 47 CFR Part 18

Business and industry, Household appliance.

William J. Tricarico,

Secretary.

It is proposed that Part 18 of Title 47 of the Code of Federal Regulations be amended as follows:

PART 18—INDUSTRIAL, SCIENTIFIC, AND MEDICAL EQUIPMENT

1. The authority citation for Part 18 continues to read as follows:

Authority: Secs. 4, 303, 307, 48 Stat. 1066 1082, 1083, as amended; Sec. 303, 82 Stat. 290; 47 U.S.C. 154, 302, 303, 307.

2. Section 18.203 is amended by revising paragraph (c) and by adding two new paragraph (d) and (e) as follows:

§ 18.203 Equipment authorization.

* * * * *

(c) For ISM equipment, other than RF lighting devices, grants of equipment authorization issued, as well as on-site certifications preformed, before March 1, 1986, remain in effect and no further action is required.

(d) Consumer RF lighting devices for which applications for certification are filed before [six months after effective date of final rules] are not subject to the field strength limits specified below 30 MHz in § 18.305(c). Non-consumer RF lighting devices verified before [nine months after effective date of final rules] are not subject to the field strength limits below 30 MHz specified in § 18.305(c).

(e) Notwithstanding the provisions of paragraph (d), above, the marketing and importation of any RF lighting devices, the certification or verification of which shows that they meet the field strength limits specified only above 30 MHz in § 18.305(c), shall not be permitted after [one year after effective date of final rules]. However, the use of such devices may continue in accordance with the general operating conditions of § 18.111.

3. Section 18.305(c) is revised to read as follows:

§ 18.305 Field strength limits.

* * * * *

(c) The field strength limits for RF lighting devices shall be the following:

Frequency (MHz)	Distance (m)	Field Strength Limit (dBV/m) Applications	
		Non-consumer	Consumer
0.009 to 0.49	300	2.4/F(MHz)	2.4/F(MHz)
0.49 to 1.705	30	24/F(MHz)	24/F(MHz)
1.705 to 30	30	15	15
30 to 88	3	300	100
88 to 216	3	500	150
216 to 1000	3	700	200

* * * * *

§ 18.307 [Amended]

4. Section 18.307 is amended by removing note 2 and redesignating note 3 as note 2.

47 CFR Part 21

[CC Docket No. 86–179; FCC 86–226]

Multipoint Distribution Service (MDS) Regulatory Classification

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Commission has issued an NPRM that proposes providing single channel MDS and multichannel MDS appicants with the option to make their service offerings available on either a common carrier or non-common carrier basis. Those applicants electing to offer service as common carriers would be subject to the Commission's regulatory policies applicable to non-dominant, forborne common carriers. The Commission also proposed to eliminate both § 21.903(b)(1), the "content restriction rule", and § 21.903(b)(2), the "fifty-percent rule", from the rules and regulations governing MDS common carriers. This action was initiated as a means of encouraging a competitive marketplace environment for the full and flexible development of this service.

DATES: Comments are due by June 30, 1986, Reply comments are due by July 15, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554

FOR FURTHER INFORMATION CONTACT: Cassandra C. Thomas, Domestic Facilities Division, Common Carrier Bureau, (202) 634–1855.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rulemaking, CC Docket No. 86–179, adopted April 30, 1986, and released May 9, 1986.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230) 1919 M Street NW, Washington, DC 20554. The complete text of this decision can also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Summary of Notice of Proposed Rulemaking

1. The Commission has adopted a Notice of Proposed Rulemaking (NPRM) proposing to (1) permit MDS applicants, permittees, and licensees the option of rendering service on either a common carrier basis or on a non-common carrier basis. The proposal would apply to single-channel as well as multichannel MDS applicants; (2) extend the Commission's non-dominant, forbearance policies to MDS common carriers; and (3) eliminate § 21.903(b)(1), the "content-restriction rule", and § 21.903(b)(2), the "fifty-percent rule", from its rules. 47 CFR 21.903(b)(1) and 21.903(b)(2).

2. *Common carrier* v. *non-common carrier.* While acknowledging MDS' principal use as a delivery system for the distribution of premium video entertainment programming to end-users, the Commission recognized that the continued development of MDS for video entertainment programming as well as non-video entertainment programming is facilitated by its continued classification as a common carrier service. At the same time, the maximum and flexible development of the service would be enhanced by our proposal to permit MDS applicants the option to make their service offerings available on a non-common carrier basis. Entities that elect to provide

service on a common carrier basis would be subject to the requirements of Title II in the manner discussed at paragraph 3 below. Alternatively, parties choosing non-common carrier status would be subject only to the requirements of Title III imposed on applicants seeking a radio license authorization.

3. *MDS non-dominant, forborne common carriers.* The Commission's decision to extend its non-dominant, forbearance policies to MDS carriers is predicated on the tentative conclusion that, as a whole, these carriers lack the market power to control prices for their service offerings in such a way as to constitute unjust, unreasonable and unduly discriminatory rates and anti-competitive practices contrary to the statutory obligations imposed by Sections 201(b) and 202(a) of the Communications Act of 1934, as amended. The Commission observed that the MDS receives vigorous competition from other services capable of transmitting video entertainment programming as well as from other transmission services. Based on this analysis, it proposed to treat MDS common carriers as non-dominant carriers. In addition, it also determined that reliance on its carrier and customer complaint process would serve as an adequate mechanism for ensuring that common carriers meet their statutorily imposed obligation to refrain from setting unjust, unreasonable and discriminatory rates and practices.

4. *Elimination of §§ 21.903(b)(1) and 21.903(b)(2).* The proposal recommends eliminating both §§ 21.903(b) and 21.903(b)(2) from the Commission's rules and regulations. Section 21.903(b)(1), the restriction on content control, was found to be unnecessary because it merely restated the principle that a common carrier may not undertake to influence the content of the message transmitted. Similary, § 21.903(b)(2), the "fifty-percent" rule, was also determined to be unnecessary in view of the manner in which the service has developed and how it is anticipated it will develop in the future. The Commission noted that the subscriber non-affiliation rule embodied in § 21.903(b)(2) may not be necessary to ensure the availability of transmission time and capacity to users other than the licensee. It also observed that the stated practice in the MDS industry is for operators to lease 100% of their transmission time and all of their capacity to unaffiliated parties, even though § 21.903(b)(2) would allow carriers to lease up to 50 percent of their transmission time and capacity to related entities. In addition, the Commission further stated that in light of its proposal to permit entities to elect to offer MDS on a common carrier basis or on a non-common carrier basis, a party choosing to offer service to an affiliate would be able to do so by rendering MDS on a non-common carrier basis.

5. This is a non-restricted notice and comment rulemaking proceeding. *See* § 1.1231 of the Commission's Rules, 47 CFR 1.1231 for rules governing permissible ex parte contacts.

6. In accordance with the Regulatory Flexibility Act of 1980, 5 U.S.C. 603, this proceeding will remove a significant regulatory restriction now imposed upon both small and large MDS carriers. Public comment is requested on the initial regulatory flexibility analysis set out in full in the Commission's complete decision. This proposal has also been analyzed with regard to the Paperwork Reduction Act of 1980 and found to contain no new or modified form, information collection and/or recordkeeping, labeling, disclosure, or record retention requirements. The proposal will not increase or decrease burden hours imposed on the public.

7. Pursuant to applicable procedures set forth in §§ 1.415 and 1.419, of the Commission's Rules, 47 CFR 1.415 and 1.419, interested parties may file comments on or before June 30, 1986, and reply comments on or before July 15, 1986. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding.

Ordering Clause

8. Accordingly, notice is hereby given of rulemaking to amend the Commission's Rules and Regulations in accordance with the rule proposals set forth at the end of this document. Authority for this proposed rulemaking is contained in Sections 4 (i) and (j), and 303 of the Communications Act of 1934, as amended, 47 U.S.C. 4(i), 4(j), and 303 and Section 553 of the Administrative Procedure Act, 5 U.S.C. 553.

List of Subjects in 47 CFR Part 21

Communications common carriers, Radio.

Part 21 of Title 47 of the Code of Federal Regulations is amended as follows:

PART 21—DOMESTIC PUBLIC FIXED RADIO SERVICES

Subpart K—Multipoint Distribution Service

1. The authority citation for Part 21 continues to read as follows:

Authority: 47 U.S.C. 154, 309.

2. Section 21.900 is amended by revising the first sentence of the introductory paragraph and paragraph (c) to read as follows:

§ 21.900 Eligibility.

Authorizations for stations in this service will be granted to existing and proposed communications common carriers or non-common carriers.

* * * * *

(c) The public interest, convenience, and necessity would be served by a grant thereof. The applicant shall submit a statement indicating whether service will be provided on a common carrier or non-common carrier basis. In addition, the applicant shall submit a statement indicating whether there is any affiliation or relationship to any intended or likely subscriber or program originator.

3. Paragraph (b) of § 21.903 is revising introductory paragraph, removing paragraphs (b)(1) and (b)(2), redesignating paragraph (b)(3) as (b)(1), revising the new paragraph (b)(1), redesignating paragraph (b)(4) as (b)(2), and by revising paragraph (c) as follows:

§ 21.903 Purpose and permissible service.

* * * * *

(b) Unless otherwise directed or conditioned in the applicable instrument of authorization, Multipoint Distribution Service stations may render any kind of communcations service consistent with the Commission's rules and the legally applicable tariff of the carrier or on a non-common carrier basis.

(b)(1) Unless service is rendered on a non-common carrier basis, the carrier must control the operation of all receiving facilities (including any equipment necessary to convert the signal to a standard television channel but exlcuding the television receiver); and

* * * * *

(c) Non-dominant common carriers are required to charge just, reasonable and non-discriminatory rates and are subject to the Commission's complaint process, but are not required to file a tariff with the Commission. Although tariff filings with the Commission are not necessary, those carrier's desiring to file a tariff may continue to do so. In those instances, the carriers tariff shall fully described the parameters of the service to be provided, including the degree of privacy of communications a subscriber can expect in ordinary service. If the ordinary service does not provide for complete security of transmission, the tariff shall make

provision for service with such added protection upon request.

William J. Tricarico,

Secretary.

47 CFR Part 21

[Docket 20490]

Common Carrier Radio Licensing; Termination of Proceeding

AGENCY: Federal Communications Commission.

ACTION: Proceeding Terminated.

SUMMARY: The Commission has terminated Docket 20490 which proposed to amend Part 21 of the Commission's Rules relating to licensing of common carrier microwave stations because most of the issues have been resolved. The few issues remaining unresolved in Docket 20490 have been incorporated into CC Docket 86-128 which proposes a comprehensive revison of Part 21.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Emily Williams, Domestic Facilities Division, Common Carrier Bureau, (202) 634-1869.

SUPPLEMENTARY INFORMATION:

Order Terminating Proceeding

In the matter of Amendment of Parts 21 and 43 of the Commission's rules and regulations relative to various procedural requirements for the Domestic Public Fixed Radio Services; Docket No. 20490, FCC 86-160.

Adopted April 8, 1986.
Released April 11, 1986.

By the Commission:

This proceeding was initiated May 29, 1975 (40 FR 24021, June 4, 1975) by the issuance of a Notice of Proposed Rulemaking which sought to promulgate new rules in parts 21 and 43 of the Commission's Rules to simplify and improve our processing of common carrier radio applications. Most of the proposed rules were adopted in the First Report and Order, 55 FCC 2d 744 (1975), and the Second Report and Order 76 FCC 2d 273 (1980). Several proposals have never been adopted, however.

Since the release of the Notice of Proposed Rulemaking in this Docket there have been a number of important developments in the domestic common carrier radio industry, the Communications Act and our own regulations. These changes have required us to review all the rules relating to the Domestic Fixed Radio Services. Accordingly, we have adopted a Notice of Proposed Rulemaking (NPRM) that proposes a comprehensive revision of Part 21 of our rules. (51 FR 13258, April 18, 1986). The NPRM incorporates the unresolved proposals from the notice in this docket that remain viable in today's industry and environment.

Accordingly, it is ordered that this proceeding is terminated.

Federal Communications Commission.

William J. Tricarico,

Secretary.

BILLING CODE 6712-01-M

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

49 CFR Part 193

[Docket PS-89, Notice]

Fire Protection and Security of Waterfront Liquefied Natural Gas Facilities

AGENCY: Research and Special Programs Administration (RSPA).

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to extend the scope of the existing standards governing fire protection and security of liquefied natural gas (LNG) facilities to cover facilities at waterfront LNG plants other than facilities that involve marine cargo transfer operations and facilities located in navigable waters. The proposed amendment is needed to comply with mandatory provisions of the Pipeline Safety Act of 1979 and to conform the existing standards with the United States Coast Guard's revised assessment of responsibilities for port safety and security. The proposed amendment would require that the affected facilities at waterfront LNG plants meet the same standards for fire protection and security that now apply to similar facilities at more than 100 non-waterfront LNG plants in the United States.

DATE: Interested persons are invited to submit written comments on this proposal before August 14, 1986. Late filed comments will be considered so far as practicable.

ADDRESS: Comments should be sent to the Dockets Branch, Room 8426, Research and Special Programs Administration, U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590, and identify the docket and notice numbers. All comments and other docket material are available in Room 8426 for inspection and copying between the hours of 8:30 a.m., and 5:00 p.m. each working day.

FOR FURTHER INFORMATION CONTACT: L.M. Furrow, 202-426-2392.

SUPPLEMENTARY INFORMATION: Section 152(a) of the Pipeline Safety Act of 1979 (49 U.S.C. 1674a(b)), required the Secretary of Transportation to establish, within 270 days after November 30, 1979, minimum safety standards for operation and maintenance of liquefied natural gas (LNG) facilities. With certain exceptions for waterfront LNG plants, as explained below, RSPA issued the requisite standards on October 17, 1980, including, in accordance with 49 U.S.C. 1674a(d)(3), associated standards for fire protection and security of LNG facilities and personnel qualifications and training. The new standards were published as Subparts F-J of Part 193 (Docket OPSO-46; 45 FR 70390, October 23, 1980), completing a comprehensive set of safety standards for LNG facilities begun January 30, 1980, by issuance of standards for siting, design, and construction (45 FR 9189; February 11, 1980).

The United States Coast Guard (USCG) has been developing regulations for the storage and handling of LNG and other hazardous materials at waterfront facilities. To avoid inconsistent regulations and duplication of effort regarding waterfront LNG plants, a memorandum of understanding (MOU) was signed February 7, 1978 (44 FR 8146). Among other things, the 1978 MOU made the establishment of regulatory requirements for fire protection and security matters at waterfront LNG plants an exclusive USCG responsibility. Consequently, waterfront LNG plants are specifically excepted from the scope of RSPA's standards in Part 193 governing fire protection (Subpart I) and security (Subpart J) of LNG facilities (§§ 193.2801 and 193.2901). Because of this exclusion, the related qualification and training requirements (Subpart H) for fire protection and security personnel do not apply at waterfront LNG plants. All other Part 193 operation and maintenance standards do apply to waterfront LNG plants, however, except for marine cargo transfer systems and associated facilities (§ 193.2001(b)(3)) and any LNG facility located in navigable waters (§ 193.2001(b)(4)).

The term "waterfront LNG plant" is defined in Part 193 as "an LNG plant with docks, wharves, piers, or other

structures in, on, or immediately adjacent to the navigable waters of the United States or Puerto Rico and any shore area immediately adjacent to those waters to which vessels may be secured and at which LNG cargo operations may be conducted." There are five LNG plants in the United States which are now or have been operational waterfront LNG plants. Four are LNG import terminals: (1) Distrigas Corporation, Everett, Massachusetts (2) Columbia LNG Corporation, Cove Point, Maryland; (3) Southern Energy Company, Elba Island, Georgia; and (4) Trunkline LNG Company, Lake Charles, Louisiana. One, Philips-Marathon, Kenai, Alaska is an export terminal. Only the Distrigas and Philips plants are currently operational. The remaining three import terminals are temporarily shut down due to high contract costs for base-load LNG. A proposed import waterfront plant, Western LNG Terminal, Point Conception, California, has undergone considerable planning, but has been placed on hold. Also, an export waterfront LNG plant in Alaska, originally proposed for bringing Alaskan LNG to Western and the lower 48 States, frequently appears in the literature as a continuing consideration. In addition, a proposal to enlarge or build new LNG facilities in Kenai for exporting Alaskan LNG to Japan is actively being pursued.

Since 1980, when the Part 193 fire protection and security standards were adopted, USCG has reassessed the scope of its port safety and security responsibilities.

Also, since then RSPA and the gas pipeline industry have had several years' experience applying the standards to over 100 non-waterfront LNG plants. Apart from the marine transfer aspects, many of these plants are similar in size and operating characteristics to waterfront LNG plants. Given these considerations, RSPA and USCG have reconsidered the division of responsibilities in the 1978 MOU regarding fire protection and security regulations.

Consequently, a revised MOU has been adopted. It is published in this issue of the **Federal Register** as part of USCG's rulemaking notice on waterfront LNG plants. The revised MOU assigns RSPA new responsibility for regulating fire protection and security. It also recognizes that due to a statutory change (49 U.S.C. 1671(12)), RSPA's responsibility for regulating LNG facilities does not extend to any structures or equipment (or portions thereof) located in navigable waters. All other duties assigned by the 1978 MOU remain the same. More specifically, the revised MOU assigns RSPA responsibility for regulating fire protection and security of all waterfront LNG facilities except those facilities located between the vessel and the last manifold (or valve) immediately before the receiving tanks and any structures or equipment (or portions thereof) located in navigable waters. USCG is responsible for fire protection, security, and all other matters pertaining to these excepted facilities except for RSPA's responsibility for site selection of the onshore portion of marine cargo transfer systems and associated facilities.

In view of this new division of regulatory responsibilities and the mandate of the Pipeline Safety Act of 1979 to establish operation and maintenance standards for LNG facilities which cover fire protection, security, and associated personnel qualification and training (49 U.S.C. 1674a(b) and (d)(3)), RSPA is proposing to delete the exceptions of waterfront LNG plants from the fire protection and security standards of Part 193. Removal of the exceptions, which are provided in §§ 193.2801 and 193.2901, would simultaneously cause the related personnel qualification and training requirements of Subpart H of Part 193 to apply to waterfront LNG plants (§§ 193.2709, 193.2715 and 193.2717). As provided by the existing § 193.2001(b)(3), if the proposed amendments to §§ 193.2801 and 193.2901 are adopted as final, the fire protection and security standards of Subparts I and J and the related rules in Subpart H would remain inapplicable to marine cargo transfer systems and associated facilities at waterfront LNG plants. Section 193.2001(b)(4) now provides that Part 193 does not apply to any structures or equipment (or portions thereof) located in navigable waters.

When final rules for fire protection and security were published in Subparts H, I, and J, operators of non-waterfront LNG plants were allowed varying extended periods to prepare for compliance before the rules became effective. Extra time was necessary to procure and install new equipment and to develop the required personnel training program and procedures for fire protection and security. In contrast, RSPA's experience with waterfront LNG plants shows that the operators already voluntarily comply with most, if not all, of the fire protection and security rules of Part 194. They, therefore, should not need a lengthy period in which to bring their facilities into full compliance before the rules become mandatory. RSPA proposes, therefore, that after final rules are published in this proceeding, a period of 6 months be provided before the rules take effect.

This notice does not propose any substantive change to the existing rules in Subparts H, I, or J of Part 193. Those rules cover aspects of fire protection and security of LNG facilities that should need no differentiation with regard to waterfront location. RSPA intends to establish identical requirements for non-waterfront as well as waterfront LNG plants. Comments that suggest modifications to existing rules will be considered, but unless clearly based on waterfront location, they will be set aside for future consideration in a separate proceeding involving all LNG facilities.

Classification. The proposed amendments to the regulations are considered to be nonmajor under Executive Order 12291 and nonsignificant under DOT regulatory policies and procedures (44 FR 11034, February 26, 1979) based on the evaluation of costs and benefits contained in Docket OPSO-46. Also, the agency certifies that this proposal will not have a significant economic impact on a substantial number of small entities, since small entities do not now, and are not expected to, own or operate waterfront LNG plants because of the high capital costs involved. RSPA's experience with waterfront LNG plants shows that the expected impact of this rulemaking on existing and planned facilities would not be substantial enough to warrant a full evaluation of the costs and benefits involved.

List of Subjects in 49 CFR Part 193

Fire prevention, Security measures, Liquefied natural gas facilities.

Accordingly, RSPA proposes to amend Part 193 of Title 49 of the Code of Federal Regulations as follows:

1. The authority citation for Part 193 is revised to read as follows:

Authority: 49 U.S.C. 1674a; 49 CFR 1.53.

2. By revising § 193.2801 to read as follows:

§ 193.2801 Scope.

This subpart prescribes requirements for fire prevention and fire control at LNG plants.

3. By revising § 193.2901 to read as follows:

§ 193.2901 Scope.

This subpart prescribes requirements for security at LNG plants.

Issued in Washington, DC, on May 9, 1986 under authority delegated by 49 CFR Part 106, Appendix A.

Robert L. Paullin,

Director, Office of Pipeline Safety.

BILLING CODE 4910-60-M

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 79-04; Notice 3]

Federal Motor Vehicles Safety Standards; Side Impact Protection; Correction

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Correction.

SUMMARY: This document corrects a notice announcing a public meeting on side impact protection. The notice referenced various research results that the agency believed would be of interest to persons planning to attend the meeting and provided an incorrect listing of the public dockets that contained the research. This notice lists the correct dockets.

FOR FURTHER INFORMATION CONTACT: Mr. J.E. Tomassoni, NRM-12, National Highway Traffic Safety Administration, Room 5320, 400 Seventh Street SW., Washington, D.C. 20590, (202) 426-2242.

SUPPLEMENTARY INFORMATION: On April 8, 1986 (51 FR 11957), NHTSA published in the **Federal Register** a notice announcing a public meeting on side impact protection. For the convenience of persons planning to attend the meeting, the notice identified relevant research on side impact protection and listed the agency's dockets in which the information was filed. The docket listings for some of the documents were incorrect. Attached is a complete listing of all the referenced research material and the corrected docket listings:

1. "Results of the National Highway Traffic Safety Administration's Thoracic Side Impact Protection Research Program" Hackney et al., SAE Paper 840886 (See Docket 79-04, General Reference, Entry 55).

2. "Structural Improved Side Impact Protection in Europe," European Experimental Vehicles Committee (EEVC) Working Group, 9th International Technical Conference on Experimental Safety Vehicles. (See Docket 79-04, General Reference, Entry 51).

3. "The CCMC Mobile Deformable Barrier for Lateral Collision Testing," Committee of Common Market Automobile Constructors Working Group, 10th International Technical Conference on Experimenatl Safety Vehicles (See Docket 79-04, General Reference, Entry 47).

4. "Results of the Motor Vehicle Manufacturers Association Component and Full Vehicle Side Impact Test Procedure Evaluation Program," Wasko and Wilson, 10th International Technical Conference on Experimental Safety Vehicles (See Docket 79-04, General Reference, Entry 49).

5. "A Force Measuring Mechanical Test Device for Estimating and Comparing the Energy Absorbing Characteristics of Vehicle Side Panels." Daniel, *et al.*, 9th International Technical Conference on Experimental Safety Vehicles. (See Docket 79-04, General Reference, Entry 63.)

6. "Development of Dummy and Injury Index for NHTSA's Thoracic Side Impact Protection Research Program," Eppinger, *et al.* SAE Report No. 840885 (See Docket 79-04, General Reference, Entry 46).

7. "The EUROSID Side Impact Dummy," EEVC, 10th International Technical Conference on Experimental Safety Vehicles (See Docket 79-04, General Reference, Entry 45).

8. "Thoracic Impact: A Viscous Tolerance Criterion," Viano and Lau (See Docket 74-14, General Reference, Entry 579).

In addition, the notice incorrectly noted the hours that the agency's docket section is open. The docket is open from 8:00 am to 4:00 p.m.

Issued on May 13, 1986.

Barry Felrice,

Associate Administrator for Rulemaking.

[FR Doc. 86-11049 Filed 5-15-86; 8:45 am]

BILLING CODE 4910-59-M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1135

[Ex Parte No. 290 (Sub-2)]

Railroad Cost Recovery Procedures

AGENCY: Interstate Commerce Commission.

ACTION: Extension of time to file comments to notice of proposed rulemaking and reopened proceeding.

SUMMARY: In a decision served May 1, 1986, and published in the Federal Register on May 2, 1986 (51 FR 16363), the Commission proposed to modify its rules governing railroad cost recovery procedures by requiring railroads to adjust their rates to take into account declines in the rail cost adjustment factor. That notice established May 16, 1986, as the date for filing initial comments and May 23, 1986, as the date for filing replies in this proceeding. In a motion filed May 8, 1986, the Association of American Railroads (AAR) seeks a 14-day extension of the time for filing initial and reply comments. AAR states that the extension is necessary because of the complexity and importance of the issues, and because of the short time period originally allotted for comments. Some shipper respondents oppose the extension request; some do not.

While we recognize the complexity and importance of the issues, we will grant only a seven-day extension in the time for filing opening comments. Although the comment period established in our May 1, 1986, decision appears short, in fact we informed the public in our decision served April 18, 1986, that comments would soon be sought on an expedited basis in this matter.

Moreover, the parties have been aware of the issues involved for several months. Because delays in resolving this matter could result in substantial revenue losses to the shipping public and could preclude timely issuance of the third quarter Rail Cost Adjustment Factor (currently due to be issued on June 20, 1986), we conclude that the full extension sought by AAR is not warranted.

Accordingly, AAR's petition is granted in part. Initial comments will now be due on May 23, 1986. Because of the Memorial Day holiday, reply comments will not be due until June 2, 1986.

DATES: Initial comments are due May 23, 1986; reply comments are due June 2, 1986.

FOR FURTHER INFORMATION CONTACT: Craig M. Keats, (202) 275-7602.

Decided: May 13, 1986.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Sterrett, Andre, and Lamboley. Commissioner Andre voted to grant the two-week extension. Commissioner Lamboley was absent and did not participate.

James H. Bayne,

Secretary.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Proposed Endangered Status for Warea Amplexifolia (Wide-Leaf Warea)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Service proposes to determine a plant in the Mustard family (Brassicaceae), *Warea amplexifolia* (wide-leaf warea), to be an endangered species pursuant to the Endangered Species Act (Act) of 1973, as amended. Critical habitat is not being proposed. This species occurred historically in a small region of central Florida in Lake County, western Orange County, extreme northwestern Osceola County, and northern Polk County. It is now limited to only four sites in Lake and Polk Counties. Habitat at all of the other sites at which the species was known to occur has been destroyed by intensive agricultural (citrus) and urban developments.

This proposal, if made final, would implement the Federal protection and recovery provisions afforded by the Act for this plant. Comments on this proposal are invited from all interested parties.

DATES: Comments from all interested parties must be received by July 15, 1986. Public hearing requests must be received by June 30, 1986.

ADDRESSES: Comments and materials concerning this proposal should be sent to the Field Supervisor, Endangered Species Field Office, U.S. Fish and Wildlife Service, 2747 Art Museum Drive, Jacksonville, Florida 32207. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Mr. David J. Wesley, Endangered Species Field Supervisor, at the above address (904/791-2580 or FTS 946-2580).

SUPPLEMENTARY INFORMATION:

Background

Warea amplexifolia was originally described by Thomas Nuttall in 1822 from a specimen collected in central peninsular Florida by N. A. Ware. Nuttall at first placed this plant in the genus *Stanleya* but in 1834 transferred it to the genus *Warea* and provided an amplified description that accommodated specimens from the Florida panhandle. The panhandle specimens were later recognized as a distinct species, *Warea sessilifolia*, by Nash. Shinners (1962) proposed a new name for the peninsular species, *Warea auriculata*, but other reviewers (Payson 1922, Channel and James 1964, Judd 1980) consider *Warea amplexifolia* to be the correct name. The plant has been collected infrequently during the years since the early 1800's, probably because of its extremely restricted geographical range. It is now known to occur at only four localities in Lake and Polk Counties, Florida.

Warea amplexifolia is in the mustard family (Brassicaceae). It is an erect herb growing to a height of about 0.6 meters (3 feet), with slender branching stems arising from an elongate tap root. The leaves are alternately arranged along the stem and are generally heart-shaped. They are about 8 millimeters (0.3 inch) to about 30 millimeters (1.3 inches) long and from about 4 millimeters (0.2 inch) to nearly 20 millimeters (0.8 inch) wide, with conspicuous basal lobes which clasp the stem. The flowers are showy and are borne in small, rounded, puff-like clusters at the ends of the branches. Each flower has 4 pale purple petals with a rounded upper portion, an elongated stalk-like lower portion, and 6 stamens which protrude above the petals. The pistil is narrowly cylindrical and is borne at the end of a long stalk. The fruit is a dry, thin, curved pod of about 30 millimeters (1.0 inch) to about 75 millimeters (3.0 inches) in length which is borne at the end of a 9–14 millimeter (0.3–0.5 inch) long stalk. The pod (silique) eventually splits lengthwise into two portions which spread apart revealing a thin central partition around which the small brown seeds are attached.

Warea amplexifolia is occasionally confused with the three other species of the genus. It is distinguished from *Warea sessilifolia* by its conspicuously heart-shaped leaves and lighter purple flowers; it is easily separated from *Warea carteri* and *Warea cuneifolia* by its stalkless and auriculate-based leaves. Keys to the species of *Warea* are given by Payson (1922), Small (1933) and Channel and James (1964).

Warea amplexifolia is a summer annual herb, with showy flowers, visited by various Hymenoptera (bees) and Lepidoptera (butterflies). Reproduction is exclusively sexual, by the production of seeds which are probably released from the pods by wind action. The small seeds generally fall near the parent plant. No information exists on the yearly fluctuation in seed production, seed viability, germination requirements, or the extent of soil storage. Flowering occurs from mid-August to early October, and fruiting occurs from late September to mid-November. Senescence (old age) occurs just before the fruit matures; the population overwinters as seeds.

The following information is from Judd (1980). *Warea amplexifolia* is endemic to the Lake Wales Ridge of central peninsular Florida. It was known to occur in Lake County, Orange County, Osceola County, and Polk County, but is now confined to only Lake and Polk Counties. the Lake Wales ridge is an elongated area of raised and usually dry soils, with elevations up to about 100 meters (300 feet), extending from central Highlands County northward and gradually disappearing in southern Marion County. The region supports dry forests of *Pinus palustris* (long-leaf pine) or *Pinus clausa* (sand pine), and various communities dominated by scrubby oaks such as *Quercus laevis* (turkey oak), *Quercus geminata* (sand live oak), *Quercus incana* (bluejack oak), *Quercus myrtifolia* (myrtle oak), and *Quercus chapmanii* (Chapman's oak), or *Ceratiola ericoides* (Florida rosemary). *Warea amplexifolia* is restricted to *Pinus palustris* and scrubby oak forests. Most of the Lake Wales ridge has undergone intensive agricultural development and now supports extensive citrus groves. The remaining portion is under extremely heavy pressure from agricultural and urban developments. These developments have resulted in a loss of habitat for *Warea amplexifolia*, and threaten the survival of the species at the four sites where it still occurs in Lake and Polk Counties.

Section 12 of the Endangered Species Act of 1973 directed the Secretary of the Smithsonian Institution to prepare a report on plants considered to be endangered, threatened or extinct. The Secretary of the Smithsonian presented this report (House Document No. 94–51) to Congress on January 9, 1975. On July 1, 1975, the ervice published a notice in the **Federal Register** (40 FR 27823) of its acceptance of the Smithsonian report as a petition within the context of Section 4(c)(2) of the Act. On June 16, 1976, the Service published a proposed rule in the **Federal Register** (41 FR 24523) to determine approximately 1,700 vascular plant species recommended by the Smithsonian Report to be endangered species pursuant to section 4 of the Act. *Warea amplexifolia* was included in the Smithsonian Report, the July 1, 1975, notice, and the June 6, 1976, proposal.

The 1978 Endangered Species Act Amendments required that all proposals over 2 years old be withdrawn, except

that a 1-year grace period was given to proposals already over 2 years old. On December 10, 1979, the Service published a notice of withdrawal of the June 6, 1976, proposal, along with four other proposals which had expired (44 FR 70796). On December 15, 1980, the Service published a revised notice of review in the Federal Register (45 FR 82480); *Warea amplexifolia* was included as a category-1 species (species for which data in the Service's possession indicate listing is warranted). A supplement to the Notice of Review (48 FR 53640, November 28, 1983) treated *Warea amplexifolia* as a category-2 candidate (species for which data in the Service's possession indicate listing is possibly appropriate). The 1985 updated review of plant candidates (50 FR 39526, September 27, 1985) maintained *Warea amplexifolia* in category 2. This reclassification was based on a report of the species being found in Alabama, subsequently found to be incorrect.

Section 4(b)(3)(B) of the Endangered Species Act, as amended in 1982, requires the Secretary to make findings on certain pending petitions within 12 months of their receipt. Section 2(b)(1) of the Act's Amendments of 1982, further requires that all petitions pending on October 13, 1982, be treated as having been newly submitted on that date. This was the case for *Warea amplexifolia* because of the acceptance of the 1975 Smithsonian Report as a petition. On October 13, 1983, October 12, 1984, and October 11, 1985, the Service made 12-month findings that the petition to list *Warea amplexifolia* was warranted, and that although pending proposals had precluded its proposal, expeditious progress was being made to add other species to the list. Biological data, supplied by Judd (1980) and supplemented by a field investigation in 1985, fully support a listing of *Warea amplexifolia* as endangered. The present proposal is based primarily on Judd's biological data, and constitutes the next 12-month finding requirement of section 4(b)(3)(B) of the Act for this species. All four sites listed by Judd as containing populations of *Warea amplexifolia* were revisited in 1985. Three of these four sites were found to still contain habitat which could support the species. The fourth site has been lost to commercial development since Judd completed his survey. An additional site was discovered in 1985 on the grounds of the Bok Tower Gardens, Lake Wales, Polk County; it was reported to the Fish and Wildlife Service by Kent Perkins of the University of Florida Herbarium on November 14, 1985.

Summary of Factors Affecting the Species

Section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations (50 CFR Part 424) promulgated to implement the listing provisions of the Act set forth the procedures for adding species to the Federal Lists. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). these factors and their application to *Warea amplexifolia* (Nuttall) Nuttall (wide-leaf warea) are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* This has been, and continues to be, the primary threat to the survival of *Warea amplexifolia*. The species is known at present from only the following three sites of Judd (1980), all of which were relocated in 1985, and one additional site reported to the Fish and Wildlife Service by Kent Perkins, University of Florida Herbarium, in personal communication of November 14, 1985:

1. Leesburg Site (Lake County)—A population of ca. 250 plants occupy a woodlot or roughly 1 acre. The woodlot is surrounded by development (urban and citrus), but is now part of the Lake Griffin State Recreation area.

2. Clermont Site (Lake County)—About 700 plants (the largest population known) inhabit a woodland of roughly 10 acres. The woodland is privately owned (by a mining company) and is surrounded by orange groves.

3. Haines City Site (Polk County)—About 200 plants inhabit a privately owned woodland of about 1 to 2 acres in size surrounded by orange groves.

4. Lake Wales Site (Polk County)—A population of about 24 plants was discovered in 1985 at the Pine Ridge Reserve on the grounds of the Bok Towers Gardens. This area is about 50 acres in size and is a remnant of the original longleaf pine vegetation. It is managed by the Gardens to preserve its flora.

The species is known or assumed extirpated from four sites in Orange County and one site in both Lake and Osceola Counties within its historical range (Judd 1980). Judd further noted that very few areas of upland, dry, open *Pinus palustris* woods exist at the present time in the area of well-drained white sandy soil from Leesburg to Haines City. This area is now covered with citrus groves, with the few remaining wooded areas occupying mainly lowland sites. A search of the Clermont, Haines City, and Leesburg areas revealed no additional localities for *Warea amplexifolia*.

Thus, of the 10 sites where the species has been known to occur historically, six have already been destroyed by agricultural and urban development. The remaining four sites are small, the three are privately-owned; two of these are very vulnerable to development pressures. Altogether, fewer than 1,200 plants are known to survive on less than 65 acres of land. All present populations are surrounded by citrus groves and/or urban developments (Orlando, Tavares, Leesburg, etc.).

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* According to Judd (1980), *Warea amplexifolia* has potential as a cultivated ornamental because of its showy, light purple flowers clustered in dense "puff-like" terminal racemes. The plant is striking in full bloom, and is highly vulnerable to picking by vandals and curiosity seekers.

C. *Disease or predation.* Not applicable.

D. *The inadequacy of existing regulatory mechanisms. Warea amplexifolia* was listed as endangered in 1985 under the Preservation of the Native Flora of Florida Law (Section 581.185 of the Florida Statutes). This Florida law regulates taking, and the sale of plants, but it does not provide habitat protection.

E. *Other natural or manmade factors affecting its continued existence.* Because this species is an annual, and extremely restricted in both range and members, it is very vulnerable to disturbance and natural disasters. The failure of any one of the four remaining populations to set seed in the fall, could result in the extirpation of that population and a further reduction in the already small genetic variability of the species.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to propose this rule. Based on this evaluation, the preferred action is to list *Warea amplexifolia* as endangered. The species is extremely limited in range and numbers, and occurs mainly on private lands in rapidly growing areas. A failure to list this species, or a proposal to list it as threatened, would not recognize the fact that available data indicate it is in danger of extinction throughout its entire range. Critical habitat is not being proposed for *Warea amplexifolia* for the reasons discussed in the following section.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that to the maximum extent prudent and determinable, the Secretary designate any habitat of a species which is considered to be critical habitat at the time the species is determined to be endangered or threatened. The Service finds that designation of critical habitat is not prudent for this species at this time. As stated under Factor B in the "Summary of Factors Affecting the Species," *Warea amplexifolia* is a striking plant when in bloom, and has a potential for ornamental cultivation. In addition, its showy, light purple flowers are conspicuous in the field, and it would be a great temptation for flower lovers or for vandals to pick them. Since there are only four remaining populations of this species, any molestation of them by curiosity seekers or vandals could result in their extinction. Therefore, a determination of critical habitat would provide an additional threat to the species by supplying precise information to the general public on where the species may be found. All involved parties and landowners will be notified of the location and importance of protecting this species' habitat. Protection of this species' habitat will be addressed through the recovery process and through the section 7 jeopardy standard. Because of these factors, the Service believes that a determination of critical habitat is not prudent for *Warea amplexifolia*.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. Such actions are initiated by the Service following listing. The protection required of Federal agencies and the prohibitions against taking are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402, and are now under revision (see proposal at 48 FR 29990; June 29, 1983). Section 7(a)(4) requires Federal agencies to confer informally with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, section 7(a)(2) requires Federal agencies to ensure that activities they authorizes, fund, or carry out are not likely to jeopardize the continued existence of such a species or destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service. Since all presently known sites for *Warea amplexifolia* are on private or State owned land, there will be no effect from the above requirement unless a private action requires some Federal action, such as funding or permits.

The Act and its implementing regulations found at 50 CFR 17.61, 17.62, and 17.63 set forth a series of general trade prohibitions and exceptions that apply to all endangered plant species. All trade prohbitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.61, apply. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to import or export an endangered plant, transport it in interstate or foreign commerce in the course of commercial activity, sell or offer it for sale in interstate or foreign commerce, or remove it from areas under Federal jurisdiction and reduce it to possession. *Warea amplexifolia* is not known at present from any Federal lands. Certain exceptions can apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.62 and 17.63 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered species under certain circumstances. It is anticipated that few trade permits would be sought or issued for *Warea amplexifolia*, since it is not in cultivation or common in the wild. Requests for copies of the regulations on plants and inquiries regarding them may be addressed to the Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, DC 20240 (703/235–1903).

Public Comments Solicited

The Service intends that any final action resulting from this proposal will be as accurate and as effective as possible. Therefore, any comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning any aspect of this proposed rule are hereby solicited. Comments particulaly are sought concerning:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to this species;

(2) The location of any additional populations of this species and the reasons why any habitat should or should not be determined to be critical habitat as provided by section 4 of the Act;

(3) Additional information concerning the range and distribution of this species; and

(4j) Current or planned activities in the subject areas and their possible impacts on this species.

Final promulgation of the regulation on *Warea amplexifolia* will take into consideration the comments and any additional information received by the Service, and such communications may lead to adoption of a final regulation that differs from this proposal.

The Endangered Species Act provides for a public hearing on this proposal, if requested. Requests must be fild within 45 days of the date of the proposal. Such requests must be made in writing and addressed to the Field Supervisor, Endangered Species Field Office, 2747 Art Museum Drive, Jacksonvile, Florida 32207.

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Notices

Federal Register
Vol. 51, No. 95
Friday, May 16, 1986

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Committee on Administration; Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. No. 92-463), notice is hereby given of a meeting of the Committee on Administration of the Administration Conference of the United States, to be held at 2:30 p.m. on Wednesday, May 28, 1986, in the Secretary's Conference Room, Room 5859, at the Department of Commerce, 14th Street & Constitution Avenue, NW., Washington, D.C.

The Committee will meet to discuss the following projects:

(a) The proposed recommendation on agency use of alternative dispute resolution techniques, based on a project by Philip J. Harter, Esq.; and,

(b) Professor Burnele V. Powell's preliminary analysis on agency use of declaratory orders.

Attendance is open to the interested public, but limited to the space available. Persons wishing to attend should notify the Office of the Chairman of the Administrative Conference by Friday, May 23. The Committee Chairman, if he deems it appropriate, may permit members of the public to present oral statements at the meeting. Any member of the public may file a written statement with the Committee before, during or after the meeting.

For further information concerning this meeting, contact Charles Pou, Jr., Office of the Chairman, Administrative Conference of the United States, 2120 L Street, NW., Suite 500, Washington, D.C. (Telephone: 202-254-7065.) Minutes of the meeting will be available on request.

Richard K. Berg,
General Counsel.
May 14, 1986.

Office of Grants and Program Systems

Policy Advisory Committee for the Science and Education Research Grants Program; Renewal

Notice is hereby given that the Secretary of Agriculture has renewed the Policy Advisory Committee for two years. The purpose of this Committee is to advise the Secretary with respect to areas of agricultural research to be supported, priorities to be adopted, and procedures to be followed in implementing programs of research grants to be awarded competitively.

The Policy Advisory Committee will meet twice annually in Washington, DC, to assess the Competitive Research Grants Program in relation to progress in funded areas; recommend shifts in resources to concentrate more effort in certain ongoing areas; or in new areas, advise on ways to improve guidelines and evaluation procedures.

It has been determoined that the renewal of the Policy Advisory Committee is in the public interest in connection with the duties and responsibilities of the Department of Agriculture as lead agency of the Federal Government of agricultural research.

Done at Washington, DC, this 6th day of May, 1986.

John J. Franke, Jr.,
Assistant Secretary for Administration.

DEPARTMENT OF COMMERCE

Agency Form Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of the Census
Title: 1986 Post-Enumeration Survey Followup of Los Angeles, California
Form number: Agency—DC-1301U; OMB—NA
Type of request: New collection
Burden: 400 respondents; 400 reporting hours
Needs and uses: This survey will be used to determine whether people were counted in the 1986 Census of Los Angeles. The information will be used to match the Post Enumeration Survey and the Census for estimates of coverage
Affected public: Individuals or households
Frequency: One time
Respondent's obligation: Mandatory
OMB desk officer: Timothy Sprehe, 395-4814.

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals (202) 377-4217, Department of Commerce, Room 6622, 14th and Constitution Avenue NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Timothy Sprehe, OMB Desk Officer, Room 3235, New Executive Office Building, Washington, D.C. 20503.

Dated: May 9, 1986.
Edward Michals,
Departmental Clearance Officer.

Agency Form Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration
Title: Incidental Taking of Sea Turtles
Form number: Agency—N/A; OMB—N/A
Type of request: New collection/emergency submission
Burden: 100 respondents; 8 reporting hours
Needs and uses: To support the closure by the State of Texas of a shrimping area to allow shrimp to grow to a marketable size, NOAA is opening up a geographical area for a limited time that would otherwise be closed to shrimp trawlers. The proposed action is likely to result in the capture, injury or harassment of endangered or threatened sea turtles. The information collection will be used to monitor shrimping operations to ensure that allowable incidental take levels are not exceeded.
Affected public: Businesses or other for-profit institutions; small businesses or organizations
Frequency: Other (By fishing trip)
Respondent's obligation: Mandatory
OMB desk officer: Sheri Fox, 395-3785.

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377-4217, Department of Commerce, Room 6622, 14th and Constitution Avenue NW., Washington, D.C. 20230.

Written comments and recommendations for the proposed information collection should be sent to Sheri Fox, OMB Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503.

Dated: May 9, 1986.

National Oceanic and Atmospheric Administration

Western Pacific Fishery Management Council; Public Meetings

The Western Pacific Fishery Management Council's Scientific and Statistical Committee (SSC), and Lobster Plan and Bottomfish/Seamount Grounfish Plan Development Teams will convene public meetings as follows:

Lobster Plan Development Team (PDT)—will convene May 23, 1986, at 12:30 p.m., at the Council's Office, 1164 Bishop Street, Room 1405, Honolulu, HI, to discuss the outcome of the recent public information meeting (April 29, 1986) on lobsters; review recommendation of legal minimum tail width for common slipper lobster (*Scyllarides squammosus*); discuss state/federal consistency and enforcement issues per recent changes in the spiny lobster regulations, as well as discuss other Team business.

Bottomfish/Seamount Groundfish PDT—will convene May 27, 1986, at 8:30 a.m., at the Pagoda Hotel, Penthouse Room, 1525 Rycroft Street, Honolulu, HI, to discuss the preparation of a bottomfish annual report-format and information base; review progress of developing a Northwestern Hawaiian Islands (NWHI) bottomfish access management plan, and discuss other Team business.

SSC—will convene May 27, 1986, from 1:30 p.m. to 5 p.m.; reconvene May 28, from 8:30 a.m. to 5 p.m., at the same location as stated above for the Bottom fish/Seamount Groundfish PDT meeting. The SSC will review progress on an access management amendment to the Bottomfish Framework Fishery Management Plan; review recommendations of the Lobster Planning Team on management of the NWHI fisheries, i.e., slipper lobsters closed seasons economic conditions of the fishery, and the comments of the lobster fishermen on those recommendations; review and comment on the final 1985 lobster annual report as well as discuss any other SSC business. A detailed agenda will be available through the Council's Office after May 9. For further information contact Kitty Simonds, Executive Director, Western Pacific Fishery Management Council, 1164 Bishop Street, Room 1405, Honolulu, HI; telephone: (808) 523-1368.

Dated: May 12, 1986.

BILLING CODE 3510-22-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjusting the Import Limit for Certain Apparel Products From the Democratic Socialist Republic of Sri Lanka

May 13, 1986.

The Chairman of the Committee for Implementation of Textile Agreements (CITA), under the authority contained in E.O 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 19, 1985. For further information contact Nathanial Cohen, Trade Reference Assistant, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Background

A CITA directive date May 24, 1985 (50 FR 21923) established limits for certain specified categories of cotton, wool, and man-made fiber textile products, including Category 341 (women's, girls' and infants' cotton blouses and shirts), produced or manufactured in Sri Lanka and exported during the agreement period which began on June 1, 1985 and extends through May 31, 1986. The limit for Category 341 is filled. At the request of the Government of the Democratic Socialist Republic of Sri Lanka, special carryforward in the amount of 20,000 dozen is being applied to the restraint limit, increasing it from 526,939 dozen to 546,939 dozen for the current agreement year. The limit for Category 341 during the agreement period beginning on June 1, 1986 will be adjusted to account for carryforward used in the current agreement year.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44872), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

William H. Houston III,
Chairman, Committee for the Implementation of Textile Agreements.
May 13, 1986.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directive of May 24, 1985, from the Chairman of the Committee for the Implementation of Textile Agreements, concerning imports into the United States of certain cotton, wool, and man-made fiber textile products, produced or manufactured in Sri Lanka and exported during the agreement period which began on June 1, 1985.[1]

Effective on May 23, 1986, paragraph 1 of the directive of May 24, 1985, as amended, is hereby further amended to include an adjusted restraint limit for Category 341 of 546,539 dozen.[2]

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 86-11102 Filed 5-15-86; 8:45 am]

BILLING CODE 3510-DR-M

Adjusted Restraint Limit for Category 334 Produced or Manufactured in Sri Lanka

May 13, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 19, 1986. For further information contact Nathaniel Cohen, Trade Reference Assistant, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Background

A CITA directive dated May 24, 1985 (50 FR 21923) established restraint limits for certain cotton, wool and man-made fiber textile products, including men's and boys' other cotton coats in Category 334, produced or manufactured in Sri Lanka and exported to the United States during the agreement year which began on June 1, 1985 and extends through May 31, 1986. The limit for Category 334 was increased to 191,892 dozen by the application of carryover from the previous agreement year by directive of February 4, 1986 (51 FR 4784). Additional shipments have been received and charged, reducing the amount of carryover actually available. Consequently, in the letter to the Commissioner of Customs which follows this notice, the Chairman of CITA directs that the limit for Category 334 be reduced from 191,892 dozen to 188,019 dozen.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of The United States Annotated (1986).

William H. Houston III,

Chairman, Committee for the Implementation of Textiles Agreements.

Committee for the Implementation of Textile Agreements

May 13, 1986.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directive of May 24, 1985, as amended, concerning certain cotton, wool and man-made fiber textile products, produced or manufactured in Sri Lanka.

Effective on May 19, 1986, the directive of May 24, 1985 is hereby further amended to reduce the restraint limit established for cotton textile products in Category 334 to 188,019 dozen.[1]

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

William H. Houston III,

Chairman, Committee for the Implementation of Textiles Agreements.

[FR Doc. 86-11103 Filed 5-15-86; 8:45 am]

BILLING CODE 3510-DR-M

[1] The agreement provides, in part, that: (1) Specific limits and sublimits may be exceeded during the agreement year by designated percentages of the square yards equivalent total in any agreement period, provided that the amount of the increase is compensated for by a decrease in equivalent square yards in one or more other specific limits; (2) specific limits may be increased for carryover or carryforward; and (3) administrative adjustments or arrangements may be made to resolve minor problems arising in the implementation of the agreement.

[2] The restraint limit has not been adjusted to reflect any imports exported after May 31, 1986.

[1] The limit has not been adjusted to reflect any imports exported after May 31, 1986.

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List 1986; Addition

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Addition to Procurement List.

SUMMARY: This action adds to Procurement List 1986 a commodity to be produced by workshops for the blind or other severely handicapped.

EFFECTIVE DATE: May 16, 1986.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

FOR FURTHER INFORMATION CONTACT: C.W. Fletcher, (703) 557-1145.

SUPPLEMENTARY INFORMATION: On February 21, 1986, the Committee for Purchase from the Blind and Other Severely Handicapped published a notice (50 FR 6295) of proposed additions to Procurement List 1986, October 15, 1985 (50 FR 41809).

Addition

After consideration of the relevant matter presented, the Committee has determined that the commodity listed below is suitable for procurement by the Federal Government under 41 U.S.C. 46-48c, 85 Stat. 77 and 41 CFR 51-2.6.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered were:

a. The action will not result in any additional reporting, recordkeeping or other compliance requirements.

b. The action will not have a serious economic impact on any contractors for the commodity listed.

c. The action will result in authorizing small entities to produce the commodity procured by the Government.

Accordingly, the following commodity is hereby added to Procurement List 1986:

Bag, Carrying: 8465-01-216-6259.

E.R. Alley, Jr.,

Acting Executive Director.

DEPARTMENT OF DEFENSE

Office of the Secretary

President's Blue Ribbon Commission on Defense Management; Closed Meeting

ACTION: Notice of Closed Meeting.

SUMMARY: The President's Blue Ribbon Commission on Defense Management announces a forthcoming meeting beginning at 8:30 a.m. on June 11 and 12, 1986, at 735 Jackson Place, NW., Washington, DC 20503.

Discussion during the meeting will include classified matters of national security and other matters which cannot be addressed in open forum throughout. Such discussions cannot reasonably be segregated for separate open and closed sessions without defeating the effectiveness and purpose of the overall meeting. Accordingly, consistent with section 10(d) of Pub. L. 92–463, the "Federal Advisory Committee Act," and section 552b(c)(1) and (c)(9)(9B) of Title 5, United States Code, this meeting will be closed to the public.

Agenda: The Commission will meet to continue its consideration of defense management and organization issues and its preparation of a final report to the President.

FOR FURTHER INFORMATION CONTACT: Mr. Herbert E. Hetu (Public Affairs), 1899 L Street NW., Suite 400, Washington, DC 20036. Telephone: (202) 466–7980 or (202) 395–3198.

Patricia H. Means,

OSD Federal Register Liaison Officer, Department of Defense.

Defense Contract Audit Agency

Privacy Act of 1974; New Record System

AGENCY: Defense Contract Audit Agency (DCAA), DoD.

SUMMARY: The Defense Contract Audit Agency is adding a new record system to its existing inventory of record systems subject to the Privacy Act of 1974, as amended, (5 U.S.C. 552a).

DATE: This proposed action will be effective without further notice June 16, 1986, unless comments are received which would result in a contrary determination.

ADDRESS: Send any comments to Mrs. Connie Miller, Records Administrator, Cameron Station, Room 4A–375, Alexandria, VA 22304–6178, Telephone: 202–274–7288.

SUPPLEMENTARY INFORMATION: The Defense Contract Audit Agency systems of records notices subject to the Privacy Act of 1974 have been published in the Federal Register as follows:

FR Doc. 85-10237 (50 FR 22894) May 29, 1985
FR Doc. 85-29260 (50 FR 50339) December 10, 1985
FR Doc. 85-30595 (50 FR 52903) December 27, 1985

The new record system identified as RDCAA 160.5, entitled: Travel Orders, is required to document all entitlements, authorizations and paperwork associated with an employee's official travel. These records are currently maintained by travel order number. A new system report, as required by 5 U.S.C. 552a(o) of the Privacy Act was submitted on April 4, 1986, pursuant to paragraph 4b of Appendix I to OMB Circular No. A-130, "Federal Agency Responsibilities for Maintaining Records About Individuals," dated December 12, 1985.

Linda M. Lawson,
Alternate OSD Federal Register Liaison Officer Department of Defense.
May 12, 1986.

RDCAA 160.5

SYSTEM NAME:

160.5 Travel Orders.

SYSTEM LOCATION:

Defense Contract Audit Agency (DCAA) Headquarters, Cameron Station, Alexandria, VA 22304-6178, DCAA regional offices, whose addresses are listed in the DoD directory in the appendix to DCAA's systems notices and field audit offices, whose addresses may be obtained from their cognizant regional office.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Any DCAA employee who performs official travel.

CATEGORIES OF RECORDS IN THE SYSTEM:

File contains individual's orders directing or authorizing official travel to include approval for transportation of automobiles, documents relating to dependents travel, bills of lading, vouchers, contracts, and any other documents pertinent to the individual's official travel.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 USC. 301; 10 USC 133; 44 USC 2901, et seq.

PURPOSE(S):

To document all entitlements, authorizations, and paperwork associated with an employee's official travel.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM INCLUDING CATEGORIES OF USERS, USES, AND THE PURPOSE OF SUCH USES:

See blanket routine uses.

POLICIES AND PROCEDURES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders.

RETRIEVABILITY:

By fiscal year and alphabetically by surname. May be filed in numerical sequence by travel order number.

SAFEGUARDS:

Under control of office staff during duty hours. Building and/or office locked and/or guarded during nonduty hours.

RETENTION AND DISPOSAL:

Records are destroyed after 4 years.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Field Administration Support Office, Headquarters, DCAA, Cameron Station, Alexandria, VA 22304-6178;

Regional Directors, DCAA, whose addresses are listed in the DoD directory in the appendix to DCAA's systems notices (50 FR 22897, May 29, 1985); and

Chiefs of Field Audit Offices, whose addresses may be obtained from their cognizant regional office.

NOTIFICATION PROCEDURE:

Information may be obtained from the Records Administrator, Defense Contract Audit Agency, Cameron Station, Alexandria, VA 22304-6178.

RECORDS ACCESS PROCEDURES:

Requests from individuals should be addressed to the Records Administrator, Defense Contract Audit Agency, Cameron Station, Alexandria, VA 22304-6178.

Written requests for information should contain the full name of the individual, current address, and telephone number and current business address. Visits are limited to those offices listed in the DoD directory in the appendix to DCAA's systems notices.

For personal visits, the individual should be able to provide some acceptable identification, that is, driver's license or employing office identification card.

CONTESTING RECORD PROCEDURES:

The Agency's rules for contesting contents and appealing initial determinations may be obtained from the Records Administrator, Defense Contract Audit Agency, Cameron Station, Alexandria, VA 22304-6178.

RECORD SOURCE CATEGORIES:

Administrative offices; personnel offices; servicing payroll offices; employee.

SYSTEMS EXEMPTED FROM CERTAIN INFORMATION OF THE ACT:

None.

BILLING CODE 3810-01-M

Department of the Navy

Proposed U.S. Navy Restriction of the North River, Naval Submarine Base, Kings Bay, GA; Public Hearing on the Kings Bay Environmental Impact Statement (EIS) for North River Access Restriction

Pursuant to the National Environmental Policy Act of 1969 (42 U.S.C. 4321-4361) and the Council on Environmental Quality Regulations (40 CFR 1500-1508), the U.S. Navy has prepared and filed with the U.S. Environmental Protection Agency, a Draft Environmental Impact Statement (DEIS) for the proposed restriction of the North River, Naval Submarine Base, Kings Bay, Georgia. The DEIS has been distributed to various Federal, Georgia and Florida state and local agencies, interest groups and media. Copies of the DEIS may also be viewed during normal business hours at the following locations:

a. *St. Marys, Georgia*
(1) St. Marys City Hall.
(2) National Park Service Office (Cumberland Island National Sea Shore).
b. *Kingsland, Georgia*
(1) Kingsland City Hall.
(2) Camden County Branch Office.
c. *Woodbine, Georgia*
(1) Camden County Court House.
d. *Fernandina Beach, Florida*
(1) Fernandina Beach City Hall.

A public hearing to inform the public of the study's findings and to solicit comments on the Navy's proposed restriction of the North River will be held at the following location:

Camden County High School, St. Marys, Georgia
Date: Tuesday, June 3, 1986
Times: Registration—7:00 to 7:30 P.M.;
Hearing—7:30 to approximately 10:30 P.M.

The hearing will be chaired by the U.S. Navy in accordance with the National Environmental Policy Act, Council of Environmental Quality regulations and applicable U.S. Navy

regulations. All interested parties are invited to be present or represented at this meeting. This includes representatives of Federal, state, and local agencies; private industry; civic and environmental groups; fish and wildlife organizations; and other interested and concerned citizens. All parties will be afforded full opportunity to express their views, but in order to allow all an opportunity to speak, oral statements will be limited to 5 minutes. Technical statements, statements of considerable length, or statements from persons unable to attend, should be delivered in writing either at the hearing or mailed to: Director, Strategic Systems Programs, Department of the Navy (SP–20161), Washington, DC 20376–5002.

Oral statements will be heard and transcribed by a stenographer, but for accuracy of record all statements should be submitted in writing. All statements, both oral and written, will become part of the official record on this study. Copies of the public hearing transcript will be available for public review at the locations listed above for reviewing the DEIS.

Final decision on the proposed project will be made only after full consideration is given to the views of responsible agencies, groups, and citizens.

Written statements will be accepted until June 27, 1986.

Questions concerning this public notice may be directed to Commander Bruce M. Dutton at telephone (202) 697–8055.

Dated: June 13, 1986.

Robert E. Coyle,

Captain, JAGC, U.S. Navy Federal Register Liaison Officer.

BILLING CODE 3810-AE-M

DEPARTMENT OF ENERGY

Bonneville Power Administration

Direct Service Industry Options; Final Environmental Impact Statement Availability

AGENCY: Bonneville Power Administration (BPA), DOE.

ACTION: Notice is hereby given that the Bonneville Power Administration, in compliance with the National Environmental Policy Act of 1969 (NEPA), has responded to comments received on the subject draft environmental impact statement (EIS), revised the document accordingly, and prepared a final EIS entitled "Direct Service Industry Options."

SUMMARY: The EIS examines three potential actions (and alternatives) by which BPA hope to reduce load fluctuations and revenue uncertainty resulting from its electrical service to 10 aluminum smelters. Options discussed include a variable power rate tied to the price of aluminum; a formal link between the Industrial Firm Power and the rate to the preference utilitie; and partial BPA support for aluminum smelter modernization/conservation. BPA believes these actions, or combinations of them, will give BPA greater ability to plan for power needs and help to maintain its relatively strong financial position during this current period of power surplus, enhancing PBA's ability to repay the U.S. Treasury. In turn, BPA's rates to its utility and other nonindustrial customers would stabilize.

Copies of the final EIS are available for public review at major libraries in California, Idaho, Montana, Oregon, and Washington, and at locations listed bulow:

Reading Rooms

FOI DOE MA 232.1, Public Reading Room 1E–190, Forrestal Building, 1000 Independence Ave. SW, Washington, DC

Bonneville Power Administration, Washington, DC Office, Room 3G033, Forrestal Building, 1000 Independence Avenue SW., Washington, DC

Additional Review Locations

The document may be inspected at the following BPA offices.

Ms. Donna Geiger, BPA Public Reference Room, 1002 NE. Holladay, 6th Floor, Portland, Oregon 97232
503–230–3478

208–334–9137

Mr. Thomas Wagenhoffer, Area Manager, West 101 Poplar, Walla Walla, Washington 99362
509–522–6226

Mr. Robert N. Laffel, District Manager, 531 Lomax Street, Idaho Falls, Idaho 83401
208–523–2706.

FOR FURTHER INFORMATION CONTACT: Requests for copies, questions, or comments regarding the EIS should be directed to Anthony R. Morrell, Environmental Manager, Bonneville Power Administration, P.O. Box 3621–SJ, Portland, Oregon 97208; phone 503–230–5136. The review period will close 18 days after the Environmental Protection Agency's notice of availability of the final EIS is published in the Federal Register.

Issued in Portland, Oregon, on May 8, 1986.

Peter T. Johnson,

Administrator.

BILLING CODE 6450-01-M

Economic Regulatory Administration

Proposed Remedial Order; Port Petroleum, Inc. et al.

Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administration (ERA) of the Department of Energy hereby gives notice of a Proposed Remedial Order which was issued to Port Petroleum, Inc. and Morris M. James, T. Michael Howell, and C. Gregory Crafts. This Proposed Remedial Order alleges entitlement violations in the amount of $9,020,867 plus interest in connection with the failure to satisfy entitlements obligations during the period August 1979 through December 1980. These alleged violations have potential nationwide impact.

A copy of the Proposed Remedial Order may be obtained from the Office of Freedom of Information Reading Room; U.S. Department of Energy; Forrestal Building, Room 1E–190; 1000 Independence Avenue SW.; Washington, D.C. 20585. Within fifteen (15) days of publication of this Notice, any aggrieved person may filed a Notice of Objection with the Office of Hearings and Appeals; U.S. Department of Energy; Forrestal Building, Room 6F–078; 1000 Independence Avenue SW.; Washington, D.C. 20585, in accordance with 10 CFR 205.193.

Issued in Dallas, Texas, on the 7th day of April 1986.

Dan Lennes,

Director, Office of Field Operations, Dallas Economic Regulatory Administration.

Appendix

The addresses of the Port Petroleum, Inc. Proposed Remedial Order respondents are: Port Petroleum, Inc., Louisiana Towers, Suite 1810, Shreveport, Louisiana 71101; Morris M. James, 1963 Round Springs, Kingwood, Texas 77339; T. Michael Howell, 5724 Marina Bay Drive, Shreveport, Lousiana 71119; and C. Gregory Crafts, 2790 Fairfield Avenue, Shreveport, Louisiana 71104.

BILLING CODE 6450-01-M

Proposed Remedial Order; Scruggs Energy Co. et al.

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of proposed remedial order to Scruggs Energy Company, W.W. (Bill) Scruggs and Donald W. Guillory.

SUMMARY: Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives Notice of a Proposed Remedial Order which was issued to Scruggs Energy Company, W.W. (Bill) Scruggs and Donald W. Guillory (collectively referred to as Scruggs). This Proposed Remedial Order alleges layering violations in the amount of $13,302,314.00, plus interest, and pricing violations in the amount of $660,379.00, plus interest, in connection with the sale of crude oil at prices in excess of those permitted under 10 CFR Part 212 during the time period August 1, 1979 through January 31, 1981. The effect of the alleged violations is nationwide.

A copy of the Proposed Remedial Order, with confidential information deleted, may be obtained from: Office of Freedom of Information Reading Room, United States Department of Energy, Forrestal Building, Room 1E-190, 1000 Independence Avenue SW., Washington, DC. 20585.

Within fifteen (15) days of publication of this Notice any aggrieved person may file a Notice of Objection with the Office of Hearings and Appeals, U.S. Department of Energy, Forrestal Building, 1000 Independence Avenue SW., Washington, D.C. 20585, in accordance with 10 CFR 205.193. The Notice shall be filed in duplicate, shall briefly describe how the person would be aggrieved by issuance of the Proposed Remedial Order as a final order and shall state the person's intention to file a Statement of Objections.

Pursuant to 10 CFR 205.193(c), a person who files a Notice of Objection shall on the same day serve a copy of the Notice upon:

James Louthan, Audit Director, Economic Regulatory Administration, U.S. Department of Energy, One Allen Center, Suite 660, 500 Dallas Street, Houston, Texas 77002

and upon:

Carl A. Corrallo, Solicitor, Economic Regulatory Administration, U.S. Department of Energy, Room 3H-017, RG-15, 1000 Independence Avenue SW., Washington, D.C. 20585.

Issued in Houston, Texas, on the 10th day of April 1986.

Sandra K. Webb,

Director, Houston Office, Economic Regulatory Administration.

Appendix

The addresses of the Scruggs Energy Company Proposed Remedial Order respondents are: Scruggs Energy Company, c/o W.W. (Bill) Scruggs, President, 2907 Laurel Lake Drive, Kingwood, Texa 77339; W.W. (Bill) Scruggs, Lakewood Yacht Club, 2425 Nasa Road 1, Nassaua Bay, Texas 77566; and Donald W. Guillory, Route 8, Box 194, Lake Charles, Louisiana 70605.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. RP86-73-000]

Algonquin Gas Transmission Co.; Proposed Changes in FERC Gas Tariff

May 9, 1986.

Take notice that on May 2, 1986, Algonquin Gas Transmission Company ("Algonquin Gas ") tendered for filing the following tariff sheets to its FERC Gas Tariff, Second Revised Volume No. 1:

Substitute Second Revised Sheet No. 631
Substitute Original Sheet No. 631-A

Algonquin Gas states that it is filing such tariff sheets to add a provision to its Purchased Gas Cost Adjustment Provisions ("PGAC") setting forth the procedure for reimbursement to Algonquin Gas of a contingent purchased gas cost, if incurred. More specifically Algonquin Gas' purchases from its supplier, Texas Eastern Transmission Corporation ("Texas Eastern") include gas purchased under a filed rate schedule of that Company (Rate Schdule DCQ-D). That rate schedule contains a minimum commodity charge which has not heretofore been applicable. As a result of transportation programs, however, the provision may now become applicable and result in an actual gas cost to Algonquin Gas . The purpose of Algonquin Gas' filing is to provide a specific procedure for distributing any such actual gas cost among Algonquin Gas' customers.

Algonquin Gas proposes the effective date of the above tariff sheets to be April 30, 1986, the date the Commission issued an order making effective a new transportation rate schedule of Algonquin Gas which may have the effect of activating the contingent gas cost provision of Texas Eastern.

Algonquin Gas notes that a copy of this filing is being served upon each affected party and interested state commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 16, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-11035 Filed 5-15-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. ER86-467-000, et al.]

Boston Edison Co., et al.; Electric Rate and Corporate Regulation Filings

May 9, 1986.

Take notice that the following filings have been made with the Commission:

1. Boston Edison Company

[Docket No. ER86-467-000].

Take notice that on May 5, 1986, Boston Edison Company (Edison) tendered for filing a supplemental Exhibit A to a Service Agreement for Cambridge Electric Light Company (CEL), under its FERC Electric Tariff, Original Volume No. III, Non-Firm

Transmission Service (the Tariff). The Exhibit A specifies the amount and duration of transmission service required by CEL under the Tariff.

Edison requests waiver of the Commission's notice requirements to permit the Exhibit A to become effective as of the commencement date of the transaction to which it relates, May 1, 1986.

Edison states that it has served the filing on Cambridge Electric Light Company and the Massachusetts Department of Public Utilities.

Comment date: May 22, 1986, in accordance with Standard Paragraph E at the end of this notice.

2. Boston Edison Company

[Docket No. ER86-468-000]

Take notice that on May 5, 1986, Boston Edison Company (Edison) tendered for filing updated charges to be paid by Cambridge Electric Light Company (Cambridge), for the support of Edison's Substation 509 located in North Cambridge, Massachusetts. These charges are filed pursuant to Boston Edison Company FPC Rate No. 101 approved by the Commission on March 11, 1975 in docket E-9254.

Edison requests waiver of the Commission's notice requirements to permit these charges to be made effective as of June 24, 1982.

Edison states that it has served the filing on Cambridge Electric Light Company and the Massachusetts Department of Public Utilities.

Comment date: May 22, 1986, in accordance with Standard Paragraph E at the end of this notice.

3. Cliffs Electric Service Company

[Docket No. ER86-463-000]

Take notice that on May 1, 1986, Cliffs Electric Service Company tendered for filing an Amendment to the Power Sales Agreement between Cliffs Electric Service Company (Service Company) and Wisconsin Public Power Incorporated System (WPPI). The Amendment amends the May 13, 1985, Power Sales Agreement.

The Power Sale Agreement was accepted for filing in Docket No. ER85-529 by letter dated July 8, 1985. The Amendment filed herewith extends the time during which Service Company will sell power to WPPI and revises certain of the rates, terms, and conditions of the sale. The Admendment limits options previously available to WPPI to terminate at an earlier date purchases under Transaction No. 4 and reduces slightly the energy rates in the Power Sale Agreement. The changes reflected in the April 22, 1986, letter agreement were reached after negotiations between the parties.

Comment date: May 20, 1986, in accordance with Standard Paragraph E at the end of this notice.

4. The Connecticut Light and Power Company.

[Docket No. ER86-466-000]

Take Notice that on May 5, 1986, The Connecticut Light and Power Company (CL&P) tendered for filing as an initial rate schedule an agreement (the Agreement) between CL&P, Western Massachusetts Electric Company (WMECO, and together with CL&P, the NU Companies) and Long Island Lighting Company (LILCO). The Agreement, dated as of February 21, 1986, provides for the sale by the NU Companies of system power from their systems ("system power") to LILCO on a daily or weekly basis (a transaction). CL&P states that the timing of transactions cannot be accurately estimated but that the NU Companies would offer to sell such system power to LILCO only when it was economic to do so. LILCO would only accept such offer if it was economical to do so.

LILCO will pay a capacity charge to the NU Companies for each transaction in an amount equal to the megawatt-hours of system power reserved for LILCO by the NU Companies during a transaction multiplied by a capacity charge rate negotiated prior to each transaction. LILCO will pay an energy charge for each hour of each transaction in an amount equal to (i) the megawatt-hours delivered to LILCO pursuant to this Agreement for such hour, multiplied by (ii) the forecasted energy charge rate on the systems of the NU Companies for such hour.

CL&P requests that the Commission waive its customary notice period and allow the Agreement to become effective on February 21, 1986.

WMECO has filed a Certificate of Concurrence in this docket.

The Agreement has been executed by CL&P, WMECO and LILCO, and copies have been mailed or delivered to each of them.

CL&P further states that the filing is in accordance with Section 35 of the Commission's Regulations.

Comment date: May 22, 1986, in accordance with Standard Paragraph E at the end of this notice.

5. Florida Power Corporation

[Docket No. ER86-472-000]

Take notice that on May 6, 1986, Florida Power Corporation (Florida Power) tendered for filing a Contract for Interchange Service dated May 1, 1986 between Florida Power and Florida Municipal Power Agency (FMPA). FMPA has become the all requirements resale service supplier to the Cities of Bushnell, Leesburg, and Ocala, Florida. Florida Power and FMPA do not have an existing contract for interchange service.

Florida Power requests that the Contract for Interchange Service be made effective as a rate schedule on May 1, 1986, and therefore, requests waiver of the sixty day notice requirement. Copies of the filing have been served on the Cities of Bushnell, Leesburg, and Ocala, Florida, Florida Municipal Power Agency, and the Florida Public Service Commission.

Comment date: May 22, 1986, in accordance with Standard Paragraph E at the end of this document.

6. Kansas City Power & Light Company

[Docket No. ER86-165-000]

Take notice that on May 5, 1986, Kansas City Power & Light Company ("KCPL") tendered a supplement to its earlier filing in this Docket.

KCPL states that the purposes of this supplement is to respond to an objection to language contained in Section A of Schedule H-MPA contained in the Amendatory Agreement. The supplement accepts a cap for percentage adders on purchase and resale transactions under Section A of Schedule H-MPA. The cap is the same as the adder for purchase and resale transactions which the Commission has accepted for other similar transactions by KCPL.

Comment date: May 22, 1986, in accordance with Standard Paragraph E at the end of this notice.

7. New York State Electric & Gas Corporation

[Docket No. ER86-469-000]

Take notice that New York State Electric & Gas Corporation (NYSEG), on May 5, 1986, tendered for filing proposed changes in its FERC Rate Schedules Nos. 27, 28, 30, 33 and 35. It is estimated that the proposed changes would increase revenues from jurisdictional sales and service by about $20,000 based on the 12-month period ended October 31, 1985.

Pursuant to Ordering Clause No. 3 of Opinion 85-8 issued by the Public Service Commission of the State of New York on April 9, 1985 at the end of NYSEG's previous major rate case, NYSEG made a "third stage" filing of revised leaves to Schedule PSC No. 115—Electricity, which were allowed to become effective April 15, 1986. These increased rates are the result of the third

and final phase-in of the Somerset generating plant into base rates. Rate Schedule PSC No. 115 is incorporated in the previously noted FERC schedules.

NYSEG has filed with its jurisdictional customers copies of this proposed notice, the filing letter, the pertinent revenue effect schedules and applicable tariff leaves.

Comment date: May 22, 1986, in accordance with Standard Paragraph E at the end of this notice.

8. Union Electric Company

[Docket No. ER86-465-000]

Take notice that Union Electric Company, on May 2, 1986 tendered for filing a Letter Agreement dated March 20, 1986, between City of Columbia, Missouri, and Union Electric Company.

Union Electric states the purpose of the Letter Agreement is to revise the rate formula for Transmission Service.

Comment date: May 22, 1986, in accordance with Standard Paragraph E at the end of this notice.

Virginia Electric and Power Company

[Docket No. ER86-372-000]

Take notice that Virginia Electric and Power Company on May 6, 1986, tendered for filing supplemental materials supporting its March 27, 1986 filing in Docket No. ER86-372-000 and, at the same time, submitted rate schedules to substitute for those filed March 27, 1986 to become effective only if the additional materials are found to be deficient. The alternative rates eliminate the revenues associated with the inclusion of "Other CWIP" in rate base. Based on the test period 12 months ending December 31, 1986 conditions, the alternative rate schedules will increase revenues from Rural Electric Cooperatives, other than Old Dominion Electric Cooperative (ODEC), by $1.9 million, increase annual revenues from the Municipal Customers by $2.5 million and increase revenues from supplemental service to ODEC by $10.4 million. The Company has requested waiver of the notice requirements so as to permit the alternative Phase 1 and Phase 2 rates to become effective May 27, 1986 and May 28, 1986, respectively.

Copies of the proposed alternative rates were served upon all of the Company's jurisdictional wholesale customers, the Virginia State Corporation Commission and the North Carolina Utilities Commission.

Comment date: May 22, 1986, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should life a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests shoudl be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-11038 Filed 5-15-86; 8:45 am]

BILLING CODE 6717-01-M

Docket No. G-6150-001, et al.

Mobil Producing Texas & New Mexico Inc.; Application

May 12, 1986.

Take notice that on April 30, 1986, Mobil Producing Texas & New Mexico Inc. (MPTM), of Nine Greenway Plaza, Suite 2700, Houston, Texas 77046, filed an application pursuant to Section 7 of the Natural Gas Act, 15 U.S.C. 717f, and § 157.23 of the Commission's Regulations under the Natural Gas Act, to continue the service previously authorized to The Superior Oil Company (Superior) in the states of Texas and New Mexico, which is on file with the Commission and open to public inspection. Applicant requests that the certificates currently held by Superior be amended to show Mobil Producing Texas & New Mexico Inc. as certificate holder and that the related rate schedules be redesignated as those of Mobil Producing Texas & New Mexico Inc., all as more fully shown on the attached Exhibit "A". Mobil Producing Texas & New Mexico, Inc. also requests that it be sustituted for Superior in any pending proceeding before the Commission.

By assignment dated effective April 1, 1986, The Superior Oil Company conveyed all of its interest in properties located in Texas, New Mexico and the offshore Federal waters of the U.S. outer continental shelf within the limited jurisdiction of Texas, to Mobil Producing Texas & New Mexico Inc.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 27, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01

[Project No. 9817-000, et al.]

Hydroelectric Applications (Cash Flow Systems, et al.); Filed With the Commission

Take notice that the following hydroelectric appliocations have been filed with the Federal Energy Regulatory Commission and are available for public inspection:

1. a. Type of Application: Preliminary Permit.

b. Project No.: 9817-000.

c. Date Filed: December 31, 1985.

d. Applicant: Cash Flow Systems.

e. Name of Project: Ausable.

f. Location: Ausable River in Essex and Clinton Counties, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. Contact Person: Mr. Lawrence R. Taft, 10315 Caughdenoy Road Central Square, NY 13036, (315) 437-2547.

i. Comment Date: July 7 1986.

j. Description of Project: The purpose of project would consist of: (1) Reconstruction of the existing 8-foot-high, 160-foot-long concrete dam owned by the Village of Keeseville with a crest evaluation of 380 feet msl; (2) a proposed reservoir with a surface area of 3 acres and a storage capacity of 15 acre-feet; (3) a proposed 10-foot-diameter, 230-foot-long penstock; (4) a proposed powerhouse containing a generating unit with a rated capacity of 1,500-kW; and (5) a proposed 50-foot-long transmission line tying into the existing New York State Electric and Gas Company system. The Applicant estimates a 5,200,000 kWh average annual energy production.

k. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit to investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending on the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates that the cost of the studies under permit would be $21,000.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

2 a. Type of Application: Minor License.

b. Project No.: 9722-000.

c. Date Filed: December 20, 1985.

d. Applicant: Burlington Energy Development Associates.

e. Name of Project: Wynantskill Project.

f. Location: Wynantskill Creek in Rensselaer County, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. Contact Person: Mr. John R. Anderson, Burlington Energy Development Associates, 64 Blanchard Road, Burlington, MA 01803, (617) 229-6103.

i. Comment Date: July 7, 1986.

j. Description of Project: The proposed project would consist of: (1) An existing 13-foot-high, 110-foot-long concrete gravity dam; (2) a reservoir with a surface area of 10 acres, a storage capacity of 44 acre-feet, and a normal water surface elevation of 251 feet m.s.l.; (3) a new concrete intake structure; (4) a new 42-inch-diameter, 1,225-foot-long steel penstock; (5) an existing 13-foot-wide, 10-foot-high concrete surge tank; (6) a new concrete powerhouse containing six generating units with a capacity of 94.5 kW each for a total installed capacity of 567 kW; (7) a new transmission line, 500 feet long; (8) a 500-foot-long gravel access road; and (9) appurtenant facilities. The applicant estimates the average annual generation would be 1,200,000 kWh. The existing dam is owned by Campbell's 9 Acres, Inc., Wynantskill, New York.

k. Purpose of Project: Project power would be sold to Niagara Mohawk Power Corporation.

l. This notice also consists of the following standard paragraphs: A3, A9, B, C, and D1.

3 a. Type of Application: Minor License.

b. Project No.: 9689-000.

c. Date Filed: December 18, 1985.

d. Applicant: Wilfred and Rory Poulin.

e. Name of Project: Wynantskill.

f. Location: On the Wynantskill Creek in Rensselaer County, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. Contact Person: Mr. Neal F. Dunlevy, Stetson-Dale, Architects & Engineers, 185 Genesee Street, Utica, NY 13501, (315) 797-5800.

i. Comment Date: July 7, 1986.

j. Description of Project: The propsed project would consist of: (1) An existing 15-foot-high, 200-foot-long concrete gravity dam with masonry abutments; (2) a reservoir with a surface area of 15 acres, a storage capacity of 48 acre-feet, and a normal water surface elevation of 177.0 feet m.s.l.; (3) a new concrete intake structure; (4) a new 42-inch-diameter, 2,800-foot-long steel penstock; (5) a new concrete powerhouse containing one generating unit with a capacity of 255 kW and one generating unit with a capacity of 475 kW for a total installed capacity of 730 kW; (6) a new transmission line, 150 feet long; and (7) appurtenant facilities. The Applicant estimates the average annual generation would be 2,230,000 kWh. The existing dam is owned by the City of Troy, New York.

k. Purpose of Project: Project power would be sold to Niagara Mohawk Power Corporation.

1. This notice also consists of the following standard paragraphs: A3, A9, B, C, and D1.

4 a. Type of Application: Major License.

b. Project No.: 9073-001.

c. Date Filed: December 26, 1985.

d. Applicant: Northwest Power Company, Inc.

e. Name of Project: Lavezzola Creek, near Downieville, within the Tahoe National Forest, in Sierra County, California (Sections 28, 32, and 33 of T21N, R12E, Sections 5, 6, 7, and 18 of T20N, R12E, and Sections 13, 23, 24, and 26 of T20N, R11E, M.D.M.&B.).

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. Contact Person: Mr. J. Ward MacDonald, Northwest Power Company, Inc., Four Embarcadero Center, Suite 1960, San Francisco, CA 94111, (415) 433-3505.

i. Comment Date: July 2, 1986.

j. Description of Project: The proposed run-of-the-river project would consist of: (1) A 6-foot-high, 70-foot-long concrete and steel diversion structure at elevation 4,500 feet msl; (2) a 6-foot-high (arched), 9-foot-wide, 1,200-foot-long tunnel; (3) a 42-inch-diameter, 11,200-foot-long steel penstock; (4) a powerhouse containing a single turbine-generator unit with a rated capacity of 4,660 kW and operating under a head of 710 feet; and (5) a 60-kV, 5-mile-long transmission line interconnecting the project to an existing Pacific Gas and Electric Company (PG&E) substation. The project's estimated average annual generation of 9.5 GWh would be sold to PG&E.

k. This notice also consists of the following standard paragraphs: A3, A9, B, C, and D1.

5 a. Type of Application: Exemption (5 MW or less).

b. Project No.: 9664-000.

c. Date Filed: December 12, 1985.

d. Applicant: Weisenberger Mills.

e. Name of Project: Weisenberger Mills.

f. Location: On South Elkhorn Creek near Midway, Scott and Woodford Counties, Kentucky.

g. Filed Pursuant to: Energy Security Act of 1980, Section 408 (16 U.S.C. 2705 and 2708).

h. Contact Person: Mr. Daniel Swan, Power Development Systems, Inc., 1712 Deerwood #3, Louisville, KY 40205–1053, (502) 451–1848.

i. Comment Date: June 16, 1985.

j. Description of Project: The proposed project would consist of: (1) An existing masonry and concrete dam 10.5 feet high and 150 feet long; (2) an existing concrete powerhouse 20 feet square and 10 feet high containing a proposed 67-kW submerged turbine-generator; (3) a proposed 240-V three phase transmission line 65 feet long; and (4) appurtenant facilities. The project energy will be used at the mill with the surplus sold to Kentucky Utilities. The Applicant estimates that the average annual energy generation would be 214 MWh.

k. Purpose of Exemption: An exemption, if issued, gives the Exemptee priority of control, development, and operation of the project under the terms of the exemption from licensing, and protects the Exemptee from permit or license appplicant that would seek to take or develop the project.

l. This notice also consists of the following standard following paragraphs: A3, A9, B, C, and D3a.

6. a. Type of Application: Preliminary Permit.

b. Project No.: 9954–000.

c. Date Filed: March 25, 1986.

d. Applicant: Burlington Hydro Associates.

e. Name of Project: Mississippi Lock & Dam No. 18.

f. Location: On the Mississippi River in Henderson County, Illinois and Desmoines County, Iowa.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. J. Kirk Rector, Burlington Hydro Associates, 5041 S. Boabab Drive, Salt Lake City, UT 84117, (801) 272–2030.

i. Comment Date: July 7, 1986.

j. Description of Project: The proposed project would utilize the U.S. Army Corps of Engineers Mississippi River Lock and Dam No. 18, having a water surface elevation of 528.0 feet msl and would consist of: (1) Four new steel penstocks each 60 feet long and 19 feet in diameter; (2) a new concrete powerhouse 80 feet by 240 feet containing four turbine/generator units having a total installed capacity of 28 MW operating at 9.37 feet of hydraulic head; (3) a new rock tailrace approximately 100 feet long, 200 feet wide, and 5 feet deep; (4) a new 1.5-mile-long 69-kV transmission line; and (5) appurtenant facilities. The Applicant estimates the average annual energy production to be 170 GWh.

k. Purpose of Project: The Applicant intends to sell the power generated at the proposed facility to the Iowa-Illinios Gas and Electric Company.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

m. Proposed Scope under this Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 36 months during which time Applicant would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates that the cost of the studies under permit would be $155,000.

7. a. Type of Application: Preliminary Permit.

b. Project No.: 9952–000.

c. Date Filed: March 24, 1986

d. Applicant: Warren Osborne.

e. Name of Project: Sixmile Creek.

f. Location: On Sixmile Creek in Adams County, Idaho, Township 20N and Range 2E.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Carl L. Myers, 750 Warm Springs Avenue, Boise, ID, 83712, (208) 336–1425.

i. Comment Date: June 30, 1986.

j. Description of Project: The proposed project would consist of: (1) A 2-foot-high check dam at elevation 5160 feet; (2) an 11,500-foot-long, 22-inch-diamater penstock; (3) a powerhouse containing a generating unit with a capacity of 2,850 kW and an average annual generation of 5,117 MWh; and (4) an 0.5-mile-long transmission line.

A preliminary permit does not authorize construction. Applicant seeks issuance of a preliminary permit for a term of 18 months during which it would conduct engineering and environmental feasibility studies and prepare an FERC license application at a cost of $25,000. No new roads would be constructed or drilling conducted during the feasibility study.

k. Purpose of Project: Project power would be sold.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

8 a. Type of Application: Preliminary Permit.

b. Project No.: 9975–000.

c. Date Filed: April 17, 1986.

d. Applicant: City of Tacoma, Washington.

e. Name of Project: Howard Hanson.

f. Location: At the Corps of Engineers Howard Hanson Dam on the Green River, in King County, Washington.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: E.E. Coates, City of Tacoma, Department of Public Utilities, P.O. Box 11007, Tacoma, Washington 98411, (206) 383–2471.

i. Comment Date: July 10, 1986.

j. Description of Project: The proposed project would utilize the Corps of Engineers Howard Hanson Dam and would consist of: (1) An intake structure at the dam; (2) a 2,640-foot-long, 11-foot-diameter penstock to the upper powerhouse; (3) an upper powerhouse containing a generating unit with a capacity of 2.5 MW; (4) a 3,000-foot-long, 12-foot-diameter tunnel; (5) a 14,600-foot-long, 11-foot-diameter penstock to the lower powerhouse; (6) a lower powerhouse containing three generating units, with a combined capacity of 24.5 MW; and (7) a 1,000-foot-long transmission line. The average annual generation would be 94 GWh.

A peliminary permit does not authorize construction. Applicant seeks issuance of a preliminary permit for a term of 36 months during which it would conduct engineering and environmental feasibility studies and prepare an FERC license application at a cost of $250,000. No new roads would be constructed or drilling conducted during the feasibility study.

k. Purpose of Project: Project power would be sold.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

9 a. Type of Application: New License.

b. Project No.: 1250–001.

c. Date Filed: December 31, 1984, and amended on January 31, 1986.

d. Applicant: City of Pasadena Water and Power Department.

e. Name of Project: Azusa Water Power Project.

f. Location: On the San Gabriel River, in Los Angeles County, California.

g. Filed Pursuant to: Federal Power Act 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Karl A. Johnson, General Manager, City of Pasadena Water and Power Department, 100 North Garfield Avenue, Pasadena, California 91109, (818) 405–4420.

i. Comment Date: July 7, 1986.

j. Expiration Date of Initial License: Applicant's initial license for Project No. 1250 expired on May 31, 1984. The project is currently under annual license.

k. Description of Project: The existing project would utilize waters released

from the Los Angeles County Flood Control District's (District) San Gabriel Reservoir through a 30-foot-diameter, 1,850-foot-long outlet tunnel at the end of which the powerhouse for the exempted San Gabriel Project No. 6764 will be located. The existing project starts at the tailrace of Project No. 6764 and consists of: (1) A 30-foot-diameter, 50-foot-long tunnel; (2) a small stilling basin; (3) a 5.63-mile-long horseshoe shape tunnel, 4.75 feet wide and 5.3 feet high; (4) a 40-foot by 18-foot forebay at elevation 1,147 feet; (5) a 38-inch-diameter, 797-foot-long penstock; (6) a powerhouse containing a single generating unit with installed capacity of 3,000 kW, operating under a head of 400 feet; (7) a switchyard; (8) a 12-kV transmission line approximately 500 feet long connecting the project with the Southern California Edison Company's (SCE) transmission line west of the powerhouse.

The project does not include any recreational facilities and none is proposed by the Applicant. Applicant estimates the replacement cost of the project at $34 million.

l. Purpose of Project: The annual generation of 11.5 million KWh is sold to SCE.

m. This notice also consists of the following standard paragraphs: B, C, and D1.

10 a. Type of Application: Preliminary Permit.

b. Project No.: 9955–000.

c. Date Filed: March 25, 1986.

d. Applicant: Lowman Associates.

e. Name of Project: Deadwood Dam.

f. Location: At the Bureau of Reclamation's Deadwood Dam in Valley County, Idaho, Township 11N and Range 7E.

g. Filed Pursuant to: Federal Power Act 16 U.S.C. 791(a)–825(r).

h. Contact Person: J. Kirk Rector, 5041 S. Boabab Drive, Salt Lake City, UT 84117.

i. Comment Date: June 27, 1986.

j. Description of Project: The proposed project would utilize the existing Deadwood Dam, reservoir, and outlet pipes. New construction would include: (1) A 160-foot-long, 30-inch-diameter steel penstock from the dam outlet pipes to the powerhouse (2) a powerhouse containing one generating unit with a capacity of 8,000 kW and an average annual generation of 18.6 GWh and (3) a 22-mile-long transmission line.

A preliminary permit does not authorize construction. Applicant seeks issuance of a preliminary permit for the term of 36 months during which it would conduct engineering and environmental feasibility studies and prepare an FERC license application at a cost of $155,000. No new roads would be constructed. Core drilling would be conducted during the feasibility study.

k. Purpose of Project: Project power would be sold.

1. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

11 a. Type of Application: Preliminary Permit.

b. Project No.: 9702–000.

c. Date Filed: December 30, 1985.

d. Applicant: Re-Enertech, Inc.

e. Name of Project: Sheep Creek.

f. Location: On Sheep Creek, in the Burrough of Juneau, Alaska.

g. Filed Pursuant to: Federal Power Act U.S.C. 791(a)–825(r).

h. Contact Person: James D. Franklin, P.O. Box 1037, Oak Harber, WA 98277, (206) 679–4342.

i. Comment Date: June 25, 1986.

j. Description of Project: The proposed project would consist of: (1) A 6-foot-high crib dam at elevation 620 feet; (2) a 2,687-foot-long, 36-inch-diameter penstock; (3) a powerhouse containing a generating unit with a capacity of 2,200 kW and an average annual generation of 4.5 GWh; and (4) a 0.25-mile-long transmission line.

A preliminary permit does not authorize construction. Applicant seeks issuance of a preliminary permit for a term of 24 months during which it would conduct engineering and environmental feasibility studies and prepare an FERC license application at a cost of $22,000. No new roads would be constructed or drilling conducted during the feasibility study.

k. Purpose of Project: Project power would be sold.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

12 a. Type of Application: Preliminary Permit.

b. Project No.: 9866–000.

c. Date Filed: January 3, 1986.

d. Applicant: Birch Power Company.

e. Name of Project: Williams Creek.

f. Location: On Williams Creek, in Franklin County, Idaho. Township 12S and Range 41E.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Ted S. Sorenson, 550 Linden Drive, Idaho Falls, ID 83401, (208) 522–8069.

i. Comment Date: June 30, 1986.

j. Description of Project: The proposed project would consist of: (1) A 4-foot-high embankment dam at elevation 5,540 feet; (2) a 13,500-foot-long, 28-inch-diameter penstock; (3) a powerhouse containing a generating unit with a capacity of 725 kW and an average annual generation of 4,700 MWh; and (4) a 0.25-mile-long transmission line.

A preliminary permit does not authorize construction. Applicant seeks issuance of a preliminary permit for a term of 24 months during which it would conduct engineering and environmental feasibility studies and prepare an FERC license application at a cost of $15,000. No new roads would be constructed or drilling conducted during the feasibility study.

k. Purpose of Project: Project power would be sold to Utah Power and Light.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

13 a. Type of Application: Preliminary Permit.

b. Project No.: 9763–000.

c. Date Filed: December 30, 1985.

d. Applicant: Re-Enertech, Inc.

e. Name of Project: Nugget Creek.

f. Location: In Tongass National Forest, on Nugget Creek, in the Borough of Juneau, Alaska. Township 40S and Range 66E.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: James D. Franklin, P.O. Box 1037, Oak Harbor, WA 98277, (206) 679–4342.

i. Comment Date: June 25, 1986.

j. Description of Project: The proposed project would consist of: (1) A 25-foot-high crib dam at elevation 600 feet; (2) a 6,582-foot-long, 48-inch-diameter penstock; (3) a powerhouse containing a generating unit with a capacity of 2,200 kW and an average annual generation of 4.5 GWh; and (4) a 0.25-mile-long transmission line.

A preliminary permit does not authorize construction. Applicant seeks issuance of a preliminary permit for a term of 24 months during which it would conduct engineering and environmental feasibility studies and prepare an FERC license application at a cost of $22,000. No new roads would be constructed or drilling conducted during the feasibility study.

k. Purpose of Project: Project power would be sold.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

Standard Paragraphs

A3. Development Application—Any qualified development applicant desiring to file a competing application must submit to the Commission, on or before the specified comment date for the particular application, a competing development application, or a notice of intent to file such an application. Submission of a timely notice of intent

allows an interested person to file the competing development application no later than 120 days after the specified comment date for the particular application. Applications for preliminary permit will not be accepted in response to this notice.

A4. Development Application—Public notice of the filing of the initial development application, which has already been given, established the due date for filing competing applications or notices of intent. In accordance with the Commission's regulations, any competing development applications or notices of intent to file competing development applications, must be filed in response to and in compliance with the public notice of the intial development application. No competing applications or notices of intent may be filed in response to this notice.

A5. Preliminary Permit—Anyone desiring to file a competing application for preliminary permit for a proposed project must submit the competing application itself, or a notice of intent to file such an application, to the Commission on or before the specified comment date for the particular application (see 18 CFR 4.36 (1985)). Submission of a timely notice of intent allows an interested person to file the competing preliminary permit application no later than 30 days after the specified comment date for the particular application.

A competing preliminary permit application must conform with 18 CFR 4.30(b)(1) and (9) and 4.36.

A7. Preliminary Permit—Any qualified development applicant desiring to file a competing development application must submit to the Commission, on or before the specified comment date for the particular application, either a competing development application or a notice of intent to file such an application. Submission of a timely notice of intent to file a development application allows an interested person to file the competing application no later than 120 days after the specified comment date for the particular application.

A competing license application must conform with 18 CFR 4.30(b)(1) and (9) and 4.36.

A8. Preliminary Permit—Public notice of the filing of the initial preliminary permit application, which has already been given, established the due date for filing competing preliminary permit and development applications or notices of intent. Any competing preliminary permit or development application, or notice of intent to file a competing preliminary permit or development application, must be filed in response to and in compliance with the public notice of the initial preliminary permit application. No competing applications or notices of intent to file competing applications may be filed in response to this notice.

A competing license application must conform with 18 CFR 4.30(b)(1) and (9) and 4.36.

A9. Notice of intent—A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, include an unequivocal statement of intent to submit, if such an application may be filed, either (1) a preliminary permit application or (2) a development application (specify which type of application), and be served on the applicant(s) named in this public notice.

B. *Comments, Protests, or Motions to Intervene*—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. *Filing and Service of Responsive Documents*—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST" or "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing is in response. Any of the above named documents must be filed by providing the original and the number of copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426. An additional copy must be sent to: Mr. Fred E. Springer, Director, Division of Project Management, Federal Energy Regulatory Commission, Room 203–RB, at the above address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D1. *Agency Comments*—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the Federal Power Act, the Fish and Wildlife Coordination Act, the Endangered Species Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. No. 88–29, and other applicable statutes. No other formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the Applicant. If an agency does not file comments with the Commission within the time set for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be set to the Applicant's representatives.

D2. *Agency Comments*—Federal, State, and local agencies are invited to file comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3a. *Agency Comments*—The U.S. Fish and Wildlife Service and the State Fish and Game agency(ies) are requested, for the purposes set forth in Section 408 of the Energy Security Act of 1980, to file within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3b. *Agency Comments*—The U.S. Fish and Wildlife Service and the State

Fish and Game agency(ies) are requested, for the purposes set forth in Section 30 of the Federal Power Act, to file within 45 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 45 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Dated: May 12, 1986.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-11039 Filed 5-15-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER86-471-000]

Arizona Public Service Co.; Filing

May 8, 1986.

Take notice that Arizona Public Service Company (APS) on May 5, 1986, tendered for filing a schedule of "Established Transmission Service Rates" for transmission services provided under the auspices of the Revised Inland Power Pool Agreement (FERC Rate Schedule NO. 104).

The schedule of Established Transmission Service Rates proposes rates for non-firm transmission service that are consistent with previously accepted Commission rates for similar service in other FERC rate schedules.

APS requests waiver of the notice requirements so that the rate can become effective upon the date of filing.

Copies of this filing are being served upon the Arizona Corporation Commission and all the parties to the Revised Inland Power Pool Agreement.

Any person desiring to be heard or to protest said filing should file a Motion to Intervene or Protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's rules of practice and procedure (18 CFR §§ 385.211, 385.214). All such motions or protests should be filed on or before May 16, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a Motion to Intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-11041 Filed 5-15-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ID-1927-003]

Clifford L. Greenwalt; Filing

May 9, 1986.

Take notice that on April 28, 1986 Clifford L. Greenwalt tendered for filing an application to hold the following position:

Position, Name of Corporation, and Classification

Director, CIPS, Public Utility

Any person desiring to be heard or to protest the Application should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's rules of practice and procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before May 21, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-11042 Filed 5-15-86; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 6920-005]

DCH Development Co.; Surrender of Exemption

May 12, 1986.

Take notice that DCH Development Company, Exemptee for the proposed Cascade Dam Hydroelectric Project No. 6920, has requested that his exemption be terminated. The exemption was issued on March 3, 1983. The project would have been located at South Fork of Deer Creek at the Cascade Dam, in Nevada County, California. No construction has commended at this project.

The Exemptee filed the request on April 17, 1986, and the exemption for Project No. 6720 shall remain in effect through the thirtieth day after issuance of this notice unless that day is a Saturday, Sunday or holiday as described in 18 CFR 385.2007, in which case the exemption shall remain in effect through the first business day following that day. New applications involving this project site, to the extent provided for under 18 CFR Part 4, may be filed on the next business day.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-11037 Filed 5-15-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP86-470-000, et al.]

Gas Gathering Corporation, et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commission:

1. Gas Gathering Corpoeation

[Docket No. CP86-470-000]

May 7, 1986.

Take notice that on April 22, 1986, Gas Gathering Corporation (GGC), P.O. Box 519, Hammond, Louisiana 70404, filed in Docket No. CP86-470-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205), for authorization to transport natural gas on behalf of Anchor Gasoline Corporation (Anchor) under the certificate issued in Docket No. CP86-129-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

The proposed transportation service commenced on April 5, 1986, pursuant to the 120-day self-implementing provisions of § 284.223(a)(1) of the Regulations. GGC states that the transportation would be performed under the terms of Rate Schedule T-1 and would be for an initial term through December 5, 1986, and month to month thereafter. It is stated that the maximum daily deliveries under the agreement would be 550 MMBtu.

Comment date: June 23, 1986, in accordance with Standard Paragraph G at the end of this notice.

2. Algonquin Gas Transmission Company

[Docket No. CP86-480-000]

May 9, 1986.

Take notice that on April 28, 1986, Algonquin Gas Transmission Company (Applicant), 1284 Soldiers Field Road, Boston, Massachusetts 02135, filed in Docket No. CP86-480-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale of firm natural gas to eleven existing resale customers, under existing Rate Schedule F-4, and the construction and operation of facilities necessary for such service, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that as a result of additional gas supply of 4,612 MMBtu equivalent of natural gas per day offered to it by its principal supplier, Texas Eastern Transmission Corporation (TETCO), Applicant proposes to offer such additional gas to the following of its existing resale customers under its existing Rate Schedule F-4:

Customer	Rate schedule F-4 additional maximum daily quantities (million Btu)	Rate schedule F-4 additional annual contract quantities (million Btu)
Bay State Gas Co	576	210,970
Bristol and Warren Gas Co	34	12,410
Colonial Gas Co	200	73,000
Commonwealth Gas Co	1,225	447,490
The Connecticut Light & Power Co	900	324,000
Fall River Gas Co	252	91,980
City of Norwich, CT	77	28,105
The Pequot Gas Co	9	3,285
Providence Gas Co	808	294,920
South County Gas Co	21	7,665
The Southern Connecticut Gas Co	517	188,700
Total	4,612	1,683,280

In order to provide the proposed sales service on a firm basis, Applicant states that it must construct the following loops: (1) 2.5 miles of 16-inch pipeline loop would be added to Applicant's existing G-3 system near Dartmouth, Massachusetts; and (2) 1.4 miles of 12-inch pipeline loop, will be added to Applicant's existing G-10 system near Berkley, Massachusetts. Applicant states that the total cost of the facilities is estimated to be $3,985,100. Applicant states it would initially finance this cost of constructing the proposed facilities through revolving credit arrangements, short-term loans, and funds on hand, with permanent financing to be undertaken at a later date as part of Applicant's overall long-term financing program.

Applicant states that it would render the proposed firm sales service upon the completion of required facilities and availability of firm service from TETCO, which presently is scheduled to commence on or about November 1, 1986.

Comment date: May 28, 1986, in accordance with Standard Paragraph F at the end of this notice.

3. United Gas Pipe Line Company

[Docket No. CP86-482-000]

May 9, 1986.

Take notice that on April 29, 1986, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251-1478, filed in Docket No. CP86-482-000 an application pursuant Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas on behalf of Air Products and Chemicals, Inc. (Air Products), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

United states that Air Products owns and operates an industrial facility near Floridatown, Santa Rosa County, Florida. Pursuant to an agreement executed November 1, 1984, United has, under Order No. 319, transported natural gas to Air Products' facility for use as process gas and feedstock. Although the agreement provides that additional delivery points may be added by mutual agreement, the Commission has held that United may not transport gas delivered through delivery points that were not specified in the agreement on October 9, 1985. United states that its application is filed, in part, to restore its ability to add delivery points related to Air Products' sources of supply and to authorize the transportation of gas for use as boiler fuel, process gas and feedstock.

United states that it would transport, on an interruptible basis, up to 35,000 Mcf per day to an existing point of interconnection between the facilities of United and Air Products located near Floridatown, Santa Rosa County, Florida. United advises that there are currently 32 delivery points. However, new delivery points would be allowed periodically during the term of the agreement, if the parties mutually agreed. United could accept or refuse tenders in excess of 35,000 Mcf per day. The initial rate for the transportation would be 42.04 cents per Mcf, which is United's currently effective Northern - Zone transportation rate, including components for fuel and GRI.

The agreement would remain in effect until October 1, 1989, and would continue on a year-to-year basis thereafter. However, either party could terminate the agreement prior to October 1, 1989, by giving the other party 24 months advance written notice. For termination thereafter, six months prior notice is required.

Comment date: May 28, 1986, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's procedural rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is

BEST COPY AVAILABLE

filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-11034 Filed 5-15-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP86-474-000, et al.]

Great Lakes Gas Transmission Company, et al.; Natural Gas Certificate Filings

May 12, 1986.

Take notice that the following filings have been made with the Commission:

1. Great Lakes Gas Transmission Company

[Docket No. CP86-474-000]

Take Notice that on April 23, 1986, Great Lakes Gas Transmission Company, 2100 Buhl Building, Detroit, Michigan 48226 (Petitioner), filed in Docket No. CP86-474-000 a petition to amend the Commission's order issued February 10, 1986, in Docket No. CP79-464-010, *et al.*, 34 FERC ¶ 61,185, pursuant to section 7(c) of the Natural Gas Act, so as to authorize an increase in transportation volumes, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioner states that it seeks authorization to render transportation service, for the contract year beginning November 1, 1986, for Texas Eastern Transmission Corporation (TETCO) of volumes of natural gas to be purchased by TETCO from ProGas Limited, in the quantity of 75,000 Mcf of gas per day, instead of the 37,500 Mcf per day currently authorized for such contract year.

Petitioner states that pursuant to an order issued June 10, 1981, 15 FERC ¶ 61,154, as amended by the orders issued July 18, 1985, and February 10, 1986, Petitioner is currently authorized to transport up to 75,000 Mcf of gas per day for TETCO. Petitioner further states that current authorization provides for transportation service for TETCO of up to 75,000 Mcf per day and an amount equal to 50 percent of 75,000 Mcf of gas per day during the contract year beginning November 1, 1986. Petitioner states that TETCO has requested in an April 4, 1986, letter that TETCO's level of transportation volumes remain at 75,000 Mcf per day commencing November 1, 1986.

Comment date: June 2, 1986, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

2. Standard Gas Marketing Company

[Docket No. CP86-448-000]

Take notice that on April 16, 1986, Standard Gas Marketing Company (SGM), 5151 San Felipe, Houston, Texas 77056, filed in Docket No. CP86-448-000 an application pursuant to section 7 of the Natural Gas Act and Subpart E of Part 157 of the Commission's Regulations for an optional expedited certificate of public convenience and necessity authorizing the construction and operation of certain pipeline facilities and the transportation of natural gas through such facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

SGM proposes to construct and operate 30.0 miles of 8-inch pipeline from an interconnection with ANR Pipeline Company's (ANR) pipeline in Bolivar County, Mississippi, to a pulp and paper mill in Desha County, Arkansas, owned and operated by Potlatch Corporation (Potlatch) and to transport gas through such facilities for Potlatch. SGM estimates that the cost of the proposed facilities wold be $4,111,000 and states that such facilities would be financed from funds on hand or funds obtained from SGM's parent company, Standard Oil Production Company (Standard).

It is stated that pursuant to a natural gas sales agreement dated August 29, 1985, as amended, Potlatch is obligated to purchase from SGM, once SGM has the necessary facilities in place, its requirements for natural gas for use in its pulp and paper mill located near Cypress Bend, Desha County, Arkansas. The agreement, it is indicated, is for a primary term of five years and year to year thereafter until terminated by either party. It is explained that the Potlatch mill is located within forty miles of several points on the existing interstate pipeline system of ANR and that under a transportation agreement dated October 10, 1985, between SGM and Potlatch, SGM is obligated to seek approval for the construction of facilities connecting the Potlatch mill to ANR's system and the transportation of gas for Potlatch through those facilities. Initially, it is contemplated that SGM would be transporting gas purchased by Potlatch from SGM, with Potlatch's taking title to the gas at the point of interconnection between the SGM and ANR facilities. However, it is not that the transportation agreement obligates SGM to transport gas for Potlatch for a period of at least five years after sales terminate.

It is stated that under a transportation agreement dated November 19, 1985, as amended February 13, 1986, ANR has agreed to transport gas for SGM from certain specified points of receipt onshore and offshore Texas and in Oklahoma and Kansas to the proposed point of interconnection with the SGM facilities for which approval is sought herein. It is further stated that on February 26, 1986, ANR filed with the Commission, in Docket No. CP86-348-000, an application for a certificate of public convenience and necessity authorizing it to provide the transportation services contemplated by the agreement.

It is explained that Potlatch does not presently have a supplier of gas for its Cypress Bend pulp and paper mill. The proposal herein would, it is asserted, enable SGM to provide Potlatch with economic natural gas for use in its process equipment, which has been recently modified to permit dual fuel operation. It is further asserted that this service would eliminate Potlatch's sole dependence on fuel oil, would enable Potlatch to obtain natural gas service at market sensitive prices, and would contribute to an overall lowering of its cost of manufacturing.

SGM states that concurrently with the filing of the instant application it has filed an application in Docket No. CP86-449-000 for a blanket transportation certificate under Section 284.221 of the Commission's Regulations.

Comment date: June 2, 1986, in accordance with Standard Paragraph F at the end of this notice.

3. Tennessee Gas Pipeline Company, a Division of Tenneco Inc. United Gas Pipe Line Company

[Docket No. CP86-434-000]

Take notice that on April 11, 1986, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), P.O. Box 2511, Houston, Texas 77001 and United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77001, filed in Docket No. CP86-434-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the exchange of natural gas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Tennessee and United propose to exchange up to 5,000 Mcf of natural gas

per day from sources of supply in the vicinity of each other's pipeline systems in Cameron and Lafayette Parishes, Louisiana. It is stated that United would deliver natural gas to Tennessee at a point of receipt in the Little Chenier field, Cameron Parish, Louisiana. It is further stated that natural gas delivered to United by or for the account of Tennessee would be delivered to United at the following points of delivery: (1) United's existing common point connection in South Grand Chenier field, Cameron Parish, Louisiana; (2) United's existing common point connection in the Ridge field, Lafayette Parish, Louisiana; and (3) United's existing common point connection in the Grand Chenier field, Cameron Parish, Louisiana.

Tennessee and United state that all natural gas exchanged under the gas exchange agreement dated June 12, 1964, is at no charge to either party provided, however, there are no imbalances. For excess gas transported and delivered by United to Tennessee at the Tennessee balancing points, the amount to be paid by Tennessee to United would be an amount, per Mcf, equal to one-half of United's transportation rate in effect from time to time in United's Southern Rate Zone and/or one-half of United's transportation rate in effect from time to time in United's Northern Rate Zone, depending upon the zone in which such excess gas is delivered. For all excess gas delivered by Tennessee to United at the United balancing points, the amount to be paid by United to Tennessee for such service would be based on Tennessee's system average transmission costs.

It is stated that in the event of an imbalance, the natural gas from such imbalance would be transported and delivered by the party receiving such excess natural gas to certain balancing points of delivery. It is further stated that excess natural gas delivered by United to Tennessee would be delivered at the following balancing points: (1) The existing interconnection between Tennessee and United located near Iowa, Calcasieu Parish, Louisiana, (2) the existing interconnection between Tennessee and United near Centerville, St. Mary Parish, Louisiana, and (3) the existing point of interconnection between Tennessee and United near West Monroe, Ouachita Parish, Louisiana. To the extent that Tennessee delivers excess gas to United, it is indicated that such natural gas would be delivered at the following balancing points: (1) the existing interconnection between Tennessee and United near Iowa, Calcasieu Parish, Louisiana; (2) the outlet of the Champlin gas processing plant in Panola County, Texas; and (3) the existing interconnection between Tennessee and United near Wharton, Wharton County, Texas.

Comment date: June 2, 1986, in accordance with Standard Paragraph F at the end of this notice.

4. Tennessee Gas Pipeline Company, a Division of Tenneco Inc.

[Docket No. CP86-465-000]

Take notice that on April 21, 1986, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), P.O. Box 2511, Houston, Texas 77001, filed in Docket No. CP86-465-000 an application pursuant to section 7(c) of the Natural Gas Act and Subpart E of Part 157 of the Commission's Regulations for a certificate of public convenience and necessity authorizing the sale of natural gas for resale in interstate commerce, on an interruptible basis, and the operation of certain existing measurement facilities to make such sale, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Tennessee requests authorization to make a sale for resale to Cameron Gas Company (Cameron), on an interruptible basis, of up to 20 billion Btu of natural gas per day pursuant to an interruptible gas sales contract, dated April 17, 1986. It is stated that Cameron owns and operates a gas distribution system in West Virginia. It is explained that Cameron intends to purchase such gas for resale to various industrial end-user customers.

Tennessee proposes to deliver gas to Cameron at the following points:

1. Interconnection of Tennessee and Mountaineer Gas Company (Mountaineer Gas) at Tennessee's meter No. 2-0614, Cabell County, West Virginia;
2. Interconnection of Tennessee and Mountaineer Gas at Tennessee's meter No. 2-0615, Kanawha County, West Virginia;
3. Interconnection of Tennessee and Columbia Gas Transmission Corporation (Columbia Gas) at Tennessee's meter No. 2-0027, Kanawha County, West Virginia;
4. Interconnection of Tennessee and Columbia Gas at Tennessee's meter No. 2-0001, Kanawha County, West Virginia; and/
5. Interconnection of Tennessee and Consolidated Gas Supply Corporation at Tennessee's meter No. 2-0044, Kanawha County, West Virginia.

It is explained that with the exception of the metering facilities connecting Mountaineer Gas' system, the meters proposed to be utilized are existing certificated sales meters. It is stated that with respect to the metering facilities connecting Mountaineer Gas' system, Tennessee seeks authorization to operate the existing facilities in interstate commerce. Tennessee further states that these facilities were installed to render a transportation service pursuant to section 311 of the Natural Gas Policy Act of 1978 on behalf of Mountaineer Gas and pursuant to § 284.3(c) of the Commission's Regulations are not jurisdictional. Tennessee requests authorization to operate the facilities to make the jurisdictional sale proposed herein.

Tennessee states that it proposes to charge Cameron each month a negotiated sales rate for each dt equivalent of natural gas delivered by Tennessee for Cameron's account at the delivery points. Tennessee requests authorization to have several negotiated gas sales rates applicable to the dt of gas solf by Tennessee to Cameron each month. Tennessee proposes that these rates, to be agreed upon monthly, would not exceed the maximum gas sales rate currently calculated to be $3.06, or be less than the minimum gas sales rate, currently calculated to be $2.66. Tennessee also requests authority to charge Cameron an overrun quantity penalty, emergency quantity charge, or an incremental pricing surcharge.

Additionally, as provided for in Subpart E of Part 157, Tennessee requests conditional pregranted abandonment authorization at the expiration of its gas sales contract with Cameron.

Comment date: June 2, 1986, in accordance with Standard Paragraph F at the end of this notice.

5. United Gas Pipe Line Company

[Docket No. CP86-475-000]

Take notice that on April 25, 1986, United Gas Pipe Line Company (Applicant), P.O. Box 1478, Houston, Texas 77251-1478, filed in Docket No. CP86-475-000, a request pursuant to §§ 157.205 and 157.211 of the Regulations under the Natural Gas Act (18 CFR 157.205 and 157.211) for authority to construct and operate a sales tap under the certificate issued in Docket No. CP82-430-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Applicant proposes to install a 2-inch sales tap on its 4-inch Avery Island pipeline in Iberia Parish, Louisiana. In order to sell and deliver up to 124 Mcf of natural gas per day to Entex, Inc. (Entex), a local distribution company, for resale to residential and commercial

customers in Entex's New Iberia, Louisiana, Service Area. Applicant states that it is authorized in Docket No. CP71–89–000 to sell and deliver natural gas to Entex for resale under Applicant's Rate Schedule DG–S. Applicant further states that the proposed construction and operation would not result in an increase in Entex's aggregate base requirements or contractual MDQ, nor would it have an adverse impact upon any of Applicant's other existing customers.

Comment date: June 26, 1986, in accordance with Standard Paragraph G at the end of this notice.

6. United Gas Pipe Line Company

[Docket No. CP86–476–000]

Take notice that on April 25, 1986, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251–1478, filed in Docket No. CP86–476–000 a request, pursuant to § 157.205 of the Commission's Regulations (18 CFR 157.205), for authorization to construct and operate a 2-inch sales tap on United's 16-inch pipeline in Ouachita Parish, Louisiana, under the certificate issued in Docket No. CP82–430–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

United states that the proposed sales tap would enable United to sell and deliver to Trans Louisiana Gas Company Inc. (Transla), the local distributor, an estimated daily volume of up to 100 Mcf of natural gas on an average day, and 160 Mcf on a peak day, for resale to residential users in the Many, Louisiana, service area. United advises that Transla is an existing total requirements customer and purchases gas under United's Rate Schedule G–N pursuant to a service agreement dated August 27, 1981. United avers that its proposal would not impact Transla's current base requirement (the maximum daily quantity is stated to be 4,075 Mcf) or minimum daily requirement.

Comment date: June 26, 1986, in accordance with Standard Paragraph G at the end of this notice.

7. Williston Basin Interstate Pipeline Company

[Docket No. CP86–450–000]

Take notice that on April 17, 1986, Williston Basin Interstate Pipeline Company (Williston Basin), Suite 200, 304 East Rosser Avenue, Bismarck, North Dakota 58501, filed in Docket No. CP86–450–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to abandon a sales tap and appurtenant facilities under the authorization issued in Docket Nos. CP82–487–000 *et al.*, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in its request which is on file with the Commission and open to public inspection.

Williston Basin proposes to abandon one sales tap and appurtenant facilities located on its natural gas transmission system in McLean County, North Dakota. It is stated the customer, Montana-Dakota Utilities Co., a Division of MDU Resources Group, Inc., no longer requires the tap and facilities because its customers' site has been acquired by the North Dakota Highway Department through right-of-way acquisition. It is stated that the abandonment of the sales tap would have no effect upon existing rates and no impact upon Williston Basin's peak-day and annual requirements. Williston Basin further states that since such sales tap would be abandoned on its existing transmission right-of-way, there would be no significant adverse impact on the environment.

Comment date: June 26, 1986, in accordance with Standard Paragraph G at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's procedural rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to §157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717–01–M

[Project Nos. 8507–001, et al.]

HydroPool, et al.; Surrender of Preliminary Permits

May 12, 1986.

Take notice that the following preliminary permits have been surrendered effective as described in Standard Paragraph I at the end of this notice.

1. HydroPool

[Project No. 8507–001]

Take notice that HydroPool, Permittee for the Eagle Creek Project, FERC No. 8507, has requested that its preliminary permit be terminated. The preliminary permit for Project No. 8507 was issued on March 14, 1985, and would have expired on August 31, 1988. The project would have been located on Eagle Creek, in Trinity County, California.

The Permittee filed the request on April 18, 1986.

2. Utah Municipal Power Agency

[Project No. 7316–002]

Take notice that Utah Municipal Power Agency, Permittee for the Thistle Lake Power Project, FERC No. 7316, has

requested that its preliminary permit be terminated. The preliminary permit for Project No. 7316 was issued on March 20, 1984, and would have expired on February 28, 1987. The project would have been located on Spanish Fork River, in Utah County, Utah.

The Permittee filed the request on April 17, 1986.

Standard Paragraphs

I. The preliminary permit shall remain in effect through the thirtieth day after issuance of this notice unless that day is a Saturday, Sunday or holiday as described in 18 CFR 385.2007 in which case the permit shall remain in effect through the first business day following that day. New applications involving this project site, to the extent provided for under 18 CFR Part 4, may be filed on the next business day.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA86-2-47-002]

MIGC, Inc.; Compliance Filing

May 9, 1986.

Take notice that on May 1, 1986, MIGC, Inc. (MIGC) tendered for filing as part of its FERC Gas Tariff, Original Volume No. 1, Thirty-Seventh Revised Sheet No. 32. MIGC states that the filed sheet reflects changes made effective through the Commission's approval on April 3, 1986 of a contested settlement in Docket No. RP84-15, *et al.* and MIGC's latest purchase gas cost adjustment in the above-referenced docket. According to § 381.103(b)(2)(iii) of the Commission's regulations (18 CFR 381.103(b)(2)(iii)), the date of filing is the date on which the Commission receives the appropriate filing fee, which in the instant case was not until May 5, 1986.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's rules of practice and procedure. All such motions or protests should be filed on or before May 20, 1986. (18 CFR 385.214, 385.211). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. CP85-57-005]

Natural Gas Pipeline Co. of America; Compliance Filing

May 9, 1986.

Take notice that on April 25, 1986, Natural Gas Pipeline Company of America (Natural) tendered for filing Fourth Revised Sheet No. 5E to be a part of its FERC Gas Tariff, Third Revised Volume No. 1. Natural states that the purpose of this sheet is to set out the threshold percentages and discount rates applicable to Rate Schedule IOS for the month of May, 1986. Natural further states that this filing is being made in accordance with the provisions of Rate Schedule IOS which was authorized by FERC order issued March 13, 1986, at Docket No. CP85-57-003.

Natural has mailed copies of this filing to its jurisdictional customers and to interested regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capital Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's rules of practice and procedure. All such motions or protests should be filed on or before May 16, 1986. (18 CFR 385.214, 385.211). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER86-474-000]

Southern California Edison Co.; Filing

May 8, 1986.

Take notice that, on May 7, 1986, Southern California Edison Company ("Edison") tendered for filing an agreement entitled "Edison-Arizona Interruptible Transmission Service Agreement", which has been executed by Edison and the Arizona Public Service Company (APS").

Under the terms and conditions of the Agreement, Edison will make available to APS interruptible transmission service from a specified point of receipt to a specified point of delivery.

The Agreement is proposed to become effective when executed and accepted for filing by the Commission, with a proviso that if the Commission enters into a hearing to determine whether the Agreement is just and reasonable, the Agreement will not become effective until the date when an order no longer subject to judicial review has been issued by the Commission determining the Agreement to be just and reasonable without changes or new conditions unacceptable to either party.

Copies of the filing were served upon the Public Utilities Commission of the State of California and APS.

Any person desiring to be heard or to protest this application should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with section 211 or 214 of the Commission's rules of practice and procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 16, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[Docket No. SA86-18-000]

Zinn Petroleum Co.; Petition for Adjustment

May 12, 1986.

On March 28, 1986, Zinn Petroleum Company (Zinn) filed with the Federal Energy Regulatory Commission a petition for adjustment pursuant to section 502(c) of the Natural Gas Policy Act of 1978 (NGPA) [1] and Subpart K of the Commission's Rules of Practice and Procedure.[2] Zinn seeks waiver of its

[1] 15 U.S.C. 3412(c) (1982).

[2] 18 CFR Part 385, Subpart K (1985).

obligation under Commission Order Nos. 399, 399–A, and 399–B [3] requiring payment of Btu adjustment refunds by first sellers of natural gas.

Zinn, operator of the Daniel-Pierce No. 1 Well, Matagorda County, Texas, states that a working interest owner in the well, Partners Oil Company (Partners), has declined, on the grounds of bankruptcy, to pay $4,194.13 in Btu adjustment refunds. Zinn had sold the gas from this well to Dow Chemical U.S.A. which is seeking the Btu refund from Zinn. Upon Zinn's request that Partners pay its share of this refund, Partners declined, stating that the U.S. Bankruptcy Court for the Southern District of Texas had confirmed a plan of reorganization for Partners and that Partners was thereby released from all pending claims. Partners further stated that since the refund claim was a pre-bankruptcy petition claim and was not filed with the Court, nothing was allowed for it in the confirmed plan. Zinn requests a waiver of responsibility for payment of the refund amount attributable to Partners' working interest in the well.

The procedures applicable to the conduct of this adjustment proceeding are found in Subpart K of the Commission's Rules of Practice and Procedure. Any person desiring to participate in this adjustment proceeding must file a motion to intervene in accordance with the provisions of such Subpart K. All motions to intervene must be filed within 15 days after publication of this notice in the **Federal Register**.

ENVIRONMENTAL PROTECTION AGENCY

[OPTS–59186B FRL–3017–8]

Toxic and Hazardous Substances Control; Extension of Test Marketing Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's extension of the test marketing period of a test marketing exemption (TME) under section 5(h)(6) of the Toxic Substances Control Act (TSCA), TME–85–32. The new test marketing conditions are described below.

EFFECTIVE DATE: May 8, 1986.

FOR FURTHER INFORMATION CONTACT: Eileen Gibson, Premanufacture Notice Management Branch, Chemical Control Division (TS–794), Environmental Protection Agency, Room E–609, 401 M Street, SW., Washington, DC 20460, (202–382–3394).

SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use and disposal of the substances for test marketing purposes will not present any unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities and may modify or revoke a test marketing exemption upon receipt of new information which casts significant doubt on its finding that the test marketing activity will not present any unreasonable risk of injury.

EPA hereby extends TME–85–32. EPA has determined that test marketing of the new chemical substance described below, under the conditions set out in the original TME appplication and extension request, and for the time periods and restrictions (if any) specified below, will not present any unreasonable risk of injury to health or the environment. Production volume, use, and number of customers must not exceed those specified in the application. All other conditions and restrictions described in the application and in this notice must be met.

The following additional restrictions apply to TME–85–32. A bill of lading accompanying each shipment must state that the use of the substance is restricted to those approved in the TME. In addition, the Company shall maintain the following records until five years after the dates they are created, and shall make them available for inspection or copying in accordance with section 11 of TSCA.

1. The applicant must maintain records of the quantity of the TME substance produced.

2. The applicant must maintain records of the dates of shipment to each customer and the quantities supplied in each shipment.

3. The applicant must maintain copies of the bill of lading that accompanies each shipment of the TME substance.

T–85–32

Date of Receipt: March 19, 1985.

Notice of Receipt: March 29, 1985 (50 FR 12626).

Applicant: CP Chemicals, Inc.

Chemical: (S) Lead methanesulfonate.

Use: (S) Lead salt in electroplating operations.

Production Volume: 10,000 pounds.

Number of Customers: Six.

Worker Exposure: Manufacture: dermal and inhalation, a total of up to 3 workers, up to 2 hrs/day for up to 20 days/year each. Use: dermal and inhalation, a total of up to 6 workers, up to 8 hours/day for up to 28 days/year each.

Notice of Approval of Test Marketing Exemption: May 7, 1985 (50 FR 19228).

Original Test Marketing Period: Twelve months.

Modified Test Marketing Period: Six months.

Commencing on: May 8, 1986.

Risk Assessment: EPA identified no significant health or environmental concerns. Therefore, the test market substance will not present any unreasonable risk of injury to health or the environment.

Public Comments: None.

The Agency reserves the right to rescind approval or modify the conditions and restrictions of an exemption should any new information come to its attention which casts significant doubt on its findings that the test marketing activities will not present any unreasonable risk of injury to health or the environment.

Dated: May 8, 1986.

Don R. Clay,

Director, Office of Toxic Substances.

BILLING CODE 6560-50-M

[OPTS–59185B; FRL–3017–4]

Toxic and Hazardous Substance Control; Extension of Test Marketing Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's extension of the test marketing period of a test marketing exemption (TME) under section 5(h)(6) of the Toxic Substances Control Act (TSCA), TME–85–53. The new test marketing conditions are described below:

EFFECTIVE DATE: May 8, 1986.

FOR FURTHER INFORMATION CONTACT: Eileen Gibson, Premanufacture Notice

Management Branch, Chemical Control Division (TS–794), Environmental Protection Agency, Room E–609, 401 M Street SW., Washington, DC 20460 (202–382–3394).

SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use and diposal of the substances for test marketing purposes will not present any unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities and may modify or revoke a test marketing exemption upon receipt of new information which casts significant doubt on its finding that the test marketing activity will not present any unreasonable risk of injury.

EPA hereby extends TME–85–53. EPA has determined that test marketing of the new chemical substance described below, under the conditions set out in the original TME application and extension request, and for the time periods and restrictions (if any) specified below, will not present any unreasonable risk of injury to health or the environment. Production volume, use, and number of customers must not exceed those specified in the application. All other conditions and restrictions described in the application and in this notice must be met.

The following additional restrictions apply to TME–85–53. A bill of lading accompanying each shipment must state that the use of the substance is restricted to those approved in the TME. In addition, the Company shall maintain the following records until five years after the dates they are created, and shall make them available for inspection or copying in accordance with section 11 of TSCA.

1. The applicant must maintain records of the quantity of the TME substance produced.

2. The applicant must maintain records of the dates of shipment to each customer and the quantities supplied in each shipment.

3. The applicant must maintain copies of the bill of lading that accompanies each shipment of the TME substance.

T–85–53

Date of Receipt: June 20, 1985.

Notice of Receipt: June 28, 1985 (50 FR 26840).

Applicant: CP Chemicals, Inc.

Chemical: (S) Copper (2+) methanesulfonate.

Use: (S) Copper salt in electroplating operations.

Production Volume: 4545 kilograms.

Number of Customers: Six.

Worker Exposure: Manufacture: A total of 4 workers at 1 site for up to 3 hours per day, 20 days per year. Use: A total of 6 workers per site, at 6 sites for up to 8 hours per day, 28 days per year.

Notice of Approval of Test Marketing Exemption: August 6, 1985 (50 FR 31770).

Original Test Marketing Period: Twelve months.

Modified Test Marketing Period: Six months.

Commencing on: May 8, 1986.

Risk Assessment: EPA identified no significant health or environmental concerns. Therefore, the test market substance will not present any unreasonable risk of injury to health or the environment.

Public Comments: None.

The Agency reserves the right to rescind approval or modify the conditions and restrictions of an exemption should any new information come to its attention which casts significant doubt on its findings that the test marketing activities will not present any unreasonable risk of injury to health or the environment.

[OPTS–59221; FRL–3017–7]

Dimethyl Siloxane Copolymer; Test Marketing Exemption Application

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA may upon application exempt any person from the premanufacturing notification requirements of section 5 (a) or (b) of the Toxic Substances Control Act (TSCA) to permit the person to manufacture or process a chemical for test marketing purposes under section 5(h)(1) of TSCA. Requirements for test marketing exemption (TME) applications, which must either be approved or denied within 45 days of receipt, are discussed in EPA's final rule published in the **Federal Register** of May 13, 1983 (48 FR 21722. This notice, issued under section 5(h)(6) of TSCA, announces receipt of one application for an exemption, provides a summary, and requests comments on the appropriateness of granting the exemption.

DATE: Written comments by: June 2, 1986.

ADDRESS: Written comments, identified by the document control number "[OPTS–59221]" and the specific TME number should be sent to: Document Control Officer (TS–790), Confidential Data Branch, Information Management Division, Office of Toxic Substances, Environmental Protection Agency, Rm. E–201, 401 M Street SW, Washington, DC 20460, (202) 382–3532.

FOR FURTHER INFORMATION CONTACT: Wendy Cleland-Hamnett, Premanufacture Notice Management Branch, Chemical Control Division (TS–794), Office of Toxic Substances, Environmental Protection Agency, Rm. E–611, 401 M Street, SW, Washington, DC 20460, (202) 382–3725.

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission provided by the manufacturer on the TME received by EPA. The complete non-confidential document is available in the Public Hearing Room E–107 at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared April 28, 1986 through May 2, 1986 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 382–5075/76. An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated February 7, 1986 (51 FR 4804).

Draft EISs

ERP No. D–AFS–J82001–00, Rating EC2, Custer Nat'l Forest, Noxious Weed Treatment Program, MT, ND, and SD. Summary: EPA generally concurs with the preferred alternative, but recommends additional emphasis on applicator training and awareness of herbicide impacts on riparian and wetland areas.

ERP No. D–AFS–K01004–AZ, Rating EC2, Canyon Uranium Mining Development, Kaibab Nat'l Forest, AZ. Summary: EPA requested more complete information on provisions to prevent contamination from storm water runoff and mine abandonment; and clarification of portions of the radiation discussion.

ERP No. D–AFS–K65069–CA, Rating EC2, Sequoia Nat'l Forest, Land and Resource Mgmt. Plan, CA. Summary: EPA expressed concerns about potential impacts to forest resources such as watersheds, water quality, riparian/meadow areas, soils and beneficial uses.

ERP No. D–COE–C36060–NY, Rating LO, Cazenovia Creek Flood Damage Reduction Plan, NY. Summary: EPA believes that no significant environmental impacts will result from implementation of the project. However, EPA requested that additional information on minimum flows through the sluice gate be included in the final EIS.

Final EISs

ERP No. FB–COE–A36264–CA, Wildcat and San Pablo Creeks Flood Control Plan, Description of Impacts, CA. Summary: The final supplemental EIS adequately addressed the flood control project's environmental impacts.

ERP No. FS–COE–C36005–NY, Saw Mill River Basin Flood Control Project, Elmsford and Greenburgh Areas, NY. Summary: The final EIS adequately addresses the concerns EPA expressed on the draft EIS.

ERP No. FS–COE–F39015–OH, Geneva-on-the-Lake Small Boat Harbor Construction, Revised Plan and Additional Wetland Mitigation Construction, OH. Summary: EPA's review resulted in no objections to the proposed activity.

ERP No. FS–USN–C11004–00, Stapleton—Fort Wadsworth Complex, Surface Action Group Homeporting Facility, Development Plans Modification and Family Housing alternatives at Staten Island, NY, RI, and MA. Summary: EPA believes that no significant environmental impacts will result from the implementation of this project. However, EPA requested that a commitment to implement mitigation measures on impacts to air quality and environmentally sensitive resources be included in the record of decision.

Dated: May 13, 1986.

David G. Davis,

Acting Director, Office of Federal Activities.

[ER–FRL–3016–7]

Intent to Prepare an Environmental Impact Statement; Hilltop Interception; Northeast Ohio Regional Sewer District: Cleveland, OH

AGENCY: Environmental Protection Agency (USEPA) Region V.

ACTION: Preparation of an environmental impact statement (EIS) for the construction of interceptor sewers to service the Hilltop Planning Area of the Northeast Ohio Regional Sewer District (NEORSD).

PURPOSE: In accordance with section 102(2)(c) of the National Environmental Policy Act, USEPA has identified a need to prepare an Environmental Impact Statement (EIS) and therefore publishes this Notice of Intent pursuant to 40 CFR 1401.7.

FOR FURTHER INFORMATION CONTACT: William D. Spaulding, 5WFP–TUB–00, Environmental Planning Section, Telephone No. (312) 886–0215, United States Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604.

Summary

Proposed USEPA Action

It is the intent of USEPA to study and select the most cost-effective and environmentally acceptable wastewater

treatment and/or conveyance alternative for the Hilltop Planning Area.

The Hilltop planning area is located in northeastern Cuyahoga County and includes all or portions of Richmond Heights, Highland Heights, Lyndhurst, Mayfield, Mayfield Heights, and Willoughby Hills.

Project Background

The Hilltop project is the second portion of the Heights/Hilltop interceptor system. A Finding of No Significant Impact (FNSI) was issued for the Heights portion of the system on August 29, 1984, and construction has begun. General problems to be solved by the Hillton project include: wet weather overflows from the Beech Hill-Bonnieview/ Wilson Mills (BBW) pumping complex; inadequate treatment by package plants; and inflow and infiltration problems. The proposed project, as described in an August 1985 preliminary environmental assessment, recommends construction of a large (60 to 70 million gallons per day) gravity interceptor to transport wastewater to the Heights Interceptor and then to the NEORSD Easterly WWTP. The Hilltop Interceptor would eliminate the need for package plants and several pumping stations in the area.

Issues Involved

a. Construction of the proposed project may lead to destruction of natural terrestrial and acquatic habitat.

b. The design of the proposed project appears to anticipate growth, yet population data reflects a stable population over the 20-year design period. The basis of design, its relationship to growth projections and the environmental impacts associated with potential development will be studied.

c. The recommended action is the environmental assessment and facilities plan is the most costly alternative. This expenditure may be a high cost project.

Scoping Process

The scope of the EIS will encompass the range of possible alternatives for solving the Hilltop area wastewater problems and their potential impacts upon the surrounding communities. It is the intent that there shall be an early and open process for determining the scope of issues to be addressed and for all parties to identify the significant environmental issues related to the proposed project.

The scoping process shall consist of two public meetings to be held at 3:00 and 7:30 p.m. on Wednesday, June 18, 1986, at the Highland Heights Community Center, 5827 Highland Road, Highland Heights, Ohio 44143.

At each of these meetings a summary of the project will be provided, and the public will be invited to present concerns they would like to see addressed in the EIS.

Timing

USEPA expects to issue a draft EIS for public review and comment within approximately ten (10) months.

Requests for Copies of the Draft EIS

All interested parties are encouraged to submit their names and addresses to the person indicated above for inclusion on the distribution list for the draft EIS and related public notices.

David G. Davis,

Acting Director, Office of Federal Activities.

[OPTS-51623; FRL-3017-6]

Toxic and Hazardous Substances Control; Certain Chemicals Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of the final rule published in the Federal Register of May 13, 1983 (48 FR 21722). This notice announces receipt of thirty-four PMNs and provides a summary of each.

DATES: Close of Review Period:

P 86-980, 86-981 and 86-982—July 30, 1986.

P 86-983, 86-984 and 86-985—August 2, 1986.

P 86-986, 86-987, 86-988, 86-989, 86-990, 86-991, 86-992, 86-993, 86-994, 86-995, 86-996, 86-997, 86-998, 86-999, 86-1000, 86-1001, 86-1002, 86-1003, 86-1004, 86-1005, 86-1006, 86-1007—August 3, 1986.

P 86-1008, 86-1009, and 86-1010—August 4, 1986.

P 86-1011, 86-1012, and 86-1013—August 5, 1986.

Written comments by:

P 86-980, 86-981 and 86-982—June 30, 1986.

P 86-983, 86-984 and 86-985—July 3, 1986.

P 86-986, 86-987, 86-988, 86-989, 86-990, 86-991, 86-992, 86-993, 86-994, 86-995, 86-996, 86-997, 86-998, 86-999, 86-1000, 86-1001, 86-1002, 86-1003, 86-1004, 86-1005, 86-1006 and 86-1007—July 4, 1986.

P 86-1008, 86-1009, 86-1010—July 5, 1986.

P 86-1011, 86-1012, and 86-1013—July 6, 1986.

ADDRESS: Written comments, identified by the document control number "[OPTS-51623]" and the specific PMN number should be sent to: Document Control Officer (TS-790), Confidential Data Branch, Information Management Division, Office of Toxic Substances, Environmental Protection Agency, Rm. E-201, 401 M Street SW., Washington, DC 20460, (202) 382-3532.

FOR FURTHER INFORMATION CONTACT: Wendy Cleland-Hamnett, Premanufacture Notice Management Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-611, 401 M Street, SW, Washington, DC 20460, (202) 382-3725.

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission provided by the manufacturer on the PMNs received by EPA. The complete non-confidential document is available in the Public Reading Room E-107 at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

P 86-980

Manufacturer. E.I. du Pont de Nemours and Company, Inc.

Chemical. (G) Imidazolidine amide carboxylate complex.

Use/Production. (G) Destructive use. Prod. range: Confidential.

Toxicity Data. Acute oral: 25,000 mg/kg; Irritation: Skin—Non-corrosive, Eye—Non-irritant; LC_{50} 96 hr (Fathead minnow): 45.2 mg/l; EC_{50} 48 hr (Daphnia magna): 21.1 mg/l.

Exposure. Manufacture: dermal.

Environmental Release/Disposal. Release to water. Disposal by on-site waste water treatment.

P 86-981

Manufacturer. Confidential.

Chemical. (G) Alkylphosphatoalkyl titanate.

Use/Production. (G) Ink additive. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Manufacture: dermal, a total of 8 workers, up to 3 hrs/da.

Environmental Release/Disposal. No release.

P 86-882

Manufacturer. Confidential.
Chemical. (G) Prepolymer modified MDI.
Use/Production. (G) Insulation. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Confidential.
Environmental Release/Disposal. No release. Disposal by navigable waterway.

P 86-883

Manufacturer. Confidential.
Chemical. (G) Magnesium salt of alkenyl succinic acid.
Use/Production. (G) Petroleum additive. Prod. range: Confidential.
Toxicity Data. No data on the PMN substance submitted.
Exposure. Manufacture: dermal, a total of 26 workers.
Environmental Release/Disposal. Less than 1 kg/batch released to air and water. Disposal by navigable waterway.

P 86-884

Manufacturer. Confidential.
Chemical. (G) Alkyl ester capped urea compound.
Use/Production. (G) Sag control agent. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Confidential.
Environmental Release/Disposal. Confidential.

P 86-885

Manufacturer. Hach Company.
Chemical. (S) 2,4'-dihydroxy-1,1'-azobisnaphthalene-3,4',6-trisulfonic acid.
Use/Production. (S) Industrial reagent for hardness analysis in water or brine. Prod. range: 100–300 kg/yr.
Toxicity Data. No data submitted.
Exposure. Manufacture: dermal and inhalation, a total of 7 workers, up to 8 hrs/da, up to 60 da/yr.
Environmental Release/Disposal. Release to water. Disposal by publicly owned treatment works (POTW) and waste treatment facility.

P 86-886

Importer. Confidential.
Chemical. (G) Hydrocarbon resin.
Use/Import. (G) Open, non-dispersive use. Import range: Confidential.
Toxicity Data. Acute oral: 5.0 g/kg; Acute dermal: 2.0 g/kg; Irritation: Eye—Slight; Inhalation: 180 mg/m³; Skin sensitization: Non-sensitizer; Sensory irritation: Non-irritant; Human repeat insult patch test: Very low potential.
Exposure. Confidential.
Environmental Release/Disposal. Confidential.

P 86-887

Manufacturer. Confidential.
Chemical. (G) Alkyl alcohol, alkoxylated.
Use/Production. (G) Textile processing aid. Prod. range: Confidential.
Toxicity Data. No data on the PMN substance submitted.
Exposure. Confidential.
Environmental Release/Disposal. Confidential.

P 86-888

Importer. Confidential.
Chemical. (G) Substituted copper phthalocyanine, salts.
Use/Production. (S) Industrial colorant for paper. Import range: Confidential.
Toxicity Data. Acute oral: >5.0 mg/kg; Irritation: Skin—Non-irritant, Eye—Non-irritant; 96 hr (Brachydanio rerio): 31.6 mg/l and 4.2 mg/l; 48 hr (Brachydanio rerio): 56.2 mg/l; $IC_{...}$: >100 mg/l.
Exposure. Processing: dermal and ocular.
Environmental Release/Disposal. No release to air, water and land.

P 86-889

Importer. Confidential.
Chemical. (G) Substituted copper phthalocyanine, salts.
Use/Production. (S) Industrial colorant for paper. Import range: Confidential.
Toxicity Data. Acute oral: >5.0 mg/kg; Irritation: Skin—Non-irritant, Eye—Corrosive; $LC_{...}$ 96 hr (Brachydanio rerio): 115 mg/l; $LC_{...}$ 96 hr (Brachydanio rerio): 102 mg/l; $LC_{...}$ 96 hr (Brachydanio rerio): 90 mg/l; $IC_{...}$: >100 mg/l.
Exposure. Processing: dermal and ocular.
Environmental Release/Disposal. No release to air, water and land.

P 86-890

Manufacturer. Confidential.
Chemical. (G) Starch, dihydrogen phosphate, disubstituted alkyl ether.
Use/Production. (G) Cellululose binder. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Confidential.
Environmental Release/Disposal. Disposal by POTW.

P 86-891

Manufacturer. Confidential.
Chemical. (G) Alkoxylated aromatic, alkenoate ester.
Use/Production. (G) Radiation and chemical curing agent for inks and coatings. Prod. range: Confidential.
Toxicity Data. Irritation: Skin—Mild.
Exposure. Confidential.
Environmental Release/Disposal. Confidential. Disposal by navigable waterway.

Toxicity Data. Acute oral: 5,000 mg/kg; Irritation: Skin-Non-irritant: Ames test: Non-mutagenic; Skin sensitization: Weak sensitizer.
Exposure. Processing: dermal, a total of 3 workers, up to 2.0 hr/da.
Environmental Release/Disposal. 1.0 kg released. Disposal by Resource Conservation and Recovery Act (RCRA) and approved landfill.

P 86–1008

Manufacturer. Confidential.
Chemical. (G) Terephthalic mixed glycol ester.
Use/Production. (G) Industrial intermediate glycolester for urethane foam insulating material. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Manufacture, processing and use: dermal, a total of 27 workers, up to 2 hrs/da, up to 250 da/yr.
Environmental Release/Disposal. 5 to 10 kg/batch released to water. Disposal by POTW, incineration, approved landfill and recycling with 10 to 30 kg/batch to control technology.

P 86–1009

Manufacturer. Confidential.
Chemical. (S) Polymer of isobutyl acrylate, 2-ethyl hexyl acrylate, methyl methacrylate, acrylic acid.
Use/Production. (G) An open use. Prod. range: 7,000–15,000 kg/yr.
Toxicity Data. COD: 1,880,000 ug/g[a]; BOD: 4,800 ug/g[a].
Exposure. Manufacture: dermal, a total of 6 workers, up to 2 hrs/da, up to 5 da/yr.
Environmental Release/Disposal. Minimal release to air. Disposal by biological treatment lagoon and licensed landfill.

P 86–1010

Manufacturer. Lawter International Inc.
Chemical. (G) Polyester of aliphatic polyol, rosin, linseed oil and aromatic dibasic acid.
Use/Production. (S) Printing ink vehicle. Prod. range: 225,000–270,000 kg/yr.
Toxicity Data. No data submitted.

Environmental Release/Disposal. 0.1 kg/batch released to air and water with 0.5 to 2 kg/batch to solids. Disposal by POTW and approved landfill.

P 86-1011

Manufacturer. Confidential.

Chemical. (G) Substituted carbopolycycle sulfonate of substituted phenyl azo substituted heteromonocycle.

Use/Production. (G) Open, non-dispersive use. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Confidential.

Environmental Release/Disposal. Disposal by navigable waterway.

P 86-1012

Manufacturer. Confidential.

Chemical. (S) Mixed $C_6/C_6/C_7$, dimer, and C_6/C_6 ethers; (gases, extractive, C_4-C_6, amylene rich, reaction products with olefins, and methanol, distillation residues).

Use/Production. (S) Industrial automotive fuel components. Prod. range: Confidential.

Toxicity Data. No data on the PMN substance submitted.

Exposure. Manufacture: dermal.

Environmental Release/Disposal. No release expected.

P 86-1013

Manufacturer. Confidential.

Chemical. (S) Mixed $C_6/C_6/C_7$, dimer, and C_6/C_6 methyl ethers; (gases, extractive, C_4-C_6, amylene rich, reaction products with olefins, and methanol, distillation residues).

Use/Production. (S) Industrial fuel oil components. Prod. range: Confidential.

Toxicity Data. No data on the PMN substance submitted.

Exposure. Manufacture: dermal.

Environmental Release/Disposal. No release expected.

Dated: May 9, 1986.

Toxic and Hazardous Substances Control; Certain Chemicals Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of the final rule published in the **Federal Register** of May 13, 1983 (48 FR 21722). In the **Federal Register** of November 11, 1984, (49 FR 46066) (40 CFR 723.250), EPA published a rule which granted a limited exemption from certain PMN requirements for certain types of polymers. PMNs for such polymers are reviewed by EPA within 21 days of receipt. This notice announces receipt of fourteen such PMNs and provides a summary of each.

DATES: Close to Review Period:

Y 86-131 and 86-132—May 22, 1986.

Y 86-133—May 25, 1986.

Y 86-134, 86-135, 86-136, 86-137, and 86-138—May 26, 1986.

Y 86-139, 86-140, 86-141, 86-142 and 86-143—May 27, 1986.

Y 86-144—May 28, 1986.

FOR FURTHER INFORMATION CONTACT: Wendy Cleland-Hamnett, Premanufacture Notice Management Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-611, 401 M Street, SW., Washington, DC 20460, (202) 382-3725.

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission by the manufacturer on the exemptions received by EPA. The complete non-confidential document is available in the Public Reading Room E-107 at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

Y 86-131

Manufacturer. Confidential.

Chemical. (G) Modified styrenated acrylic terpolymer.

Use/Production. (S) Commercial automotive after market refinish clear coat for pigment basecoat. Prod. range: Confidential.

Toxicity Data. No data submitted.

BILLING CODE 6560–

FEDERAL EMERGENCY MANAGEMENT AGENCY

Anti-Arson Program; Solicitation for Award of Cooperative Agreement

May 12, 1986.

AGENCY: Federal Emergency Management Agency.

ACTION: Notice of Solicitation for Award of Cooperative Agreement.

Notice of Solicitation is hereby given that the Federal Emergency Management Agency, under the Fire Prevention and Control Act of 1974, will issue a Request for Assistance (RFA) No. EMW–86–S–2355 on May 13, 1986 regarding the design and implementation of anti-arson strategy program for Community-Based Anti-Arson Programs. This program is limited to Community-Based Organizations.

The purpose of this assistance is to focus on nationwide efforts to reduce the number of arson related fires that occur every year throughout this country.

Some broad objectives of this program are:

*To encourage neighborhood involvement in reducing arson fires through new and innovative broad spectrum programs.

*To expand the neighborhood involvement to a community-wide participation in fighting arson.

*To make information available to other neighborhoods and communities regarding successful programs.

*To increase the cooperation between neighborhood residents, community groups and public service organizations such as fire, police, building and code departments.

*To build a comprehensive community anti-arson program.

Applications for assistance must be requested in writing and addressed as follows:

Federal Emergency Management Agency, Office of Acquisition Management, 500 C Street, SW., Room 728, Washington, DC 20472
ATTN: John Marshall, Contract Specialist
Request for Assistance No. EMW–86–S–2355

Please include a self-addressed mailing label with the request.

Cooperative Agreements are anticipated to be awarded as a result of this request for assistance. It is anticipated that a minimum of five (5) and a maximum of thirty (30) assistance awards will be made. the anticipated funding levels of this program are between $5,000 to $25,000. based on the criteria shown in Attachment C of the solicitation package.

Kenneth J. Brzonkala,

Acting Director, Office of Acquisition Management.

BILLING CODE 6718–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Department of Health and Human Services (HHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the last list was published on May 9, 1986.

Public Health Service

(Call Reports Clearance Officer on 202–245–2100 for copies of packages)

Food and Drug Administration

Subject: Establishment License Application and Supplemental License Application for the Manufacture of

Blood and Blood Components—Extension—(0910–0041)
Respondents: Businesses or other for-profit; Non-profit institutions; Small businesses or organizations
OMB Desk Officer: Bruce Artim

Health Care Financing Administration

(Call Reports Clearance Officer on 301–594–8650 for copies of packages)
Subject: Request for Claim Number Verification—HCFA 1600—Extension—(0938–0069)
Respondents: Businesses or other for-profit; Small businesses or organizations
Subject: Title XIX Superior Utilization Review System Waiver Request—Information Collection Requirement—Sections 9320–9330 of State Medicaid Manual—HCFA R–95 Existing Collection—
Respondents: State or local governments
Subject: Medicaid Eligibility Quality Control Statistical Tables—HCFA 302–309—Revision—(0938–0310)
Respondents: State or local governments
OMB Desk Officer: Fay S. Iudicello

Copies of the above information collection clearance packages can be obtained by calling the Reports Clearance Officer on the number shown above.

Written comments and recommendations for the proposed information collections should be sent directly to the appropriate OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, D.C. 20503. ATTN: (name of OMB Desk Officer)

Dated: May 13, 1986.

K. Jacqueline Holz,
Deputy Assistant Secretary for Management Analysis and Systems.

BILLING CODE 4150–04–M

Food and Drug Administration

Advisory Committees; Notice of Meetings

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice announces forthcoming meetings of public advisory committees of the Food and Drug Administration (FDA). This notice also summarizes the procedures for the meetings and methods by which interested persons may participate in open public hearings before FDA's advisory committees.

Meetings: The following advisory committee meetings are announced:

Anesthesiology and Respiratory Therapy Devices Panel

Date, time, and place. June 5 and 6, 8:30 a.m. Conference Rm. 703A, Hubert H. Humphrey Bldg., 200 Independence Ave. SW., Washington, DC 20201.

Type of meeting and contact person. Open public hearing, June 5, 8:30 a.m. to 9:30 a.m.; open committee discussion, 9:30 a.m. to 6 p.m.; open committee discussion, June 6, 8:30 a.m. to 6 p.m.; Michael S. Gluck, Center for Devices and Radiological Health (HFZ–430), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7255.

General function of the committee. The committee reviews and evaluates available data on the safety and effectiveness of devices and makes recommendations for their regulation.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make a formal presentation should notify Michael S. Gluck (address above) before May 23, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of the proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. The committee will discuss information contained in premarket approval applications for a transcutaneous carbon dioxide monitor and two high frequency ventilators. The committee will also discuss a proposed reclassification of pH-sensitive glass electrode cutaneous carbon dioxide ($PcCO_2$) monitors and a Proposed Evaluation Protocol for high frequency ventilators.

Science Advisory Board to the National Center for Toxicological Research

Date, time, and place. June 23, 2 p.m., June 24, 9 a.m., Bldg. 12, Conference Center, National Center for Toxicological Research, Jefferson, AR.

Type of meeting and contact person. Open committee discussion, June 23, 2 p.m. to 5 p.m.; open committee discussion June 24, 9 a.m. to 12 m.; open public hearing, 1 p.m. to 2 p.m.; open committee discussion, 2 p.m. to 3 p.m.; Ronald F. Coene, National Center for Toxicological Research, Food and Drug Administration, 5600 Fishers Lane, Rm. 14–101, Rockville, MD 20857, 301–443–3155.

General function of the committee. The committee advises the Director, National Center for Toxicological Research (NCTR), in establishing and implementing a research program that will assist the Commissioner of Food and Drugs in fulfilling his regulatory responsibilities. The committee provides the extra-agency review needed to ensure that research programs at NCTR are scientifically sound and pertinent to its stated goals and objectives.

Agency—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make a formal presentation should notify the contact person before June 13, and submit a brief statement of the general nature of the evidence or argument they wish to present, the name and address of proposed participants, and an indication of the approximate time requested to make their comments.

Agenda—Open committee discussion. The committee will receive an update of NCTR's research initiatives in the areas of: (1) Biomarkers, modulators of toxicity and extrapolation/risk assessment; and (2) a review of NCTR's programs in reproductive and developmental toxicology. Additional items are being considered for review by the committee and a final agenda will be available on June 17, 1986, by contacting Ronald F. Coene (address above).

FDA public advisory committee meetings may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. There are no closed portions for the meetings announced in this notice. The dates and times reserved for the open portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairperson determines will facilitate the committee's work.

Public hearings are subject to FDA's guideline (Subpart C of 21 CFR Part 10) concerning the policy and procedures for electronic media coverage of FDA's public administrative proceedings, including hearings before public

advisory committees under 21 CFR Part 14. Under 21 CFR 10.205, representatives of the electronic media may be permitted, subject to certain limitations, to videotape, film, or otherwise record FDA's public administrative proceedings, including presentations by participants.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this Federal Register notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairperson's discretion.

Persons interested in specific agenda items to be discussed in open session may ascertain from the contact person the approximate time of discussion.

A list of committee members and summary minutes of meetings may be requested from the Dockets Management Branch (HFA–305), Rm. 4–62, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under section 10(a) (1) and (2) of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770–776 (5 U.S.C. App. I)), and FDA's regulations (21 CFR Part 14) on advisory committees.

Dated: May 12, 1986.

John M. Taylor,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 86–11023 Filed 5–15–86; 8:45 am]

BILLING CODE 4160–01–M

[Docket No. 86E–0147]

Determination of Regulatory Review Period for Purposes of Patent Extension; Toray Soft Contact Lens

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has determined the regulatory review period for the Toray Soft Contact Lens and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of an application to the Commissioner of Patents and Trademarks, Department of Commerce, for the extension of a patent which claims this medical device.

ADDRESS: Written comments and petitions should be directed to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Michael W. Cogan, Office of Health Affairs (HFY–20), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–1382.

SUPPLEMENTARY INFORMATION: The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98–417) generally provides that a patent may be extended for a period of up to 5 years so long as the patented item (human drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under that act, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: a testing phase and an approval phase. For medical devices, the testing phase begins with a clinical investigation of the device and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the device and continues until permission to market the device is granted. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Commissioner of Patents and Trademarks may award (half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a medical device will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(3)(B).

FDA recently approved for marketing the Toray Soft Contact Lens, a daily or extended-wear soft contact lens for correction of visual acuity in aphakic and not-aphakic people with nondiseased eyes that are myopic. Following FDA's approval, Toray Industries filed a patent term restoration application with the U.S. Patent and Trademark Office, which then requested FDA's assistance in determining the patent's eligibility for patent term restoration. In a letter dated April 11, 1986, FDA advised the Patent Office that the product had undergone a regulatory review period and that the product represented the first commercial marketing or use of the device. Shortly thereafter, the Patent Office requested that FDA determine the product's regulatory review period.

FDA has determined that the applicable regulatory review period for Toray Soft Contact Lens is 2,355 days. Of this time, 1,867 days occurred during the testing phase of the regulatory review period, while 488 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date a clinical investigation involving this device was begun:* August 16, 1979. The product is a nonsignificant-risk device, for which FDA regulations do not require that FDA review an investigational device exemption (IDE). In addition, the clinical studies for the device were conducted in Japan. For these reasons, FDA lacks records to verify independently the date on which the applicant began clinical testing and accepts the applicant's claim that testing began on August 16, 1979.

2. *The date an application was initially submitted with respect to the device under section 515 of the Federal Food, Drug, and Cosmetic Act:* September 24, 1984. FDA has verified that the premarket approval application (No. P84–0044) was initially submitted on September 24, 1984.

3. *The date the application was approved:* January 24, 1986. FDA has verified that PMA P84–0044 was approved on January 24, 1986.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the U.S. Patent and Trademark Office applies several statutory limitations in its calculations of the actual period for patent extension. In its application for patent extension, this applicant seeks 146 days of patent extension.

Anyone with knowledge that any of the dates as published is incorrect may, on or before July 15, 1986, submit to the Dockets Management Branch (address above) written comments and ask for a redetermination. Furthermore, any interested person may petition FDA, on or before November 12, 1986, for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must contain sufficient facts to merit an FDA investigation. (See H. Rept. 857, Part 1, 98th Cong., 2d Sess., pp. 41–42, 1984). Petitions should be in the format specified in 21 CFR 10.30.

Comments and petitions should be submitted to the Dockets Management

Branch (address above) in three copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. Comments and petitions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: May 9, 1986.

Stuart L. Nightingale,

Associate Commissioner for Health Affairs.

[FR Doc. 86-11024 Filed 5-15-86; 8:45 am]

BILLING CODE 4160-01-M

Health Care Financing Administration

Privacy Act of 1974; Revision to Existing System of Records

AGENCY: Health Care Financing Administration, HHS.

ACTION: Notice of revision of Privacy Act system of records.

SUMMARY: Notice is hereby given that HCFA is revising one of its system of records, the Physician's Practice Costs and Incomes Survey, HHA/HCFA/ORD No. 09-70-0032, most recently published at 49 FR 14442; April 11, 1984. The notice is being revised to reflect a change in the Retention and Disposal section of the system. The revision contains no new routine uses.

EFFECTIVE DATE: May 16, 1986.

FOR FURTHER INFORMATION CONTACT: Sherry A. Terrell, Office of Research and Demonstrations, Health Care Financing Administration, Room 2-A-14, Oak Meadows Building, 6325 Security Boulevard, Baltimore, Maryland 21207. Telephone 301-597-1416.

SUPPLEMENTARY INFORMATION: HCFA, in cooperation with the Assistant Secretary of Planning and Evaluation, is planning to participate in a one time resurvey of respondents of the original 1984-1985 survey. Therefore, it is necessary to maintain the records from the survey longer than originally anticipated. Even if a resurvey were not contemplated, contractor data quality control activities have delayed implementation of the survey process and a new retention and disposal date of September 1986 is needed.

The applicable text of the system of records is revised to read as follows:

09-70-0032

SYSTEM NAME

Physicians' Practice Costs and Incomes Survey.

* * * * *

RETENTION AND DISPOSAL:

Hardcopy lists of names and case identification numbers will be retained in secure storage areas. Individual records delivered to HCFA on the final data tape will contain no individual names, and the case identifiers will be different from those used by the contractor. The disposal technique of degaussing will be used to strip magnetic tape of all identifying names and numbers in September 1986. Hardcopy lists of names and identifying numbers will be destroyed at this time.

* * * * *

Dated: May 9, 1986.

Henry R. Desmarais,

Acting Administrator, Health Care Financing Administration.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Oglala Sioux Tribe, Pine Ridge Indian Reservation, Pine Ridge, South Dakota, Transfer of Federally-owned Lands

This notice is published in exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8.1.

By notice dated February 3, 1986, pursuant to authority contained in the Federal Property and Administrative Services Act of 1949, as amended by Pub. L. 93-599, dated January 2, 1975 (88 Stat. 1954), custody and accountability is transferred to the Bureau of Indian Affairs, effective 12:01 a.m., March 1, 1986, without reimbursement, to be held in trust by the United States for the benefit and use of the Oglala Sioux Tribe, Pine Ridge Indian Reservation, Pine Ridge, South Dakota, for the following described lands:

Sixth Principal Meridian

T. 36 N., R. 49 W.,

Sec. 35, S½SW¼SE¼SE¼

Containing 5.0 acres, more or less.

These lands are to be treated the same and to receive the same benefits and protection as other trust lands held for the benefit and use of the Oglala Sioux Tribe. Appropriate notations will be made in the land records of the Bureau of Indian Affairs.

Ross O Swimmer,

Assistant Secretary, Indian Affairs.

BILLING CODE 4310-02-M

Bureau of Land Management

Anchorage District Advisory Council Meeting

AGENCY: Bureau of Land Managment, Interior.

ACTION: Joint Meeting of Fairbanks and Anchorage District Advisory Councils.

SUMMARY: The District Advisory Councils for the Fairbanks and Anchorage Districts of the Bureau of Land Management will have a general meeting on Tuesday, June 17, 1986. The meeting will be held at the BLM/Anchorage District Office, 6881 Abbott Loop Road, Anchorage, Alaska 99507.

The meeting will convene at 9:00 a.m. and conclude at 7:00 p.m. Public comments will be received by the Council from 11:30 a.m.-12:30 p.m. Oral comments may be limited by time and it is recommended that public comments be submitted in writing at the meeting.

The major topic of discussion will center on the organizational structure of BLM/Alaska.

All Advisory Council meetings are open to the public. For additional information contact the Bureau of Land Management, Public Affairs Office, 6881 Abbott Loop Road, Anchorage, Alaska 99507, telephone (907) 267-1284.

Wayne A. Boden,

District Manager, Anchorage District Office.

Realty Actions; Arizona; Notice of Reconveyance and Order Providing for Opening Lands

An exchange proposal made under the provisions of section 206 of the Federal Land Policy and Management Act of October 21, 1976, 43 U.S.C. 1716, will reconvey the following described lands to the United States:

Gila and Salt River Meridian, Arizona

T. 17 N., R. 5 E.,

Sec. 33, a parcel of land situated in and being a part of the E½ described as follows:

Parcel A

Beginning at the Northeast corner of said Section 33, as established from the USBLM survey of 1956, run thence South 4°46' West (USBLM bearing—1956) along the East line of said Section 33, 700.28 feet; thence North 87°45'20" West, 196.61 feet; thence South 40°03'50" West, 84.39 feet; thence South 2°06'53" East, 119.25 feet; thence South 16° 49'04" East, 33.41 feet; thence South 46°41'39" East, 39.55 feet; thence South 55°22'04" east, 91.43 feet; thence South 51°44'22" East, 58.70 feet to a point on the East line of said Section 33; thence South 4°46' West along said East line of Section 33, 3703.40 feet to the Southeast corner of the Northeast Quarter of the Southeast Quarter of the Southeast Quarter (NE¼SE¼SE¼) of Section 33; thence North 89°55'31" West along the South line of said Northeast Quarter of the Southeast Quarter of the Southeast Quarter of Section 33, 662.45 feet of the Southwest corner of said Northeast Quarter of the Southeast Quarter of the Southeast Quarter of Section 33; thence North 4°21'47" East, 2004.54 feet to the Northwest corner of the East Half of the Northeast Quarter of the Southeast Quarter (E½ NE¼ SE¼) of Section 33; thence South 89°58'57" West along the North line of the Southeast Quarter (SE¼) of Section 33, 557.40 feet to the Southeast corner of the certain property as described in Book 607, Pages 908, 909, and 910, Records of Yavapai County, Arizona; (deed bearing North 88°40' East); thence along the Easterly line of that certain property as described in said Book 607, Pages 908, 909, and 910 (making an adjustment of 0°19'00" Easterly to said deed bearing) the following described courses and distances, i.e.;

North 0°21' East (North 0°02' East deed), 1207.87 feet; North 65°16' East (North 64°57' East deed), 109.20 feet; North 63°43' East (North 63°24' East deed), 414.82 feet; North 5°32' West (North 5°51' West deed) 296.70 feet; North 61°29' East (North 61°10' East deed), 122.00 feet, to a point in Oak Creek; North 10°11' West (North 10°30' West deed), 183.60 feet; North 13°17' West (North 13°36' West deed), 221.97 feet; North 36°01' West (North 36°20' West deed), 171.35 feet; North 31°44' West (North 32°03' West deed), 131.32 feet; North 37°49' West (North 38°08' West deed), 90.34 feet; North 75°27' West (North 75°46' West deed), 420.53 feet; South 78°11' West (South 77°52' West deed), 308.39 feet; South 62°52' West (South 62°33' West deed), 107.03 feet; South 56°56' West (South 56°37' West deed), 356.66 feet; North 42°29' West (North 42°48' West deed), 383.50 feet; South 47°31' West (South 47°12' West deed), 58.20 feet, more or less to a point in Red Rock road; thence North 43°40'04" East, 40.45 feet to a point of curve on the center line of Red Rock Road, as described in Book 118, Pages 419, 420, and 421, said point of curve having a tangent bearing of North 50°47'30" East (North 50°57'30" East deed); thence along said curve in a Northeasterly direction, concave to the left, said curve having a central angle of 13°10'15", a radius of 727.01 feet and a length of 167.12 feet to a point on the North line of the Northeast Quarter (NE¼) of said Section 33; thence North 88°05' East (USBLM bearing—1956) along the North line of said Northeast Quarter of Section 33, 2468.40 feet to the Northeast corner of said Section 33 and the point of beginning.

Sec. 34, a parcel of land situated in and being a part of section 34 described as follows:

Parcel B

Beginning at the Southwest corner of the Northwest Quarter of the Northwest Quarter (NW¼NW¼) of said Section 34, from which the Northwest corner of said Section 34 bears North 4°K46' East (USBLM bearing), 1355.31 feet; thence South 4° 46' West along the West line of said Section 34, 3373.92 feet to the Southwest corner of the North Half of the South Half of the Southwest Quarter (N½S½SW¼) of said Section 34; thence North 88°25'09" East along the South line of said North Half of the South Half of the Southwest Quarter, 2583.54 feet to the Southeast corner of said North Half of the South Half of the Southwest Quarter of said Section 34, said corner being identical with the Southwest corner of the Northwest Quarter of the Southwest Quarter of the Southeast Quarter (NW¼SW¼SE¼) of said Section 34; thence North 89°33'04" East, 660.13 feet to the Southeast corner of said Northwest Quarter of the Southwest Quarter of the Southeast Quarter of Section 34; thence North 2° 42' 22" East along the East line of said Northwest Quarter of the Southwest Quarter of the Southeast Quarter of Section 34 and a prolongation thereof, 1015.11 feet to the Northeast corner of the South Half of the Southwest Quarter of the Northwest Quarter of the Southeast Quarter (S½SW¼N W¼SE¼) of said Section 34; thence North 9°16'16" East, 47.13 feet to the Southeasterly corner of that certain property as described in Book 564, Page 157, Records of Yavapai County, Arizona; thence along the Southerly and Westerly lines of said property as described in Book 564, Page 157 (making an adjustment of 0°02'00" Easterly to said deed bearings) the following courses and distances, i.e.;

South 48°51' West (South 48°49' West deed), 52.5 feet; North 46° 44' West (North 46° 42' West deed) 327.9 feet; North 22° 20' West (North 22°18' West deed), 105.6 feet; North 54° 33' West (North 54°31' West deed), 197.5 feet; North 21°01' West (North 20°59' West deed), 235.0 feet; North 48°14' West (North 48°12' West deed), 152.8 feet; South 89°36' West (South 89°38' West deed), 148.7 feet; North 39°24' West (North 39°22' West deed), 304.9 feet to a point in Oak Creek; North 41°22' East (North 41°24' West deed), 123.3 feet up Oak Creek; North 11°45' West (North 11°43' West deed), 395.0 feet up Oak Creek to the Northwest corner of that certain property as described in said book 564, Page 157 said Northwest corner also being the Southwest corner of that certain property as described in Book 559, Page 780, Records of Yavapai County, Arizona; thence along the Westerly line of said property as described in Book 559, Page 780 (making a bearing adjustment of 0°02'00" Easterly to said deed bearings) the following courses and distances, i.e.;

North 11°45' West (North 11°43' West deed), 505.0 feet up Oak Creek; North 33°02' West (North 33°00' West deed), 397.2 feet up Oak Creek to a point on the North line of the Southeast Quarter of the Northwest Quarter (SE¼NW¼) of said Section 34; thence South 88°39'22" West along the South line of the North Half of the Northwest Quarter (N½ NW¼) of said Section 34, 1680.40 feet to the Southwest corner of the Northwest Quarter of the Northwest Quarter (NW¼NW¼) of said Section 34 and the point of beginning.

Excepting therefrom the following described land:

The North 635.25 feet of the West 1200.00 feet of the Southwest Quarter of the Northwest Quarter (SW¼NW¼), the side lines being parallel with the North and West lines of said SW¼NW¼, located in Section 34, Township Seventeen (17) North, Range Five (5) East of the Gila and Salt River Base and Meridian, Yavapai County, Arizona.

The areas described contain 256.17 acres, more or less, located in Lower Oak Creek State Park within the boundaries of the Prescott National Forest.

Upon acceptance of title, the land will be transferred to the Arizona State Parks Board under the Recreation and Public Purposes Act of June 14, 1926, as amended, 43 U.S.C. 869.

Inquiries concerning the land should be addressed to Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, P.O. Box 16563, Phoenix, Arizona 85011.

John T. Mezes,

Chief, Branch of Lands and Minerals Operations.

[FR Doc. 86-11022 Filed 5-15-86; 8:45 am]

BILLING CODE 4310-32-M

Realty Action; Idaho Falls District

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action, Sale of Public Lands in Bear Lake and Caribou County, Idaho.

SUMMARY: The following described lands have been examined and, through the public-supported land use planning process, have been determined to be suitable for disposal by sale pursuant to section 203 of the Federal Land Policy and Management Act of 1976, at no less

than fair market value as determined by an appraisal (available after June 1, 1986):

Parcel	Legal description	Sale type
I-19700	T. 14 S., R. 46 E., B.M., Sec. 27: SE¼NE¼ (40 acres), Bear Lake County.	Competitive.
I-22292	T. 11 S., R. 43 E., B.M., Sec. 33: SW¼NW¼ (40 acres), Bear Lake County.	Direct.
I-22293	T. 12 S., R. 43 E., B.M., Sec. 20: SE¼SE¼ (40 acres), Bear Lake County.	Competitive.
I-22296	T. 9 S., R. 42 E., B.M., Sec. 31: N½NE¼ (80 acres), Caribou County.	Competitive.

When patented, the lands will be subject to the following reservations:

Parcel and Reservations

I-19700—Ditches and Canals, all minerals.
I-22292—Ditches and Canals, all minerals, Grazing Lease #3521 expiring 2/28/1990, held by Don F. Bartschi (if competitive).
I-22293—Ditches and Canals, all minerals, Grazing Lease #3551 expiring 2/28/1990, held by Wilmer W. Brown, Road Right-of Way I-20533, held by Bear Lake County.
I-22296—Ditches and Canals, leasable minerals, Grazing Lease #3620 expiring 2/28/1992, held by Rich Livestock Company. Powerline Right-of-Way I-05212, held by Utah Power & Light.

Continued use of the land by valid right-of-way holders is proper subject to the terms and conditions of the grant. Administrative responsibility previously held by the United States will be assumed by the patentee.

The previously described lands are hereby segregated from appropriation under the public land laws, including the mining laws, for a period of 270 days or until patent is issued, whichever comes first.

Sales Procedures

Sale parcels I-19700, I-22293, and I-22296 will be sold by competitive bidding procedures as follows: A sealed bid must be submitted in person or by mail prior to the date and time of the sale in the Pocatello Resource Area Office located in the Federal Building, Room 172, 250 South 4th Avenue, Pocatello, Idaho 83201. The bid must be sealed in an envelope with the envelope specifying the serial number and the sale date in the lower left hand corner (i.e. "Sealed Bid—Public Land Sale I-19700—July 29, 1986"): If two or more valid sealed bids are received for the same amount and are the high bid, a supplement bidding of the high bidders will be held.

Sale parcel I-22292 is being offered directly to Don F. Bartschi because of his past use of the land and owning the land surrounding the parcel. Should Mr. Bartschi fail to submit a bid by the date of the sale, the parcel will be sold by competitive procedures as described in the previous paragraph.

Bids must be submitted for at least fair market value and will constitute an application to purchase that portion of the mineral estate of no known value for I-22296. A thirty percent (30%) deposit must accompany each bid and for parcel I-22296 an additional $50 non-refundable mineral conveyance processing fee is required. The filing fee and deposit must be paid by certified check, money order, bank draft, or cashier's check. Bids will be rejected if accompanied by a personal check.

DATE AND ADDRESS: The sale offering will be held on Tuesday, July 29, 1986, at 1 p.m. in the basement meeting room, B-43, in the Federal Building, 250 South 4th Avenue, Pocatello, Idaho. Unsold parcels or direct sale parcels where no bids are received will be offered every Tuesday at 1:00 p.m. in Room 172 at the above address through August 26, 1986, on which date this sale offering will be suspended.

SUPPLEMENTARY INFORMATION: Detailed information concerning the conditions of the sale can be obtained by contacting Debbie Kovar or Dennis Hill at (208) 236-6860.

For a period of 45 days from the date of publication of this notice in the **Federal Register**, interested parties may submit comments to the District Manager, Bureau of Land Management, 940 Lincoln Road, Idaho Falls, Idaho 83401. Objections will be reviewed by the State Director who may sustain, vacate, or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

Dated: May 8, 1986.

O'dell A. Frandsen,
District Manager.

BILLING CODE 4310-GG-M

[N-43253]

Realty Action; Lease or Sale of Public Lands for Recreation and Public Purposes, Pershing County, NV

In response to an application from the State of Nevada for a medium security prison site, the following described land has been identified as suitable and will be classified for lease or sale under the Recreation and Public Purposes Act, as amended (43 U.S.C. 869, et seq.):

Mount Diablo Meridian, Nevada

T. 27 N., R. 32 E., sec. 10, All.

By motion of the Bureau, the following additional lands have been identified as alternate sites which are suitable for the use proposed and will also be classified for lease or sale under the Recreation and Public Purposes Act:

Mount Diablo Meridian, Nevada

T. 27 N., R. 32 E.,
Sec. 4, lots 2, 3, NE¼SW¼, S½S½;
Sec. 8, NE¼NE¼, S½NE¼, E½SE¼SW¼, SE¼;
Sec. 10, All.

The lands are not required for Federal purposes. Disposal is consistent with the Bureau's planning for this area and would be in the public's interest.

The lands described in this notice will not be offered for lease or sale until the classification becomes effective, all required environmental, archaeological, and mineral clearances are completed and all application requirements are met.

A patent, when issued, will contain the following reservations to the United States:

1. A right-of-way thereon for ditches and canals constructed by the authority of the United States pursuant to the Act of August 30, 1890 (43 U.S.C. 945).

2. All mineral deposits in the lands so patented, and to it, or persons authorized by it, the right to prospect for, mine, and remove such deposits from the same under applicable law.

And will be subject to:

1. Provisions of the Recreation and Public Purposes Act and to all applicable regulations of the Secretary of the Interior.

2. All valid existing rights documented on the official land records at the time of patent issuance.

3. Any other reservations the Authorized Officer determines appropriate to ensure public access and proper management of Federal lands and interests therein.

Upon publication of this Notice in the **Federal Register** the above described public lands will be segregated from all forms of appropriation under the public land laws, including the general mining laws, but not the Recreation and Public Purposes Act.

For a period of 45 days from the date of publication of this Notice in the **Federal Register**, interested parties may submit comments to the District Manager, 705 East 4th Street, Winnemucca, NV 89445. Any adverse comments will be reviewed by the State

Director. In the absence of any adverse comments, the classification of the lands described in this Notice will become effective 60 days from the date of publication in the Federal Register.

Upon the effective date of classification, the lands described above in sections 4, 8, and 18 will be open to the filing of an application under the Recreation and Public Purposes Act by the State of Nevada for the specified use. If, after 18 months following the effective date of classification, an application has not been filed, the segregative effect of the classification shall automatically expire and the lands classified shall return to their former status without further action by the Authorized Officer.

Dated: May 9, 1986.

Frank C. Shields,

District Manager.

BILLING CODE 4310-HC-M

Emergency Seasonal Closure of Public Lands

AGENCY: Bureau of Land Management, Interior.

ACTION: Emergency seasonal closure of public lands in eastern Kern County, California.

SUMMARY: Certain Public Lands in eastern Kern County, California, generally described as lying east of State Highway 14 in the Red Rock Canyon area, are temporarily closed to all public use, including vehicle operation, camping, shooting, hiking, sightseeing, grazing, and mining operations from May 7, 1986 through June 30, 1986. Access may be allowed for management or scientific study purposes and must be approved in writing by the Authorized Officer. The lands affected by this notice are being closed under the authority of 43 CFR 8364.1.

The lands affected by this emergency closure are specifically:

Mt. Diablo Base and Meridian T. 29 S., R. 37 E.

Secs: 23 (portion of SE¼, S and E of existing route)
24 (S½);
25 (N½ and SW¼);
26 (E½).

Totaling approximately 1,200 acres.

Any person who violates this closure order may be subject to a fine of $1,000 or imprisonment not exceeding 12 months, or both, under authority of 43 CFR 8360.0-7.

Public Lands temporarily closed to public use under this order will be posted with signs at points of public entry. Maps showing the exact location of the closure are available from the Ridgecrest Resource Area Office, 112 E. Dolphin St., Ridgecrest CA 93555. Closure order notices and or maps will be posted near or within the closure area as well as at local U.S. Post Offices, the Red Rock Canyon State Park, and the Ridgecrest Resource Area Office.

EFFECTIVE DATES: May 7, 1986, through June 30, 1986.

SUPPLEMENTARY INFORMATION: The purpose of this emergency seasonal closure is to provide protection and solitude for nesting birds of prey, primarily, the golden eagle (*Aquila chrysaetos*), and prairie falcon (*Falco mexicanus*), and the great horned owl (*Bubo virginianus*). Further, this closure is ordered to comply with 16 U.S.C., Subchapter II, Part 668, Bald Eagle Protection Act, as amended, which extends protection to golden eagles. This closure order will prevent violations of "take", described in Part 668c of the Act as including "pursue, shoot, shoot at, poison, wound, kill, capture, trap, collect, molest or disturb."

The lands affected by this closure notice are cooperatively managed by the Bureau of Land Management and the California Department of Parks and Recreation. Enforcement will be accomplished by both agencies.

FOR FURTHER INFORMATION CONTACT: Patricia E. McLean, Area Manager, Ridgecrest Resource Area, 112 E. Dolphin, Ridgecrest, California 93555, (619) 375-7125.

Dated: May 9, 1986.

H.W. Blackan,

District Manager.

Exchange of Public and State Lands in Owyhee County, ID

Correction

In FR Doc. 86-9809 beginning on page 16230 in the issue of Thursday, May 1, 1986, make the following corrections on page 16230.

1. In the second column, in the Action section, third line, "Country" should read "County".

2. In the same column, under T.6 S., R.3 W., in Sec. 34, the second line should read "SW¼SE¼".

3. In the same column, under T.8 S., R.4 W., in Sec. 4, the entry should read "S½SW¼".

4. In the same column, under T.9 S., R.3 W., in Sec. 11, the entry should read "N½SW¼, SW¼SE¼".

5. On the same page, third column, under T.14 S., R. 5 W., in Sec. 36, "NE¼Ne¼" should read "NE¼NE¼".

BILLING CODE 1505-01-M

National Park Service

Management Plan—Upper Delaware Scenic and Recreational River; NY and PA Hearings

AGENCY: National Park Service, Interior.

ACTION: Notice of Public Hearings and Opportunity to Comment on Draft River Management Plan (incorporating Revised Guidelines for Land and Water Use Controls and the Land Protection Plan) and draft environmental impact statement.

SUMMARY: This notice sets forth the schedule of public hearings and opportunity for written comment on the draft River Management Plan, including revised Guidelines for Land and Water Use Controls, and draft Environmental Impact Statement. Public hearings are required pursuant to the Upper Delaware Segment Special Provisions (section 704(b) to (j) of Pub. L. 95-625). The draft River Management Plan also incorporates a land protection plan for the area, in conformance with National Park Service rules (48 FR 21121, May 11, 1983).

DATES AND ADDRESSES:

June 4, 1986; 7:30 PM, Damascus Central School, Damascus, PA

June 5, 1986; 7:30 PM, Delaware Valley Central School, Rt. 97, Callicoon, NY

June 6, 1986; 7:30 PM, Shohola Firehouse, Shohola, PA

June 7, 1986; 1:00 PM; Port Jervis Senior High School, Huguenot Road, Port Jervis, NY

Written comments should be submitted on the draft Plan to either James W. Coleman, Jr., Regional Director, National Park Service, 143 South Third Street, Philadelphia, Pennsylvania 19106 (215/597-7013) or Craig Stewart, Chairman, Conference of Upper Delaware Townships, P.O. Box 41, Fosterdale, New York 12735 (914/932-8707). Comments on the draft Environmental Impact Statement should be submitted to Mr. James W. Coleman, Jr., at the above address. Comments must be received by June 20, 1986.

FOR FURTHER INFORMATION CONTACT: J. Glenn Eugster, Chief, Park and Resource Planning, National Park Service, Mid-Atlantic Regional Office, 143 South

Third Street, Philadelphia, Pennsylvania 19106 (215/597-7386).

SUPPLEMENTARY INFORMATION: The draft River Management Plan and the revised Guidelines for Land and Water Use Controls have been prepared pursuant to the National Wild and Scenic Rivers Act of 1968 (Pub. L. 90-542, as amended) and the 1978 special provisions for management of the Upper Delaware defined in section 704 of Pub. L. 95-625. The draft plan and the revised Guidelines were prepared by the Conference of Upper Delaware Townships and the National Park Service, with the advice and participation of the Commonwealth of Pennsylvania, the State of New York, the Delaware Rive Basin Commission, the Upper Delaware Citizens' Advisory Council, and many other interested parties. Copies of the draft plan and the revised Guidelines are available on request.

The draft River Management Plan contains detailed maps showing the boundaries of the Upper Delaware Scenic and Recreational River, a program for the management of existing and future land and water uses, an assessment of the impacts of the plan on the revenues and cost of local government, and a program providing for coordinated implementation and administration of the plan. The draft document also includes proposed revisions to the existing Land and Water Use Guidelines for the Upper Delaware (published in 46 FR 45433, September 11, 1981). Additionally, the draft plan incorporates, through its "land management program" a land protection plan for the area, as required by National Park Service rules (48 FR 21121, May 11, 1983).

A draft Environmental Impact Statement (EIS) has also been prepared by the National Park Service for this draft plan. The EIS describes in detail the environment of the Upper Delaware and identifies the environmental impacts of the proposed plan and alternatives. The final River Management Plan and final EIS will be issued simultaneously.

The draft plan will be revised based upon comments received during public review. Upon completion of the plan and EIS both will then be submitted to the Secretary of the Interior for consideration and decision, following which the plan will be transmitted to the Governors of New York and Pennsylvania, and to the House Interior and Insular Affairs Committee, and the Senate Committee on Energy and Natural Resources of the Congress. The plan will become effective ninety days after its transmittal to the Congress.

Dated: May 9, 1986.

James W. Coleman, Jr.,

Regional Director, Mid-Atlantic Region.

Bureau of Reclamation

Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed collection of information and related forms and explanatory material may be obtained by contacting the Bureau's clearance officer at the phone number listed below. Comments and suggestions on the requirements should be made within 30 days directly to the Bureau clearance officer and to the Office of Management and Budget Interior Department Desk Officer, Washington, DC 20503, telephone (202) 395-7340.

Title: Water Users Census

Abstract: The annual crop census is taken on all operating Federal Reclamation projects primarily for use as a tool in administering, managing, and evaluating the Federal Reclamation program. Respondents are water users on Reclamation project lands.

Bureau Form Number: 7-332

Frequency: Annual

Description of Respondents: Water Users on Federal Reclamation Projects

Annual Responses: 25,000

Annual Burden Hours: 8,333

Bureau clearance officer: Alma Gonzales, (202) 343-4249.

Dated: April 17, 1986.

INTERSTATE COMMERCE COMMISSION

[Docket No. AB-52 (Sub-45)]

The Atchison, Topeka & Santa Fe Railway Co.—Abandonment—In Pawnee and Osage Counties, OK; Notice of Findings

The Commission has issued a certificate and decision authorizing the Atchison, Topeka and Santa Fe Railway Company to abandon its 21.61-mile rail line between Camp (milepost 59.36) and Fairfax (milepost 37.55), in Pawnee and Osage Counties, OK. The abandonment certificate will become effective 30 days after this publication unless within 15 days after publication the Commission also finds that: (1) A financially responsible person has offered financial assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and the applicant no later than 10 days from publication of this Notice. The following notation must be typed in bold face on the lower left-hand corner of the envelope containing the offer: "Rail Section, AB-OFA". Any offer previously made must be remade within this 10-day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1152.27.

DEPARTMENT OF JUSTICE

Antitrust Division

National Cooperative Research Act of 1984; NAHB Research Foundation; Smart House Project

Notice is hereby given that pursuant to section 6(a) of the National Cooperative Research Act of 1984, Pub. L. No. 98–462 ("the Act"), the NAHB Research Foundation, Inc. has filed a written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities of the parties to the Smart House Project and (2) the nature and objectives of the Smart House Project. The notification was filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to single damages under specified circumstances. Pursuant to section 6(b) of the Act, the identities of the parties to the Smart House Project, and its general areas of planned activity, are given below.

The Smart House Project is a joint venture project that will be implemented in a series of stages by separate agreements at each stage. The following parties have signed agreements to fund or otherwise participate in the first stage of the venture, which involves, among other things, organizational activities:

American Gas Association
AMP, Incorporated
Apple Computer, Inc.
AT&T Technologies, Inc.
Bell Communications Research, Inc.
Bell Northern Research Ltd.
BrinTec Corporation
Broan Mfg. Co., Inc.
Burndy Corporation
Carrier Corporation
Copper Development Association
Dukane Corporation
E.I. duPont de Nemours & Company (Inc.)
Electric Power Research Institute
Emerson Electric Co.
Federal Pacific Electric
Gas Research Institute
General Electric Company
Honeywell Inc.
Landis & Gyr Metering, Inc.
Lennox Industries Inc.
NAHB Research Foundation, Inc.
National Semiconductor Corporation
North American Philips Consumer Electronics Corp., on its own behalf and on behalf of Signetics Corporation
Onan Corporation
Pass & Seymour Incorporated
Robertshaw Controls Company
Schlage Lock Company
Scott Instruments Corporation
Scovill Inc.
Shell Development Company (Division of Shell Oil Company)
Siemens-Allis, Inc.
Slater Electric, Inc.
Sola Basic Industries, Inc.
Southern California Edison Company
Square D Company
Systems Control, Inc.
Whirlpool Corporation
The Wiremold Company

The Smart House Project will engage in activities the purpose of which will be to develop a coordinated home control and energy distribution system containing integral telecommunications and advanced safety features. The project is intended to design and develop a set of compatible products, including integrated power and signal cabling to tie home electrical products into a single power and communications network; communications-capable appliances, heating and cooling equipment, utility meters and home electrical and electronic products; electric power conditioning and conversion equipment; controllers and software to make logical decisions, issue control instructions, and regulate the distribution of energy, information and instructions throughout the network; monitoring and control devices to detect and neutralize malfunctions in energy distribution within the home; telephone and CATV interfaces to allow information to be passed to and from the home over telephone and CATV lines; and input and output devices with which users can control and receive information from the network and the devices attached to it.

A prior notification identifying the parties to the venture and describing in general terms the areas of planned activity of the venture, is published at vol. 50, no. 197, p. 41428, October 10, 1985.

Joseph H. Widmar,
Director of Operations Antitrust Division.

BILLING CODE 4410-01-M

Proposed Termination of Final Judgment; American Savings Bank, FSB, et al. (Mortgage Conference of New York)

Notice is hereby given that American Savings Bank, FSB, Apple Bank for Savings, Bankers Trust Company, The Bowery Savings Bank, The Canada Life Assurance Company, Chase Manhattan Bank, N.A., Chemical Bank, Citibank, N.A., Crossland Savings, FSB, Dime Savings Bank of New York, Dollar Dry Dock Savings Bank of New York, Eastern Savings Bank, Emigrant Savings Bank, Irving Trust Company, Manhattan Savings Bank, Manufacturers Hanover Trust Company, Morgan Guaranty Trust Company of New York, New York Life Insurance Company, The Prudential Insurance Company of America, Savings Banks Trust Company, The Seamen's Bank for Savings, PSB, and Ticor Title Guarantee Company ("defendants") have filed with the United States District Court for the Southern District of New York a joint motion to terminate the final judgment in *United States of America* v. *The Mortgage Conference of New York, et al.*, Civil No. 37–247; and the Department of Justice ("Department"), in a stipulation also filed with the Court, has consented to termination of the judgment, but has reserved the right to withdraw its consent pending receipt of public comments. The complaint in this case (filed on August 6, 1946) alleged a combination and conspiracy in restraint of trade and commerce in setting mortgage interest rates, mortgage payment schedules, and appraisal procedures in violation of Section 1 of the Sherman Act, 15 U.S.C. 1. Specifically, the complaint described how by creating a trade association, The Mortgage Conference of New York ("The Mortgage Conference"), the defendants jointly set rental policies for mortgaged properties, exchanged weekly reports of new mortgage commitments, withheld financing for new construction that might lessen income from other mortgaged properties, and engaged in red-lining—jointly refusing on racial or ethnic grounds to grant mortgages in certain neighborhoods, regardless of the qualifications of the applicant or the property in question. The case was settled by entry of a consent decree. The judgment (entered on June 16, 1948) required the dissolution of the Mortgage Conference and enjoined the other defendants from jointly setting rates or terms of mortgages, exchanging information about pending applications, joint red-lining or otherwise refraining from competing in greater New York City, including the counties of New York, Bronx, Kings, Queens, Richmond, Westchester, and Nassau.

The Department has filed with the court a memorandum setting forth the reasons why the Department believes that termination of the judgment would serve the public interest. Copies of the complaint and final judgment, the defendant's joint motion, the stipulation containing the government's consent, the Department's memorandum and all further papers filed with the court in connection with this motion will be available for inspection in the Legal Procedure Unit of the Antitrust Division, Room 7233, Department of Justice, 10th Street and Pennsylvania Avenue, NW., Washington, DC 20530 (telephone 202/633–2481), and at the Office of the Clerk

BEST COPY AVAILABLE

of the United States District Court for the Southern District of New York, Foley Square, New York, 10007. Copies of any of the materials may be obtained from the Legal Procedure Unit upon request and payment of the copying fee set by Department of Justice regulations.

Interested persons may submit comments regarding the proposed termination of the decree to the Department. Such comments must be received within thirty (30) days, and will be filed with the court. Comments should be addressed to Barry Grossman, Chief, Communications and Finance Section, Antitrust Division, Department of Justice, Washington, DC 20530 (telephone 202/724-6693).

Dated: May 9, 1986.

Joseph H. Widmar,

Director of Operations, Antitrust Division.

BILLING CODE 4410-01-M

Proposed Termination of Final Judgment; Matthews International Corp.

Notice is hereby given that Matthews International Corporation ("Matthews"), formerly Jas. H. Matthews & Company, has filed with the United States District Court for the Western District of Pennsylvania a petition to terminate the Final Judgment in *United States v. Jas. H. Matthews & Co.*, Civil Action No. 16818; and the Department of Justice ("Department") filed with the Court a memorandum requesting publication of notice of Matthews' petition for termination of the Final Judgment, to provide all interested persons an opportunity to submit comments concerning the petition.

The complaint in this case (filed on March 21, 1958) alleged a conspiracy to restrain trade, a conspiracy to monopolize, an attempt to monopolize, and a monopolization of the manufacturer, sale and distribution of bronze grave markers. The Final Judgment (entered on November 5, 1958) enjoins Matthews from engaging in the conduct that prompted the filing of the Complaint, including, among other things, (1) selling markers to any cemetary which reserves to itself the exclusive right to sell markers within its confines, which refuses to install reasonably appropriate markers which are sold by other retail dealers or which has any rule or established course of conduct which makes it unreasonably difficult or more costly to install within its confines markers sold by others, (2) entering into a requirements contract for markers, (3) entering into an exclusive contract to supply markers, (4) urging a person to refuse the sale or installation of markers not made by Matthews, and (5) making suggestions to any cemetery to refuse the installation or sales of markers in that cemetery by any person. The Final Judgment also requires Matthews to sell its markers on a non-discriminatory basis to any person who makes a written request and who has been regularly engaged in the retail sale of markers or monuments for the last six months.

Copies of the Complaint and Final Judgment (as modified), Matthews' petition, the Department's memorandum and all further papers filed with the Court in connection with this petition will be available for inspection at Room 7233, Antitrust Division, Department of Justice, 10th Street and Pennsylvania Avenue, NW., Washington, DC 20530 (telephone 202-633-2481), and at the Office of the Clerk of the United States District Court for the Western District of Pennsylvania, 829 United States Post Office & Courthouse, Seventh Avenue & Grant Street, Pittsburgh, Pennsylvania 15219. Copies of any of these materials may be obtained from the Antitrust Division upon request and payment of the copying fee set by Department of Justice regulations.

Interested persons may submit comments regarding the proposed termination of the Final Judgment to the Department. Such comments must be received within the sixty day period established by court order, and will be filed with the court. Comments should be addressed to John A. Weedon, Chief, Great Lakes Office, Antitrust Division, Department of Justice, 905 Celebrezze Federal Building, Cleveland, Ohio 44199 (telephone 216-522-4070).

Dated: May 9, 1986.

BILLING CODE 4410-09-M

DEPARTMENT OF LABOR

Employment Standards Administration; Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, NW., Room S-3504, Washington, DC 20210.

Modifications to General Wage Determination Decisions

The numbers of the decisions listed in the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" being modified are listed by Volume, State, and page number(s). Dates of publication in the **Federal Register** are in parentheses following the decisions being modified.

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts". This publication is available at each of the 80 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (202) 783-3238.

When ordering subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. The subscription cost is $277 per volume. Subscriptions include an annual edition and (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC, this 9th day of May 1986.

James L. Valin,

Assistant Administrator.

BILLING CODE 4510-27-M

Employment and Training Administration

State Employment Security Agency Administrative Financing System; DOL Planned Changes

AGENCY: Employment and Training Administration, Labor.

ACTION: Planned actions in response to public comments.

SUMMARY: This notice announces changes which the Department of Labor plans to make to the administrative financing procedures for the State Employment Security Agency (SESA) system, pursuant to comments recieved in response to notices published in the Federal Register on December 20, 1985, (50 FR 51955) and January 3, 1986, (51 FR 264) and at four public meetings in January 1986.

FOR FURTHER INFORMATION CONTACT: Carolyn M. Golding, Director, Unemployment Insurance Service, Employment and Training Administration, 601 D Street, NW., Washington, DC 20213 (202/376-6636).

SUPPLEMENTARY INFORMATION: Public meetings were held by the Department of Labor in Dallas, Texas; Chicago, Illinois; Washington, DC; and San Francisco, California, in January 1986. Forty-nine of the 198 attendees provided oral comments. Written comments were received from eighty-four respondents. Comments were received from a wide variety of parties interested in administrative financing of the State Employment Security Agency system, including State agencies, State governors, business and labor groups, and other parties. Respondents identified problems in the administrative financing process and made recommendations for short-term and long-term solutions. The Department of Labor reviewed these comments and proposals and in response is taking the following actions: (1) Announcing its decisions on the following four *short-term* revisions which reflect a broad consensus of the comments received, and (2) continuing the public discussion through the SESA Administrative Finance Roundtable on proposed *long-term* revisions to the administrative financing system with the objective of developing a proposal that will receive broad support.

Department of Labor Decisions on Short-Term Changes to the State Employment Security Agency Administrative Financing System

Decision 1: Replace quarterly recapture of unused base Unemployment Insurance (UI) grants-to-states funds with annual recapture only. The appropriation language for the administration of State base Unemployment Insurance operations states in part that contingency funds shall be available for increased costs of administration generally over those upon which the State's basic allocation was based and which cannot be provided for by normal budgetary adjustments. Heretofore, it has been the Department's practice to recapture unused basic UI administrative allocations three times during the year—at the end of the second, third, and fourth quarters—before honoring any requests for contingency funds. This has frequently resulted in States losing funds in one quarter which were needed in subsequent quarters.

The Department will discontinue the second and third quarter recapture processes, and complete the normal budgetary adjustment once annually at the end of the fiscal year. Thirty-four commenters proposed this change, to increase State flexibility and ability to respond more effectively to changes in current year's needs. This change will have no impact on the contingency process used to finance ". . . increased costs of administration resulting from changes in a State law or increases in the number of unemployment insurance claims filed and claim paid or increased salary costs resulting from changes in State salary compensation plans . . ." (Department of Labor Appropriation Act, 1986, Pub. L. 99-178, quoted in part).

Decision 2: Substantially reduce fiscal reporting as rapidly as possible, pursuant ot Decision 1 and to other changes such as Decision 4. The Department will forward to the Office of Management and Budget for expedited approval revisions to a number of existing reporting and planning forms. These revisions will reduce State reporting burdens and simplify the planning and reporting processes. They will also demonstrate the Department's intent to confine detailed review of State administrative resources to State self-monitoring, to control and monitor administrative expenditures and obligations on a bottom line basis and to focus its attention on performance outcomes. Forty-five commenters suggested giving States greater flexibility and bottom-line authority over expenditures. (Earlier, in response to State concerns about overlap and duplication between the quality appraisal and quality control systems, instructions eliminating overlap were issued.) At the present time, the current method used to allocate administrative resources to States will not change, although Decision 2 will reduce Federal monitoring and reporting requirements on the use of these resources.

Decision 3: Eliminate detailed Federal monitoring of State financial administration of the UI program. Eighteen commenters cited this as a problem; ten suggested reduced monitoring as a solution. Routine Federal fiscal monitoring will be limited to total dollar utilization for the UI program. Consistent with the other changes being made, the current quarterly monitoring of spending by line item and by salary and nonpersonal service cost categories will be eliminated. Current requirements for corrective action planning and follow-up monitoring for States failing to meet the Secretary's standards for performance (20 CFR, Ch. V, Part 640 and 650, Employment and Training Administration Handbook 365, and Unemployment Insurance Program Letter 9-86) will remain unchanged. As a

result, States will have increased flexibility to move resources among program categories, among quarters within a fiscal year, and among cost categories. States will not be held accountable by specific cost category, but rather on a bottom line basis, and State managers will gain the flexibility to use UI administrative resources based on State assessment of needs. The Department will focus its monitoring on State performance outcomes rather than on expenditure by cost category. Requirements for grant officer's prior approval of expenditures contained in Federal regulations (41 CFR, 29–70.103) will be delegated to the States. States will continue to be required to provide additional information to the Department on any requests for supplemental funding to justify the need for increased funds for changes in State law or for increased salary costs; the Department has streamlined its procedures for handling such requests.

Decision 4: Consolidate contingency categories and contingency overhead funding. Many commenters criticized the present contingency system as too complex, and urged simplification. The Department will consolidate contingency financing and reporting categories consistent with reduced overall financial planning and reporting requirements, as outlined in Decision 2. Contingency support resources for nonpersonal services, UI support, and administrative staff and technical resources will be provided as a flat percentage add-on to direct workload entitlement. This change will simplify and reduce State reporting, increase State flexibility in the use of resources and reduce Federal workload. This change will result in more stable and predictable resource expectations for States and simplify State planning for anticipated workload increases.

The Department plans to implement these decisions as soon as possible. Decision 1 is expected to be implemented in field office instructions within the next few weeks. Revised planning and reporting instructions will be issued as soon as possible to implement Decision 2. Field office guidance to implement Decisions 3 and 4 will be issued as soon as possible, with the objective of implementing Decision 3 upon issuance and Decision 4 effective October 1, 1987.

The Department is continuing the public discussion on possible long-term revisions to the administrative financing system as a result of commenters' suggestions on changes to the current allocation system and to the statutory framework which defines and authorizes the current administrative financing system. Any proposals for such long-term changes will be published separately for notice and comment in the **Federal Register** before the Department makes any decisions.

Signed at Washington, DC, on May 12, 1986.

Roberts T. Jones,

Deputy Assistant Secretary of Labor.

BILLING CODE 4510-30-M

NATIONAL SCIENCE FOUNDATION

Advisory Committee for Engineering; Open Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, the National Science Foundation announces the following meetings:

Name: Advisory Committee for Engineering.

Date and Time: June 5–6, 1986; 9:00 a.m.–5:00 p.m., June 5; 9:00 a.m.–3:00 p.m., June 6.

Place: National Science Foundation, 1800 G Street NW., Room 540, Washington, DC 20550.

Type of Meeting: Open.

Contact Person: Mrs. Mary Poats, Executive Secretary, Advisory Committee for Engineering, Room 537, National Science Foundation, Washington, DC 20550, Telephone: (202) 357–9571.

Summary Minutes: Mrs. Mary Poats at the above address.

Purpose of Advisory Committee Meeting: To provide advice, recommendations, and counsel on major goals and policies pertaining to Engineering programs and activities.

Summarized Agenda: Discussion on issues, opportunities and future directions for the Engineering Directorate; discussion of the Engineering Research Centers Program; discussion of Engineering Directorate budget situation as well as other items.

M. Rebecca Winkler,

Committee Management Officer.

May 13, 1986.

BILLING CODE 7555-01-M

Advisory Committee for Ocean Sciences (ACOS); Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Science Foundation announces the following meeting:

Name: Advisory Committee for Ocean Sciences (ACOS).

Date and Time: June 5, 6, 1986—8:30 a.m. to 5:00 p.m. each day.

Place: Room 351, National Academy of Sciences, 21st and Pennsylvania Avenue NW., Washington, DC.

Type of Meeting: Open.

Contact Person: Dr. M. Grant Gross, Director, Division of Ocean Sciences, Room 609, National Science Foundation, Washington, DC—Telephone: 202/357–9639.

Summary Minutes: May be obtained from the contact person.

Purpose of Committee: To provide advice and recommendations concerning oceanographic research and its support by the NSF Division of Ocean Sciences.

Agenda

The Committee will hold morning and afternoon Sessions on both days. Following opening remarks and general introductions—the Committee will hear several presentations and status reports of current and topical interest from various officials and representatives from NSF, other departments and agencies, and other organizations active in ocean science matters. The Committee will also hear reports from subcommittees ranging from Manpower to Oversight Review and determine a proper course of action based on the information and circumstances presented. The committee will also discuss scheduled revisions of the Long-Range Plan for Ocean Sciences and formulate guidance and direction for the continuing planning process. The Committee will also conduct necessary administrative functions in accordance with established custom and practice with respect to: approval of the minutes of the previous meeting; determination of time and place of the next meeting; as well as any other appropriate business.

M. Rebecca Winkler,

Committee Management Officer.

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards Subcommittee on Reactor Operations; Meeting

The ACRS Subcommittee on Reactor Operations will hold a meeting on June 3, 1986, Room 1046, 1717 H Street, NW, Washington, DC.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows: *Tuesday, June 3, 1986—8:30 a.m. until 12:00 noon.*

The Subcommittee will review recent evens at operating plants.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee may exchange preliminary views regarding matters to be considered during the balance of the meeting. The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant ACRS staff member, Mr. Herman Alderman (telephone 202/634–1414) between 8:15 a.m. and 5:00 p.m. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., which may have occurred.

Dated: May 12, 1986.

Morton W. Libarkin,

Assistant Executive Director for Project Review.

BILLING CODE 7590–01–M

Advisory Committee on Reactor Safeguards; Subcommittee on Severe (Class 9) Accidents; Meeting

The ACRS Subcommittee on Severe (Class 9) Accidents will hold a meeting on June 3, 1986, 1717 H Street, NW, Washington, DC.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows: *Tuesday, June 3, 1986—1:00 p.m. until 5:00 p.m.*

The Subcommittee will review final draft of NUREG–0956, "Reassessment of the Technical Bases for Estimating Source Terms.".

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, its consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant ACRS staff member, Mr. Dean Houston (telephone 202/634–3267) between 8:15 a.m. and 5:00 p.m. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to the advised of any changes in schedule, etc., which may have occurred.

Dated: May 13, 1986.

Shipping Coordinating Committee; Notice of Two Meetings

The Shipping Coordinating Committee (SHC) will conduct an open meeting on June 12, 1986 at 9:30 AM, in Room 6319, U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC

The purpose of the meeting is to finalize preparations for the 56th Session of the Council of the International Maritime Organization (IMO) which is scheduled for June 16–20 in London. In particular, the SHC will discuss the development of the U.S. positions dealing with, inter alia, the following topics:

—Reports of the various committees
—Financial and personnel matters
—Status of conventions

Members of the public may attend up to the seating capacity of the room.

For further information, please contact Mr. G.P. Yoest, U.S. Coast Guard Headquarters (G–CPI), 2100 Second Street SW., Washington, DC. 20593, Tel: (202) 426–2280.

Subcommittee on Safety of Life at Sea Working Group on Fire Protection

The U.S. Safety of Life at Sea (SOLAS) Working Group on Fire Protection will conduct an open meeting on June 18, 1986 at 9:30 am, in Room 1103, U.S. Coast Guard Headquarters, 2100 Second Street SW. Washigton, DC

The purpose of this meeting will be to discuss results of the 31st Session and plans for the 32nd Session of the International Maritime Organization (IMO) Subcommittee on Fire Protection, February 24–28, 1986, including: location and separation of spaces, location of fire control plans, flame spread test for interior finish and deck coverings, portable and fixed halon units, bow and stern loading, helicopter facilities, fire standards for bedding, upholstered furniture, guidelines for cargo tank venting, oxygen liberation, materials other than steel for pipes, floating reception facilities, and other miscellaneous subjects.

Members of the public may attend up to the seating capacity of the room.

For further information please contact Mr. Donald J. Kerlin, U.S. Coast Guard (G–MTH–4/13), 2100 Second Street SW., Washington, DC 20593, Tel: (202) 426–2107.

Dated: May 12, 1986.

BILLING CODE 4910–62–M

Federal Aviation Administration

Task Force Report V-Tail Bonanza Investigation; Availability

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of availability of task force report V-tail Bonanza investigation.

SUMMARY: This report provides the results of an independent study of the Beech Aircraft V-tail Bonanza by the Transportation Systems Center (TSC), Cambridge, Massachusetts, contracted for by the FAA, and a Foreword to the report prepared by the FAA.

DATE: The report was published in January, 1986.

ADDRESSES: Send all requests for the report to: Federal Aviation Administration, Attn: Technical/Administrative Support Staff Office, ACE–103, 601 E. 12th Street, Kansas City, Missouri 64106, together with payment in the amount of $19.60, or $25.60 for a certified true copy.

FOR FURTHER INFORMATION CONTACT: Larry Malir, Aerospace Engineer, FAA, Standardization/Evaluation Group Office, Projects and Evaluation Section, ACE–107, 601 E. 12th Street, Kansas City, Missouri 64106; commercial telephone (816) 374–9634 or FTS 758–9634.

SUPPLEMENTARY INFORMATION: Any person may obtain a copy of this Report by writing to: Federal Aviation Administration, Aircraft Certification Division, ACE–103, 601 E. 12th Street, Kansas City, Missouri 64106. When ordering please submit a check in the amount of $19.60, or $25.60, payable to the Treasurer of the United States, for the cost of this Report.

Background

This Task Force Report, consisting of two volumes, is an independent study prepared by TSC, Cambridge, Massachusetts, for FAA under a contract, to define actions necessary to determine whether there are deficiencies inherent in the design of the Beechcraft V-tail Bonanza that contribute significantly to in-flight airframe failure.

Recommendations were made by TSC to the FAA which are being addressed as described in the FAA Foreword to the report. The FAA is concerned with several findings. These concerns and their proposed resolution are specifically addressed in the Foreword.

Issued in Kansas City, Missouri, on May 2, 1986.

Barry D. Clements,

Manager, Aircraft Certification Division.

Radio Technical Commission for Aeronautics (RTCA); Special Committee 159—Minimum Aviation System Performance for Global Positioning System; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. I) notice is hereby given of a meeting of RTCA Special Committee 159 on Minimum Aviation System Performance for Global Positioning System to be held on June 12–13, 1986, in the RTCA Conference Room, One McPherson Square, 1425 K Street NW., Suite 500, Washington, DC, commencing at 9:30 a.m.

The Agenda for this meeting is as follows: (1) Chairman's Introductory Remarks; (2) Approval of the Second Meeting Minutes; (3) Review of EUROCAE WG–28 Activities; (4) Report on SC–155 Operations Working Group Activities; (5) Report of the Integrity Working Group; (6) Briefing on Waypoint Entry, Simplification and Error Reduction; (7) Consideration of Working Papers on GPS Minimum System Requirements; (8) Develop Format for Committee Report; (9) Task Assignments; (10) Other Business; and (11) Date and Place of Next Meeting.

Attendance is open to the interested public but limited to space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the RTCA Secretariat, One McPherson Square, 1425 K Street NW., Suite 500, Washington, DC 20005, (202) 682–0266. Any member of the public may present a written statement to the committee at any time.

Issued in Washington, DC, on May 9, 1986.

Wesdie F. Chapman,

Designated Officer.

UNITED STATES INFORMATION AGENCY

Radio Engineering Advisory Committee; Meeting

The Radio Engineering Advisory Committee of the United States Information Agency (USIA) will meet in Greenville, North Carolina, on Wednesday, June 4, 1986, to discuss current operations and future plans of the Voice of America (VOA). The meeting will be held at the USIA VOA Relay Station in Greenville, North Carolina. The meeting will begin at 8 a.m. Point of contact for the meeting is Terry Balazs, telephone (202) 485-8048.

This meeting will include reports from senior members of the VOA management and engineering staff on the progress being made on the overall VOA modernization and enhancement effort. Specific topics of discussion will include the procurement and testing of 500 kW high frequency broadcasting transmitters, the status of site negotiations and major construction projects and other technical and regulatory issues relating to VOA modernization.

This meeting will be closed to the public because issues relating to future site negotiations for VOA relay stations will be discussed throughout the meeting. This meeting will be closed because disclosure of the matters to be discussed is likely to divulge information that is: (A) Specifically authorized under criteria established by an Executive order to be kept secret in the interest of national defense or foreign policy, and (B) in fact, is properly classified pursuant to such Executive Order (5 USC 552b(c)(1)).

Dated: May 8, 1986.

SECURITIES AND EXCHANGE COMMISSION

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meetings during the week of May 19, 1986:

Open meetings will be held on Tuesday, May 20, 1986, at 2:30 p.m., and Thursday, May 22, 1986, at 11:00 a.m., in Room 1C30. A closed meeting will be held on Tuesday, May 20, 1986, following the 2:30 p.m. open meeting.

The Commissioners, Counsel to the Commissioners, the Secretary of the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendared matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4), (8), (9)(A) and (10) and 17 CFR 200.402(a)(4), (8), (9)(i) and (10), permit consideration of the scheduled matters at a closed meeting.

Commissioner Peters, as duty officer, voted to consider the items listed for the closed meeting in a closed session.

The subject matter of the open meeting scheduled for Tuesday, May 20, 1986, at 2:30 p.m., will be:

1. Consideration of whether to: (1) issue a notice of filing of an application for an order, pursuant to Sections 6(c), 17(b) and 17(d) of the Investment Company Act of 1940 and Rule 17d-1 thereunder, so that the IDS Mutual Fund Group may lend portfolio securities to Shearson Lehman Brothers, an affiliated broker-dealer; and (2) authorize the Secretary to issue an order "By the Commission" granting the application, if no request for a hearing if filed. For further information, please contact George Martinez at (202) 272-3024.

2. Consideration of whether to adopt Rule 151 under the Securities Act of 1933, which would provide a "safe harbor" for certain types of annuity contracts. The rule would define the term "annuity contract," as used in Section 3(a)(8) of the Act, to include any contract offered by a corporation subject to state insurance regulation, under which the insurer assumes the investment risk, and which is not marketed primarily as an investment. For further information, please contact Joseph R. Fleming at (202) 272-3017.

The subject matter of the closed meeting scheduled for Tuesday, May 20, 1986, following the 2:30 p.m. open meeting, will be:

Formal order of investigation.
Modification of administrative proceeding.
Institution of injunctive action.
Institution of administrative proceeding of an enforcement nature.

The subject matter of the open meeting scheduled for Thursday, May 22, 1986, at 11:00 a.m., will be:

Consideration of developments over the last year in the internationalization of the world securities markets and what future actions should be taken in the internationalization area. For further information, please contact Andrew E. Feldman at (202) 272-2414.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Ronald Schy at (202) 272-2468.

John Wheeler,
Secretary.

Department of Defense

Department of the Navy

Privacy Act of 1974; Annual Publication of the System of Records; Notice

DEPARTMENT OF DEFENSE

Department of the Navy

Privacy Act of 1974; Annual Publication Systems of Records

AGENCY: DEPARTMENT OF THE NAVY, DOD.

ACTION: The Department of the Navy is publishing in their entirety the notices for all of the record systems subject to the Privacy Act of 1974, maintained by the Navy as of April 15, 1986.

DATES: The systems are all effective now as all of these system notices listed have been previously published in the Federal Register as required y 5 U.S.C. 552a(e)(11) of the Privacy Act of 1974.

FOR FURTHER INFORMATION CONTACT: Mrs. Gwendolyn R. Aitken, Privacy Act Coordinator, Office of the Chief of Naval Operations (OP-09B30), Department of the Navy, The Pentagon, Washington, D.C. 20350-2000, telephone: 202-697-1459.

SUPPLEMENTARY INFORMATION: This compilation of Navy systems represents a complete up-to-date listing of all the Navy record systems subject to the Privacy Act including those systems that have been added, or amended since the last published compilation on May 29, 1985 at 50 FR 22735. This compilation is current as of April 15, 1986. This current updated compilation will serve as the new base line of reference when adding, deleting or amending future Navy systems of records. This publication is not within the purview of the provision of 5 U.S.C. 552a(o) which requires the submission of a new or altered system report.

Linda M. Lawson,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

UNITED STATES NAVY

HOW SYSTEMS OF RECORDS ARE ARRANGED. In the Department of the Navy records are categorized by a Standard Subject Identification Code (SSIC). Each series of records has been assigned a major subject title, followed by a combined alpha-numeric identification number. For example, the systems of records containing financial information would be found under the major subject title, Financial Management. The range of identification records will be from 7000 to 7999. The system of records containing military pay is 7220. If there were multiple systems of records maintained under the NO7220 identification number, they would be identified as NO7220-1, NO7220-2, NO7220-3, etc. The NO stands for Navy, the four digits indicates that records are related to military and the last digit indicates the first, second, third, etc system or records within the category of military pay.

HOW TO USE THE INDEX GUIDE. The systems of records maintained by the Department of the Navy are contained within the major subject title and numerical series listed below. This list identifies each series in numeric order. Use the list to identify major subject areas of interest.

SUBJECT SERIES
SYSTEM IDENTIFICATION SERIES

Military Personnel
1000-1999

Telecommunications
2000-2999

Operations and Readiness
3000-3999

Logistics

Facilities and Activities
11000-11999

Civilian Personnel
12000-12999

Aeronautical and Astronautical Material
13000-13999

REQUESTING RECORDS

Records are retrieved by name or by some other personal identifier. It is therefore especially important for expeditious service when requesting a record that particular attention be provided to the Notification and/or Access Procedures of the particular record system involved so as to furnish the required personal identifiers, or any other pertinent personal information as may be required to locate and retrieve the record.

BLANKET ROUTINE USES

Certain blanket 'routine uses' of the records have been established that are applicable to every record system maintained within the Department of Defense unless specifically stated otherwise within a particular record system. These additional blanket routine uses of the records are published below only once in the interest of simplicity, economy and to avoid redundancy before the individual record system notices begin rather than repeating them in every individual record system.

ROUTINE USE-LAW ENFORCEMENT

In the event that a system of records maintained by this component to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, state, local, or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

ROUTINE USE-DISCLOSURE WHEN REQUESTING INFORMATION

A record from a system of records maintained by this component may be disclosed as a routine use to a Federal, state, or local agency maintaining civil, criminal, or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to a component decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant or other benefit.

ROUTINE USE-DISCLOSURE OF REQUESTED INFORMATION

A record from a system of records maintained by this component may be disclosed to a Federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant or other benefit by the

requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

ROUTINE USE-CONGRESSIONAL INQUIRIES

Disclosure from a system of records maintained by this component may be made to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual.

ROUTINE USE-PRIVATE RELIEF LEGISLATION

Relevant information contained in all systems of records of the Department of Defense published on or before August 22, 1975, may be disclosed to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular A-19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

ROUTINE USE-DISCLOSURES REQUIRED BY INTERNATIONAL AGREEMENTS

A record from a system of records maintained by this component may be disclosed to foreign law enforcement, security, investigatory, or administrative authorities in order to comply with requirements imposed by, or to claim rights conferred in, international agreements and arrangements including those regulating the stationing and status in foreign countries of Department of Defense military and civilian personnel.

ROUTINE USE-DISCLOSURE TO STATE AND LOCAL TAXING AUTHORITIES

Any information normally contained in IRS Form W-2 which is maintained in a record from a system of records maintained by this component may be disclosed to state and local taxing authorities with which the Secretary of the Treasury has entered into agreements pursuant to Title 5, U.S. Code, Sections 5516, 5517, 5520, and only to those state and local taxing authorities for which an employee or military member is or was subject to tax regardless of whether tax is or was withheld. This routine use is in accordance with Treasury Fiscal Requirements Manual Bulletin Nr. 76-07.

ROUTINE USE - DISCLOSURE TO THE OFFICE OF PERSONNEL MANAGEMENT

A record from a system of records subject to the Privacy Act and maintained by this component may be disclosed to the Office of Personnel Management concerning information on pay and leave, benefits, retirement deductions, and any other information necessary for the Office of Personnel Management to carry out its legally authorized Government-wide personnel management functions and studies.

ROUTINE USE-DISCLOSURE TO THE DEPARTMENT OF JUSTICE FOR LITIGATION

A record from a system of records maintained by this component may be disclosed as a routine use to any component of the Department of Justice for the purpose of representing the Department of Defense, or any officer, employee or member of the Department in pending or potential litigation to which the record is pertinent.

ROUTINE USE-DISCLOSURE TO MILITARY BANKING FACILITIES OVERSEAS

Information as to current military addresses and assignments may be provided to military banking facilities who provide banking services overseas and who are reimbursed by the Government for certain checking and loan losses. For personnel separated, discharged, or retired from the Armed Forces, information as to last known residential or home of record address may be provided to the military banking facility upon certification by a banking facility officer that the facility has a returned or dishonored check negotiated by the individual or the individual has defaulted on a loan and that if restitution is not made by the individual, the U.S. Government will be liable for the losses the facility may incur.

ROUTINE USE-DISCLOSURE OF INFORMATION TO THE GENERAL SERVICES ADMINISTRATION (GSA)

A record from a system of records maintained by this component may be disclosed as a routine use to the General Services Administration (GSA) for the purpose of records management inspections conducted under authority of 44 U.S.C. 2904 and 2906.

ROUTINE USE-DISCLOSURE OF INFORMATION TO THE NATIONAL ARCHIVES AND RECORDS ADMINISTRATION (NARA)

A record from a system of records maintained by this component may be disclosed as a routine use to the National Archives and Records Administration (NARA) for the purpose of records management inspections conducted under authority of 44 U.S.C. 2904 and 2906.

ROUTINE USE-DISCLOSURE TO THE MERIT SYSTEMS PROTECTION BOARD

A record from a system of records maintained by this component may be disclosed as a routine use to the Merit Systems Protection Board, including the Office of the Special Counsel for the purpose of litigation, including administrative proceedings, appeals, special studies of the civil service and other merit systems, review of OPM or component rules and regulations, investigation of alleged or possible prohibited personnel practices; including administrative proceedings involving any individual subject of a DoD investigation, and such other functions, promulgated in 5 U.S.C 1205 and 1206, or as may be authorized by law.

N01001-1

SYSTEM NAME:

Roster, Naval Reserve Law Companies

SYSTEM LOCATION:

Office of the Judge Advocate General (Code 62) Department of the Navy, 200 Stovall St., Alexandria, Va 22332

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Listing of law program officers in Naval districts having cognizance over Reserve affairs; listing of Naval Legal Service Offices; listing of the staff of the Director, Naval Reserve Law Programs; listing of Naval Reserve Law Company commanding officers; and listing of members of the law companies.

CATEGORIES OF RECORDS IN THE SYSTEM:

Roster contains names and locations of personnel associated with Naval Reserve Law Programs; names of members of law companies, social security number, rank, home and office addresses, name of spouse, and telephone numbers.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 USC 806

PURPOSE(S):

To facilitate and promote liason between Naval Reserve Law Companies, law program officers, the Director, Naval Reserve Law Programs, and the Navy's legal assistance program. It is an essential publication used by legal assistance officers Navy-wide. It apprises Naval Reserve Officers of the locations of Reserve units in order

that they participate in the reserve law program.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Blanket Routine Uses that appear at the beginning of the Department of the Navy's compilation apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders

RETRIEVABILITY:

By names of members and location of Reserve units.

SAFEGUARDS:

Records are maintained under the control of authorized personnel during working hours; the office space in which the rosters are maintained is locked outside official working hours.

RETENTION AND DISPOSAL:

Rosters are retained for approximately two years and destroyed when a new edition is published.

SYSTEM MANAGER(S) AND ADDRESS:

Assistant Judge Advocate General (Civil Law) Office of the Judge Advocate General Department of the Navy, 200 Stovall St., Alexandria, Va. 22332

NOTIFICATION PROCEDURE:

Information may be obtained from the System Manager. Written requests must be signed by the requesting individual.

RECORD ACCESS PROCEDURES:

Requests from individuals should be addressed to the System Manager. Personal visits may be made to: Reserve Personnel Division Office of the Judge Advocate Room 9S05 Hoffman Bldg II 200 Stovall St. Alexandria, Va. 22332

CONTESTING RECORD PROCEDURES:

The agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned may be obtained from the SYSMANAGER

RECORD SOURCE CATEGORIES:

Information is received from Reserve officers who participate in the Naval Reserve Law Programs.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None

N01001-2

SYSTEM NAME:

Naval Reserve Law Program Officer Personnel Information

SYSTEM LOCATION:

Office of the Judge Advocate General (Code 62), Department of the Navy, 200 Stovall St., Alexandria, Va. 22332.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Applicants applying for appointment or transfer to Judge Advocate General's Corps of the Naval Reserve.

CATEGORIES OF RECORDS IN THE SYSTEM:

Furnishes information as to applicant's qualifications and intentions to affiliate in Naval Reserve Law Program.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 USC 806

PURPOSE(S):

Information is obtained to publish a Directory of Naval Reserve Judge Advocates' location, Reserve assignment, etc. Information in the Directory is made available to Navy Judge Advocates, active and reserve, to enable them to locate and identify the legal expertise of Naval Reserve Judge Advocates in the various states with varying legal qualifications and State licenses and to permit contact between Navy Judge Advocates.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Blanket Routine Uses that appear at the beginning of the Department of the Navy's compilation apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders, stored in a file cabinet

RETRIEVABILITY:

By officer's name

SAFEGUARDS:

Files are maintained in file cabinets under the control of authorized personnel during working hours; the office space in which the file cabinets are located is locked outside official working hours.

RETENTION AND DISPOSAL:

Records are maintained for two years and then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Assistant Judge Advocate General (Civil Law), Office of the Judge Advocate General, Department of the Navy, 200 Stovall St., Alexandria, Va. 22332.

NOTIFICATION PROCEDURE:

Information may be obtained from the: Office of the Judge Advocate General (Code 62), Department of the Navy, Room 9S05, Hoffman Bldg II, 200 Stovall St., Alexandria, Va. 22332. Written requests must be signed by the requesting individual, and for personal visits, the individual should be able to provide some acceptable identification, e.g. Armed Forces identification card, driver's license, etc.

RECORD ACCESS PROCEDURES:

Requests should be addressed to: Judge Advocate General (Code 62), Department of the Navy, 200 Stovall St., Alexandria, Va. 22332.

CONTESTING RECORD PROCEDURES:

The agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Information is received from applicants who are applying for appointment in the Judge Advocate Generals' Corps or from reserve officers requesting transfer to the system manager.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None

N01001-3

SYSTEM NAME:

Naval Reserve Intelligence/Personnel File

SYSTEM LOCATION:

Commander Naval Intelligence Command 4600 Silver Hill Road Washington, DC 20389

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All officers and enlisted personnel of the Naval Reserve Intelligence Program and applicants for affiliation with the program.

CATEGORIES OF RECORDS IN THE SYSTEM:

File contains information relating to the individual's residence history, education, professional qualifications, occupational history, foreign country travel and knowledge, foreign language capabilities, history of active military

duty assignments and military reserve active duty training and background investigation, qualifications for active military duty assignments and military promotions.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

National Security Act of 1947, as amended; 5 U.S.C. 301 Departmental Regulations; 10 U.S.C. 503 Department of the Navy 10 U.S.C. 6011 Departmental Regulations; 44 USC 3101, Records Management by Federal Agencies;

PURPOSE(S):

To determine qualifications for members of the Naval Reserve Intelligence Program and to provide a personnel management device for career development programs, manpower and personnel requirements for program activities, assignment of support projects of the reserve program and mobilization planning requirements.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Blanket Routine uses that appear at the beginning of the Department of the Navy's compilation apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Computerized magnetic tapes; microform; some records may be maintained in file folders.

RETRIEVABILITY:

The file can be accessed for each file element or any combination therof.

SAFEGUARDS:

GSA approved security containers located in controlled access spaces.

RETENTION AND DISPOSAL:

Records are maintained as long as the individual is a member of the Naval Reserve Intelligence Program. Records are destroyed when member becomes inactive.

SYSTEM MANAGER(S) AND ADDRESS:

Commander, Naval Intelligence Command 4600 Silver Hill Road Washington, DC 20389

NOTIFICATION PROCEDURE:

Information may be obtained by written request to the System Manager, giving full name, residence address and date and place of birth. A notarized statement may be required for identity verification.

RECORD ACCESS PROCEDURES:

The Agency's rules for access to records may be obtained from the System Manager.

CONTESTING RECORD PROCEDURES:

The Agency's rules for contesting contents and appealing initial determinations by the individual concerned may be obtained from the System Manager.

RECORD SOURCE CATEGORIES:

Reserve Personnel History File data submitted by the individual; background investigation reports from the Naval Investigative Service.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

NONR

N01001-5

SYSTEM NAME:

MSC/NCSORG Reserve Personnel Record

SYSTEM LOCATION:

Commander, Military Sealift Command, Department of the Navy, Washington, D.C. 20390

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Naval Reserve personnel in the MSC/NCSORG Reserve Program

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, rank, social security number, designator, date of birth, home address and phone, active duty training, correspondence courses, education, active military service, civilian employment experience.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, Departmental Regulations

PURPOSE(S):

To facilitate COMSC in keeping a current record of MSC and NCSORG reserve personnel. Such information is used to identify location, qualifications, and training assignments of the reservists.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Blanket Routine Uses that appear at the beginning of the Department of the Navy's compilation apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Data cards or similar record.

RETRIEVABILITY:

By name

SAFEGUARDS:

Records are kept within COMSC Naval Reserve Division Office. No one authorized access outside of Naval Reserve Division personnel. Building employs security guards.

RETENTION AND DISPOSAL:

Records are retained indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Commander, Military Sealift Command. Department of the Navy. Washington, D.C. 20390

NOTIFICATION PROCEDURE:

Information may be obtained from System Manager. Written requests for information should contain full name of the individual, military grade or rate, and date of birth. For personal visits, the individual should be able to provide some acceptable means of identification.

RECORD ACCESS PROCEDURES:

The agency's rules for access to records may be obtained from the system manager.

CONTESTING RECORD PROCEDURES:

The agency's rules for contesting contents and appealing initial determinations by the individual concerned may be obtained from the systems manager.

RECORD SOURCE CATEGORIES:

Information is submitted by the individual concerned.

N01070-1

SYSTEM NAME:

JAG Corps Officer Personnel Information

SYSTEM LOCATION:

Office of the Judge Advocate General (Code 61), Department of the Navy, 200 Stovall St., Alexandria, Va. 22332.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Active Duty Officers in the Judge Advocate General's Corps, Active Duty

Officers in the Law Education and Excess Leave Programs

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, date of birth, social security account number, USN/USNR, designator, rank, state bar membership and year admitted, wife's name, no. of dependents, lineal listing by year group, duty assignment, arrival and rotation dates, release date if applicable

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 USC 806

PURPOSE(S):

To manage the officers of the Navy JAG Corps, as the Judge Advocate General is statutorily required to make recommendation on the assignment of all active duty JAG Corps officers; to determine qualifications of an officer to receive a JAG Corps designation and to be certified as a trial or defense counsel; to determine the rotation dates and release from active duty dates of JAG Corps officers as well as the date new officers will be available for duty; to prepare JAG Corps strength plans for submission to OPNAV; and to obtain an officer's preference for duty assignment as well as eligibility for consideration for postgraduate education and overseas assignments. Certain of this information is promulgated to all active-duty JAG Corps officers in a semi-annual publication known as the Directory of Navy Judge Advocates. The information is promulgated for informational purposes so that officers can determine what positions (billets) might be available should they desire rotation.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Blanket Routine Uses that appear at the beginning of the Department of the Navy's compilation apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Computer strips kept on a strip file (wheel) and paper records kept in a folder identified by the officer's name kept in file cabinets.

RETRIEVABILITY:

By officer's name, folders are filed alphabetically.

SAFEGUARDS:

Records are maintained in the Office of the Judge Advocate General personnel office under the control of authorized personnel during working hours; the office space in which the storage devices containing the records is locked outside official working hours.

RETENTION AND DISPOSAL:

Upon release from active duty, records are kept three years and then destroyed. Upon retirement from active duty, records are maintained indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Assistant Judge Advocate General (Civil Law), Office of the Judge Advocate General, Department of the Navy, 200 Stovall St., Alexandria, Va. 22332.

NOTIFICATION PROCEDURE:

Information may be obtained from: Judge Advocate General (Code 61), Department of the Navy, Room 9S25, Hoffman Bldg II, 200 Stovall St., Alexandria, Va. 22332, Telephone: (202)325-9830

Written requests must be signed by the requesting individual. For personal visits, the requesting individual should be able to provide some acceptable identification, e.g. Armed Forces identification card, driver's license, etc.

RECORD ACCESS PROCEDURES:

Requests from individuals should be addressed to: Judge Advocate General (Code 61), Department of the Navy, 200 Stovall St., Alexandria, Va. 22332.

Personnel visits may be made to the JAG Personnel Office, Room 9S25, Hoffman Bldg II, 200 Stovall St., Alexandria, Va. 22332.

CONTESTING RECORD PROCEDURES:

The agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned may be obtained from the System Manager.

RECORD SOURCE CATEGORIES:

Information submitted by the officer upon his successful completion of law school and admission to the bar, orders to active duty and subsequent transfer orders, computer strips provided by the Bureau of Naval Personnel on all active duty officers.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

NONE

N01070-10

SYSTEM NAME:

Aviation Training Jacket

SYSTEM LOCATION:

The Aviation Training Jacket accompanies the individual student to each Naval Air Command as he progresses in the training program. Upon completion or termination of training, the Aviation Training Jacket is forwarded to the following command:
Chief of Naval Air Training
Naval Air Station
Corpus Christi, TX, 78419

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All naval aviators, naval flight officers, naval flight surgeons, aviation warrant officers, and precommissioning training for aviation maintenance duty and aviation intelligence officers. This includes records in the above categories for individuals who do not complete prescribed training.

CATEGORIES OF RECORDS IN THE SYSTEM:

Aviation flight training, practical and academic grade scores, including pre-training aviation test battery scores.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 USC 301, Departmental Regulations

PURPOSE(S):

To maintain an up-to-date student flight record and to evaluate the student's individual training progress and qualifications, including aircraft, medical and physiological qualifications.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To educational institutions upon individual requests for academic transcripts.

The Blanket Routine Uses that appear at the beginning of the Department of the Navy's compilation also apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders in metal filing cabinets.

RETRIEVABILITY:

Name and date of designation, completion or termination of training.

SAFEGUARDS:

Access is restricted to the individual or those who maintain training records and those who are directly involved with the individual's training or evaluation. The file cabinets containing the jackets are in command areas under normal military 24 hour security measures.

RETENTION AND DISPOSAL:

Retained at the Chief of Naval Air Training headquarters for six months, then transferred to the Federal Records Center, East Point, GA. Retained for 75 years (SECNAVINST 5212.5B).

SYSTEM MANAGER(S) AND ADDRESS:

Chief of Naval Air Training, Naval Air Station, Corpus Christi, TX 78419

NOTIFICATION PROCEDURE:

The individual is informed that the Aviation Training Jacket is being maintained and has ready access to it during training. After training, he can submit written request to the system manager listed above and must provide name, social security number or officer file number, and date of completion or termination of training. Personal vistors can provide proof of identity by military identification card, active or retired, or driver's license and some record of naval service.

RECORD ACCESS PROCEDURES:

The agency's rules for access to records may be obtained from the system manager.

CONTESTING RECORD PROCEDURES:

The agency's rules for contesting contents and appealing initial determinations by the individual concerned may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Prior educational experience, flight grades, academic grades supporting flight training, physical fitness/survival/swimming proficiency, aviation physiology training and qualifications, and birth certificate.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None

N01070-11

SYSTEM NAME:

Flight Instruction Standardization and Training (FIST) Jacket

SYSTEM LOCATION:

The FIST jacket is located at the various Naval Air Training Commands where the individual may be assigned. The following command can be contacted to determine the location of any specific command. Chief of Naval Air Training Naval Air Station Corpus Christi, TX 78419

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All naval aviators and naval flight officers assigned to duty as instructors within the Naval Air Training Command.

CATEGORIES OF RECORDS IN THE SYSTEM:

A record of flight instruction standardization and training required of naval aviators and naval flight officers assigned duty as instructors.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 USC 301, Departmental regulations

PURPOSE(S):

To ensure that the flight instructor's qualifications are current to instruct in the designated naval aircraft, both academically and physiologically. The system is used to schedule training flights, qualify and designate flight instructors, etc. This system is used by Commanding Officers and training personnel of the command to which the individual is assigned.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Blanket Routine Uses that appear at the beginning of the Department of the Navy's compilation apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders in metal file cabinets.

RETRIEVABILITY:

Name, rank, and social security number.

SAFEGUARDS:

Access is restricted to the individual, his commanding officer, or those involved in maintaining training records. The file cabinets containing the jackets are in command areas under normal military 24 hour security measures.

RETENTION AND DISPOSAL:

Jackets are retained in the individual's command until detachment, at which time it is given to the individual.

SYSTEM MANAGER(S) AND ADDRESS:

Chief of Naval Air Training, Naval Air Station, Corpus Christi, TX 78419

NOTIFICATION PROCEDURE:

The individual is informed that the FIST jacket is being maintained, participates in its development and, additionally, is required to review the jacket with his instructor periodically.

RECORD ACCESS PROCEDURES:

The agency's rules for access to records may be obtained from the system manager.

CONTESTING RECORD PROCEDURES:

The agency's rules for contesting content and appealing initial determinations by the individual concerned may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Academic tests, Flight performance evaluation, Check flight evaluation, Instructor's evaluation, Command determinations, and, Personal input

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None

N01070-12

SYSTEM NAME:

Administrative Files System

SYSTEM LOCATION:

Naval Investigative Service (NIS) Headquarters, PO Box 16230, Suitland, Md. 20746

Decentralized Segments - Naval Investigative Service Regional Offices (NISROs) retain duplicate copies of certain segments of the administrative files. Addresses of these offices are included in the directory of Department of the Navy mailing list.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Past and present civilian, military and foreign national personnel assigned world-wide NIS.

CATEGORIES OF RECORDS IN THE SYSTEM:

Personnel Management System - an automated management information and statistical system containing all needed items of personnel information.

Special Agent Career Development Files - a compendium of Civil Service Performance Evaluation and Ratings and all correspondence unique to the NIS Special Agent, including annual physical examinations, which has a bearing on world-wide assignability, promotion and general career assessment.

Weapons Inventory File - an automated file containing the credential number, badge, weapons and handcuffs assigned to each NIS criminal investigator.

Personnel Security Clearance File - an automated file containing the classified material access level and date of last security clearance for assigned civilian and military personnel of NIS.

Personnel Utilization Data File - an automated file designed to provide statistical information regarding the manner by which available NIS manhours are expended in the execution of its assigned investigative and counterintelligence mission. The file is formed by the submission (monthly) of individual manhour diaries. All assigned personnel input to this system; their manhours are categorized by function.

Freedom of Information and Privacy Requests File. Records relating to requests for information pursuant to the Freedom of Information Act and the Privacy Act of 1974, and responses thereto.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; Departmental Regulations

PURPOSE(S):

The Personnel Management System: To prepare virtually all personnel documents and personnel statistical studies. It provides such information as the average grade, the total number and composition of personnel at each NIS component and the past assignments of personnel. It is used on a daily basis by personnel in the formation and execution of staffing actions for the various NIS components, informal verification of employee's tenure and the compilation of necessary statistical studies.

Special Agent Career Development Files: Used for in-house agency decisions regarding reassignment, promotion, career training and long-range development. They form in-house agency repository for both adverse and favorable documents regarding Special Agents. The files have a long-range function - that of forming the basis for law enforcement retirement service certification. Though part of the file is duplicated in the official file maintained by the Civilian Personnel Office, the Special Agent Career Development file is considered privileged information and its contents are not released outside NIS. Within NIS, the files are maintained and controlled exclusively within the Career Services Division, NIS HQS, and by assigned personnel to that Division. The files are released for review only to senior management personnel of NIS.

Weapons Inventory File: To identify and inventory credentials, weapons, badges and handcuffs issued to authorized NIS personnel.

Personnel Security Clearance File: To informally verify and authenticate security clearances issued to NIS personnel. The file has a daily working purpose of acting as a check sheet for the updating of security clearances. It further is the file referred to when the Director, NIS, is required to certify the access level of certain assigned NIS personnel to other Navy commands as well as civilian contractors.

Personnel Utilization Data File: A statistical file from which an indepth analyses of manhour expenditures are surveyed (used exclusively within NIS). The various analyses drawn from the file are used to modify the staffing levels at various NIS components based on actual work level. It further provides a tool to NIS management to gauge the efficiency of all components by comparing their workload with the amount of manhours available.

The records in this system may be used by other DOD components requiring confirmation of security clearance levels and statistical purposes.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To law enforcement activities conducting criminal or suitability investigations.

To the Office of Personnel Management when making personnel determinations, e.g., awards or disciplinary actions.

To credit companies in response to credit queries and to personal physicians regarding medical records.

The Blanket Routine Uses that appear at the beginning of the Department of the Navy's compilation also apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The Personnel Management System, Weapons Inventory File, Personnel Security Clearance File and the Personnel Utilization Data File are stored on magnetic tape in an automated system. The Personnel Management System is composed of visible file cards and computer paper printouts; the Personnel Security Clearance File is composed of computer paper printouts and associated Department of Defense security certification documents, the latter being filed in individual file folders; the Weapons Inventory File and the Personnel Utilization Data File are composed of computer papor printouts only.

The Special Agent Career Development files are composed exclusively of paper records in file folders.

RETRIEVABILITY:

Information is accessed and retrieved by name only in the Special Agent Career Development File. The Weapons Inventory File is queried by either name only or by item number (i.e., badge, credential, weapon, handcuff serial number).

The Personnel Management System is accessed by name and SSN; retrieval is by individual data characteristic such as GS-grade level, duty-station, special qualifications, language qualifications or it my be retrieved by name only or in conjuction with the SSN.

The Personnel Utilization Data File is normally accessed and retrieved by location and functional category of employment (i.e., Special Agent, clerical, etc.). The capability exists, however, to retrieve by SSN. The Personnel Security Classificaton File is a subordinate file to the Personnel Management System. Accession is by name and SSN. Retrieval is accomplished by computer paper printout in both alphabetical and duty-station format.

SAFEGUARDS:

All files in this system are protected by limited, controlled access, safes, and locked cabinets and doors. Futher, visitor control and secure computer software measures (where applicable) are utilized.

RETENTION AND DISPOSAL:

Personnel indexed in the Personnel Management System and the Personnel Security Clearance File are deleted from the magnetic tape data storage upon termination of employment. Residual paper records are retained from two to five years.

Personnel indexed in the Weapons Inventory File are deleted at such time as assigned equipment is returned and accounted for. Residual paper printouts are destroyed at least semi-annually.

The Special Agent Career Development Files are semi-permanent and are retained, at least in essential skeletal format, indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Naval Investigative Service, P.O. Box 16230, Suitland, Md. 20746

NOTIFICATION PROCEDURE:

Requests from individuals should be addressed to the System Manager, above. Individuals submitting requests should provide their full name, date of birth, SSN and dates of employment or assignment with NIS.

In the case of personal visits, individuals requesting access to files in this system will be required to present reasonable proof of identity to minimally include a drivers' license or similar document at least one of which must bear a current photograph and be able to provide (orally) some element of unique identifying data such as name of spouse or a past duty-station with NIS.

RECORD ACCESS PROCEDURES:

Access to files in this system may be gained by written notification or personal visit to the Naval Investigative Service Headquarters at the location specified above. Requests should be directed to the Information and Privacy Coordinator.

CONTESTING RECORD PROCEDURES:

The agency's rule for access to records and for contesting contents and appealing initial determinations by the inividual concerned may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

In the case of Personnel Management System and the Personnel Utilization Data System, the individual employee is the prime source of information both for initial access to the files as well as periodic update. The Personnel Security Clearance File information is obtained as a sub-file to the Personnel Management System. The information for the Weapons Inventory File is obtained from personnel charged with the issuance of various items inventoried therein (with verification by the personnel to whom the items are issued.)

Information for the Special Agent Career Development File is recieved from the individuals supervisors, from various Naval Commands and other Federal and State agencies with whom the Special Agent has had professional contact and from the individual himself. Also, this file contains copies of each physical examination required annually of assigned civilian Special Agents.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

N01070-13

N01070-3

SYSTEM NAME:

Navy Personnel Records System

SYSTEM LOCATION:

Primary System-Naval Military Personnel Command, Navy Department, Washington, D.C. 20370; Naval Reserve Personnel Center, Naval Support Activity (East Bank), Bldg. 603, New Orleans, LA 70159; and local activity to which individual is assigned (see Directory of the Department of the Navy Mailing Addresses).

Secondary System-Department of the Navy Activities in the Chain of Command between the local activity and the Headquarters level (see Directory of the Department of the Navy Mailing Addresses); Federal Records Storage Centers; National Archives.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All Navy military personnel: officers, enlisted, active, inactive, reserve, fleet reserve, retired, midshipmen, officer candidates, and Naval Reserve Officer Training Corps personnel.

CATEGORIES OF RECORDS IN THE SYSTEM:

Personnel Service Jackets and Service Records, correspondence and records in both automated and non-automated form concerning classification, assignment, distribution, promotion, advancement, performance, recruiting, retention, reenlistment, separation, training, education, morale, personal affairs, benefits, entitlements, discipline and administration of Navy military personnel.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 USC 301 Departmental Regulations

PURPOSE(S):

To assist officials and employees of the Navy in the management, supervision and administration of Navy personnel (Officer and enlisted) and the operations of related personnel affairs and functions.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To officials and employees of other Departments and Agencies of the Executive Branch of government, upon request, in the performance of their official duties related to the management, supervision and

administration of military personnel and the operation of personnel affairs and functions.

To officials and employees of the National Research Council in Cooperative Studies of the National History of Disease; of Prognosis and of Epidemology. Each study in which the records of members and former members of the naval service are used must be approved by the Commander, Naval Military Personnel Command.

To officials and employees of the Department of Health and Human Services, Veterans Administration, and Selective Service Administration in the performance of their official duties related to eligibility, notification and assistance in obtaining benefits by members and former members of the Navy.

To officials and employees of Navy Relief and the American Red Cross in the performance of their duties related to the assistance of the members and their dependents and relatives.

To duly appointed Family Ombudsmen in the performance of their duties related to the assistance of the members and their families.

To state and local agencies in the performance of their official duties related to verification of status for determination of eligibility for Veterans Bonuses and other benefits and entitlements.

To officials and employees of the Office of the Sergeant at Arms of the United States House of Representatives in the performance of their official duties related to the verfication of the active duty naval service of members of Congress.

Information as to current military addresses and assignments may be provided to military banking facilities who provide banking services overseas and who are reimbursed by the Government for certain checking and loan losses. For personnel separated, discharged or retired from the Armed Forces information as to last known residential or home of record address may be provided to the military banking facility upon certification by a banking facility officer that the facility has a returned or dishonored check negotiated by the individual or the individual has defaulted on a loan and that if restitution is not made by the individual the United States Government will be liable for the losses the facility may incur.

To state, local, and foreign (within Status of Forces agreements) law enforcement agencies or their authorized representatives in connection with litigation, law enforcement, or other matters under the jurisdiction of such agencies.

When required by Federal statute, by Executive Order, or by treaty, personnel record information will be disclosed to the individual, organization, or governmental agency as necessary.

The Blanket Routine Uses that appear at the beginning of the Department of the Navy's compilation also apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Automated records may be stored on magnetic tapes, disc, drums and on punched cards.

Manual records may be stored in paper file folders, microfiche or microfilm.

RETRIEVABILITY:

Automated records may be retrieved by social security account number and/or name.

Manual records may be retrieved by name, social security account number, enlisted service number, or officer file number.

SAFEGUARDS:

Computer and punched card processing facilities and terminals are located in restricted areas accessible only to authorized persons that are properly screened, cleared and trained.

Manual records and computer printouts are available only to authorized personnel having a need to know.

RETENTION AND DISPOSAL:

Records are retained or disposed of in accordance with SECNAVINST P5212.5 , subj: Disposal of Navy and Marine Corps Records.

SYSTEM MANAGER(S) AND ADDRESS:

Commander, Naval Military Personnel Command, Washington, D.C. 20370; Commanding Officers, Officers in Charge, and Heads of Department of the Navy activities as listed in the Directory of the Department of the Navy Mailing Addresses.

NOTIFICATION PROCEDURE:

Requests by correspondence should be addressed to: Commander, Naval Military Personnel Command (ATTN: Privacy Act Coordinator), Navy Department, Washington, D.C. 20370. or, in accordance with the Directory of the Department of the Navy Mailing Addresses (i.e., local activities). The letter should contain full name, social security account number (and/or enlisted service number/officer file number), rank/rate, designator, military status, address, and signature of the requestor.

The individual may visit the Commander, Naval Military Personnel Command, Arlington Annex (FOB 2), Washington, D.C., for assistance with records located in that building; or the individual may visit the local activity to which attached for access to locally maintained records. Proof of identification will consist of Military Identification Card for persons having such cards, or other picture-bearing identification.

RECORD ACCESS PROCEDURES:

The Agency's rules for access to records may be obtained from SYSMANAGER.

CONTESTING RECORD PROCEDURES:

The Agency's rules for contesting contents and appealing initial determinations by the individual concerned may be obtained from the SYSMANAGER.

RECORD SOURCE CATEGORIES:

Officials and employees of the Department of the Navy, Department of Defense, and components thereof, in performance of their official duties and as specified by current Instructions and Regulations promulgated by competent authority; educational institutions; federal, state, and local court documents; civilian and military investigatory reports; general correspondence concerning the individual; official records of professional qualifications; Navy Relief and American Red Cross requests for verification of status.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Parts of this system may be exempt under 5 U.S.C. 552a (k) (1) and (5), as applicable. For additional information contact the System Manager.

N01070-5

SYSTEM NAME:

Personnel Resources Information System for Management (PRISM)

SYSTEM LOCATION:

Commander, Naval Security Group Command Naval Security Group Headquarters 3801 Nebraska Avenue, NW, Washington, D. C. 20390

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Active duty Navy and Marine Corps personnel and Naval and Marine Corps Reserve personnel affiliated with the Naval Security Group. Also civilian personnel holding a NAVSECGRU clearance.

CATEGORIES OF RECORDS IN THE SYSTEM:

System comprises automated records reflecting information pertaining to the pesonnel identification, location, current duties, professional qualifications and experiences, education, rotation data, personal information (marital status, dependents, home of record) and career information (dates of expiration of enlistment, release from active duty and security clearance data)

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 USC 301 Departmental Regulations

PURPOSE(S):

To plan and manage NAVSECGRU personnel resources. Regularly produced management reports are used to determine adequacy of the personnel manning posture (quantitatively and qualitatively) at NAVSECGRU field activities; trends concerning levels of various NAVSECGRU personnel skills; trends in enlistments, reenlistments, training quotas, retirement, etc.

Personnel of the Naval Military Personnel Command use the information to assist in meeting authorized NAVSECGRU training requirements. NAVSECGRU Area Directors in Atlantic, Pacific and European Commands use the information to determine manning and skill posture within their respective theaters. Officials of NAVSECGRU field stations world-wide use the information to determine numbers and skills of personnel ordered to report to duty. Officials of the Naval Technical Training Center, Pensacola, Florida use the information to mail advancement examinations and other training materials.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To officials and employees of the National Security Agency to assess adequacy of personnel levels and skills in meeting national cryptologic requirements.

The Blanket Routine Uses that appear at the beginning of the Department of the Navy's compilation also apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored on magnetic tapes, discs, punched cards, microfiche and computer paper printouts.

RETRIEVABILITY:

Records are retrieved by name, social security number, skill codes, duty stations, career information (dates of enlistment, expected release), education, rating and paygrade.

SAFEGUARDS:

The computer facility and terminal are located in restricted areas accessible only to authorized persons that are properly screened, cleared and trained. Records and computer printouts are

available only to authorized personnel having a need to know.

RETENTION AND DISPOSAL:

Computer magnetic tapes are erased three months after they are created. Punched cards are converted to magnetic tape and destroyed. Microfiche and paper printouts are retained 3 years or until superseded.

SYSTEM MANAGER(S) AND ADDRESS:

Commander, Naval Security Group Command Naval Security Group Headquarters 3801 Nebraska Avenue, NW, Washington, D.C. 20390

NOTIFICATION PROCEDURE:

Send request to SYSMANAGER. Full name, DPOB, military status, SSN (if you will voluntarily include it) or service number.

Visits for the purpose of obtaining information must be submitted in writing to Commander, Naval Security Group Command, 3801 Nebraska Avenue, NW, Washington, D.C. 20390, who will advise of time/date/place for viewing records or will advise whether system contains records pertaining to the requestor.
